<tbody>
<tr>
<td>ISE 502</td>
<td>INDUSTRIAL &amp; ORGANIZA PSY</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Application of basic principles of learning, motivation, and perception to typical industrial and organizational problems.</td>
<td></td>
</tr>
<tr>
<td>ISE 503</td>
<td>HUMAN FACTORS PSYCHOLOGY</td>
<td>3</td>
</tr>
<tr>
<td>ISE 523</td>
<td>INTR STATISTICAL QUALITY CONTR</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>This course introduces statistical theory and techniques to control quality of manufacturing products. This course will provide a solid foundation in Statistical Quality Control (SQC). The Six Sigma methodology is also introduced in this course. Students can take the certification exam to earn a Green Belt in Six Sigma.</td>
<td></td>

<tr>
<td>ISE 526</td>
<td>DESIGN/ANALY OF EXPERIMENT</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Advanced topics in statistical experiments with emphasis on design aspect. Confounding, fractional replication, factorial and nested design.</td>
<td></td>
</tr>
<tr>
<td>ISE 530</td>
<td>MANUF SYS &amp; FACILITIES DESIGN</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Overview of modern manufacturing systems design with emphasis on facility location and plant layout. Includes classical systems, just-in-time systems, basic principles of integrated manufacturing systems design, as well as analysis of process flow, process productivity, and available space to determine plant layout. Includes laboratory exercises.</td>
<td></td>
</tr>
<tr>
<td>ISE 533</td>
<td>PRODUCTION/INVENTORY CONTR SYS</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Inventory models including classical optimal economic order quantity models, manufacturing resource planning (MRP) systems, master production scheduling, material requirements planning, and purchase order control. Emphasis on manufacturing system revision, continuous process improvement, and the implementation of lean principles.</td>
<td></td>
</tr>
<tr>
<td>ISE 537</td>
<td>ELECTRONICS MANUF PROCESSES</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Current concepts, facilities, and technology utilized in the manufacture of electronic components and products. Includes printed wiring board fabrication and component mounting methods, automation, quality and reliability, product testing, and economic issues.</td>
<td></td>

</table>
ISE 626 - INTRO OPERATIONS RESEARCH
Semester Hours: 3

Philosophy and methodology of operations research. Includes linear programming, game theory, sequencing, and networks.

ISE 627 - ENGINEERING SYSTEMS
Semester Hours: 3

Development of a systems-scientific framework for the integration of systems theory, systems thinking, systems engineering, and systems management. Emphasis is on the conception, design, and management of systems to accommodate complex environments.

ISE 630 - COMPUTER INTEGRATED MANUFACT
Semester Hours: 3

In-depth analysis of integrated manufacturing/computer integrated manufacturing. Reviews the tools, concepts, and enabling technologies necessary to integrate the physical, information, and managerial aspects of a manufacturing enterprise.

ISE 635 - LINEAR PROGRAMMING
Semester Hours: 3

Application of linear programming to complex allocation problems. Methods for determining maximum or minimum of objective functions whose variables are subject to constraints. Simplex methods, degeneracy, modified simplex, transportation problems, flows, goal programming, and sensitivity analysis.

ISE 637 - SYSTEMS MODELING & ANALYSIS
Semester Hours: 3

System analysis and modeling of large complex systems using systems engineering fundamentals. Life cycle simulations developed as a focus for the multidisciplinary analysis integration using computational systems engineering techniques including probability, statistics, design of experiments, response surfaces, and optimization. State of the art software tools will be used for simulation development.

ISE 638 - ENGINEERING RELIABILITY
Semester Hours: 3

Methodology of reliability prediction including application of discrete and continuous distribution models. Reliability estimation, reliability logic diagrams, life testing, and reliability demonstrations.

ISE 639 - SELECTED TOPICS/ISE
Semester Hours: 1-6

ISE 641 - ADVANCED QUALITY CONTROL
Semester Hours: 3

This capstone course uses advanced statistical quality tools such as autocorrelated data, multi-variate quality controls charts, response surface methodology, ridge analysis, and evolutionary operations (EVOP). Advanced Six Sigma concepts will be taught and students will have the opportunity to earn a Black Belt in Six Sigma upon successful completion of the certification exam and an acceptable project.

ISE 647 - ADVANCED SYSTEM SIMULATION
Semester Hours: 3

Methods and procedures for simulation of large and complex systems. Discrete increment, continuous time and combined models. Comparison of discrete-event simulation languages. Model verification and validation. Statistical inference. Input data collection and analysis, output analysis, and comparison of alternatives.

ISE 670 - INTEGRATED PRODUCT & PROC DES
Semester Hours: 3

This capstone course incorporates curriculum materials to support an integrated products and process design process. Particular attention is devoted to multifunctional teams and their value in promoting the concept of life-cycle engineering. Provides experience with tools and technologies that support the IPPD philosophy.

