Undergraduate .................................................................................................................................................................................................................................. 15

Academic Information .................................................................................................................................................................................................. 15

- Army ROTC Program .......................................................................................................................................................................................... 16
- Cooperative Education and Career Development Program .......................................................................................................................... 18
- Intensive Language and Culture ..................................................................................................................................................................... 19
- JUMP .................................................................................................................................................................................................................... 20
- Online Learning .............................................................................................................................................................................................. 21
- Pre-Health Professions Program ............................................................................................................................................................... 21
- Pre-Law Program Certificate ....................................................................................................................................................................... 23
- Professional and Continuing Studies .......................................................................................................................................................... 23
- Study Abroad ............................................................................................................................................................................................. 23

Admissions ........................................................................................................................................................................................................... 23

- Academic Common Market Scholarship .................................................................................................................................................. 24
- Course Placement .......................................................................................................................................................................................... 24
- Dual Enrollment Program ........................................................................................................................................................................... 27
- Early Start Program ...................................................................................................................................................................................... 27
- First Year Students ....................................................................................................................................................................................... 28
- General Information ..................................................................................................................................................................................... 29
- International Students .................................................................................................................................................................................. 30
- Residency ........................................................................................................................................................................................................ 31
- Special Student Status ................................................................................................................................................................................ 33
- Transfer Students ......................................................................................................................................................................................... 35
- Visiting Student Program ......................................................................................................................................................................... 36

Charger Foundations .......................................................................................................................................................................................... 36

- AHSS Foundations Template ....................................................................................................................................................................... 39
- Engineering Foundations (Shared) .............................................................................................................................................................. 41
- College of Science Charger Foundations .................................................................................................................................................. 42

Colleges and Departments ............................................................................................................................................................................... 44

Arts, Humanities, and Social Sciences ......................................................................................................................................................... 48

- Ancient and Medieval Studies Minor ......................................................................................................................................................... 49
- Art and Art History ....................................................................................................................................................................................... 50
  - BFA in Art - Digital Animation Concentration ...................................................................................................................................... 60
  - BA in Art - Art Education Concentration ............................................................................................................................................... 63
  - Art History, BA ........................................................................................................................................................................................ 65
  - Studio Art, BA .......................................................................................................................................................................................... 68
  - Studio Art, BFA - Graphic Design Concentration .................................................................................................................................... 73
  - Studio Art, BFA - Painting/Drawing Concentration .................................................................................................................................. 76
  - Studio Art, BFA - Photography Concentration ....................................................................................................................................... 78

Bachelor of Science in Kinesiology with Exercise Science option ................................................................. 352
Bachelor of Science in Kinesiology with Physical Education (P-12) licensure .................................................. 356
Engineering ....................................................................................................................................................... 358
  Chemical and Materials Engineering ............................................................................................................. 359
  Chemical Engineering, BSCHeE ....................................................................................................................... 362
  Chemical Engineering, BSCHeE - Biotechnology Concentration ................................................................. 364
  Chemical Engineering, BSCHeE - Materials Concentration ....................................................................... 368
Civil and Environmental Engineering ............................................................................................................... 372
  Civil and Environmental Engineering, BSCE ............................................................................................... 376
  Civil Engineering, BSCE - Environmental Track ......................................................................................... 380
  Civil Engineering, BSCE - Structural Track ................................................................................................. 384
  Civil Engineering, BSCE - Transportation Track ....................................................................................... 388
Electrical and Computer Engineering ............................................................................................................. 392
  Computer Engineering, BSCpE ....................................................................................................................... 398
  Electrical Engineering, BSEE ....................................................................................................................... 402
  Optical Engineering, BSOE ......................................................................................................................... 406
Engineering Clusters ....................................................................................................................................... 410
  Industrial and Systems Engineering and Engineering Management ......................................................... 411
    Industrial and Systems Engineering, BSISE ............................................................................................... 413
  Mechanical and Aerospace Engineering .................................................................................................... 417
    Aerospace Engineering, BSAE ................................................................................................................... 422
    Mechanical Engineering, BSME .............................................................................................................. 426
Honors College .................................................................................................................................................. 430
Nursing ............................................................................................................................................................. 435
  Nursing, BSN ................................................................................................................................................. 442
  Nursing, RN-BSN ....................................................................................................................................... 449
Professional Studies ....................................................................................................................................... 453
Science ............................................................................................................................................................... 458
  Atmospheric Science ................................................................................................................................. 459
Biological Sciences .......................................................................................................................................... 465
  Biological Sciences, BS or BA ....................................................................................................................... 472
  Biological Sciences, BS or BA - Biochemistry Concentration .................................................................... 476
  Biological Sciences, BS or BA - Ecology and Evolution Concentration .................................................... 481
  Biological Sciences, BS or BA - Exercise Physiology Concentration ...................................................... 485
  Biological Sciences, BS or BA - Microbiology Concentration .................................................................. 490
  Biological Sciences, BS or BA - Pre-Professional Health Careers Concentration ................................ 494
  Biological Sciences, BS or BA - Secondary Education Concentration ..................................................... 501
  Biological Sciences Minor .......................................................................................................................... 505
Chemistry ........................................................................................................................................................ 506
  Chemistry, BS .............................................................................................................................................. 511
  Chemistry, BS - Basic Chemistry Concentration ....................................................................................... 512
  Chemistry, BS - Biochemistry Concentration ........................................................................................... 516
Mathematical Sciences ................................................................................................................................................................................  603
Individualized Bachelor of Science (IND) Degree .......................................................................................................................................  603

Computer Science .......................................................................................................................................................................................  562
Physics, BS - Secondary Education Certification .................................................................................................................................  646
Physics, BS - Optics Concentration .....................................................................................................................................................  642
Physics, BS - Engineering Physics Concentration ...............................................................................................................................  637
Physics, BS - Astronomy and Astrophysics Concentration ..................................................................................................................  633
Physics, BS - Applied and Theoretical Physics Concentration ............................................................................................................  629

Mathematics, BS or BA - Concentration III ..........................................................................................................................................  616
Mathematics, BS or BA - Concentration I ............................................................................................................................................  611
Mathematics, BS or BA ........................................................................................................................................................................  607

Geographic Information Systems/Remote Sensing Minor ....................................................................................................................  602
Atmospheric Science Minor ..................................................................................................................................................................  601

Mathematics, BS or BA - Chemical Business Concentration .............................................................................................................  523
Chemistry, BS - Chemical Education Concentration ..........................................................................................................................  527
Chemistry, BS - Chemical Physics Concentration ...............................................................................................................................  531
Chemistry, BS - Environmental Chemistry Concentration ..................................................................................................................  536
Chemistry, BS - Forensics Chemistry Concentration .........................................................................................................................  540
Chemistry, BS - Materials Chemistry Concentration ..........................................................................................................................  544
Chemistry, BS - Pre-Pharmacy Concentration .................................................................................................................................  547
Chemistry, BS - Pre-Professional Concentration ...............................................................................................................................  551
Chemistry, BS - Pure Chemistry Concentration .................................................................................................................................  555
Chemistry Minor for Biology Majors Taking BYS 361 and BYS 362 ...........................................................................................................  560
Chemistry Minor for Chemical Engineering Majors ..................................................................................................................................  560
Chemistry Minor for Physics, Mathematics, and Chemical Engineering Majors ........................................................................................  561
Chemistry Minor for Premedical and Predental Students ....................................................................................................................  561
Chemistry Minor for Some Biology and Medical Technology Majors ....................................................................................................  561

Entertainment Computing Minor ...........................................................................................................................................................  582
Computer Science Minor ......................................................................................................................................................................  582
Computer Languages and Systems Minor ...........................................................................................................................................  581

Computer Science, BS ..............................................................................................................................................................................  567
Computer Science, BS - Entertainment Computing ............................................................................................................................  577

Computer Science, BS .........................................................................................................................................................................  567

Mathematics, BS or BA - Concentration I ............................................................................................................................................  611
Mathematics, BS or BA - Concentration II .........................................................................................................................................  612
Mathematics, BS or BA - Concentration III .........................................................................................................................................  616

Mathematics Minor ...............................................................................................................................................................................  620
Chemistry, BS - Pure Chemistry Concentration ...................................................................................................................................  555
Chemistry, BS - Pre-Professional Concentration .................................................................................................................................  551
Chemistry, BS - Materials Chemistry Concentration ............................................................................................................................  544
Chemistry, BS - Forensics Chemistry Concentration ...........................................................................................................................  540
Chemistry, BS - Chemical Physics Concentration ...............................................................................................................................  531
Chemistry, BS - Chemical Education Concentration ..........................................................................................................................  523
Chemistry, BS - Chemical Business Concentration .............................................................................................................................  523

Chemistry Minor for Some Biology and Medical Technology Majors ....................................................................................................  561
Mathematics, BS or BA - Concentration III ..........................................................................................................................................  616
Mathematics, BS or BA - Concentration I ............................................................................................................................................  611
Mathematics, BS or BA - Concentration II .........................................................................................................................................  612
Mathematics, BS or BA - Concentration III .........................................................................................................................................  616

Mathematics Minor ...............................................................................................................................................................................  620
Physics ...........................................................................................................................................................................................................  620
Physics, BS ..................................................................................................................................................................................................  625
Physics, BS - Applied and Theoretical Physics Concentration .............................................................................................................  629
Physics, BS - Astronomy and Astrophysics Concentration ................................................................................................................  633
Physics, BS - Engineering Physics Concentration ...............................................................................................................................  637
Physics, BS - Optics Concentration .....................................................................................................................................................  642
Physics, BS - Secondary Education Certification ..................................................................................................................................  646

Individualized Bachelor of Science (IND) Degree ..................................................................................................................................  603
Mathematical Sciences ................................................................................................................................................................................  603

Physics, BS ..................................................................................................................................................................................................  625
Physics, BS - Applied and Theoretical Physics Concentration .............................................................................................................  629
Physics, BS - Astronomy and Astrophysics Concentration ................................................................................................................  633
Physics, BS - Engineering Physics Concentration ...............................................................................................................................  637
Physics, BS - Optics Concentration .....................................................................................................................................................  642
Physics, BS - Secondary Education Certification ..................................................................................................................................  646
Astronomy and Astrophysics Minor .................................................................................................................................................................... 650
Optics Minor ........................................................................................................................................................................................................... 651
Physics Minor .................................................................................................................................................................................................. 651
Course Descriptions .................................................................................................................................................................................................. 651
Accounting (ACC) .................................................................................................................................................................................................. 652

The University of Alabama in Huntsville is a research-intensive, internationally recognized technological university serving Alabama and beyond. Our mission is to explore, discover, create, and communicate knowledge, while educating individuals in leadership, innovation, critical thinking, and civic responsibility and inspiring a passion for learning.

Although this catalog intends to reflect currently any policies or rules of The Board of Trustees of The University of Alabama referred to or incorporated herein, users are cautioned that changes or additions to such policies and rules, including those relating to tuition and/or fees, may have become effective since the publication of this material. In the event of such a conflict, the current statements of Board policy contained in the official minutes and manual of rules, by-laws, and guidelines shall prevail.

The University of Alabama in Huntsville also reserves the right in its sole discretion and at any time to modify any policy, procedure, benefit, or program described or set forth in this catalog and to make any other changes it deems necessary and appropriate. Students enrolling in the University are subject to current policies and rules as contained herein and as subsequently stated or modified by official institutional action.
Undergraduate

The Undergraduate catalog is a comprehensive reference for your academic career. It provides a list of programs and courses offered at the University of Alabama in Huntsville. In addition, it gives you valuable information such as suggested and required degree plans and information about tuition, financial aid, and support services.

While we encourage you to follow the pathways outlined in this catalog, it is also recommended that you take every opportunity to consult with your academic advisor to ensure that you are taking advantage of courses and university resources that will help you reach your educational and career goals by graduating on time. A list of advisors by college is provided by the Registrar’s Office (uah.edu/academic-advising).

For questions regarding the content of this catalog please contact the Registrar’s Office at 256.824.7777 or SSB 120.

Academic Information

Charger Success Course

The purpose of the Charger Success 101 course (FYE 101) is to help new students make a successful transition to The University of Alabama in Huntsville, both inside and outside the classroom. This course aims to foster a sense of belonging, promote engagement in the academic life of the university, provide fundamental knowledge and skill sets essential for success at UAH, and articulate to students the expectations of the University. In addition, the course will assist students to develop and apply critical thinking skills, as well as to help students to clarify their academic goals and eventual career direction. This course must be taken in the first semester for all full-time students.

Degrees Offered

Programs are provided as indicated below for the undergraduate degrees of Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Science, Bachelor of Science in Business Administration, Bachelor of Science in Economics and Computational Analysis, Bachelor of Arts in Education, Bachelor of Science in Engineering, and Bachelor of Science in Nursing.

Bachelor of Arts - Art Studio, Art History, Biology, Communication Arts, Elementary Education K-6, English, Foreign Language and International Trade, History, Mathematics, Music, Philosophy, Political Science, Psychology, Sociology, Theatre, World Languages and Cultures, and Writing.

Bachelor of Fine Arts

Bachelor of Science in Business Administration - Accounting, Finance, Information Systems, Management, and Marketing.

Bachelor of Science in Engineering - Aerospace, Chemical, Civil, Computer, Electrical, Industrial and Systems, Mechanical, and Optical.

Bachelor of Science in Nursing - unified professional curriculum.

Bachelor of Arts or Science in Professional Studies - Professional Studies.

Declaring a Major

When applying to enter UAH, prospective students may declare a major, defined as the primary field of study. Required major semester hours vary by program but typically range from 30-45 semester hours with overall degree requirements ranging from 120-128 semester hours. Some students are not yet decided, and may declare “undecided”. The Colleges of Arts, Humanities, and Social Sciences, Business, Education, Engineering, Honors, Professional and Continuing Studies, Science, and Nursing assign advisors. Undecided students will be advised by the Exploratory Advisor within the Student Success Center, LIB 154. For procedures in the Colleges of Arts, Humanities, and Social Sciences, Business, Education, Engineering, Honors, Professional and Continuing Studies, Science, and Nursing contact the advising office of the college or visit the advising website (http://www.uah.edu/academic-advising).

Minors

Typically minors are offered in all major fields of study and require a minimum of 18 semester hours of work, twelve of which are at the 300/400 level; students should consult their advisors and the appropriate subject area portions of the catalog.
Many degree programs that have extensive core requirements for majors do not have a minor component. Students, however, may opt to add a minor to their programs of study. Again, students should work closely with their advisors in constructing their programs of study for timely completion of their degrees.

**Army ROTC Program**

**Army Senior Reserve Officers Training Corps (ROTC) Department**

Location: 223D Charger Union (Building #17 (CGU) on UAH campus map)

Telephone: (256) 824-6561

Email: armyrotc@uah.edu  ( armyrotc@uah.edu)

Chair: Professor of Military Science (Alabama A&M University)

Instructor: Military Science Instructor (Army Contractor) /Assistant Professor of Military Science (Military)

Army Senior ROTC Web Page: http://www.goarmy.com/rotc.html

**Overview**

Alabama Agricultural & Mechanical University (Alabama A&M) established its Army ROTC program in 1971 and serves as the program host. The University of Alabama in Huntsville is an extension of the Alabama A&M program and its students may use the Visiting Student Agreement between the universities to participate in the ROTC program. The Senior Military Science Instructor (SMSI)/Assistant Professor of Military Science (APMS) represents Alabama A&M's Professor of Military Science on the UAH campus.

**Mission**

The Military Science Department produces commissioned officers in the quality, quantity, and academic disciplines necessary to meet regular Army (RA), Army National Guard (ARNG), and the US Army Reserve (USAR) requirements. Instruction in basic concepts and principles of military arts and sciences, including leadership, professional values and ethics, and an appreciation of national security issues, provide selected students with a sound basis for future professional development and effective performance to serve as commissioned officers in the active and Reserve components of the U.S. Army.

**Program Description**

The ROTC program consists of eight semesters of instruction divided into two courses. The Basic Course, consisting of four semesters, is designed to provide freshman and sophomore students with the conceptual skills required to effectively manage their time, health and fitness, and support effective communication. Course outcomes enable students to understand U.S. Army customs, courtesies, and the Army's Professional Ethic. Participation in the Leadership Laboratory reinforces classroom training and provides an opportunity to master basic military skills such as drill and ceremonies, first aid, field craft, and land navigation. The Leadership Laboratory uses simple tactical scenarios to drive the students' military decision making process. The Advance Course, also consisting of four semesters, is designed to prepare Basic Course graduates, eligible students with prior military service, or students currently serving in the USAR or ARNG with the conceptual skills and professional military education necessary to commission as an officer in the U.S. Army. Advance Course students receive practical experience each week through mandatory participation in the Leadership Laboratory. Advance Course students must also participate in morning physical conditioning at the ROTC Building (Old Councill Training Center) on the Alabama A&M University campus.

The SSI/APMS provides Basic Course classroom instruction on the UAH campus. Physical conditioning training and the Leadership Laboratory is conducted at the ROTC Building on the Alabama A&M University campus on Mondays and Wednesdays and on the UAH campus on Fridays.

All Advance Course instruction takes place in the ROTC Building on the Alabama A&M University campus.

**Course Registration**

Although students may register for Military Science classes using BANNER, the Professor of Military Science or his representative is required to ensure that each student's degree program is properly aligned with ROTC program requirements to ensure completion of pre-commissioning requirements prior to graduation. Therefore, interested students should contact the ROTC Department prior to registration to ensure proper placement in the ROTC program.

**Eligibility Requirements**

For current eligibility and commissioning requirements, contact the ROTC Department at UAH or the Recruiting Operations Officer at Alabama A&M University (256) 372-4023 for details.

Progression (Basic + Advance Course)

Students complete 8 credit hours of military science instruction beginning with the fall semester of their freshman year. Students that meet all Army eligibility requirements will attend Basic Camp (BC) during the summer after MIL102 or 202. After BC, progression students must complete 12 additional credit hours of military science instruction and attend Advance Camp (AC) after MIL302 (Preferred) or after 402, which requires prior Professor of Military Science approval.

Lateral Entry (Advance Course)

Students that have completed their initial entry training (IET) in any branch of the US Armed Forces and currently serving in the Army Reserve Component or honorably discharged at the expiration of their term of service are required to complete 12 credit hours of military science instruction beginning with the fall semester. Students that meet all Army eligibility requirements will attend AC during the summer after MIL302 or 402. Graduate
students with a minimum of 2 years remaining in their degree programs may enroll after completing BC (or, with the approval of the PMS, may attend BC after completing MIL302). They must still attend AC during the summer either prior to, or after, graduation. Requires permission of Professor of Military Science.

Academic Alignment Option (14 hrs of instruction + MIL 101/202 or MIL 102/201 + Advance Course)

Students enrolled in degree programs for engineering and nursing, as well as students identified by the ROTC Department as scholars, athletes, and/or leaders (SAL), complete 14 hours of critical training, followed by 4 credit hours of military science instruction and BC. After BC, students complete the remaining 12 credit hours of the Advance Course and AC prior to graduation. Requires Professor of Military Science recommendation and authorization of ROTC Brigade Commander.

Completion Cadets

Students that have completed all required military science instruction (based on program requirements explained above), BC (or IET) and AC, but have not completed their degree programs, are classified as completion cadets. Completion cadets are normally eligible to commission after completion of all degree requirements. Requires permission of Professor of Military Science.

Cooperative Education and Career Development Program

Student Services Building 205
256.824.6741
chargerjobs@uah.edu
www.uah.edu/career-services

Career Center

Career Services

Career Services assists students in all phases of career planning and preparation including resume writing and critique, interview preparation, developing networking skills, career assessments and career coaching through one-on-one appointments as well as workshops and information sessions. Our services provide students with the knowledge and resources to make informed career choices and the personal skills to reach their objectives.

Career Services coordinates on and off campus recruiting opportunities and hosts two comprehensive career fairs each fall and spring semester for students in all majors. Career Fair allows our students the opportunity to speak with multiple employers in one location about co-op, internships and degreed positions. Attendees are required to dress professionally and bring copies of their resumes for distribution.
Cooperative Education and Internships

Cooperative Education and Internships provide a unique, structured educational experience that allows students to gain practical, professional work experience while completing degree requirements. Through the integration of classroom theory and professional practices, students increase their understanding of the world of work.

The Cooperative Education program offers alternating and parallel options. Students working on an alternating schedule rotate semesters of full-time study with semesters of full-time work in their majors. Some students may complete continuous parallel (part-time work) assignments concurrently with a reduced class load. Co-op work experiences are progressive in responsibilities, monitored by the University, and directly related to the students’ academic and career goals. Students participating in Cooperative Education are required to register their co-op through the Career Center.

Internships are one semester degree related employment opportunities where students work one-on-one with professionals to gain practical experience in their field. Several academic programs on campus offer credit for internships; students should check with their academic advisor to learn about any credit bearing internship opportunities within their program of study.

Charger Path

Charger Path is UAH’s exclusive comprehensive career management system and all newly enrolled students receive an account during their first week of classes. In this system, students update their profiles, upload their resumes and apply for positions including co-ops, internships and professional, degreed opportunities. Through Charger Path, students receive career announcements, view upcoming workshops and information sessions, have access to on-campus recruiting schedules and make appointments with the Career Center.

Intensive Language and Culture

SST 146
256.824.2370
ilc@uah.edu
http://www.uah.edu/ilcp

Mission

The Intensive Language and Culture Program (ILC) is an academically-oriented language and culture program that prepares students for engagement in the classroom, on the campus, and across the community. In the ILC, nonnative speakers of English can develop language skills for study in an English-medium university such as UAH. With a rigorous curriculum and strict attendance requirements, the program supports students as they progress in their acquisition of academic/professional English.

Overview

The ILC includes 18-20 hours of classroom instruction per week. Students develop their skills in both oral and written academic English. Instruction adheres to principles of communicative language teaching.

Students are instructed in the four component skills of listening, speaking, reading, and writing. Additional work in pragmatics, grammar and pronunciation supports progress in both accuracy and fluency, with special attention paid to interaction in a U.S. university context.

The Intensive Language and Culture Program (ILC) serves the needs of non-native speakers of English at UAH. Students in Levels 010-040 (High Beginning - High Intermediate) prepare for study at English-medium universities, such as UAH. Students in Level 050 (Advanced) polish their language skills and transition into undergraduate, graduate, or non-degree programs at UAH.

Additional Information

ILC Program information is also available on the program website (http://www.uah.edu/ilcp). If you are interested in applying to the ILC or receiving additional information, please email the director of the ILC at ilc@uah.edu.

Requirements

Students applying to the ILC at UAH should submit the following documents.

1. Official transcripts from secondary and/or postsecondary institutions attended, translated into English and certified.
2. TOEFL or IELTS scores (if not available, contact the director regarding options for demonstrating language proficiency, at ilc@uah.edu)
3. Financial support documentation (F-1 students only)

To apply online, visit the UAH Admissions Login (https://sierra.uah.edu:9021/PROD/bwskalog.P_DispLoginNon), choose APPLY FOR ADMISSION. On that page, choose First Time User Account Creation. Next, create a Login ID and PIN. Then, log in to the system and select Intensive English Program Application.

For a downloadable copy of the application form, select the UAH ILC Application (http://www.uah.edu/images/administrative/ilc/IEP%20application.pdf).

If you have questions or need additional information, contact the director via email at ilc@uah.edu.

ILC 010 - INT LANG & CULT I
Semester Hours: 4-20
Course designed to improve nonnative speaker's ability in their overall language proficiency at the high beginning level.

ILC 020 - INT LANG & CULT II
Semester Hours: 4-20
Course designed to improve nonnative speaker's ability in their overall language proficiency at the low intermediate level.

ILC 030 - INT LANG & CULT III
Semester Hours: 4-20
Course designed to improve nonnative speaker's ability in their overall language proficiency at the intermediate level.

ILC 040 - INT LANG & CULT IV
Semester Hours: 4-20
Course designed to improve nonnative speaker's ability in their overall language proficiency at the high intermediate level.

ILC 050 - INT LANG & CULT V
Semester Hours: 4-20
Course designed to improve nonnative speaker's ability in their overall language proficiency at the advanced level.

ILC 090 - ILC: SPECIAL TOPICS
Semester Hours: 1-3

JUMP

UAH's Joint Undergraduate Master's Program (JUMP) allows undergraduate students to study at the graduate level. By taking graduate courses in your senior year, you could reduce the time taken to get a graduate (M.S. or M.A.) degree.

Benefits for you:

1. No entrance exam!
2. Double count undergrad classes for grad degree!
3. Pay undergrad tuition for grad classes taken as a JUMP student!
4. No application fee!

How to JUMP!

• Apply any time before your last semester.
• Meet with your college JUMP advisor and submit application.

Official Rules for JUMP!

• For admission to JUMP, student must meet overall GPA requirements of the college. GPA includes all transfer coursework.
• Only courses taken at UAH and listed on JUMP application are eligible.
• Student must receive a B in each JUMP course for it to count towards graduate degree.
• Student must maintain minimum overall GPA throughout JUMP program until graduation.
• All coursework must be completed within six years of taking first JUMP class.
• Students are considered undergraduate students until all requirements for undergraduate degree are met.
• Students cannot hold a GTA, GRA, or graduate scholarship or fellowship until undergraduate degree is completed.
• If a change is made to initial JUMP application both a JUMP change form and a change to student's undergraduate Program of Study (POS) must be submitted for approval.
• If student's GPA upon graduation is less than the required minimum, the student does not receive admission to the graduate degree program automatically. Student must apply to the graduate school with admission test score and graduate application. Courses will be counted as if the student had been a non-degree seeking graduate student.
• Students must begin their graduate program within one year of their undergraduate graduation.
• Notify the Graduate School (deangrad@uah.edu?subject=JUMP! Notification) when you submit your application for undergraduate graduation.

More information available at http://uah.edu/jump

Minimum GPA requirements by college or program

Online Learning

The University of Alabama in Huntsville offers a number of academically challenging online and hybrid-online programs. Please review a listing of available programs here: http://www.uah.edu/online-learning

State Authorization:
The state of Alabama is a member of the SARA compact. The State Authorization Reciprocity Agreement is an agreement among member states, districts and territories that establishes comparable national standards for interstate offering of postsecondary online education courses and programs. It is intended to make it easier for students to take online courses offered by postsecondary institutions based in another state. For more information, including a current list of states in the SARA compact, please visit http://www.nc-sara.org/. The University of Alabama in Huntsville is an approved SARA institution.

For further information regarding SARA requirements on the UAH campus please see http://www.uah.edu/academic-affairs/offices/oira/state-authorizations

Topics include: Timeline for approval, International Residents, Territories and Provinces, Military Bases, Additional Resources, Professional Licensure, & Grievance Procedures

Pre-Professional Program

The Office of Pre-Professional Advising at the University of Alabama in Huntsville (UAH) facilitates students in all colleges and all majors. The office assists undergraduate, graduate, alumni, and post-baccalaureate students with their individual process of pursuing a career in health or law related professions by providing support, guidance, and resources.

The office values developing meaningful relationships, a sense of community, personal growth, a sense of support and challenge, and overall wellness with each student.

If an individual has begun considering a health or law career or is in the process of submitting their application to a health or law program, the office assists students with planning, procedures, and providing information. The office assists students in building competitive applications, which involves reviewing personal statements, developing pre-professional resumes, conducting mock interviews, finding and building shadowing and volunteering opportunities and experiences, discovering and applying for internships and summer programs, conducting research, writing letters of recommendation (must meet requirements), and more.

To receive services and maintain status at UAH as a pre-professional student, all interested students must apply through the Pre-Professional website: uah.edu/ppa

Pre-Professional Areas
Careers supported by the Office of Pre-Professional Advising include:

• Law
• Allopathic Medicine
• Osteopathic Medicine
• Nursing Advanced Practice
• Dentistry
• Optometry
• Veterinary Medicine
• Pharmacy
• Physical Therapy
• Occupational Therapy
• Physician Assistant
• Public Health
• Graduate studies in health related areas, including, but not limited to: epidemiology, genetic counseling, health behavior sciences, rehabilitation sciences, audiology, health care organization, and more.
The Office of Pre-Professional Advising offers academic preparatory options, which are flexible and provide a broad background to satisfy a wide variety of career objectives, including the diverse fields in the health professions.

Professional schools review student coursework, recommendation letters (e.g. employers, faculty, PPA committee letter), health related experiences (e.g. volunteering, shadowing, internships), quality interview skills and admissions test scores (e.g. Medical College Admission Test (MCAT), Dental Admission Test (DAT), Law School Admission Test (LSAT), etc.). The Pre-Professional Advisor ensures students gather each element needed for professional schools, apply at the appropriate time of year, understand components needed for their appropriate entrance exam, and feel confident in the application process.

Many students entering professional schools (e.g. medical, law, dental, optometry) do so after earning an undergraduate and/or graduate degree. No particular academic major or minor is preferred to enter a health field (with the exception that a career in nursing will require a nursing degree). It is important to consult with the desired professional school to determine specific admission requirements. Competition for admission to professional schools is intense and minimum admission requirements do not ensure acceptance.

Courses to Consider
Typical courses for admission to many health professional programs include those listed in the following set of courses. Law schools do not have a set of required courses.

It is recommended that students discuss courses with their Pre-Professional Advisor. Specific requirements of health professional programs may be found on the Pre-Professional Advising website (http://www.uah.edu/ppa).

¹ Additionally recommended: genetics, biochemistry, anatomy and physiology
² Not required for every pre-professional area of interest. Discuss with Pre-Professional Advisor.
³ Calculus preferred for Mathematics

Students are advised to choose programs of study according to individual interests and abilities.

Each professional school of interest may differ in requirements, both in and out of class, and meeting with the Pre-Professional Advisor in the Office of Pre-Professional Advising is important in accomplishing professional goals. Meeting regularly with the Pre-Professional Advisor may fulfill students’ maximum potential for admission.

Pre-Law Program Certificate

The Certificate in Pre-Law Program is designed to provide undergraduate students with skills that are required for law school and the practice of law: analytical reasoning, reading, and writing. It is also intended to provide a background on various perspectives on law from a variety of disciplines not often associated with legal studies, such as sociology, psychology, and history.

A student who chooses to pursue a Certificate in Pre-Law may choose any major or minor in any college at UAH. A choice of major and minor is best made in consultation with the Pre-Law Adviser, who can guide a student in choosing courses that will prepare him or her for the academic rigors of a legal education. For many students, the Certificate can be earned without adding additional hours to a degree program. Select courses can be counted toward Charger Foundations.

Professional and Continuing Studies

Study Abroad

The Office of Study Abroad within the Office of International Services serves as the coordinating office for study-abroad opportunities at UAH.

Faculty-Led Courses: Each year, UAH offers a number of faculty-led study abroad courses typically ranging from two to four weeks in length and conferring three to six academic credit hours in the course(s) offered.

Summer, Semester, and Academic-Year Programs: UAH works with international partners and education abroad organizations to offer students summer, semester, or academic-year study abroad programs at sites in Africa, Asia, Australia, and Europe. You can participate in these programs and earn academic credit toward your degree at UAH.

The Office of Study Abroad is located in the Student Services Building, Room 218M. Students can obtain additional information by visiting our website (www.uah.edu/ois), by emailing studyabroad@uah.edu, or by calling 256-824-6055.

Admissions

Welcome to the Office of Admissions at UAH

The Admissions Staff is here to assist you as you explore your college options. With more than 80 areas of study in our 8 colleges, 130+ student organizations, suite-style living in the residence halls, and the only NCAA Division I ice hockey team in the South, we believe you will find UAH is the right place for you!

As you research UAH, make sure to contact your Admissions Counselor (http://www.uah.edu/admissions/undergraduate/office/counselors) so they can help you along the way. From assisting you with your admission application to providing you with the most up-to-date information about campus to getting you in contact with other campus representatives, we are happy to help!
We know that visiting campus and getting involved is important in making your college decision. That's why we offer daily campus visits (http://www.uah.edu/admissions/undergraduate/visit-campus) which allow you to speak with an Admissions Counselor and go on a student-led campus tour. We hope you'll also join us at one of the many events (http://www.uah.edu/admissions/undergraduate/upcoming-events) we host both here on campus and in your community!

Academic Common Market of the Southern Regional Education Board

The Academic Common Market (ACM) is an association of 15 states (AL, AR, DE, FL, GA, KY, LA, MD, MS, OK, SC, TN, TX, VA, and WV) formed to permit out-of-state students to major in selected programs at participating institutions while paying in-state tuition rates. Each ACM state outside of Alabama typically allows its residents to participate in the University's programs through ACM.

When it has been determined that UAH offers the desired program through the Academic Common Market, applicants should initiate application procedures by contacting his/her home state's Commission on Higher Education (or the equivalent office) and requesting permission to pursue the desired program at UAH. Additional information and a listing of contacts by state may be obtained from the Southern Regional Education Board's website (http://www.SREB.org). Under the heading "Programs and Services" select Academic Common Market.

Course Placement

Course Placement and Placement Testing

All students who are beginning college-level course work in English, Mathematics, World Languages and Cultures, and Chemistry are placed at the level best suited to their academic preparation and background. Initial placements are determined by a combination of factors depending on the subject area. ACT scores and high school grades determine placement in English. Students who were placed into EH 101S may opt to take the Composition Placement Test for entry into EH 101. Students may call Testing Services at 256.824.6725 to schedule an appointment to take the Composition Placement Test. This test may only be taken once.

ACT scores, AP Calculus exam scores and/or previous college level mathematics courses (which have been accepted by the Math Department for transfer credit) determine placement in Mathematics. Students who have no means of math placement can take the Mathematics Placement Test. See here (http://www.uah.edu/science/departments/math/undergraduate-students/placement) for online test registration. This test may be taken twice.

ACT Math scores determine placement in Chemistry.

Students with prior knowledge of French, German, or Spanish may demonstrate competence at an advanced level in five ways:

1. performance on a computer based placement test,
2. high school coursework,
3. CLEP examination,
4. AP examination, or
5. native language experience.

Students should contact the World Languages and Cultures department at 256.824.6871 or 256.824.1022 to inquire about their placement policies.

Students will be notified at the time of the tests when they can expect to receive the test results. There is no charge for the Chemistry Placement Test, Composition Placement Test, Foreign Language Placement Test or the Mathematics Placement Test. If a student has not received initial course placements before enrollment, he or she should contact the Office of Admissions.

Credit by Examination

UAH recognizes credit by examination and credit for several types of out-of-class experiences. Credit hours earned by examination and/or out-of-class experiences are not considered UAH institutional coursework, and therefore, may not be applied towards fulfillment of:

- the minimum of 50 percent of the coursework required to earn a bachelor’s degree that must be earned at a bachelor’s degree granting institution (four-year college or university)
- the minimum of 25 percent of the coursework required for the degree that must be earned in residence at The University of Alabama in Huntsville

There are four alternatives by which a student may gain credit through examination at UAH:

1. departmental examinations,
2. the Advanced Placement (AP) Program,
3. the College Level Examination Program (CLEP), or

Credit by examination is not granted in the following cases:
1. if a student has been enrolled in a comparable course for more than three weeks, 
2. to remove a failure already recorded for a course, or 
3. to satisfy the residency requirement for graduation.

Credit by Department Examination

Departmental examinations for credit in specific courses may be given by a department upon application by the student and with the approval of the Department Chair. Students may apply for such a test if they have taken college-level work in secondary school, in a non-collegiate class or on a tutorial basis, or through private study. Credit, if awarded, will be recorded without grades or quality points and will not, therefore, be included in calculation of the grade point average. The amount of credit allowable through departmental examinations is determined by the appropriate academic dean and the department chair concerned.

Advanced Placement Program

Several UAH departments award credit to students who have earned designated scores on Advanced Placement (AP) Program examinations of the College Entrance Examination Board. AP examinations are usually taken at the end of an AP-designed course of study in high school. If awarded, credit will be recorded without grades or quality points and will not, therefore, be included in calculation of the grade point average. Students should apply for credit through the Office of the Registrar. Official scores may be requested at collegeboard.org. UAH AP code: 1854. Scores presented on transcripts from other institutions cannot be evaluated. To view AP Exam scores and the equivalent credit please visit http://www.uah.edu/images/admissions/Documents/AP_IB.pdf.

Please note that the equivalent mathematics course is the course that the student must enroll in based upon placement.

College Level Examination Program (CLEP)

The College Level Examination Program (CLEP) is a national program under which a student can receive credit for college level achievement. Anyone who has practical knowledge in an area through independent study, work experience, cultural exposure, or intensive reading, may take these tests. The policy for CLEP credit varies with each institution. The policies listed herein are those of UAH. See www.uah.edu/testing for test dates, fees, and registration.

Credit by CLEP examination is allowed if the appropriate academic department has approved the CLEP test for use by the University. Credit awarded for CLEP examinations will be recorded on the student's record without grades or quality points and will not, therefore, be included in calculation of the
grade point average. If a student does not pass a CLEP test, no record is placed on his or her transcript. Examinations may be retaken six months after initial testing.

Students should check with their program of study and their academic advisor to determine which, if any, CLEP examinations they may take to satisfy either free elective or degree requirements.

Listed below are UAH courses in which a student may receive CLEP credit, along with specific CLEP test titles and minimum score requirements.

¹ Students who have already completed EH 101 or a comparable course are not eligible to take the CLEP test for EH 102. CLEP tests must be taken in a student's first term.

International Baccalaureate (IB)

The University of Alabama in Huntsville recognizes International Baccalaureate (IB) credit with a score of 5, 6, or 7 on the higher-level examinations. IB score reports should be sent to the UAH Office of Admissions for evaluation. Additional credit may be awarded on a course by course basis as approved by the department. Some departments may award credit based on the subsidiary examinations. The academic unit responsible for the student's program of study will determine the application of credits toward specific degree requirements. If awarded, credits will be recorded without grades or quality points, and will not, therefore, be included in the calculation of grade point average.

**Instructional and Testing Services**

Annette Murray, Instructional Testing Administrator

225 Wilson Hall
Telephone: 256.824.6725
Email: testing@uah.edu
Website: www.uah.edu/testing

This office provides high-quality test administration and assessment services for UAH Faculty and students. It subscribes to and abides by the professional standards and guidelines for post-secondary test centers, as adopted by the National College Testing Association. Testing Services offers a variety of services for the UAH Instructors and UAH students including Online Learning exams, proctoring make-up exams, and deferred finals.

**Dual Enrollment Program**

Several local school systems have an agreement with UAH permitting high school juniors and seniors to take classes at UAH that may count for both high school credit toward graduation and college credit toward a degree at the University. High school juniors and seniors who meet regular UAH admission requirements and have at least a 2.9 high school academic GPA may, with the approval of their school officials, take classes at UAH and receive credit at both the high school and college level for UAH classes approved by the school system.

Applying for the Dual Enrollment program at UAH requires:

- a completed Dual Enrollment application
- the $30 non-refundable application fee
- an official transcript of high school work
- official ACT or SAT scores
- written approval from high school officials
- written approval from the student's parent or guardian

Students enrolled in the Dual Enrollment program may register for a maximum of two courses per semester.

**Dual Enrollment**

UAH welcomes academically talented high school juniors and seniors who wish to earn college credits while still enrolled in high school. This option may be appropriate for students whose high schools do not participate in the Dual Credit program or students who have completed all high school graduation requirements but have not yet graduated from high school.

Applying for the Early Start Program at UAH requires:
- official scores: ACT of 26 or SAT of 1180
- high school GPA of 3.5 or higher
- Early Start application form
- $30 non-refundable application fee
- official transcripts showing high school and any college-level work
- written approval from high school officials
- written approval from parent or guardian

Students enrolled in the Early Start program may register for a maximum of two courses per semester.

**First Year Students**

**Requirements for High School Graduates**

This information pertains to applicants who desire admission as beginning freshman students after graduation from high school and who have not attended an accredited postsecondary institution. International students should refer to the section on International Student Admissions in addition to this section.

**Required Documents**

**Application for Admission**

The application for admission and a nonrefundable $30 fee payable to the University of Alabama in Huntsville should be submitted as soon as possible after the beginning of the senior year. The $30.00 application fee must be in U.S. currency, drawn on a U.S. bank. This fee may also be paid via MasterCard, Visa, or American Express while applying online.

The preferred time for receipt of applications for the fall semester is the preceding August - December 1st. The fee may be waived for applicants who can document that they have received a fee waiver because of economic need as determined by the College Board (SAT) or the American College Testing Program (ACT). It is the policy of the University not to defer or waive other application fees.

**Secondary School Record**

An official high school transcript (sent by the high school directly to the Office of Admissions) reflecting work completed from the beginning of the 9th grade through the 12th grade is required.

**College Transcripts**

Students who have registered for course work at community colleges, four-year colleges, or universities through dual enrollment or non-degree student status must submit official transcripts from postsecondary institutions. Transcripts are considered official when they are sent from a college or university directly to the Office of Admissions and contain an official seal and signature. Transcripts bearing the statement, "Issued to Student," or transcripts faxed or submitted by applicants are not considered official.

**Test Scores**

The examination offered by the American College Testing Program (ACT) or the Scholastic Assessment Test (SAT) administered by the College Entrance Examination Board is required of all applicants for freshman admission. Either one or both of these tests should be taken no later than the June testing date after the senior year. Students should feel free to repeat a test, since the highest score will be considered for admission.

**Priority Deadlines for Applications and Supporting Documents**

<table>

</table>

**Admission Requirements**

Admission to the University of Alabama in Huntsville requires graduation from regionally accredited high schools or completion of the General Education Diploma (GED), certain high school academic units, a cumulative high school grade point average in those academic units, and test scores as outlined below.