ISE 690 - STATISTICAL METHODS FOR ENGR
Semester Hours: 3

Application of statistics for estimation and inference using parametric and nonparametric methods. Descriptive statistics, sampling distributions, point and interval estimates, tests of hypotheses, ANOVA, and linear regression.

ISE 696 - GRAD INTERN ISE ENGR
Semester Hours: 1-9

Active involvement in an engineering project in an engineering enterprise, professional organization, or government agency that has particular interest and relevance to the graduate student. Permission of ISE faculty member required.
ISE 697 - INDUS & SYSTEMS ENGR PROJECT I
Semester Hours: 3-9
Application oriented student project designed to show competence in Industrial and Systems Engineering.

ISE 698 - IND & SYSTEMS ENGR PROJECT II
Semester Hours: 3-9
Required each semester student is working and receiving direction on a master's thesis. Minimum of two semesters and 6 hours required for M.S.E. students. A maximum of 9 hours of credit is awarded upon successful completion of master's thesis.

ISE 699 - MASTER'S THESIS
Semester Hours: 1-9
Required each semester student is working and receiving direction on a master's thesis. Minimum of two semesters and 6 hours required for M.S.E. students. A maximum of 9 hours of credit is awarded upon successful completion of master's thesis. The 1 hour option is only available to students who have successfully defended their thesis and submitted it for approval, but do not meet the deadlines for graduation in the semester submitted. Students may only use the 1 hour option once in their career.

ISE 726 - SYSTEMS MODELING
Semester Hours: 3
The capstone course for the operations research option studies the philosophy and methodology for modeling probabilistic systems. Includes Markov processes, queueing theory, and inventory theory. Team project required.

ISE 728 - OPTIMIZA METH OPER RES
Semester Hours: 3
Classical optimization theory with introduction to search techniques, the Jacobian, and Lagrangian methods. Kuhn-Tucker conditions, quadratic programming, geometric and dynamic programming, and several search procedures.

ISE 729 - ADV NONLINEAR PROGRAM
Semester Hours: 3
Continuation of ISE 728 with emphasis on development and application of nonlinear programming algorithms. SUMT algorithm, Zoutendijk's method of feasible directions, Rosen's gradient method, and selected algorithms from current literature.

ISE 730 - MULTI-CRITERIA DEC ANALY
Semester Hours: 3
Methods for analysis of management-decision problems involving multiple goals and constraints. Linear and nonlinear goal programming; risk programming and decision making in fuzzy environments.

ISE 732 - INDUST FORECASTING/ANALY
Semester Hours: 3
Industrial forecasting methods. Simple forecasting models, multivariate regression, correlation, and spectral analysis, exponential smoothing, and Box-Jenkins forecasting.

ISE 734 - DECISION ANALYSIS
Semester Hours: 3
Decision making for systems engineering and engineering management, with an emphasis on applications to complex systems. Builds a rigorous foundation in decision making under uncertainty using expected utility theory. Topics include decision trees, value models, predictive models, preferences and bias.

ISE 735 - DISCRETE OPTIMIZATION
Semester Hours: 3
Integer programming and network analysis. Zero-one problem formulation and Balas method, cutting plane techniques, branch and bound, out-of-kilter algorithm, and special applications of integer programming.

ISE 738 - RELIAB/AVALAB/MAINTAINA
Semester Hours: 3
In-depth application of decision theory and MIL-HDBK-217, and maintenance engineering techniques in order to achieve targeted reliability, availability and maintainability design goals.

ISE 739 - SELECTED TOPICS/ISE
Semester Hours: 1-6
ISE 741 - QUALITY ENGINEERING
Semester Hours: 3
Application of quality engineering techniques to the design and improvement of products and processes. Topics include: multivariate analysis, Taguchi methods, mixture experiments, and response surface analysis.

ISE 761 - EVOL THRY ENG MGMT/IND SYS ENG
Semester Hours: 3
Development of applicable engineering management or industrial and systems engineering theory using classical concepts, contemporary studies and practices at successful technology-based organizations.

ISE 767 - CONTEMPORARY APPL EM/ISE
Semester Hours: 3
Application of key qualitative and quantitative principles of engineering management or industrial and systems engineering to real-world case problems. Students work both in teams and as individuals to solve multidimensional problems which require an integrative point of view.

ISE 790 - ADV STATISTICAL APPLICATIONS
Semester Hours: 3
Continuation of ISE 690 with extension to regression models and nonparametric methods.

ISE 799 - DOCTORAL DISSERTATION
Semester Hours: 3-9
Required each semester student is enrolled and receiving direction on doctoral dissertation.