**Suggested High School Course Units**

Applicants should have earned four units of English; three units of mathematics, including Algebra I, Algebra II and Geometry (Trigonometry is also required by the College of Engineering and recommended by all other colleges); three units of natural science; four units of social studies/social sciences (includes history, civics, political science, economics, sociology, psychology, and geography), and four units of electives that may include courses such as foreign language, computer programming, religion, philosophy as well as higher-level science and math courses.
English Language Proficiency Requirements
Applicants must demonstrate proficiency in the English language. Applicants whose first language is other than English should refer to the section (p. 19) on English language requirements for nonnative speakers.

Academic Qualifications
Each applicant is evaluated based on individual merit and demonstrated success in a rigorous academic environment. High school coursework, grade point average, and ACT/SAT scores are weighed heavily; however, these criteria do not constitute the entire foundation for an admission decision. An applicant with a grade point average of 2.9 and a composite score of 20 on the ACT or equivalent SAT, for example, is considered a strong candidate for admission.

Home Schooled Applicants
High school students who are home schooled are reviewed for admission and for scholarships at UAH following the same criteria used for students from public and private high schools including the required test scores stated above. The official high school record of courses completed should contain the titles of courses in each subject area, beginning with grade nine. This record should contain annotation of the general content in the academic courses and the textbooks used. The teaching credentials of the home school teacher should be included.

General Education Development (GED) Recipients
Persons who have not graduated from high school may be admitted on the basis of a satisfactory score on the GED test. A score of 170 or higher is required for regular admission status. An official ACT or SAT score report may be requested. An official transcript of completed high school courses is also required. UAH is a testing center for the GED program. Anyone seeking additional information or wishing to take the GED examination should contact the Office of Instructional and Testing Services at 256.824.6725.

Conditional Admission for High School Graduates
An individual who has applied for regular admission and who does not meet the admission criteria may be considered for admission on a conditional basis in certain circumstances. The Director of Admissions is authorized to offer conditional admission based on an evaluation of the student’s previous academic credentials and evidence of serious commitment to academic pursuits. Conditionally admitted students are normally limited to a maximum of a 12 semester hour course load until a total of 15 semester hours of work is completed with at least an overall C (2.0 GPA) average. Upon satisfactory completion of 15 or more semester hours of course work at UAH, with at least a 2.0 GPA on all UAH coursework, the conditional classification will be changed to regular student status. Credits earned while on conditional status are recorded on the student's permanent record and may count, if applicable, in a regular undergraduate degree program.

A student enrolled on conditional status is subject to the same periodic review of his or her academic record as a regular student and is subject to the University's regulations regarding scholastic probation and suspension. (See Academic Information.) If a student becomes subject to academic suspension, the suspension is for a minimum of one semester, and the student must petition the Admissions and Scholastic Affairs Committee for approval to re-enroll.

General Information

Conditions of Admission
The Office of Admissions will notify the applicants of the admission decision. Admission to the University is often contingent upon the subsequent receipt of satisfactory and official college, university, or high school transcripts; verification of associate of arts or baccalaureate degrees; and verification of high school graduation. Failure to submit such documents before the end of the second week of class of the initial academic semester may result in the cancellation of admission.

Ownership of Submitted Documents
All credentials and documents submitted become the property of the University of Alabama in Huntsville. The originals or copies of the originals will not be returned to the applicant or forwarded to another institution, agency, or person.

Fraudulent Records
If it is found that an applicant has made a false or fraudulent statement or an omission on the application for admission, the residency statement, or any other accompanying documents or statements, the applicant may be denied admission. If the student is already enrolled when the fraud is discovered, the case will be adjudicated using the procedures specified for violations of the Student Code of Conduct and may result in the student's admission being rescinded and the student being dismissed from the University.

Credentials and Documentation
Credentials and documentation required for admission vary by type of application. See the appropriate section below and the Office of Admissions web site at admissions.uah.edu for more specific details. Admission to the University does not guarantee admission to a specific degree program. The
Colleges of Business, Education, Engineering, and Nursing, and the Music program may have additional requirements. See the appropriate college or program section for more details. A one-time non-refundable $30 application fee must accompany the admission application.

International Students

International students are defined as any applicant who is not a U.S. Citizen or Permanent Resident. International applicants must meet all established requirements for admission from secondary schools or from other colleges and universities. International applicants should apply for admission at least six months in advance of desired attendance date in order to facilitate timely admission and enrollment.

An undergraduate international applicant must submit:

1. Completed under graduate international application form.
2. Non-refundable application fee of $60 USD.
3. Official copies of secondary school and college or university transcripts including English translations forwarded to The University of Alabama in Huntsville directly from the institution(s) attended or the approved accrediting agency. Personal copies are not accepted. English credits earned at international institutions will be evaluated by the Department of English at UAH after an admission decision is made.
4. Certificate of Foreign Credit Evaluation for all high school or college coursework done outside of the U.S. must be performed by an approved service. The evaluation should contain a course-by-course description and a grade point average from each institution attended. Applicants have the responsibility to contact the evaluation agency directly and have the evaluation agency send the official evaluation report to UAH - copies will not be accepted by UAH. Examples of acceptable evaluation services are:

   Josef Silny & Associates, Inc.
   International Education Consultants
   7101 SW 102 Avenue
   Miami, FL 33173
   Ph: 305.273.1616
   Fax: 305.273.1338
   Translation Fax: 305.273.1984
   www.jsilny.com (http://www.jsilny.com)
   info@jsilny.com

   World Education Services, Inc.
   P.O. Box 5087
   Bowling Green Station
   New York, NY 11027-5087
   Ph: 212.966.6311
   Fax: 212.739.6120
   www.wes.org (http://www.wes.org)

   Lisano International
   P.O. Box 507
   Auburn, AL 36831
   Ph: 334.745.0425

5. Official American College Test (ACT) scores or SAT scores sent directly to UAH from the testing service headquarters. ACT/SAT is not required of an applicant who has earned more than 24 semester hours of college work with a 2.0 GPA.

6. Proof of English language proficiency. Please refer to the section on English language requirements for nonnative speakers below.

7. Students who will attend UAH in F or J student status are required to submit a certified affidavit of financial support and financial statements/bank records as evidence of sufficient finances to cover university and personal expenses while attending UAH.

Transferring From Another U.S. Institution

Individuals in the U.S. in F or J status who intend to transfer to UAH from a U.S. high school or college will receive, upon admission, a transfer clearance form that must be completed by the previous institution’s designated official (international student advisor) and sent to the UAH Office of Admissions in order to be eligible for enrollment. It is also the responsibility of the admitted F or J student to communicate with the previous school’s international student advisor to ensure that the SEVIS I-20 or DS-2019 record is transferred from the previous school to UAH prior to the start of the semester of enrollment.

English Language Requirements for Nonnative Speakers

SAT/ACT score is not required for undergraduate international applicants. Applicants may submit scores, if available, for consideration in admission or scholarship eligibility determination.

All applicants whose native language is other than English must demonstrate the linguistic proficiency necessary to function in degree programs at UAH.
1. Unconditional admission to degree programs.∗
   a. In order to be considered for admission to degree programs with no additional English language training required, applicants must meet the following minimums on the TOEFL or IELTS.
   TOEFL (iBT): all sub-scores greater than or equal to 18 OR
   IELTS: all sub-scores greater than or equal to 6.0
   b. Students with two or more sub-scores below these minimum qualifications must enroll in the UAH Intensive Language and Culture (ILC) Program before they can enroll in graduate course work.
   ∗Language proficiency is only one factor in admission decisions. To confirm the full admission requirements for specific degree programs, please contact the department directly.

2. Admission to the ILC Program.
   a. Applicants who do not currently meet the requirements for admission to a degree program at the university are encouraged to apply for admission to the UAH Intensive Language and Culture (ILC) Program. Successful completion of the UAH ILC meets the language proficiency standard for admission to degree programs at the university.
   b. To be considered for admission to the UAH Intensive Language and Culture Program, applicants must have the following minimums on the TOEFL or IELTS.∗
   TOEFL (iBT): Overall of at least 50 with no sub-score below 12 OR
   IELTS: Overall of at least 4.0 with no sub-score below 3.5
   ∗NOTE: If an applicant does not have a TOEFL or an IELTS score, he/she may request a pre-assessment and be considered for admission to the ILC. He/she will then be formally assessed upon arrival at UAH and will be placed in appropriate classes in the ILC program.

NOTE THAT OFFICIAL TEST SCORES SHOULD BE SENT DIRECTLY TO UAH FROM THE TOEFL OR IELTS TESTING SERVICE.

∗iBT = internet-based TOEFL; IELTS = International English Language Testing System

English Language Placement Test
The UAH English Language Placement Test (ELPT) is required of all students whose native language is not English, regardless of nationality or prior English study. A student must complete any intensive English coursework that the test indicates is required.

Health and Immunization Policies
Student Health Insurance
International students are required to purchase the UAH student health insurance and will be assessed the insurance premium each semester upon enrollment in classes. Requests for a waiver from the mandatory policy must be made to the Student Health Center within 10 days of the start of class.

Immunizations
If you were born after 1956, proof of two (2) measles containing vaccinations. One of these vaccines must be an MMR vaccination after 1980.
Acceptable proof of tuberculosis screening that is no more than twelve months old.
All first time freshmen and students living in on campus housing must also show proof of a meningitis vaccine.

Tuberculosis Screening and Testing Policy
All new international students must complete tuberculosis screening through the Student Health Center. This screening process will be scheduled as a part of the orientation program and will be provided upon arrival on campus at the UAH Student Health Center.

Residency
UAH Resident/Non-Resident Tuition Fee Guidelines
Introduction
All students registering at The University of Alabama in Huntsville (UAH) who do not demonstrate, by presenting satisfactory evidence, that they are "resident students" will pay a "non-resident student" tuition. "Non-resident student" tuition will be at least twice the amount of "resident student" tuition. The residency classification of students will be made at the time of their initial registration and will continue unchanged through all subsequent registrations until satisfactory evidence to the contrary is submitted at the time of any subsequent registration. An Application for Reclassification of Residence must be submitted to the Office of the Associate Vice President for Student Affairs no later than the last day of registration for the appropriate semester.
Demonstrating Alabama Residency

A resident student, for the purposes of this policy, is one who has established residency in Alabama and has maintained that status for at least one year immediately prior to the date of registration at any institution of higher education in the state. The policy of the Board of Trustees of The University of Alabama on non-resident tuition states that "residence" refers to that "single location at which a person resides with the intent of remaining there indefinitely as evidenced by more substantial connections with that place than with any other place." Students seeking to demonstrate that they are Alabama residents must certify to three facts:

1. that an address or location within Alabama is their residence,
2. that they intend to remain there indefinitely, and
3. that they have "more substantial connections" with Alabama than with any other state.

Though satisfying the location and statement of intent requirements are essential, demonstrating residency will depend upon the University's evaluation of the student's connections with the state. No single connection or combination will automatically result in a finding of residency. Moreover, even if one or more connections with Alabama exist, a person who is in Alabama primarily for the purpose of obtaining an education will be considered a non-resident. The Board policy lists the following as connections that may be considered:

1. Payment of Alabama state income taxes as a resident
2. Ownership of a residence or other real property in the state and payment of state ad valorem taxes thereon
3. Full-time employment (not temporary) in the state
4. Residence in the state of a spouse, parents, or children
5. Previous periods of residency in the state continuing for one year or more
6. Voter registration and voting in the state, especially registration occurring more than one year prior to the student's initial registration
7. Possession of state or local licenses to do business or practice a profession in the state
8. Ownership of personal property (e.g., automobile, boat, etc.) in the state and payment of state taxes thereon; possession of state license plates
9. Continuous physical presence in the state for a purpose other than attending school and except for temporary absences for travel, military service, temporary employment, etc.
10. Membership in religious, professional, business, civic, or social organizations in the state
11. Maintenance in the state of checking and savings accounts, safe deposit boxes, investment accounts, etc.
12. In-state address shown on selective service registration, driver's license, automobile title registration, hunting and fishing licenses, insurance policies, stock and bond registrations, last will and testament, annuities, retirement plans, etc.
13. Location within the state of the high school from which the student graduated

As stated above, a student will be classified as an Alabama resident only if the student is able to show that he/she became a resident one year or more prior to the date of registration at any institution of higher education in the state by identifying then existing, sufficient connections with Alabama.

Demonstrating Alabama Residency - Alternative Approach

A student who does not qualify for classification as a resident student under the foregoing requirements may possibly qualify if he/she (or his/her supporting person in the case of a minor) meets any one of the following requirements at the time of registration:

1. Is a full-time, non-temporary employee at UAH or is the spouse of such an employee
2. Is employed by UAH as a graduate student or fellow on at least a 0.5 FTE (half-time) basis
3. Is a full-time, non-temporary employee of some other employer within the state of Alabama, or can verify such employment beginning not more than 90 days after registration, or is the spouse of such employee
4. Is a resident of Bedford, Coffee, Franklin, Giles, Lawrence, Lincoln, Marion, Marshall, or Moore County in Tennessee and has been a resident of that County for at least one year preceding the date of registration. The requirements for a student to demonstrate that he/she is a "resident" of one of the foregoing counties shall be the same as set forth above with regard to demonstrating Alabama residency.

As used in these Guidelines, a "minor" refers to an individual who, because of age, lacks the capacity to contract under Alabama law. This means a single individual under age 19 and a married individual under age 18. A "supporting person" refers to either or both of the parents of a student, if they are living together, or, if the parents are divorced or living separately, then the parent providing the greater amount of financial support of the two (normally, the parent having legal custody). "Non-temporary" employment means employment that is on-going and not seasonal or for a specific period of time or for the express purpose of financing the student's college education.

Residency Classification for Veterans

The following individuals shall be charged a rate of tuition not to exceed the in-state rate for tuition and fees purposes:
• A Veteran using educational assistance under either chapter 30 (Montgomery G.I. Bill – Active Duty Program) or chapter 33 (Post-9/11 G.I. Bill), of title 38, United States Code, who lives in Alabama while attending a school located in Alabama (regardless of his/her formal State of residence) and enrolls in the school within three years of discharge or release from a period of active duty service of 90 days or more.

• Anyone using transferred Post-9/11 GI Bill benefits (38 U.S.C. § 3319) who lives in Alabama while attending a school located in Alabama (regardless of his/her formal State of residence) and enrolls in the school within three years of the transferor's discharge or release from a period of active duty service of 90 days or more.

• Anyone described above while he or she remains continuously enrolled (other than during regularly scheduled breaks between courses, semesters, or terms) at the same school. The person so described must have enrolled in the school prior to the expiration of the three year period following discharge or release as described above and must be using educational benefits under either chapter 30 or chapter 33, of title 38, United States Code.

• Anyone using benefits under the Marine Gunnery Sergeant John David Fry Scholarship (38 U.S.C. § 3311(b)(9)) who lives in Alabama while attending a school located in Alabama (regardless of his/her formal State of residence).

• Anyone using transferred Post-9/11 G.I. Bill benefits (38 U.S.C. § 3319) who lives in Alabama while attending a school located in Alabama (regardless of his/her formal state of residence) and the transferor is a member of the uniformed service who is serving on active duty.

The policy shall be read to be amended as necessary to be compliant with the requirements of 38 U.S.C. 3679 as amended.

Appeal
The Associate Vice President for Student Affairs will make the initial decision on an application for reclassification to resident student status. This decision may be appealed to the Vice President for Student Affairs. Notice of appeal must be in writing and must be delivered no later than fourteen (14) days after the date of the initial decision of the Associate Vice President for Student Affairs. This decision may be appealed to the President of the University, whose decision shall be final.

The foregoing Guidelines are a summary of the provisions of Rule 202 of The Board of Trustees of The University of Alabama ("Non-resident Tuition Policy"). This Rule constitutes the full statement of policy applicable to the residency classification of UAH students.

Special Student Status

Non-degree Students

Eligibility
A general Non-Degree seeking student is one who is not currently enrolled in or pursuing a degree at another institution and who desires to enroll at UAH for one or more terms to take certain advanced coursework for personal or professional growth. Any adult who has completed high school or completed the GED with a minimum score of 170 at least two calendar years prior to the application term may apply for admission as a non-degree student. Credits earned or courses audited as a non-degree student are recorded on the student's permanent record. As appropriate, credit courses will be applied toward a regular undergraduate degree program when the individual qualifies for admission as a regular student. A student enrolled as a non-degree student must satisfy course prerequisites for each course taken and may be required to submit official transcripts from any prior collegiate institutions attended to show satisfactory completion of prerequisites. International students attending UAH on a student visa are not eligible for non-degree status. A student whose first language is other than English must demonstrate English language proficiency. See the section (p. 19) on English language requirements for nonnative speakers.

Exceptions
Several factors are considered when determining eligibility as a Non-Degree Student. Students may be more appropriately classified in other admission categories as outlined below:

• Students who have not yet graduated from high school must apply for admission via Dual Enrollment (p. 27) or Early Start (p. 27).

• A student who has completed high school or earned at least a 170 on the GED, but has not yet enrolled in college coursework must apply as a degree seeking first year/freshman student, or have graduated from high school or earned a GED at least two calendar years prior to term of application for non-degree admission.

• Students currently enrolled at another institution who wish to take classes as a visiting student with the intention of returning to the primary institution should apply as a Transient student.

• Students who have earned a bachelor's degree previously should apply as a Post-Baccalaureate student, which is a special category of Non-degree seeking students.

Enrollment
Non-Degree seeking students who have attended another college or university must have an official transcript from the last school attended sent to the Office of Admissions. The student must be in good academic standing at the last institution attended, if the application is submitted within one year of
last enrollment. Applicants who have not attended another college or university must submit an official high school transcript, including graduation date, or an official GED test report to the Office of Admissions.

Once admitted as a non-degree student, the student may only register for a maximum of 12 semester hours per term. Only 12 semester hours earned as a Non-Degree seeking student can be used toward an undergraduate degree at UAH. Please note that admission as a Non-Degree seeking student does not imply admission to an undergraduate or graduate degree program.

Non-Degree seeking students are generally considered casual course takers and as such have the lowest priority in class registration. Enrollment in courses will be on a space-available basis, and degree-seeking students shall have priority should there be a wait-list. If a course has prerequisites that the student has not met, permission must be granted by the instructor before enrollment in the course. Non-degree students may provide evidence of meeting course prerequisites by providing an unofficial transcript to the appropriate academic advisor or Registrar staff.

A student enrolled in this category is subject to the same periodic review of his or her record as a regular student and is subject to the University’s regulations regarding scholastic probation, dismissal, and reinstatement. (See Academic Policies and Procedures.)

Non-Degree students cannot become candidates for a degree, be eligible for honors or hold officer positions in student organizations unless and until they reapply and are admitted as regular degree seeking students. At such time, the student shall submit official transcripts from all institutions previously attended and meet regular admission standards.

Non-Degree students generally are not eligible for financial aid. It is recommended that applicants contact the Office of Financial Aid at 256.824.6650 for more information and to verify eligibility.

**Transient Students**

Students who are currently enrolled at other colleges may apply for admission to take credit classes that will count toward a degree at their home institution. A completed application, a non-refundable $30 application fee, and an Official Transcript from the current college are required. This verifies eligibility to return to the student’s home institution and verifies the home college will accept the UAH courses for degree requirements. Transient students should satisfy UAH course prerequisites for each course taken and may be required to submit other official transcripts showing satisfactory completion of prerequisites.

**Concurrent Enrollment**

This category permits a student to enroll concurrently at more than one higher education institution. One institution must be declared as the "home" institution. A student may enroll at UAH and concurrently at another regionally accredited higher education institution and earn credit toward a degree at UAH, provided that prior written permission has been obtained from the student’s academic advisor and the UAH Registrar. The student pays regular tuition at both institutions.

**Post-Baccalaureate Eligibility**

A Post-Baccalaureate student is one who has already earned a bachelor's degree and who desires to enroll at UAH for one or more terms to take certain advanced coursework for personal or professional growth. In addition to the application and non-refundable application fee, applicants must submit to the Office of Admissions an official transcript from the college or university from which the baccalaureate degree was earned.

**Exceptions**

Students who have already earned a bachelor's degree and wish to enroll as a degree seeking student should apply as Second Bachelor's applicant. These applicants must have a minimum cumulative grade point average of 2.0 and have all official transcripts of coursework attempted sent to UAH Office of Admissions.

Please note that admission as a Post-Baccalaureate student does not imply admission to an undergraduate or graduate degree program.

**Enrollment**

As with all Non-Degree seeking students, Post-Baccalaureate students are generally considered casual course takers and as such have the lowest priority in class registration. Enrollment in courses will be on a space-available basis, and degree-seeking students shall have priority should there be a wait-list. If a course has prerequisites that the student has not met, permission must be granted by the instructor before enrollment in the course. Non-Degree students may provide evidence of meeting course prerequisites by providing an unofficial transcript to the appropriate academic advisor or Registrar staff.

Post-Baccalaureate students are limited to 12 semester hours each term. Additionally, a maximum of 24 semester hours earned as a Post-Baccalaureate student can be applied toward a second bachelor's degree should a student decide to apply as a degree seeking student.

A student enrolled in this category is subject to the same periodic review of his or her record as a regular student and is subject to the University’s regulations regarding scholastic probation, dismissal, and reinstatement. (See Academic Policies and Procedures.)
Post-Baccalaureate students cannot become candidates for a degree, be eligible for honors or hold officer positions in student organizations unless and until they reapply and are admitted as regular degree seeking students under the Second Bachelor’s application category. At such time, the student shall submit official transcripts from all institutions previously attended and meet regular admission standards, which includes a minimum cumulative 2.0 in all attempted coursework.

Post-Baccalaureate students generally are not eligible for financial aid. It is recommended that applicants contact the Office of Financial Aid at 256.824.6650 for more information and to verify eligibility.

Re-Entry
A student who has not attended UAH for one or more semesters and who wishes to return should consult with the Office of the Registrar to determine enrollment status and the conditions under which studies may be resumed.

Transfer Students

Individuals who have completed 24 semester hours of transferable academic credit from regionally accredited colleges or universities with a 2.0 or better GPA may be admitted to UAH as transfer students without having to submit high school transcripts, ACT or SAT scores. Transfer students must submit official transcripts from all colleges previously attended. Transfer admissions decisions will be based on a full evaluation of transcripts from all colleges and universities attended with emphasis given to those courses in which the subject matter is acceptable and relevant to the desired UAH degree program. Applicants must be in good standing at their previous institutions and have a minimum overall 2.0 GPA as well as a minimum 2.0 GPA in all courses transferable to UAH to be considered for admission.

Applicants must demonstrate proficiency in the English language. Applicants whose first language is other than English should refer the section (p. 19) on English language requirements for nonnative speakers.

Students who have already completed a bachelor’s degree and wish to earn a Second Bachelor’s degree at UAH must meet regular transfer admission requirements. A student who is currently on suspension or dismissal from another college or university is not eligible for admission until his or her suspension period has ended or until the student is otherwise eligible to return to the prior institution.

Admission to the upper division of the College of Nursing is an action independent from admission to the University. Students interested in pursuing the BSN should refer to the academic college section of this catalog for more information.

Evaluation of Transfer Credit

The University of Alabama in Huntsville follows the practices specified in Transfer Credit Practices of Designated Educational Institutions, published by the American Association of Collegiate Registrars and Admissions Officers, in evaluating college level courses from other recognized colleges and universities for the purpose of transfer of credit to UAH. Transfer credit evaluations will be completed as early as possible, but no later than the first semester of enrollment.

Credits from an institution that is not yet accredited but has acquired candidate status from a regional accrediting agency are provisionally eligible for transfer to UAH. In order to obtain full credit for courses accepted as provisional credits, students must complete 30 semester hours at UAH and earn a “C” or better in each course attempted. Transfer credit will not be posted until this requirement has been met. Students with provisional credits should contact the Registrar upon completion of 30 semester hours at UAH.

Courses completed at unaccredited and non-candidate institutions are not accepted for credit at UAH. Credits for education completed in non-collegiate settings that have been evaluated and recommended for credit by the American Council on Education are accepted as transfer credit at UAH. As a member of Service Members Opportunity Colleges, UAH is committed to easing transfer of relevant course credits and crediting learning from appropriate military training and work experiences.

The completion of the Freshman Writing/Composition requirement at another regionally-accredited college or university will satisfy UAH’s Freshman Composition 6 credit-semester hour requirement (Freshman Composition I and II). For situations where this requirement was satisfied by less common approaches such as CLEP or credit by examination, please contact the chair of the English department.

Acceptance of transfer credit by the Admissions Office and application of credits to a specific degree program by the academic department are two separate and distinct processes. Consult an academic advisor for degree applicability within the desired degree program.

Credits earned in quarter hours will be converted to semester hours on the basis of two-thirds of one semester hour for each quarter hour.

An individual who enrolls as a non-degree student and later decides to work toward a degree must apply for admission as a degree-seeking student and request an evaluation of transfer credits. The application of such accepted credits to a particular program of study will be made and approved at the time of admission to the desired degree program.

Transfer Students from Alabama Junior/Community Colleges

A student transferring from an Alabama junior/community college may choose to fulfill the degree requirements of the UAH catalog which was in effect at the time of the student’s initial enrollment at the Alabama junior/community college, provided that the date does not exceed the seven year limit. (See
time limits section of the catalog.) This policy enables students enrolled at Alabama junior/community colleges to plan degree programs effectively and to be assured that degree requirements specified for UAH students will be equally applicable, within specified limits, to transfer students.

UAH participates in the Alabama Articulation Agreement. Students intending to transfer to UAH from Alabama junior or community colleges are encouraged to consult with their advisors, the UAH Office of Admissions, and obtain a STARS guide. This guide is also available via the Internet at http://stars.troy.edu. When planning their programs of study, this guide will identify courses for their major and will show equivalencies for community college courses.

A maximum of 50% of a degree program may be earned from a junior, community or two-year college. Requests for exceptions must be in writing and approved by dean of the college in which the student is enrolled.

**Visiting Student Program**

A cooperative arrangement exists with Alabama A&M University, Athens State University, Calhoun Community College, Oakwood University and The University of Alabama in Huntsville. Under this arrangement, a student at any of the participating institutions may request permission to attend a course at one of the other schools. Conditions governing the granting of permission include the following:

1. The student must be a full-time student or a full-time University employee who is a part-time student. The semester hours to be taken at the host institution shall be counted in determining the full time or part-time status of the student.
2. The course desired must be unavailable at the student’s home institution.
3. Visiting students are normally limited to one undergraduate course a semester at the host institution except where the second course is a laboratory required to accompany the first course or the second course is a one-semester-hour course in basic military science.
4. The student must have an overall C average, and meet all prerequisites of the host institution.
5. The student's request must be approved by his or her advisor and other appropriate personnel.
6. Students will be admitted by the host institution to a course based upon availability of space for the visitor, to be determined by the class enrollment on the last day of regular registration.

Any student interested in participating in the Visiting Student Program should contact the Registrar's Office for information regarding the procedures to be followed.

**Charger Foundations**

Welcome to Charger Foundations, a set of courses dedicated to helping you engage with new ideas, complex situations, and diverse perspectives. Encompassing almost one-third of your undergraduate curriculum, the courses of Charger Foundations will enhance your skills, expand your horizons, and encourage you to build on the core values of the Charger Nation: integrity, respect, diligence, excellence, inclusiveness, and diversity.

The development of competencies associated with these values begins with Charger Foundations coursework. Below, you will see a matrix providing an overview of the competencies central to your Foundations work and aligned with the Alabama General Studies Commission (AGSC) Area Requirements.

**Core Competencies**

The University of Alabama in Huntsville is committed to four core competencies that serve as the foundation for undergraduate general education. These four core competencies follow.

1. Effective communication (Area I)
2. Engagement with questions of values, ethics, and aesthetics as represented in literature, the humanities, and the arts (Area II)
3. Understanding of the scientific method and application of quantitative or inductive reasoning (Area III)
4. Understanding of human behavior and economic, social, and political structures as represented in the disciplines of history and the social and behavioral sciences (Area IV)

These core competencies are consistent with those of the State of Alabama mandated articulation agreement under ACT 94-303, which ensures the transferability of credits from the State's two-year institutions to its four-year institutions.

</tbody>
</table>

1 Students must take one literature and one history course. Students must also take either a second literature or history course to complete a sequence. (EH 207 + EH 208, EH 209 + EH 210, HY 103 + HY 104, or HY 221 + HY 222)

2 Based on Math placement (http://www.uah.edu/science/departments/math/undergraduate-students/placement), prerequisite (MA 112 and/or MA 113) Mathematics courses may be required. MA 171 is the preferred course for all College of Science majors.

3 No more than 6 hours can be taken in a single discipline.

4 For choices see the World Languages and Culture (p. 210) department.

Dean: Mitch Berbrier, Ph.D., Professor of Sociology

Mission

The College of Arts, Humanities, and Social Sciences is committed to excellence in teaching, research, and service in the following disciplines: fine arts, humanities, and the social and behavioral sciences, and teacher education. For its own majors, as for those in the professional schools, the College strives to provide superior liberal arts education characterized by close interaction between teachers and learners. Its goals are to impart to each student a spirit of intellectual curiosity, critical thinking, abilities in writing and oral communication, aesthetic awareness and creativity, familiarity with human history and behavior, knowledge of languages and cultures, and an understanding of the bases of ethical behavior and the duties of citizenship. Believing in the centrality of liberal learning to the mission of a university, the College is committed to maintaining a diverse community of teacher-scholars of the highest quality and to providing an environment that encourages personal and professional growth. It considers teaching and research mutually enriching activities and strives to make its knowledge and expertise available to professional programs on campus and to the educational needs of society. Through its graduates and programs, the College contributes to the cultural, intellectual, and economic growth of the state and nation.

Undergraduate Degrees and Programs

The College of Arts, Humanities, and Social Sciences awards the Bachelor of Arts degree as well as a Bachelor of Fine Arts degree in various studio art disciplines. A student’s Program of Study must total at least 120 semester hours of coursework and is comprised of four components: 1) general education requirements, 2) a major, 3) either a second major, minor, or supporting cognate studies and 4) electives. The minimum requirement for a major is 30 semester hours of coursework with at least 21 semester hours at the 300 level or above. The minimum requirement for a minor is 18
semester hours of coursework with at least 12 semester hours at the 300-level or above. The cognate studies option must be formed from two or more closely aligned disciplines and must be comprised of at least 21 semester hours with at least 12 semester hours at the 300-level or above. Specific requirements of each major and minor are provided in the appropriate departmental section of the catalog. At least 36 semester hours of a student's Program of Study must be at the 300-level or above. Please note that at least 25% of a student's major and minor must be earned at UAH.

The college of Arts, Humanities, and Social Sciences offers programs in the following disciplines:

- Ancient and Medieval Studies (p. 49)
- Art, Art History, and Design (p. 51)
- Communication Arts (p. 89)
- English (p. 100)
- Global Studies (p. 123)
- History (p. 129)
- Music (p. 147)
- Philosophy (p. 175)
- Political Science (p. 182)
- Psychology (p. 189)
- Science, Technology, and Society (p. 181)
- Sociology (p. 198)
- Theatre (p. 96)
- Women's and Gender Studies (p. 205)
- World Languages and Culture (p. 209)

Academic Advising in the College of Arts, Humanities, and Social Sciences

Frank Bell (M.A., M.A.E.D.), Senior Academic Advisor
Jana Savanapridi, Academic Advisor

The College provides academic advising for its students through the various academic departments and through the office of the Academic Advisor. All students are strongly encouraged to seek advising assistance at the beginning of their academic careers and to continue working with their advisors throughout their academic experience. All freshmen and most sophomores with an expressed interest in liberal arts are advised by the Academic Advisors for the College of Arts, Humanities, and Social Sciences, who are located in Room 336 of Morton Hall; phone 256.824.2867; email: bellf@uah.edu or jms0014@uah.edu (amy.smeal@uah.edu). In addition, a Prelaw Certificate Advisor is available to assist those who plan to apply for admission to law school. Contact John Nale at jen0005@uah.edu.

The goals of academic advising include:

1. assisting students in planning academic and life goals
2. assisting students in their personal adjustment to the UAH campus
3. aiding students in the assessment of academic needs and in developing appropriate educational plans
4. explaining and clarifying graduation requirements as well as academic policies and
5. facilitating student success

The College of Arts, Humanities, and Social Sciences Academic Advisors assist students in fulfilling the General Education Requirements and, in concert with faculty advisors, provides information about possible major fields. An official declaration of major should be filed at the end of the sophomore year or at the completion of 42 semester hours. When a student decides on a specific major and minor, the student will then initiate a Program of Study with a College of Arts, Humanities, and Social Sciences Academic Advisor. Subsequent to completion of a Program of Study, the student is advised by faculty within the declared major(s). These faculty members are specialists in their fields of interest.

Ancient and Medieval Studies Minor

The Ancient and Medieval Studies Minor allows students to appreciate ancient and medieval civilizations both as accomplishments worthy of study in their own right and for a better understanding of the modern world. This program provides an interdisciplinary framework for exploring topics that range from history of ideas and institutions to that of material culture and archaeology, literature, philosophy and languages.

Art, Art History & Design

160-B Wilson Hall
Telephone: 256.824.6114
Email: art@uah.edu

Mission

The Department of Art, Art History & Design is an accredited institutional member of the National Association of Schools of Art and Design (NASAD). Our programs are dedicated to preparing students with the knowledge and skills necessary for pursuing lives as artists, designers, art historians and other professionals. Graduates will be creative, inquisitive, and well-rounded individuals, conscious of the important roles that artistic endeavor and intellectual pursuit play within their lives and throughout our culture. The department is an integral part of the interdisciplinary experience within the university and by virtue of its commitment to the highest standards in teaching, research, and service, is dedicated to supporting and strengthening the mission of the College of Arts, Humanities, and Social Sciences.

The department of Art, Art History & Design offers the following degree programs:

- BA in Art - Art Education Concentration (p. 63)
- BA in Art - Art History Concentration (p. 65)
- BA in Art - Art Studio Concentration (p. 68)
- BFA in Art - Digital Animation Concentration (p. 60)
- BFA in Art - Graphic Design Concentration (p. 73)
- BFA in Art - Painting/Drawing Concentration (p. 76)
- BFA in Art - Photography Concentration (p. 78)
- BFA in Art - Printmaking Concentration (p. 81)
- BFA in Art - Sculpture Concentration (p. 84)

Program

The Department of Art, Art History & Design offers courses in art studio and art history leading to a Bachelor of Arts (BA) in Art or a Bachelor of Fine Arts (BFA) degree in a particular art studio concentration (Digital Animation, Graphic Design, Painting/Drawing, Photography, Printmaking, or Sculpture).
For the BA, students can concentrate in either Art Studio or Art History. The 51 semester hour Art Studio concentration allows a student to focus his or her upper-division studies on any of six areas: digital animation, graphic design, painting/drawing, photography, printmaking, or sculpture. The program culminates in a group exit show. In the 42 semester hour Art History concentration, students take a variety of courses exploring the visual culture of different regions and eras, and complete their degree by writing a senior thesis. The BA provides students with a solid foundation to pursue a career in the arts or a related field.

The BFA is the primary professional degree in Art Studio. In a BFA program, the goals are to develop the skills, concepts, and professional practices to pursue a career as an artist. It is also the preferred degree for students who plan to go on for a Master of Fine Arts (MFA) degree. This 78 semester hour major requires more studio courses than the BA and does not require a minor.

Students must apply for acceptance to the BFA program. The application, which is available in the department office, involves submission of a transcript (3.0 GPA required in Art History and Art Studio classes), two essays, and a portfolio of five pieces (one drawing, one 3-D piece, one work using color, and two additional pieces, preferably in the area of concentration). The review is typically done as a rising junior, but students should consult with their faculty mentors. The BFA Review is conducted at the end of the fall and spring terms.

All BFA students must complete an exit requirement specific to their concentration. Students who are candidates for a BFA in fine arts concentrations (Painting/Drawing, Photography, Printmaking, and Sculpture) will mount a solo exit show. Those in Digital Animation and Graphic Design will complete a comprehensive portfolio review. See your faculty mentors for guidelines.

Transfer credit for equivalent coursework in Art Studio and Art History classes will be determined by the department chair. Art majors transferring to UAH must complete at least 12 semester hours of art courses at the 300-level or above at UAH. Art Studio or Art History minors transferring in must take at least six (6) semester hours of art courses at the 300 level or above.

Majors in Art, Art History, and Design

- BA in Art - Art Education Concentration (p. 63)
- BA in Art - Art History Concentration (p. 65)
- BA in Art - Art Studio Concentration (p. 68)
- BFA in Art - Digital Animation Concentration (p. 60)
- BFA in Art - Graphic Design Concentration (p. 73)
- BFA in Art - Painting/Drawing Concentration (p. 76)
- BFA in Art - Photography Concentration (p. 78)
- BFA in Art - Printmaking Concentration (p. 81)
- BFA in Art - Sculpture Concentration (p. 84)

Minors in Art, Art History & Design

- Art History (p. 87)
- Game Production (p. 87)
- Art Studio (p. 88)
- Web Communication (p. 88)

ARH 100 - ARH SURV:ANCIENT-MEDIEVAL
Semester Hours: 3

Survey of Pre-historic to Medieval art. Course emphasizes study of cultural contexts that fostered art and introduces students to basic analytic tools and history of art history. Very little in art is completely new. Learn about the visual traditions that shaped the culture we live with today.

ARH 101 - ARH SURV:RENAISSANCE-MODERN
Semester Hours: 3

Survey of the Major Western works of art produced since the Renaissance. Relates stylistic change to changes in historical and cultural contexts. Introduces students to basic analytic tools and theories of art history.

ARH 103 - ARH SUR:NON-WESTERN TRADITIONS
Semester Hours: 3

Survey of visual culture in India, the Far East, the Americas, the Pacific, and Africa. Focuses on relationships among art, religious beliefs, politics, and cultural practices. Studying the visual traditions of other cultures fosters greater understanding as our world becomes more global. Use the analytical tools and theories of art history to foster understandings of global cultures.

ARH 120 - ARH SURV: SPECIAL TOPICS
Semester Hours: 3

Course allows for survey-style exploration of special topics in art history and related fields such as archaeology.
ARH 301 - ANCIENT GREEK ART
Semester Hours: 3

Art of ancient Greece from the Homeric period to the death of Cleopatra. Focuses on relationships of art to philosophy, politics, religion, literature, and drama. Greek art and culture heavily influenced our education system as well as the appearance of cities from Washington, DC to Huntsville, AL. Prerequisites: ARH 100 and ARH 101.

ARH 302 - MEDIEVAL ART
Semester Hours: 3

Examines architecture, sculpture, manuscripts, metalwork, textiles, and stained glass from the fall of Rome to the Gothic era. In addition to a chronological study of the period, engage in case studies on courtship, warefare, religion, and cultural interactions that influenced practices today. Prerequisites: ARH 100 and ARH 101.

ARH 303 - RENAISSANCE ART
Semester Hours: 3

The Renaissance supposedly ushered in advances in arts, humanities, and sciences. Rather than focusing on great masters, this course looks at regional trends in Italy as well as the rest of Europe to see what is innovative about this era considered a high point in Western culture. Prerequisites: ARH 100 and ARH 101.

ARH 304 - TWENTIETH CENTURY ART
Semester Hours: 3

Developments in European and American art from 1890 to World War II will be examined through historical, literary, philosophical, political, and social contexts and theories. This course guides the student in critical reading of selected art historical and interdisciplinary scholarship. Prerequisites: ARH 100 and ARH 101.

ARH 305 - ANCIENT ROMAN ART
Semester Hours: 3

Roman visual culture from the foundation of the city to its fall. Explore case studies such as the age of Augustus, Pompeii, Roman engineering, the Provinces, games and spectacle. Learn about the Roman legacy and consider its impact on modern Western Culture. Prerequisites: ARH 100 and ARH 101.

ARH 306 - COLLAPSE OF CIVILIZATIONS
Semester Hours: 3

Course investigates why some cultures succeed and others fail. Examine factors that lead to collapse to address a question relevant to the contemporary world: How severe do internal stresses have to become before relatively minor climate shifts can trigger a widespread cultural collapse? Prerequisites: ARH 103.

ARH 307 - IMPRESSIONISM & POST-IMP
Semester Hours: 3

European and American art from 1860 to 1900 examined through historical, political, social, philosophical, theoretical and literary perspective. This course guides the students in critical reading of selected art historical and interdisciplinary scholarship. Prerequisites: ARH 100 and ARH 101.

ARH 309 - CONTEMPORARY ART & ISSUES
Semester Hours: 3

Major movements since World War II examined through historical, political, social, philosophical, and literary perspectives. Contemporary art theories will also be explored. Course guides students in critical reading of selected art historical and interdisciplinary scholarship. Prerequisites: ARH 100 and ARH 101.

ARH 310 - NINETEENHT CENTURY ART
Semester Hours: 3

European and American art from 1780 to 1860 examined through historical, political, social, philosophical, theoretical and literary perspectives. Course guides students in critical reading of selected art historical and interdisciplinary scholarship. Prerequisites: ARH 100 and ARH 101.

ARH 311 - PHILOSOPHY OF ART
Semester Hours: 3

What is Art? This course explores and interrogates a wide range of contrasting aesthetic theories within the western tradition, with particular emphasis on the relation between artistic expression and philosophical frameworks. Prerequisites: ARH 100 and ARH 101. OR ARH 100 and ARH 103. OR ARH 101 and ARH 103.
ARH 320 - SPECIAL TOPICS IN ART HY
Semester Hours: 3
Developed based on student and faculty interest, special topics courses explore content and issues not currently emphasized in the curriculum. Courses may focus on a particular issue like Women in Antiquity or a particular genre such as Modern Architecture. Prerequisites: ARH 100, ARH 101, and ARH 309.

ARH 395 - INDEPENDENT STUDY
Semester Hours: 3
Directed, independent study on a topic pre-arranged with instructor, normally as an outgrowth of a 300-level art history course. Weekly mentoring meetings with instructor help student develop a workable thesis, conduct research, and manage a project that results in a well-argued paper.

ARH 400 - SENIOR THESIS
Semester Hours: 3
Culminating experience for students with an Art History concentration. With the help of a faculty mentor, student will choose a topic, conduct research, and construct a well-argued paper. Student will present this research to the faculty, displaying skills valuable in most careers.

ARS 123 - TWO-DIMENSIONAL DES/COLOR TH
Semester Hours: 3
Introduction to the principles and elements of design and color theory. Assignments explore design concepts and an understanding of color. Course stresses the development of visual and manual skills, problem solving, critical thinking, and the tools and materials used in the making of art.

ARS 140 - THREE-DIMENSIONAL DESIGN
Semester Hours: 3
Course introduces students to fundamental principles pertaining to the creation of three-dimensional art and prepares them for more advanced processes. Processes include, but are not limited to, drawing for sculpture, model making, woodworking, and sewing.

ARS 160 - DRAWING: FOUNDATIONS
Semester Hours: 3
Introduction to principles, materials, and techniques of drawing. Observational drawing and exercises teach students visual skills and introduce aesthetics and artistic expression. Class covers visual and manual skills, problem solving, critical thinking, and the tools and materials artists use.

ARS 220 - ANIMATION: INTRODUCTION
Semester Hours: 3
Course is an introduction to the principles of 3D computer generated imaging including modeling, texturing, rigging, animating, lighting, and rendering, as well as production processes such as storyboarding, sound design, and editing that together provide a basic working knowledge of 3D CGI. Prerequisites: ARS 160 and ARS 123.

ARS 230 - GRAPHIC DESIGN: INTRODUCTION
Semester Hours: 3
Introduction to graphic design theories, principles, and software. Instruction in the basics of graphic design through practical understanding of visual communication and logistics of advertising, conceptual thinking, and creative exploration. Course is a primer for the Macintosh platform. Prerequisites: ARS 123 and ARS 160.

ARS 240 - SCULPTURE: INTRODUCTION
Semester Hours: 3
Students will develop and explore their ideas using a variety of traditional and non-traditional tools, materials and processes. Assemblage, subtraction, modeling, 3D modeling/printing and casting processes will be addressed, preparing students for entrance into advanced coursework. Prerequisite: ARS 140.

ARS 250 - PHOTOGRAPHY: INTRODUCTION
Semester Hours: 3
Fundamentals and techniques of the digital camera, image capture, digital scanning, and image manipulation with Adobe PhotoShop software. Basic printing and image preparation for the web and other media will also be explored. Basic Mac OS and/or Windows skills, and digital camera required. Prerequisites: ARS 123 and ARS 160.
ARS 260 - DRAWING: INTRODUCTION  
Semester Hours: 3  
Course further develops drawing skills through study and practice. Materials, design, and creative ideas are explored. Critical thinking and visual analysis are used in critique. Students continue to develop visual and manual skills, problem solving abilities, and the use of tools and materials. Prerequisites: ARS 123 and ARS 160.

ARS 270 - PAINTING: INTRODUCTION  
Semester Hours: 3  
Students learn basic painting techniques, materials, and mediums. Problem solving assignments use two-dimensional design and color theory concepts and practices. Students are required to observe and think critically for critique and discussion. Prerequisites: ARS 123 and ARS 160.

ARS 280 - PRINTMAKING: INTRODUCTION  
Semester Hours: 3  
Introduction to basic areas of printmaking, including planographic, intaglio, and relief processes. Expands 2-D design concepts, color theory, and drawing skills. Develops proficiency with printmaking tools and materials as well as critical thinking and problem solving skills. Prerequisites: ARS 123 and ARS 160.

ARS 320 - ANIMATION: TEAM GAME DESIGN I  
Semester Hours: 3  
This course in collaborative game design and development will be co-taught by Computer Science and Art faculty. Students will work together in teams to conceptualize and completely build a working video game in a single semester. Prerequisites: ARS 220; for non-art majors, approval of instructor.

ARS 321 - ANIMATION: MODELING I  
Semester Hours: 3  
Course focuses on mesh design and creation as well as surface and lighting properties for creating production quality models. Digital sculpting, 3D painting, and other workflows will be covered in this class to help students gain experience and better understand the role of CGI modelers. Prerequisite: ARS 220.

ARS 322 - ANIMATION: CHARACTER ANIMATION I  
Semester Hours: 3  
Course explores fundamental animation principles (timing/spacing, overlap, squash/stretch, anticipation, etc) along with digital animation tools (rigging, inverse kinematics, keyframing, etc) to help students gain experience and a better understanding of the role of CG animators. Prerequisite: ARS 220.

ARS 323 - ANIMATION: SHORT FILM I  
Semester Hours: 3  
In this course students will conceptualize and fully produce 3D animated short films. The story, characters, and world will be built from the ground up, and the production pipeline will mirror common industry practices. Experience with 3D is essential, but expertise in a particular discipline is not as critical as being driven to learn and create. Prerequisites: ARS 220; for non-art majors, approval of instructor.

ARS 324 - ANIMATION: TECHNICAL ARTS I  
Semester Hours: 3  
Course will concentrate on areas of production that require both technical and art skill, often called technical art. Topics include in-depth rigging, automating workflows, simulations, writing custom tools, writing shaders, etc. Students will gain experience in a sought-after production role. Prerequisite: ARS 220.

ARS 330 - GRAPHIC DESIGN: PRINT MEDIA I  
Semester Hours: 3  
Course emphasizes creative exploration in design and layout. Students will learn intermediate methods of graphic design. Focus for this course is additional study in design, creative thinking, and industry software.

ARS 332 - GRAPHIC DESIGN: WEB DESIGN  
Semester Hours: 3  
Beginning course in web design using HTML and CSS to build effective and creative websites with strong user-centric design. Understanding HTML and current best web design practices is essential to web design and development. Prerequisite: ARS 230.

ARS 333 - GRAPH DES: WATERCOLOR & DIG I  
Semester Hours: 3  
Graphic design from an illustration and fine arts perspective. Course explores different creative directions using current software in combination with traditional watercolor media. Students will learn how to handle watercolor, develop creative concepts, and use software to support their design. Prerequisite: ARS 230.
ARS 334 - GRAPH DES: WEB USER EXPER I
Semester Hours: 3

Course places emphasis on user experience, web animation, and application for the purpose of media development. This course focuses on the understanding of user experience and user interface design through the study of how consumers interact with media. Prerequisite: ARS 230.

ARS 335 - GRAPHIC DESIGN: TYPOGRAPHY I
Semester Hours: 3

Course studies type design and the usage of basic letterforms, typographic contrast, and hierarchy of information, major type families and characteristics, the history of typography design, creativity, and grid layout. Prerequisite: ARS 230.

ARS 340 - SCULP: FABRICATION I
Semester Hours: 3

Exploration of a variety of assemblage processes including wood, metal, and fabric construction. Emphasis is placed on idea development and investigating a wide range of forms and materials. Course instruction includes welding, CNC plasma cutting, advanced wood joinery, and wood bending. Prerequisite: ARS 240.

ARS 341 - SCULP: CARVING I
Semester Hours: 3

Carving stone, wood, and other materials is investigated with emphasis placed on developing the ability to see and release forms and on the unique relationship evolving between maker and material. Instruction also includes CNC routing, wood turning, and sharpening techniques. Prerequisite: ARS 240.

ARS 342 - SCULP: CASTING I
Semester Hours: 3

Course instruction focuses on mold-making processes and materials involved in casting objects using both traditional and non-traditional methods. Metal casting is the principle focus of this course with investigation surrounding how digital practices continue to affect this age-old practice. Prerequisite: ARS 240.

ARS 346 - SCULP: FIGURE MODELING I
Semester Hours: 3

Study of the human form through direct clay modeling from life, including anatomical studies, armature construction, mold making, and casting. Nude models will be used. Prerequisite: ARS 240.

ARS 347 - SCULP: SPACE AND PLACE I
Semester Hours: 3

Investigation of installation and environmental art practices including site-specific work, public art and interactive environments. Students will explore works that relate to the experience of place and develop the potential to use sculptural objects to transform space. Prerequisite: ARS 240.

ARS 350 - PHOTO: DIGITAL I
Semester Hours: 3

Digital image creation and editing techniques using postproduction software, digital printing, and image presentation. Course addresses contemporary fine art issues and an introduction to studio lighting. Students are required to provide their own digital camera with RAW settings. Prerequisite: ARS 250.

ARS 352 - PHOTO: DARKROOM I
Semester Hours: 3

Black and white film and darkroom techniques explored as a means of expression. Course discusses artistic styles and the history of twentieth-century black and white photography. Students will produce a final fine art portfolio. 35mm camera required (available through department if necessary). Prerequisite: ARS 250.

ARS 353 - PHOTO: EXPER & HIST I
Semester Hours: 3

Introduction to alternative ways of working in the darkroom with an emphasis on historical photographic techniques. Experimentation with analog and digital materials are encouraged to produce a final portfolio. Students need a film camera (available through the department if necessary). Prerequisite: ARS 352.

ARS 355 - PHOTO: DOCUMENTARY I
Semester Hours: 3

Students study “truth” in the image using the documentary style of photography. Emphasis on the history of the genre and how to work in the field with attention to ethical issues. Students are required to provide their own digital camera with RAW settings. Prerequisite: ARS 350.
ARS 360 - DRAWING: FIGURE
Semester Hours: 3

Drawing with an emphasis on life drawing utilizing both traditional and contemporary methods and materials. Figure drawing is the traditional cornerstone of art training, and includes anatomy, observation, and advanced technical skills. Nude models will be used. Prerequisite: ARS 260.

ARS 375 - PAINTING: TRADITIONAL I
Semester Hours: 3

Investigation of figure painting, focusing on technical and philosophical approaches to using the human form as subject matter. Nude models will be used. Students are guided in the development of artistic facility and vocabulary. Prerequisite: ARS 270.

ARS 376 - PAINTING: CONTEMPORARY I
Semester Hours: 3

Contemporary approaches toward painting are explored through technical and conceptual exercises based on contemporary painting practices. Students are guided in the development of artistic facility and personal expression. Prerequisite: ARS 270.

ARS 377 - PAINTING: MIXED MEDIA I
Semester Hours: 3

Exploration of painting with mixed and non-traditional media, including the use of assemblage and collage processes, shaped or contoured canvases, and related media. Students are guided in the development of artistic facility and a vocabulary of visual symbols for personal expression. Prerequisite: ARS 270.

ARS 381 - PRINT: ETCHING & RELIEF I
Semester Hours: 3

Etching and relief print processes are explored through woodblock, linoleum cut, aquatint and line etching. Through demonstrations, critical analysis, and making prints, students develop skills with tools, techniques and concepts associated with etching and relief printmaking Prerequisite: ARS 280.

ARS 383 - PRINT: SCREENPRINT I
Semester Hours: 3

Studio practices in screenprint methods are used to synthesize technical skills and develop sophisticated aesthetic modes of printmaking. Through demonstrations, critical analysis, and making prints, students will consider complex ways in which printmaking becomes a tool for artistic expression. Prerequisite: ARS 280.

ARS 385 - PRINT: BOOK ARTS I
Semester Hours: 3

Students develop skills and aesthetic modes of narrative work through book arts. Emphasis on gaining skills in cutting, folding, measuring, gluing, sewing, printing, and binding. Students develop form and content through the exploration of structural mock ups and personal work. Prerequisite: ARS 280.

ARS 387 - PRINT: MONOPRINT & LITHOGRAPHY I
Semester Hours: 3

Monoprint and lithography are explored through planographic print processes. Through demonstrations, critical analysis, and making prints, student develop skills with tools techniques and concepts associated with monoprint and lithography printmaking. Prerequisite: ARS 280.

ARS 390 - CROSS DISCIPLINARY STUDIO I
Semester Hours: 3

This portfolio development course allows students to work with and gain feedback from studio professors and students from different studio disciplines. Students will investigate a variety of conceptual approaches as well as exploring the possibility of combined and/or non-traditional media. Prerequisites: ARS 123, ARS 140, ARS 160, ARS 260, plus a minimum of two 300-level studio courses.

ARS 393 - MULTIMEDIA I
Semester Hours: 3

Study and practice of time-based and other artistic approaches that combine elements of various art forms, usually developed along strong conceptual or thematic lines. Readings, written assignments, and presentations foster an understanding of the wide varieties of contemporary art practice. Prerequisites: ARS 123, ARS, 140, ARS 160 and ARS 260.

ARS 395 - SP TOPICS IN STUDIO ART
Semester Hours: 3

Special topics on particular media or conceptual approaches to art. This course allows the student to explore new media and/or critical theoretical approaches to contemporary art. Prerequisite: Instructor Approval.
ARS 410 - PRINCIPLES FOR TEACHING ART  
Semester Hours: 3

Focus on methods, materials and processes suitable for comprehensive art education content implementation. The course is a hands-on methods course in which students are required to design and implement art lessons to be taught to students in educational settings. Prerequisites: ED 410 and at least 4 300-level ARS courses, minimum gpa 2.75 or higher.

ARS 420 - ANIMATION: TEAM GAME DESIGN II  
Semester Hours: 3

In this advanced collaborative game design and development course, students take on leadership production roles on their game teams and help mentor junior members. Students will gain experience as team leads and learn to coordinate multidisciplinary projects. Prerequisite: ARS 320, approval of instructor for non-art majors.

ARS 421 - ANIMATION: MODELING II  
Semester Hours: 3

This advanced 3D modeling course will expand on tools and techniques taught in ARS 321 and continue to focus on creating production/portfolio quality 3D models. Students will explore additional tools and techniques for creating real-time and pre-rendered assets, and will have the ability to focus on modeling areas of personal interest. Prerequisite: ARS 321.

ARS 422 - ANIMATION: CHARACTER ANIMTN II  
Semester Hours: 3

This advanced character animation course will expand on tools and techniques taught in ARS 322 and focus on creating production/portfolio quality, full character animations. Students will explore animation tools and methods for real-time and prerendered applications, and will have the ability to focus on animation areas of personal interest. Prerequisite: ARS 322.

ARS 423 - ANIMATION: SHORT FILM II  
Semester Hours: 3

In this advanced short film production course students will take on leadership roles within their discipline and help guide the conceptualization and production of 3D animated short films. Advanced understanding of an aspect of production and short film pipelines is expected. Prerequisite: ARS 323.

ARS 424 - ANIMATION: TECHNICAL ARTS II  
Semester Hours: 3

In this advanced technical arts course, students will select areas of production interest to research, identify need for improvement, and create solutions for the identified needs. Students may create everything from production quality/speed shaders, to production/pipeline tools, to advanced character rigs. Prerequisite: ARS 324.

ARS 430 - GRAPHIC DESIGN: PRINT MEDIA II  
Semester Hours: 3

Course emphasizes print production, special applications of print design, environmental graphics, and advertising campaigns. Focus is on mastering print media methods and creating portfolio enhancement projects. Prerequisite: ARS 332.

ARS 432 - GRAPH DES: SENIOR PROJ MGMT  
Semester Hours: 3

Students develop and/or manage one or more major web projects for clients as well as a professional site for students themselves. Course is the practical application of current best web design practices including user-centric design, HTML, CSS, and current web standards.

ARS 433 - GRAPH DES: WATERCOLOR & DIG II  
Semester Hours: 3

Course extends a student's knowledge of digital and traditional watercolor media. The purpose of this course is to further explore creative techniques, develop a direction, and apply new techniques combining media. Prerequisite: ARS 333.

ARS 434 - GRAPH DES: WEB USER EXPER II  
Semester Hours: 3

Course focuses on advanced methods of user experience and user interface design. With faculty mentoring, students learn how to develop complex designs using these methods in user experience for the purpose of advanced media usage. Prerequisite: ARS 334.

ARS 435 - GRAPHIC DESIGN: TYPOGRAPHY II  
Semester Hours: 3

Course explores professional methods in type design and type application. Course teaches students how to develop advertising series and text design using illustrative approaches to hand lettering. Curriculum includes expressive methods in developing type for the purpose of environmental graphics. Prerequisite: ARS 335.
ARS 440 - SCULP: FABRICATION II  
Semester Hours: 3  
Course continues investigation of fabrication processes exploring the specific nature of each area of specialization with emphasis on integrating multiple processes into singular sculptural works. Emphasis is placed on ideation, discussion, and presentation of personal artistic interests. Prerequisite: ARS 340.

ARS 441 - SCULP: CARVING II  
Semester Hours: 3  
Continued exploration of subtractive processes with a focus on specific material, process, or context. Discussion of ideation, historical/contemporary contexts, and presentation specific to personal artistic interests. Prerequisite: ARS 341.

ARS 442 - SCULP: CASTING II  
Semester Hours: 3  
Continued exploration of mold-making, patination, casting, and foundry processes as well as investigation of contemporary methods and materials. Students develop further technical knowledge and conceptual motivation related to casting with an emphasis on individual exploration. Prerequisite: ARS 342.

ARS 447 - SCULP: SPACE AND PLACE II  
Semester Hours: 3  
Exploration of installation and environmental art practices with an emphasis on creating work at off-campus sites. Students will engage in rigorous ideation through site research and public presentation. Students will have the opportunity to create public artworks on campus and in the City of Huntsville. Prerequisite: ARS 347.

ARS 450 - PHOTO: DIGITAL II  
Semester Hours: 3  
Advanced digital image creation and image presentation. Class is open to experimentation with analog materials to produce digital media. There is an emphasis on personal style to produce a cohesive final project. Students are required to provide their own digital camera with RAW settings. Prerequisite: ARS 350.

ARS 452 - PHOTO: DARKROOM II  
Semester Hours: 3  
Advanced class in black and white darkroom photography. Students will explore the techniques of medium and large format photography to produce a final fine art print portfolio. 120 and/or 4x5 view camera required (available through department if necessary). Prerequisite: ARS 352.

ARS 453 - PHOTO: EXPER & HIST II  
Semester Hours: 3  
Advanced alternative and historical techniques in photography with an emphasis on personal style. Individual projects will be assigned to produce a cohesive portfolio. Prerequisite: ARS 353.

ARS 455 - PHOTO: DOCUMENTARY II  
Semester Hours: 3  
Advanced study of the documentary genre of photography throughout the history of the medium from the first portraits and travel photographs to the photojournalism and ethical issues of the modern world. Students are required to present a final portfolio of photographs. Prerequisite: ARS 355.

ARS 460 - DRAWING: CONCEPTUAL  
Semester Hours: 3  
Practice and theory focusing on drawing as a major medium, utilizing both traditional and contemporary methods and materials. Assignments are concept based. Nude models may be used. Prerequisite: ARS 360.

ARS 475 - PAINTING: TRADITIONAL II  
Semester Hours: 3  
Continued exploration of figurative painting processes with an emphasis on portfolio development and professional practices. Students are guided in the development of artistic facility and personal expression using paint as a medium. Prerequisite: ARS 375.

ARS 476 - PAINTING: CONTEMPORARY II  
Semester Hours: 3  
Continued exploration of contemporary painting approaches with an emphasis on portfolio development and professional practices. Students are guided in their development of artistic facility and a vocabulary of visual symbols for personal expression. Prerequisite: ARS 376.
ARS 477 - PAINTING: MIXED MEDIA II  
Semester Hours: 3  
Continued exploration of mixed and non-traditional media with an emphasis on portfolio development and professional practices. Students are guided in the development of artistic facility and a vocabulary of visual symbols for personal expression through the use of a variety of media. Prerequisite: ARS 377.

ARS 481 - PRINT: ETCHING & RELIEF II  
Semester Hours: 3  
This is an advanced course, where etching and relief are used to make an independent body of work. Students demonstrate how printmaking is a tool for conceptual exploration and expression. Through visual and written research students consider the hand-printed image within our culture. Prerequisite: ARS 381.

ARS 483 - PRINT: SCREENPRINT II  
Semester Hours: 3  
Studio practices in advanced screenprint methods are used to create an independent body of work. Students investigate how screenprinting is a tool for developing prints in an expanded way and explore the multiple through the concerns of analogue and digital possibilities. Prerequisite: ARS 383.

ARS 485 - PRINT: BOOK ARTS II  
Semester Hours: 3  
Students develop an advanced body of work in the book arts, by exploring structure and content. Content is developed through the student's independent investigation of text and image. Structure developed through the making of mockups. Honing technical skills in printing and binding is emphasized. Prerequisite: ARS 385.

ARS 487 - PRINT: MONOPRINT & LITHOGRAPHY II  
Semester Hours: 3  
Monoprint and lithography print processes are used to create an independent body of work in this advanced course. Students demonstrate how unique and multiple prints are tools for conceptual exploration and expression. Through research students consider the roll printed image within visual culture. Prerequisite: ARS 387.

ARS 490 - CROSS DISCIPLINARY STUDIO II  
Semester Hours: 3  
This advanced portfolio development course allows students to work with and gain feedback from studio professors and students from different studio disciplines. Students will create a fully developed body of work that is aesthetically and/or conceptually linked. Prerequisite: ARS 390.

ARS 492 - ART INTERNSHIP  
Semester Hours: 3  
Student applies principles, theories, and skills learned in Art Studio and/or Art History courses to on-the-job experience in a professional environment. Internship host may be suggested by the student or assigned by advisor. 150 work hours required to complete 15-week internship. Prerequisite: Instructor Approval.

ARS 493 - MULTIMEDIA II  
Semester Hours: 3  
Continued exploration of multi-media art works with emphasis on increasing sophistication and portfolio development. Readings, written assignments, and presentations foster an understanding of the wide varieties of contemporary art practice. Prerequisite: ARS 393.

ARS 494 - PROFESSIONAL PRACTICES  
Semester Hours: 3  
Course is a requirement for students in the BFA program, and is open to BA students. Includes preparation for the senior exit show or design portfolio, developing written materials for careers in the visual arts, and learning how to install and manage an art exhibition. Prerequisites: ARS 123, ARS 140, ARS 160 ARS 260, plus a minimum of four 300- or 400-level studio courses.

ARS 495 - INDEPENDENT PROJECTS  
Semester Hours: 3  
Available for an advanced major when an appropriate course is not offered to facilitate progress to graduation. May be taken only one time. Prerequisite: Instructor Approval.
### BFA in Art - Digital Animation Concentration

**Digital Animation Concentration**
- Art, BFA Digital Animation requires at least 120 credit hours.
- 36 of 120 credit hours must be taken at 300 level or higher.
- No more than 6 credit hours of HPE may count in degree requirements.
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- No more than 60 credit hours from a two-year school can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

**Total Semester Hours**  120
BA in Art - Art Education Concentration

The Art Education Discipline

- Art, BA Art Education requires at least 132 credit hours.
- Admission to teacher education program requires cumulative 2.75 or higher GPA, clear background/fingerprint check, passing AECTP (Alabama Basic Skills assessment).
- 42 of 132 credit hours must be taken at 300 level or higher.
- No more than 6 credit hours of HPE may count in degree requirements.
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- No more than 66 credit hours from a two-year school can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

<td>THREE-DIMENSIONAL DESIGN</td>
</tr>
<tr>
<td>ARS 160</td>
<td>DRAWING: FOUNDATIONS</td>
</tr>
</tbody>
</table>

### Major Requirements:

**ARH 300+ Course**

Choose four:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARS 220</td>
<td>ANIMATION: INTRODUCTION</td>
</tr>
<tr>
<td>ARS 230</td>
<td>GRAPHIC DESIGN: INTRODUCTION</td>
</tr>
<tr>
<td>ARS 240</td>
<td>SCULPTURE: INTRODUCTION</td>
</tr>
<tr>
<td>ARS 250</td>
<td>PHOTOGRAPHY: INTRODUCTION</td>
</tr>
<tr>
<td>ARS 260</td>
<td>DRAWING: INTRODUCTION</td>
</tr>
<tr>
<td>ARS 270</td>
<td>PAINTING: INTRODUCTION</td>
</tr>
<tr>
<td>ARS 280</td>
<td>PRINTMAKING: INTRODUCTION</td>
</tr>
</tbody>
</table>

Choose four upper-level courses in different disciplines:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARS 32X</td>
<td></td>
</tr>
<tr>
<td>ARS 33X</td>
<td></td>
</tr>
<tr>
<td>ARS 34X</td>
<td></td>
</tr>
<tr>
<td>ARS 35X</td>
<td></td>
</tr>
<tr>
<td>ARS 360</td>
<td>DRAWING: FIGURE</td>
</tr>
<tr>
<td>ARS 37X</td>
<td></td>
</tr>
<tr>
<td>ARS 38X</td>
<td></td>
</tr>
</tbody>
</table>

**Electives**

6 hours

Choose two additional ARS 300- or 400-level courses

**Capstone Experience:**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARS 410</td>
<td>PRINCIPLES FOR TEACHING ART</td>
</tr>
</tbody>
</table>

### Education Courses

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ED 301</td>
<td>INTRO TO EDUCATION PRACTICUM</td>
</tr>
<tr>
<td>ED 307</td>
<td>MULTICULTURAL FND EDUCATION</td>
</tr>
<tr>
<td>ED 308</td>
<td>EDUCATIONAL PSYCHOLOGY</td>
</tr>
<tr>
<td>ED 309</td>
<td>CLASSROOM &amp; BEHAVIOR MGMT</td>
</tr>
<tr>
<td>ED 315</td>
<td>EDUC EVALUATION &amp; MEASUREMENT</td>
</tr>
<tr>
<td>or ED 410</td>
<td>FOUNDATIONS EDUC EVALUAT</td>
</tr>
<tr>
<td>ED 350</td>
<td>TECHNOLOGY IN CLASSROOM</td>
</tr>
<tr>
<td>EDC 301</td>
<td>TCHG THE EXCEPTIONAL CHILD</td>
</tr>
<tr>
<td>EDC 311</td>
<td>INSTR STRATEGIES INCLUSIVE CLR</td>
</tr>
<tr>
<td>ED 408</td>
<td>TCHG READING/CONTENT AREA</td>
</tr>
</tbody>
</table>

### Internship

### The Art History Discipline

- Art, BA requires 120 credit hours.
- 36 of 120 credit hours must be taken at 300 level or higher.
- Must have a 2.0 GPA in major, minor, and overall.
- No more than 6 credit hours of HPE may count in degree requirements.
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- No more than 60 credit hours from a two-year school can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

### Freshman Composition

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>EH 101</td>

</tr>
</tbody>
</table>

**History and Social and Behavioral Sciences**

12 hours of History and Social and Behavioral Sciences chosen from the following categories below.

**History:** Choose one or two

- HY 103: WORLD HISTORY TO 1500
- HY 104: WORLD HISTORY SINCE 1500
- HY 221: UNITED STATES TO 1877
- HY 222: UNITED STATES SINCE 1877

**Social and Behavioral Sciences:** Choose two or three

- ECN 142: PRINC OF MACROECONOMICS
- ECN 143: PRINC OF MICROECONOMICS
- GS 200: GLOBAL SYSTEMS AND CULTURES
- GY 105: WORLD REGIONAL GEOGRAPHY
- GY 110: PRINCIPLES OF HUMAN GEOGRAPHY
- PSC 101: INTRO TO AMERICAN GOVERNMENT
- PSC 102: INTRO TO COMPARATIVE POLITICS
- PY 101: GENERAL PSYCHOLOGY I
- PY 201: LIFE-SPAN DEVELOPMENT
- SOC 100: INTRO TO SOCIOLOGY
- SOC 102: ANALYSIS OF SOCIAL PROBLEMS
- SOC 105: INTRO CULTURAL ANTHROPOLOGY
- SOC 150: SOCIOLOGICAL PERSP TECH & SCI

**Pre-Professional Courses**

- Any WLC 100 or 200 level
- ARH 100: ARH SURV:ANCIENT-MEDIEVAL
- ARH 101: ARH SURV:RENAISSANCE-MODERN
- ARH 103: ARH SUR:NON-WESTERN TRADITIONS

Any two 100-level ARS courses

One 200-level ARS course

Pre-professional Elective

Choose from the above categories of Humanities, History, or Social and Behavioral Sciences

**Upper Division Requirements**

**Art History Courses:**

- ARH 309: CONTEMPORARY ART & ISSUES

Select five additional ARH courses at the 300 level or above from the following:

- ARH 301: ANCIENT GREEK ART
- ARH 302: MEDIEVAL ART
- ARH 303: RENAISSANCE ART
- ARH 304: TWENTIETH CENTURY ART
- ARH 305: ANCIENT ROMAN ART
- ARH 306: COLLAPSE OF CIVILIZATIONS
### ARH 307
IMPRESSIONISM & POST-IMP

### ARH 310
NINETEENTH CENTURY ART

### ARH 311
PHILOSOPHY OF ART

### ARH 320
SPECIAL TOPICS IN ART HY

### ARH 395
INDEPENDENT STUDY

### HY 310
INTRODUCTION TO PUBLIC HISTORY

#### Senior Thesis:

### ARH 400
SENIOR THESIS

#### Art Studio Courses:

One 300-level ARS course, corresponding to 200-level taken above

#### Minor

18

#### Elective Courses

Elective hours vary by student, please see advisor.

#### Total Semester Hours

120

---

1. An additional 3 hr. upper-level studio, art history, or approved related discipline is required for art history majors with a studio minor. Please consult with advisor or chair.

2. For example, if a student opts to take ARS 280, he or she may select among the 300-level Printmaking options: ARS 381, ARS 383, ARS 385, or ARS 387.

### Year 3

#### Fall
BA in Art - Art Studio Concentration

The Art Studio Discipline

- Art, BA Art Studio requires at least 120 credit hours.
- 36 of 120 credit hours must be taken at 300 level or higher.
- No more than 6 credit hours of HPE may count in degree requirements.
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- No more than 60 credit hours from a two-year school can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

Freshman Composition

Courses at Alabama A&M

1. These are tracks are based on a student’s interest, but they are not recognized concentrations or majors. Students will receive a Bachelor of Arts; Major: Art; Concentration: Art Studio.

2. Majors with an Art Studio focus must satisfy a group exhibition (fine arts areas) or portfolio review (digital animation and graphic design) requirement. Students emphasizing digital animation and graphic design must successfully present a comprehensive portfolio as part of the coursework for their final 400-level course. All other art majors with an Art Studio focus must successfully mount a senior group exhibition of their work. Contact the Department for specific requirements.

BFA in Art - Graphic Design Concentration

**Graphic Design Concentration**

- Art, BFA Graphic Design requires at least 120 credit hours.
- 36 of 120 credit hours must be taken at 300 level or higher.
- No more than 6 credit hours of HPE may count in degree requirements.
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- No more than 60 credit hours from a two-year school can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

## Electives

Select 4 courses ARH/ARS 300-level or above  
Total Semester Hours

1. Depending on the topic of this course, it may satisfy either the Pre- or Post-1800 requirement, or function as an elective.

## BFA in Art - Photography Concentration

### Photography Concentration

- Art, BFA Photography requires at least 120 credit hours.
- 36 of 120 credit hours must be taken at 300 level or higher.
- No more than 6 credit hours of HPE may count in degree requirements.
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- No more than 60 credit hours from a two-year school can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

Art Studio Minor

21 semester hours within the Department of Art and Art History:

ARS 160 DRAWING: FOUNDATIONS 3

Select two ARS 200-level studio courses 1 6
Select four ARS 300-level studio courses 2 12

Total Semester Hours 21

1 Although all 200-level studio courses with the exception of ARS 240 require ARS 123 and ARS 160 as pre-requisites, Art Studio minors may take these courses. Please contact department chair for prerequisite override when registering.

2 May include 400-level courses if the corresponding 300-level courses are successfully completed. For example, a student passing ARS 330 may take ARS 430 to count within the 12 semester hour total at the upper division.

Web Communications Minor

The Web Communications Minor requires 30 semester hours within Art and Art History, Information Systems, Technical Writing, and Marketing.

The Web Communications Minor offers an interdisciplinary plan of study in web development with an emphasis on web design and web management. This program combines courses in graphic design (ARS), information systems (IS), marketing (MKT), and technical writing (EH or CM) to prepare students for work in the growing field of web-based communication. When combined with an appropriate major, the program prepares students for work in a number of increasingly web-reliant fields, including marketing, public relations, journalism, graphic design, technical communication, corporate communication, and publishing.

The number of courses required for the minor is moderate at 30 semester hours; however, students may complete minor courses as part of their major. Students majoring in art studio, information systems, and marketing are particularly well positioned to complete minor courses in their major degree programs with fewer semester hours of minor courses outside of the major. Students with other majors should contact the Program Director to determine the number of semester hours they can complete outside the minor. A certificate in Web Communications will be awarded to students who complete their coursework and maintain a minimum 2.5 grade point average in the minor.

Students lacking computer skills in Windows© and Macintosh© operating systems, word processing, and database applications are encouraged to take IS 146 prior to taking any of the technical courses in the minor. Familiarity with the Macintosh© operating system is useful for students entering ARS 230 and upper-level ARS courses in the minor. The Director of the Web Communications minor (256.824.6114) can advise students on the level of skill required for various courses.

The Department of Communication Arts offers a comprehensive program of study leading to a Bachelor of Arts degree. Majors and minors gain practical, critical, historical, and theoretical perspectives on human communication, preparing them for work, for social life, and for further academic studies. The department offers courses in rhetoric, interpersonal communication, communication theory and research, social media, nonverbal communication, media writing, public relations, theatre, and other specialized communication contexts.

The department of Communication Arts offers the following degree programs:

• Communication Arts BA (p. 93)
• Theatre BA (p. 96)
• Writing BA (p. 119)
• Communication Arts Minor (p. 99)
• Theatre Minor (p. 99)

Program Objectives

The Department of Communication Arts offers a variety of classes that critically examine the public, professional, cultural and personal dimensions of human communication. Our comprehensive program strategically weaves together core courses in the humanistic tradition of rhetorical theory and practice with social-scientific perspectives on communication. This curriculum capitalizes on the field's far-reaching theoretical span, having roots in ancient Greco-Roman civilizations, where rhetoric became the capstone of education and the lifeblood of civic activity, and having fertile branches in the communication media of the present and future. Our goal for the communication arts degree is to equip majors with the critical thinking skills necessary to insightfully interpret persuasive messages, carefully reflect on the relationship between humanity and persuasion, and effectively participate in a variety of communicative contexts.

The department allows students to focus on traditional rhetorical studies, with emphasis on speech, textual criticism and argument; human communication, which explores and challenges communicative rules, theories, norms, and strategies in the personal practice of interpersonal communication; and media studies, which considers various genres and channels of communication in the age of new media. Students completing the degree in communication may pursue work in public relations, social media management, fund-raising, advertising, marketing, and other communication-intensive positions, or they may pursue law school or other graduate education.

As teachers, our department is committed to developing mentoring relationships with students and maintaining rigorous standards for the classroom. Our department also recognizes the symbiotic relationship between active research and creative teaching. Therefore we maintain a climate that encourages scholarly interaction through departmental meetings, academic conferences, and scholarly publication. Finally, our department takes seriously its service to the students, the university, the community, and the profession. Through course offerings and committees we serve the College of Business, the College of Education, the College of Science, the women's studies program, as well as other university departments and programs.

Major in Communication Arts

• Communication Arts, BA (p. 93)
• Theatre, BA (p. 96)
• Writing, BA (p. 119)

Minors in Communication Arts

• Communication Arts (p. 99)
• Theatre (p. 99)
• Writing
CM 110 - VOICE AND DICTION
Semester Hours: 3
Examines and practices methods of adjusting vocal articulation, tone, pitch, pace, volume, resonance, and pronunciation for improving or changing voice quality and accents. Understanding the vocal instrument prepares students for acting and for positive self-presentation in the real world.

CM 113 - Intro to Rhetorical Communication
Semester Hours: 3
Develops public speaking skills through an examination of rhetorical theory, training, and practice. Includes informative, persuasive, and other forms of speeches to prepare students for oral presentations in college and post-college ("real world") settings.

CM 131 - ACTING TECHNIQUES I/CALHOUN
Semester Hours: 3
CM 205 - INTRO TO JOURNALISM
Semester Hours: 3
Focuses on basic news writing skills specific to print journalism. Students will learn to identify news based on news values, develop leads, organize information, write stories in the inverted pyramid style, revise drafts, and copy-edit articles, all while working under simulated deadline pressure.

CM 210 - WRITING FOR VISUAL MEDIA
Semester Hours: 3
This course offers an introduction to scriptwriting for a variety of media: commercials, PSAs, fiction films, documentaries, and the web. The art of "visual writing" is emphasized. Students produce scripts on their own while contributing to and critiquing the work of their fellow classmates. ed, communication medium. Prerequisites: EH 101, EH 102.

CM 220 - INTRO PUBLIC RELATIONS
Semester Hours: 3
This course is designed to introduce students to the public relations profession. Through study of rhetorical and communication strategies, individual and group projects, as well as speaking and writing experiences, students gain the knowledge necessary to actively participate as effective public relation professionals.

CM 231 - FOUNDATIONS OF HUMAN COMMUNICA
Semester Hours: 3
Examines how human communication shapes and adapts to a variety of practical settings public, interpersonal, organizational, mass, and technical. It prepares students for effective work in various communication contexts.

CM 251 - DECISION-MAKING IN SMALL GROUP
Semester Hours: 3
Provides working knowledge of how small groups communicate in the decision-making process. Students put theory into practice by functioning as group participants, observers, and consultants. Emphasis is placed on leadership, theoretical application, group participation, and oral presentation.

CM 260 - VIDEO PRODUCTION
Semester Hours: 3
This course provides students with an opportunity to experience the process of video production through creative projects designed to stimulate the visual artist, summon the storyteller and create the video editor.

CM 303 - PRAC & RES TECHNICAL COMMUNICA
Semester Hours: 3
Provides an overview of technical communications as a career field and as a research field. Introduces students to best practices and career options in technical communications and to the research methods used by technical communication practitioners and researchers. Prerequisite: CM 301.

CM 310 - PERSUASION
Semester Hours: 3
Provides foundation in the theories, principles, and strategies of social influence through theory and application. Students explore persuasive communication, social influence, and compliance-gaining from a social-scientific level and examine the production and consumption of persuasive messages.
CM 313 - BUSINESS & PROFESSIONAL COMM  
Semester Hours: 3  
Examines communication theories and practices relevant to the business context with a focus on oral presentations, interviewing, group leadership, and face-to-face communication. Develops knowledge and skills necessary for effective communication within business environments. (Prepare business administration students to meet the oral communication requirement in upper division and graduate business courses).

CM 320 - PRACTICUM IN WRITING  
Semester Hours: 1-3  
Writing and editing under the supervision of professionals. May be repeated up to 3 times for no more than 3 hours total credit. Enrollment requires advance planning. Prerequisites: CM 301, CM 302, enrollment in the Technical Writing Track, and a successful interview with the participating technical supervisor.

CM 330 - NONVERBAL COMMUNICATION  
Semester Hours: 3  
Examines the diversity of human nonverbal behavior and its influences on everyday communication experiences. Same as PY 330.

CM 331 - COMMUNICATION THEORY  
Semester Hours: 3  
Examines significant theoretical frameworks for the study of human communication and mass communication. Develops knowledge of communication processes and social influence. Provides preparation for senior seminar in communication theory and research. Prerequisite: CM 231.

CM 333 - INTERPERSONAL COMMUNICATION  
Semester Hours: 3  
Examines the process of communication between individuals. Prerequisite: CM 231 or permission of instructor.

CM 334 - HIST OF AMERICAN CINEMA  
Semester Hours: 3  
Investigates the American cinema as a cultural artifact by studying cultural and historical context of representations, audiences, aesthetics and industry practices in American cinema from its beginning (1895) to present.

CM 335 - SOCIAL MEDIA  
Semester Hours: 3  
This course focuses on uses and effects of social media in interpersonal, organizational, mass mediated, health, and political settings. Social media technologies take on many different forms including social networking sites, micro-blogging, wikis, online videos, and blogs. Following questions are discussed in class: Who uses social media? How do people use social media to develop relationships, get social support, and evoke political change? Is privacy dead? How do employers use social media to check on employees?.

CM 340 - SPEC TOPICS IN COMM ARTS  
Semester Hours: 3  
Topics announced in advance. Representative topics include rhetoric and war, technical theatre, and culture and communication. May be repeated twice for credit.

CM 360 - ADVANCED VIDEO PRODUCTION  
Semester Hours: 3  
Advanced Video Production is an intensive video production course designed to integrate film theory and practice. Students will learn the technical and artistic necessities of the film and video medium. Through immersive lectures, workshops, projects, and exercises, students will gain valuable experience and know-how in this exciting, fast-paced, communication medium. Prerequisite: CM 260.

CM 370 - COMM RESEARCH METHODS  
Semester Hours: 3  
Examines social scientific concepts, theories and designs commonly used interpersonal communication research. Develops knowledge and skills necessary for employment in fields involving the study of communication behavior and perception. Provides preparation for senior seminar in communication theory and research. Prerequisite: CM 231.

CM 375 - RHETORICAL CRITICISM  
Semester Hours: 3  
This course is an introduction to the critical analysis of public discourse. Specifically, it focuses on understanding how the variables of situation, audience, and rhetoric influence the production and reception of public messages. Teaching students to understand the persuasive potential of messages prepares them as critical consumers, analysts, and potential creators of such messages. Prerequisite: CM 113 or approval of instructor.
CM 400 - INTERNSHIP
Semester Hours: 1-6

Practical experience in the workplace allows the student to apply principles, theories, and skills learned in communication arts courses. Arranged by the student with consent of the chair, the student meets regularly with a faculty advisor, keeps a log of activities, and submits a report on the internship. Prerequisite: Senior Standing with CM major, and permission of instructor.

CM 405 - ADVANCED MEDIA WRITING
Semester Hours: 3

An upper level course that offers an overview of various media writing genres, including Broadcast, Advertising and Public Relations. Students complete a mix of timed assignments within each context to acquire a more complete survey of media writing and prepare for a career within the mass media. Prerequisite: CM 205.

CM 408 - CLASSICAL RHET THEORY
Semester Hours: 3

This course surveys the early development of rhetorical theory in the Western world, from its sophistic origins in the 5th century BCE, through the Greek philosophers and educators, to the Romans and early Christians. Prerequisites: CM 113.

CM 409 - CONTEMPORARY RHETORICAL THEORY
Semester Hours: 3

This course surveys contemporary rhetorical thought, including modern and postmodern theories. The course requires rigorous academic analysis and critique as students explore historical and current rhetorical concepts. Prerequisite: CM 113.

CM 414 - CREATIVE NONFICTION WRITING
Semester Hours: 3

This course introduces students to the genre of creative non-fiction. Undergraduate students (CM414) will write five essays and revise toward a final writing portfolio.

CM 416 - WOMEN ORATORS
Semester Hours: 3

Critical examination of women's public address as it has developed through women's participation in movements for abolition, temperance, women's suffrage, and equal rights.

CM 418 - LEGAL ARGUMENT
Semester Hours: 3

Examines argumentation in legal communities, that is, the way lawyers and judges provide reasoned support for the positions they defend concerning what the law requires in a given case. It considers common forms of legal argument, sources and forms of evidence, and legal values that underlie legal argument. It provides students with a critical perspective from which to judge legal arguments and a basic set of tools for developing legal arguments.

CM 426 - BURKEIAN THEORY & CRITICISM
Semester Hours: 3

This course surveys key concepts in the theory of Kenneth Burke and their discussion and application by rhetorical scholars. Through readings, lectures, and class discussions students will gain insight into this, the most important rhetorical theorist of the 20th century. Prerequisite: Junior standing.

CM 430 - MASS MEDIA IN AMERICA
Semester Hours: 3

This course provides an overview of major forms of mass media communication. It focuses on both print and electronic media, its history and structure as well as on theories of mass communication. Students will become familiar with the current role and influence of media in society.

CM 431 - SR SEM COMM THEORY/RESEARCH
Semester Hours: 3

Senior capstone course involving either a scholarly project or an approved communication-intensive internship combined with a comprehensive examination. Prerequisites: CM 370 and CM 375, and senior standing.

CM 433 - DARK SIDE INTERPERSONAL COMM
Semester Hours: 3

Traditional Interpersonal Communication pedagogy focuses on more of the positive aspects of relationship formation and maintenance. This course offers a more complete view of human relationships by exploring a variety of topics related to the "darker" side of relationships situated in the contexts of friendships, family members, and intimates. By exploring issues such as deception, fatal attraction, jealousy and envy, conflict, stalking, abuse, and many others, students acquire a more complete view of human relationships. Prerequisite: CM 231.
CM 444 - ADVERTISING  
Semester Hours: 3

This course will examine the emergence of advertising as a form of communication, its influence upon other forms of mediated communications and its impact upon culture and society. Students will learn how to develop and present an advertising strategy for an actual brand. Prerequisite: Junior standing.

CM 451 - ORGANIZATIONAL TRNG & DEVELOP  
Semester Hours: 3

Provides upper-level undergraduates with the opportunity to learn how to design organizational training programs beginning with the needs assessment and continuing through the evaluation and implementation phases. Prerequisite: Junior standing.

CM 454 - NEW MEDIA WRITING & RHETORIC  
Semester Hours: 3

This course teaches students to apply rhetorical principles across a variety of media and includes an examination of communication strategies used widely in academic and industry settings. The course focuses on new media through an exploration of digital technologies and the way digital culture and new media have dramatically impacted reading, writing, and research practices. Prerequisites: EH 101 and EH 102.

CM 455 - COMMUNICATION & CULTURE  
Semester Hours: 3

This course focuses on the application of theory and research to intercultural communication. Topics and activities assist the students in developing communication skills that improve their competence in intercultural situations. By addressing the different world views that shape our perceptions, values, attitudes, and beliefs of different people, the Culture and Communication course challenges students to become aware of cultural differences, avoid ethnocentrism, and work toward effective communication with unalike others. Prerequisite: Junior standing.

Communication Arts, BA

Students wishing to major in communication arts should make that declaration at or before the beginning of the sophomore year. Students need to work closely with a faculty advisor to plan a program of study. A major in communication arts consists of 36 semester hours of coursework in the major, at least 21 semester hours of which must be at or above the 300-level. Transfer students must take at least 12 semester hours of upper-level coursework in the major at UAH.

- Communication Arts, BA requires 120 credit hours.
- 36 of 120 credit hours must be taken at 300 level or higher.
- Must have a 2.0 GPA in major, minor, and overall.
- No more than 6 credit hours of HPE may count in degree requirements.
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- No more than 60 credit hours from a two-year school can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

**Theatre, BA**

The Theatre major includes a 24-hour core of courses, four areas of 9 hour specialization, and courses that may be selected for six hours of elective credit, totaling a 39-hour major.

- Theatre, BA requires 120 credit hours.
- 36 of 120 credit hours must be taken at 300 level or higher.
- Must have a 2.0 GPA in major, minor, and overall.
- No more than 6 credit hours of HPE may count in degree requirements.
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- No more than 60 credit hours from a two-year school can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

Communication Arts Minor

A minor in communication arts consists of 21 semester hours of coursework taken within the department, at least 12 semester hours of which must be taken at or above the 300-level. At least half of the upper-level requirement must be taken at UAH.

All minors are required to take the following:

- CM 113 Intro to Rhetorical Communication 3
- CM 231 FOUNDATIONS OF HUMAN COMMUNICATION 3
- CM 331 or CM 408 or CM 409
- Select 9 semester hours of electives from CM at the 300 level or higher 9
- Select 3 semester hours of CM Electives at any level 3

Total Semester Hours 18

Theatre Minor

Communication Arts and other majors may choose to minor in theatre. This program combines courses from theatre with electives in literature, music, art, cinema, philosophy, and nonverbal communication.

The minor requires 24 semester hours, including a 15 semester hour core, and 9 semester hours of electives from Groups A and B as specified below:

Theatre Requirements

- TH 122 THEATRE APPRECIATION 3
- TH 221 ACTING 3
- TH 225 ELEMENTS OF THEATRE PRODUCTION 3
- TH 322 THEATRE HISTORY I 3
- TH 425 THEATRE MAINSTAGE 1-3

Electives
Group A. Select three semester hours from the following:

Email: eh@uah.edu

**Mission Statement**

The English Department is comprised of scholar-teachers committed to the promotion of literacy and the cultivation of scholarly and professional competencies in critical thinking and persuasive writing across a wide spectrum of literary, technical, and rhetorical situations. We foster intellectual and cultural diversity, originality of thought, and clarity and cogency of expression through degree programs designed to advance careful, sophisticated reading practices as well as complex analytical and research skills. We aim to cultivate our students' management, organization, and production of knowledge. Our curricula prepare students for a wide array of professional endeavors, including law, teaching, publishing, technical communication, advertising, media, and business, as well as the pursuit of advanced degrees.

The Department of English offers courses to fulfill requirements for the major and minor in English and in Writing at the bachelor's degree level. It also offers a program leading to teacher certification and a minor in Technical Writing. A Master of Arts degree in English is described in the Graduate Catalog.

The department of English offers the following degree programs:

- English BA (p. 107)
- English BA with teacher certification [link]
- English Minor (p. 123)
- Technical Writing Minor (p. 123)
- Writing BA (p. 119)

**CLEP Examinations**

EH 101: Score of 50 and proficient performance on Freshman College Composition Essay.  
EH 102: Score of 65 and superior performance on Freshman College Composition Essay.

**Declaring the Major**

Students are advised to officially declare a major and to obtain a Program of Study by the end of the sophomore year or at the completion of 42 semester hours. Students may initiate the Program of Study by meeting with the College of Arts, Humanities, and Social Sciences Academic Advisor (Morton Hall, Room 336).

**Majors in English**

- English, BA Curriculum One (For Students Not Seeking Teacher Certification) (p. 107)
- English, BA Curriculum Two: English/Language Arts (For Students Seeking Teacher Certification) (p. 114)
**Minors in English**

- English (p. 123)
- Technical Writing (p. 123)

**EH 101 - COLLEGE WRITING I**
Semester Hours: 3

Introduction to academic writing, critical reading, and rhetorical knowledge.

**EH 101L - STUDIO FOR COLLEGE WRITING I**
Semester Hours: 0

A writing workshop/lab to be taken concurrently with EH 101S. The course provides supplementary instruction and practice in written English language skills, editing techniques, writing strategies (brainstorming, drafting, revising, editing) as well as critical reading (skimming, scanning, inferring) for students needing additional support. Students must pass EH 101L to pass EH 101S.

**EH 101S - COLLEGE WRITING I W/STUDIO**
Semester Hours: 3

Introduction to academic writing, critical reading, and rhetorical knowledge. For students whose preparation suggests a need for intensive support as they progress through the composition sequence. Requires concurrent registration in studio section 100L.

**EH 102 - COLLEGE WRITING II**
Semester Hours: 3

Intermediate academic writing. Focuses on research questions and techniques, as well as critical engagement with published and student texts. Prerequisite: EH 101 or 101S.

**EH 103 - ACCELERATED COLLEGE WRITING**
Semester Hours: 3

Accelerated introduction to academic writing, critical reading, and research questions. Focuses on research questions and techniques, as well as critical engagement with published and student texts. Prerequisites: minimum highschool GPA 3.5; minimum 26 on ACT or mimimum 1170 on SAT.

**EH 105 - HONORS ENGLISH SEMINAR**
Semester Hours: 3

Interpretive and comparative readings in texts of enduring intellectual, esthetic, and ethical importance; critical and analytic writing and research projects. Grading Scale: A, B, C, D, F. Minimum grade of C- required to advance to 200-level English classes. Prerequisites: Formal admission to the University Honors Program.

**EH 207 - READINGS LITERATURE/CULTURE I**
Semester Hours: 3

Critical analysis of texts from ancient times through the Age of Discovery. The course introduces students to the methods of literary study through an examination of works in their social, historical, and philosophical contexts. Prerequisite: EH 102 or EH 105.

**EH 208 - READINGS LITERATURE/CULTURE 2**
Semester Hours: 3

Critical analysis of texts from the Age of Discovery through the present. The course introduces students to the methods of literary study through an examination of works in their social, historical, and philosophical contexts. Prerequisite: EH 102 or EH 105.

**EH 209 - HONORS SEM READINGS LIT/CUL I**
Semester Hours: 3

Critical analysis of texts from ancient times through the Age of Discovery. The course offers an in-depth examination of important works and their cultural contexts in a seminar format. Prerequisite: EH 101/101S and EH 102 OR EH 105.

**EH 210 - HONORS SEM READINGS LIT/CUL 2**
Semester Hours: 3

Critical analysis of texts from the Age of Discovery through the present. The course offers an in-depth examination of important works and their cultural contexts in a seminar format. Prerequisite: EH 101/101S and EH 102 OR EH 105.
EH 211 - INTRO CREATIVE WRITING
Semester Hours: 3

Students will discuss contemporary stories/poems and will participate in workshops, where their own poetry and fiction is examined and critiqued by the class and instructor. The class culminates in two revision portfolios (one fiction and one poetry). Prerequisite: EH 102 or EH 105.

EH 242 - MYTHOLOGY
Semester Hours: 3

Archetypal, metaphorical, and historical significance of deities and myths. Prerequisite: EH 102 or EH 105.

EH 260 - INTRO TO WRITING MAJOR
Semester Hour: 1

An introduction to the Writing B.A., this course will overview the field of Writing Studies, its methods of inquiry and the interdisciplinary nature of its rhetoric, composition and language/literacy influences. Prerequisites: EH 101 and 102.

EH 300 - STRATEGIES FOR BUSINESS WRIT'G
Semester Hours: 3

Practical business writing with emphasis on rhetoric, organization, and research. Open to all students in the College of Business or by permission of the Department of English. Qualifies as elective in the English major. Does not count toward English minor. Junior standing required. Prerequisite: EH 102 or EH 105.

EH 301 - TECHNICAL WRITING
Semester Hours: 3

Practical writing, especially technical or scientific reports and proposals, with emphasis on organization, research, and presentation. Qualifies as elective in English major. Does not count toward English minor except Cognate Studies in Technical Writing. Junior Standing. Prerequisite: EH 102 or EH 105.

EH 302 - TECHNICAL EDITING
Semester Hours: 4

Clarifying, expanding, reducing, and rewriting technical reports and other documents created by others. Emphasis on elements of style and usage, revision, proofreading, and application of rhetorical techniques to the work of engineers, scientists, and technicians. Qualifies as elective in English major, but for English minor (except for Cognate Studies in Technical Writing) or certification in secondary education.

EH 303 - PRAC & RSRCH IN TECH COMM
Semester Hours: 3

Provides an overview of technical communication as a career field and as a research field. Introduces students to best practices and career options in technical communication and to the research methods used by technical communication practitioners and researchers. Prerequisite: EH 301.

EH 305 - INTRO TO ENGLISH MAJOR & MINOR
Semester Hours: 3

Designed as an introduction to the discipline of English studies, this course will address the history of textual interpretation, the theoretical debates central to the field, and the basic research skills required for academic writing. Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 320 - PRACTICUM IN WRITING
Semester Hours: 3

Writing and editing under the supervision of professionals. Enrollment requires advance planning. Does not count toward English minor except for Cognate Studies in Technical Writing. Prerequisite: EH 301 and EH 302.

EH 335 - SURVEY BRITISH LITERATURE
Semester Hours: 3

Writers, genres, and periods from Beowulf through the present. Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 336 - SURVEY AMERICAN LITERATURE
Semester Hours: 3

Writers, genres, and periods from the Age of Discovery through the present. Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 340 - ACADEMIC WRITING
Semester Hours: 3

Advanced academic writing designed to prepare students for the writing, research, and publishing requirements of their field of study. Prerequisites: EH 101 and 102.
EH 400 - COMPOSITION STUDIES FOR TCHERS
Semester Hours: 3

Introduction to effective strategies for the teaching of writing. Students will report on their own writing pedagogy as a result of reading and analyzing a range of writing research related to strategies of assigning, responding and assessing writing. Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 401 - THEORY & PRACTICE IN TECH COMM
Semester Hours: 3

Explores the relationships between common practices in technical communication and the theories that legitimize those practices. Introduces students to research and theories about fundamental issues in technical communication which may then become the basis for further graduate study in technical communication. Prerequisite: EH 301 or CM 301.

EH 403 - LITERARY CRITICISM & THEORY
Semester Hours: 3

Major texts and approaches from Plato to the present. Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 406 - FEMINISM AND COMPOSITION
Semester Hours: 3

Explores issues of gender in writing: postmodern feminism, feminist theories and research, gender and forms of writing, and finally, gender, teaching and identity. Students will investigate and analyze composition scholarship through reading, writing, and collaborative inquiry. Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 408 - HISTORY OF ENGLISH LANGUAGE
Semester Hours: 3

History of the emergence and development of English from the pre-Anglo-Saxon period to the present. Emphasis on cultural contexts. Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 410 - FICTION WRITING
Semester Hours: 3

Practice in writing fiction from conception to revision. Students will read and write contemporary literary fiction. Student work will be commented on and critiqued in regular class workshops. The class culminates in a revision portfolio. Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 411 - POETRY WRITING
Semester Hours: 3

Practice in writing poetry from conception to revision. Students will read and write contemporary poetry. Student work will be commented on and critiqued in regular class workshops. The class culminates in a revision portfolio. Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 412 - SPEC STUDIES CREATIVE WRITING
Semester Hours: 3

Topics in creative writing, professional writing, or other advanced writing announced in advance. Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 413 - CHILDREN’S & ADOLESCENT LIT
Semester Hours: 3

Course content will include the study of various genres of children's and adolescent literature and their relationship to beginning reading, enhancement of reading comprehension, and intervention instruction in the various content areas. Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 414 - CREATIVE NONFICTION WRITING
Semester Hours: 3

This composition class introduces students to the genre of creative non-fiction via revising, peer responding, prose modeling, and conferencing; and developing expertise in rhetorical writing concepts. Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 415 - ANGLOPHONE/POSTCOLONIAL LIT
Semester Hours: 3

An introduction to major concepts, figures, and works with emphasis upon historical and cultural context. Specific focus will vary. Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 418 - REP TEXTS-WOMEN WRITERS
Semester Hours: 3

Focus on women’s contribution to the literary tradition. Prerequisite: EH 207 and 208 OR EH 209 and 210.
EH 422 - STUDIES IN THE NOVEL
Semester Hours: 3
Focuses on varying topics in the novel with special attention to form. Texts may be drawn from diverse national and cultural origins. Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 423 - CONTEMPORARY BRITISH LITERATURE
Semester Hours: 3
Major works after 1945 with emphasis on historical and cultural contexts. Specific focus will vary. Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 424 - POETRY AND POETICS
Semester Hours: 3
An attempt to answer (at least provisionally) the questions "What is a poem?" and "What is poetry?". How to read a poem closely and carefully, with attention to theory, history of genres, and especially the technical aspects of poetry. Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 425 - LITERATURE, SCIENCE & TECH
Semester Hours: 3
Considers the relationships among literature, scientific theories, and technological practices through a study of texts from ancient times to the present. Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 429 - STUDIES IN AMERICAN CINEMA
Semester Hours: 3
Focuses on select topics in American cinema with an emphasis on film history, technique, aesthetics, and cultural context. Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 430 - THE AMERICAN NOVEL
Semester Hours: 3
The American novel. In alternate years the course may focus on 19th or 20th century American novels. Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 432 - AMERICAN LITERARY MODERNISM
Semester Hours: 3
Major writers and cultural/historical events surrounding American Modernism, with a focus on long texts and shorter forays into the major poets. Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 433 - WILLIAM FAULKNER
Semester Hours: 3
Critical study of the major novels. Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 434 - SCIENCE FICTION
Semester Hours: 3
Selected short stories and novels, exploring the thematic and narrative concerns of both classic and contemporary science fiction. In alternate years, the course may focus on a specific problem or concern in science fiction. Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 435 - SPECIAL STUDIES AMERICAN LIT
Semester Hours: 3
Topics announced in advance. Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 436 - READING THE EARLY REPUBLIC
Semester Hours: 3
This class will investigate cultural expression and literary critical traditions associated with the founding period of the American nation (1776-1828). Writers might include Franklin, Jefferson, Equiano, Sargent, Rowson, Brockden Brown, and Irving. Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 437 - THE AMERICAN NINETEENTH CNTRY
Semester Hours: 3
This class will investigate Anglophone cultural expression and literary critical traditions associated with long nineteenth century (1789-1919). Specific thematic concern or period of focus is left to the discretion of the instructor. Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 438 - AFRICAN AMERICAN LITERATURE
Semester Hours: 3
EH 439 - ETHNIC AMERICAN NOVEL  
Semester Hours: 3  

EH 440 - SPECIAL STUDIES IN ENGLISH LIT  
Semester Hours: 3  
Topics announced in advance. Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 441 - THE CIVIL WAR IN AMERICAN IMAGINATION  
Semester Hours: 3  
Cultural representations of the Civil War (1861-5) past and present in diaries, poetry, photography, novels, oratory, history writing, and film. Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 442 - USABILITY STUDIES  
Semester Hours: 3  
Introduces students to theory and practice of usability, which involves designing useful, easy-to-use websites, software, and products. The course involves group projects conducting real-world usability testing. Junior Standing required.

EH 448 - THE BIBLE AS LITERATURE  
Semester Hours: 3  
An introduction to the major literary forms of the Bible. Material will be approached analytically, involving both socio-historical and literary-critical perspectives. Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 450 - CHAUCER  
Semester Hours: 3  
A study of Geoffrey Chaucer's Middle English works including the early drama visions, Troilus and Criseyde, and the Canterbury Tales. Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 451 - ARTHURIAN ROMANCE  
Semester Hours: 3  
A study of Arthurian Literature focused on medieval Welsh, Scottish, English, and French poetry and prose, as well as early-modern and modern adaptations of Arthurian stories in poetry, prose, drama, and film. Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 454 - NEW MEDIA WRITING & RHETORIC  
Semester Hours: 3  
This course teaches students to apply rhetorical principles across a variety of media and includes an examination of communication strategies used widely in academic and industry settings. The course focuses on new media through an exploration of digital technologies and the way digital culture and new media have dramatically impacted reading, writing, and research practices. Prerequisites: EH 101 and EH 102.

EH 460 - 16TH CENTURY LITERATURE  
Semester Hours: 3  
Selected works from the reigns of Henry VIII and Elizabeth I Close readings of texts in their historical, intellectual, and social contexts. Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 461 - SHAKESPEARE I  
Semester Hours: 3  
Introduction to Shakespeare's canon, selected from tragedies, comedies, histories, romances; the course may include a variety of critical approaches (historical, political, feminist, queer, performative, linguistic, and cultural). Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 462 - SHAKESPEARE II  
Semester Hours: 3  
Specialized study of Shakespeare's works, with particular attention to a given genre, time period, theme, cultural context, and/or critical/theoretical approach. Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 463 - CAPSTONE IN WRITING  
Semester Hours: 2  
A senior capstone course for the Writing BA for which students will complete a portfolio of their writing. Portfolios will include reflection on and revision to selected samples of course-participants' writing and a scholarly project completed for the capstone course. Prerequisites: EH 260.
EH 465 - DRAMATIC LITERATURE  
Semester Hours: 3  
Studies in Drama and interpretive strategies for reading plays. May be organized nationally, by genre, or by theme/topic. Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 470 - MILTON  
Semester Hours: 3  
A study of the development of Milton's thought and art as it appears in his early poems, selected prose, and later poetry, with particular attention given to Paradise Lost. Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 473 - EARLY MODERN LITERATURE  
Semester Hours: 3  
This course will examine a particular theme, issue and/or debate within the early modern period, roughly 1500-1700: constructions of subjectivity and community, the exploration of the New World, the rediscovery of the natural world through scientific investigation. The course will likely introduce modern scholarship. Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 475 - RHETORIC AND WRITING  
Semester Hours: 3  
Provides a focused look at specific issues of rhetoric in society, with an emphasis on academic analysis and rhetorical strategy.

EH 480 - THE LONG EIGHTEENTH CENTURY  
Semester Hours: 3  
Introduction to major works from the Restoration through the American and French Revolutions, 1680-1800, with an emphasis on Britain and the colonies. Topics may include: the rise of the novel, the rise of the lyric, consciousness of modernity, satire, book history, working-class writers, female authorship, empire. Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 485 - THE ENLIGHTENMENT  
Semester Hours: 3  
The European Enlightenment emphasized the importance of reasoned, open-eyed investigations into nature and human society. Its legacies include the scientific method, the valuation of universal human rights, and the American and French Revolutions. Authors may include: Bacon, Behn, Hume, Swift, Voltaire, Montagu, Franklin, Jefferson, Equiano, and Wollstonecraft. Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 496 - ROMANTIC LITERATURE  
Semester Hours: 3  
Poetry and prose, 1780-1832, with a focus on English language traditions. Emphasis may vary with instructor. Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 497 - VICTORIAN LITERATURE  
Semester Hours: 3  
Representative writing of the Victorian Age (1837-1901), selected from prose, poetry, or fiction, with emphasis on social and cultural changes that inform the literature. Prerequisite: EH 207 and 208 OR EH 209 and 210.

EH 498 - INDEPENDENT Study  
Semester Hours: 3  
Individual investigation into significant issues in linguistics, literature, technical communication, or composition studies under direct supervision of instructor. Prerequisites: Written approval by the instructor and the department chair of a project prospectus. Junior or Senior standing.

EH 499 - SENIOR RESEARCH PROJECT  
Semester Hours: 3  
Required: special approval from chair and instructor.

EHL 301 - TECH WRTG FOR GRAD STUDENTS  
Semester Hours: 3  
Practical writing, especially technical or scientific reports and proposals, with emphasis on organization, research, and presentation. Designed to address the specific needs of nonnative speakers of English who are developing their skills in written discourse. Prerequisite: ESL 103.

EHL 405 - SUR GEN LINGUISTICS:APP ENG I  
Semester Hours: 3  
Come to see the strange in familiar as you engage in the study of the system of language through focused analysis of the components of English. Language is usually the lens through which we observe and report on the world. In this course, it becomes the object of observations and discussion.
EHL 406 - CRITICAL ISSUES  
Semester Hours: 3  

Come to an understanding of the complex of policies, legislation, and practice that impact the progress of English Learners in elementary and secondary schools across the U.S. Understand the impact of federal, state, and local policies on classroom settings and teacher-student interactions.

EHL 407 - ADV EH GRAM:APP LINGUISTICS II  
Semester Hours: 3  

Through an in-depth analysis of the structure of sentences and discourse in contemporary English, you will understand more clearly the impact of the choices we make in the language we use in day-to-day conversations, instructional settings, political discourse, and beyond.

EHL 409 - SPEC STUDIES: APPL LINGUISTICS  
Semester Hours: 3  

Special topics in linguistics. Focus and emphasis of topics announced in advance.

**English BA Curriculum One (For Students Not Seeking Teacher Certification)**

- English, BA requires 120 credit hours.
- Two courses (6 semester hours) at the 400 level
- No more than three sophomore literature courses (9 semester hours)
- No more than three courses (9 semester hours) in creative writing
- 36 of 120 credit hours must be taken at 300 level or higher.
- Must have a 2.0 GPA in major, minor, and overall.
- No more than 6 credit hours of HPE may count in degree requirements.
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- No more than 60 credit hours from a two-year school can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

Writing, BA

The Writing Major is an interdisciplinary program designed for students who want to make writing central to their career. The major prepares students for careers in writing-related fields—such as technical writing, publishing, social media consulting, and public relations—or graduate studies in rhetoric and composition, communication, creative writing, education, or law. By combining courses from the English and Communication Arts departments, the major gives students a comprehensive education in writing and rhetorical theory along with the techniques necessary to craft effective documents in multiple genres. All students take six core courses that instill a firm foundation in writing fundamentals and two electives that allow students to customize their education. Every student also chooses one of six concentrations: technical and professional writing, creative writing, media writing, rhetoric and composition, public relations, or a customized concentration created by the student in consultation with their advisor. The major also includes a capstone portfolio that allows students to revise documents that they can show to potential employers or graduate programs.

• Writing, BA requires 120 credit hours.
• Two courses (6 semester hours) at the 400 level
• 36 of 120 credit hours must be taken at 300 level or higher.
• Must have a 2.0 GPA in major, minor, and overall.
• No more than 6 credit hours of HPE may count in degree requirements.
• 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
• No more than 60 credit hours from a two-year school can be applied toward a UAH degree.
• For graduation application instructions, see here (p. 806).

English Minor

A minor in English requires 21 semester hours above freshman composition courses; 12 semester hours must be upper level (numbered 300 or above), including at least 3 semester hours at the 400-level. Half of the upper-level requirement (6 semester hours) must be taken at UAH.

</tbody>
</table>

1 Courses in technical and business writing may not be used in the minor without special approval by the department chair.

Technical Writing Minor

The minor prepares students for a career in technical writing by combining intensive training in writing with practical experience and fundamental technical skills. The 22 semester hour cognate studies curriculum brings together all three. All students must take EH 301, EH 302, EH 401, and EH 320 plus nine hours of relevant electives. Students with non-technical majors (e.g., English, Communication Arts) should plan early to take courses in technical or scientific fields. Students with technical majors (e.g., engineering, physics, computer science) will take additional courses focusing on writing and communication skills.

A typical program for a non-technical major is as follows:

<table>
<thead>
<tr>

Global Studies Minor

The Global Studies minor provides students a multi- and interdisciplinary minor that helps them prepare for global-oriented careers in business, government, non-governmental organizations, international development organizations, and philanthropic agencies.

Mission

The Global Studies Program fosters an interdisciplinary environment of investigation of global issues that enables students to discover, create, and communicate knowledge, develop critical thinking and intercultural competencies, and cultivate civic responsibility in preparation for opportunities in a wide array of globally-oriented fields.

The primary learning outcomes of the Global Studies Minor are:

- Students will learn cultural and physical geography.
- Students will be able to utilize foreign language skills to engage in cross-cultural dialogues and investigate global issues from multiple perspectives.
- Students will be able to evaluate and demonstrate interdisciplinary-informed perspectives on global issues.
- Students will be able to reflect critically on the global contexts of local experiences.
• Students will learn to envision possible solutions for global conflicts as well as for global inequalities and power disparities.

Coursework in Global Studies includes core courses in Global Studies, a foreign language, and elective courses selected based on the student’s thematic concentration. Students will select one of the following thematic concentrations:

• Global Markets and Politics
• Global Environment, Technology, and Health
• Global Security and Development
• Cultures in Exchange and Contact
• Area Studies (Latin America, Europe, Middle East, Africa, or Asia)

### Thematic Concentrations in Global Studies

</table>

Selected topics in Global Studies. Course may also take place abroad as part of a study abroad program. May be repeated for credit with permission of Global Studies Program director.
or WLC 201G  
or WLC 201R  
or WLC 201S  
WLC 202F  
or WLC 202G  
or WLC 202R  
or WLC 202S

Students may replace WLC 201 and WLC 202 with WLC 301-level and above foreign language courses and are encouraged to do so.

**Area Studies Options (Select one of the following options):**

**Latin America:**
Curriculum determined in consultation with GS Director.
Students must use Spanish or French as their foreign language.

**Europe:**
Curriculum determined in consultation with GS Director.
Students must use a European language as their foreign language.

**Middle East:**
Curriculum determined in consultation with GS Director.
Students are encouraged to choose Arabic, pending course availability, as their foreign language.

**Asia:**
Curriculum determined in consultation with GS Director.
Students are encouraged to select Japanese or Chinese, pending course availability, as their language of focus.

**Africa:**
Curriculum determined in consultation with GS Director.
Students are encouraged to choose French as their foreign language.

**Total Semester Hours**

24

---

**Global Studies Minor - Cultures in Exchange and Contact Concentration**

This concentration enables students to explore the challenges and opportunities in a world of increasing migration and interaction of cultures, ideas, and ways of life. Students are encouraged to examine ways of increasing communication and dialogue toward better understanding and conflict resolution.

**Core Courses**

<table>
<thead>
<tr>

</tbody>
</table>
Global Studies Minor - Global Environment, Technology, and Health Concentration

This concentration enables students to explore the environmental opportunities, challenges, and threats arising from the growing demands on resources, the challenges posed to public health from globalization, and the increasing global interconnectivity of peoples. Students are encouraged to consider ways in which these interconnections can best be utilized to promote growth, protect the environment, and create better policies and mechanisms for improving public health.

</tr>
</tbody>
</table>

Global Studies Minor - Global Markets and Politics Concentration

This concentration helps students examine the global dimensions of business, finance, and manufacturing and their impact on daily life and on local, national, and international politics. Students are also encouraged to consider alternative practices for enabling more socially equitable market outcomes and sustainable development.
## Core Courses

**History**

409 Roberts Hall  
Telephone: 256.824.6310  
Email: history@uah.edu

The Department of History offers the following undergraduate degrees:

- History, BA (p. 134)
- History, BA Secondary Education (p. 138)
- History and Social Sciences, BA Secondary (p. 141)
- History Major with Public History Track (p. 143)

**Mission**

The faculty of the History Department is committed to our students and to teaching excellence. We are all active researchers who pursue publications and participate actively in local, national, and international historical organizations. We offer a wide-range of classes that foster student growth and accommodate diverse student interests. Undergraduate classes start with general surveys and proceed to specialized electives. Every course entails reading, discussion, and writing to build skills in investigating problems, analyzing information, and crafting narratives. The goal is to help students understand continuity and change, learn the complexity of judgment of past failures and successes, and become better citizens who know national patterns and cosmopolitan perspectives. Doing history, students will become skillful in research, separating important information from the inconsequential, weighing disparate interpretations, identifying and explaining trends, discussing complex topics, and presenting information orally and in writing.

The History Department offers an undergraduate B.A., as well as a minor. The department’s majors who complete Class A&B certificates in education meet all the requirements of Alabama teacher certification. We also offer courses supporting various interdisciplinary minors within the College of Arts, Humanities, and Social Sciences.

**History for Second Area of Study for Elementary Education Teacher Candidates**

Students majoring in elementary education may select history as their second area of study. Requirements can be found in the Education section of the catalog. Preliminary counseling is available in the College of Education.

**Advanced Placement Credit**

Elective credit will be given to AP American History, European History, and/or World History. Students who have earned a score of 3 on Advanced Placement (AP) Program examinations of the College Entrance Examination Board will receive credit for HY 221, while a score of 4 or 5 will receive credit for HY 221 and HY 222 at UAH. For AP European History, students submitting a score of 3 will receive credit for HY 103, while a score of 4 or 5 will earn credit for HY 103 and HY 104. In World History, a score of 3 on the AP exam will receive credit for HY 103 and students submitting a score of 4 or 5 will receive credit for HY 103 and HY 104.
Transfer Credit

With the exception of those community colleges covered within the Alabama Articulation and General Studies agreement, only in exceptional circumstances will the History Department accept transfer credit for non-interactive telecommunications courses or correspondence courses in HY 103, HY 104, HY 221, or HY 222. Students who wish to receive such credit should petition the department chair.

CLEP/Departmental Examination Credit

A student who earns an acceptable score on the CLEP examination for World History (HY 103 and/or HY 104), or U.S. History (HY 221 and/or HY 222) may petition the History Department requesting an essay examination on the subject for which credit is desired. Acceptable scores on the CLEP examination are 56 for HY 103 and HY 104, and 60 for HY 221 and HY 222. The petition will not be reviewed until a satisfactory CLEP score has been reported. After consultation with a faculty member designated by the department chair, the student may take an essay examination. If he or she also receives B or better on the essay, credit will be granted for the appropriate course(s).

Major in History

- History, BA (p. 134)
- History, BA Secondary Education (p. 138)
- History and Social Sciences, BA Secondary (p. 141)
- History Major with Public History Track (p. 143)

Minor in History

- History (p. 145)
- Public History (p. 146)

HY 103 - WORLD HISTORY TO 1500
Semester Hours: 3
Explore the historical development of peoples and cultures from their beginnings to 1500. Trace cross-cultural interactions among societies, states, and economies of Asia, Europe, Africa, the Americas and Oceania.

HY 104 - WORLD HISTORY SINCE 1500
Semester Hours: 3
Explore global interdependence from the period of transoceanic exploration to the present. Trace cross-cultural interactions among societies, states, and economies of Asia, Europe, Africa, the Americas, and Oceania.

HY 221 - UNITED STATES TO 1877
Semester Hours: 3
Discovery of America through the Civil War and Reconstruction. Open to all students other than beginning freshmen, with exceptions as indicated.

HY 222 - UNITED STATES SINCE 1877
Semester Hours: 3
United States from the end of the Civil War era to the present. Open to all students other than beginning freshmen, with exceptions as indicated.

HY 290 - CRAFT OF HISTORY
Semester Hours: 3
Introduction to historical methods and thought, designed to prepare history majors for upper-level coursework. Required of all history majors, including transfer students. Open to non-history majors. Prerequisites: HY 103 and HY 104.

HY 306 - COLLAPSE OF CIVILIZATIONS
Semester Hours: 3
This course will investigate why some cultures succeed and others fail.

HY 310 - INTRODUCTION TO PUBLIC HISTORY
Semester Hours: 3
Introduces the interdisciplinary field of public history, including historic preservation, cultural resource management, local and state history, methodology, historical archaeology, museum studies, oral history, and archival management through academic training and practical experience.
HY 311 - HISTORIC ARCHAEOLOGY
Semester Hours: 3

Introduces intellectual and practical concepts using elements of research, fieldwork, analysis, and interpretation to explore and recreate the documented and undocumented past.

HY 312 - CULTURAL RESOURCE MANAGEMENT
Semester Hours: 3

Cultural resource management encompasses recognition description, maintenance, security, and overall management of historical items, places, and ideas through preservation and protection.

HY 315 - MILITARY HISTORY/A&M
Semester Hours: 3

HY 318 - CONSTITUTIONAL HY OF THE U.S.
Semester Hours: 3

Growth and development of the American constitutional system with emphasis on those aspects, which relate to the fundamental structure of American government and social order.

HY 325 - HISTORY OF ALABAMA
Semester Hours: 3

The state's past from colonial times to the present with emphasis on its place in United States history.

HY 329 - IMPERIAL ROME
Semester Hours: 3

Roman Empire from the Principate to the barbarian invasions.

HY 330 - HISTORY OF CHRISTIAN CHURCH
Semester Hours: 3

A study of the Church from Biblical times through the Protestant Reformation.

HY 331 - WORLD OF MIDDLE AGES
Semester Hours: 3

Survey of the origins and development of medieval society in Europe from the fall of Rome to the Age of Discovery, including the Latin West, Byzantium, and Islamic world.

HY 347 - EARLY MODERN ENGLAND
Semester Hours: 3

Course surveys the political and religious history of England under the Tudors and Stuarts to the Civil Wars and revolutions of the seventeenth century.

HY 360 - AMERICAN HISTORY THROUGH FILM
Semester Hours: 3

This course will explore how motion pictures have shaped our views on American history and how the past has shaped movie making.

HY 363 - INDIGENOUS PEOPLES OF AMERICAS
Semester Hours: 3

Surveys the history of Indigenous peoples of the Americas from the fifteenth century to the present.

HY 367 - WOMEN IN U.S. HISTORY
Semester Hours: 3

Women in the United States from the colonial period to the present.

HY 368 - AMERICAN ENVIRONMENTAL HISTORY
Semester Hours: 3

Explores the interrelationship of people and the environment in American history from 1500 to the present.

HY 370 - TECHNOLOGY IN AMERICAN HISTORY
Semester Hours: 3

Explores the history of the interrelationship of people and technology in American history from 1600 to the present.
HY 371 - US MILITARY HY FRM INDP TO PRS  
Semester Hours: 3  
Explores the evolution of the U.S. military from the War of Independence to the present.

HY 373 - FOREIGN REL US TO 1920  
Semester Hours: 3  
American foreign relations from the Revolutionary era through World War I. American territorial and commercial expansion, imperialism, and emergence as a world power.

HY 376 - SOVIET RUSSIA  
Semester Hours: 3  
Russia from the collapse of autocracy to the collapse of communism with special emphasis on the revolutions of 1917, the evolution of the Soviet state, ethnicity, and the successes and failures of the post-1945 era.

HY 381 - COLONIAL LATIN AMERICA  
Semester Hours: 3  
This course surveys the history of Colonial Latin America from the hispanic period to the wars of independence in the nineteenth century.

HY 382 - MODERN LATIN AMERICAN  
Semester Hours: 3  
This course surveys the history of Latin America from the nineteenth century to the present.

HY 383 - FOOD AND WORLD HISTORY  
Semester Hours: 3  
Examines the role of food and drink in various historical settings.

HY 384 - ISLAMIC WORLD TO 1800  
Semester Hours: 3  
This course explores how Islam emerged as a civilization and connected geographic areas across the globe. Topics include: the prophet Muhammad; early Arab conquests; the Sunni-Shie split; the expansion of the Islamic world into Europe, Africa, and Asia; and the challenge of European imperialism.

HY 385 - MODERN MIDDLE EAST  
Semester Hours: 3  
This course seeks to establish a historical basis for understanding the current events of the modern Middle East (1800-present). Topics include: the making of the modern Middle East both before and after WWI; the Arab-Israeli conflict; and the relationship between the U.S. and the Middle East.

HY 390 - WOMEN IN MODERN EUROPEAN HIS  
Semester Hours: 3  
Explores European women's history from the Enlightenment to the present. Focus on gender and women's roles in different historical contexts.

HY 391 - EUROPE, 1500-1815  
Semester Hours: 3  
Examination of the economic, scientific, social, political, and cultural developments in Europe from the Renaissance to the French Revolution.

HY 392 - EUROPE SINCE 1815  
Semester Hours: 3  
Europe from the French Revolution to the present.

HY 393 - HISTORY OF SCIENCE TO 1700  
Semester Hours: 3  
This course surveys the history of science from ancient Babylon and Greece up through the Scientific Revolution.

HY 394 - HISTORY OF MODERN SCIENCE  
Semester Hours: 3  
This course surveys the history of science from the Scientific Revolution to present-day developments.
HY 395 - HY MED ANTIQTY ENLITNMENT
Semester Hours: 3
Examines the history of medicine in Europe from Ancient and Islamic origins to the changes wrought by the Scientific Revolution and Enlightenment. The course also explores anatomy and dissection, learned vs. popular medicine, sex, and madness.

HY 399 - SPECIAL TOPIC IN HISTORY
Semester Hours: 3
Intensive examination of particular problems, periods, or topics in history.

HY 401 - DAILY LIFE IN ANCIENT ROME
Semester Hours: 3
This course will re-create the daily lives of the ancient Romans using secondary readings, ancient literature, archaeology, and film. It focuses on the lives of ordinary people, with an eye to their struggles, everyday practices, beliefs, values, and mentalities.

HY 410 - SPEC TOPICS IN PUBLIC HISTORY
Semester Hours: 3
Intensive examination of a particular problem, aspect, or methodology in public history.

HY 413 - THE OLD SOUTH
Semester Hours: 3
Southern society, economics, politics and culture concentrating on the nineteenth century South through Reconstruction.

HY 414 - THE NEW SOUTH
Semester Hours: 3
Post-Reconstruction South emphasizing the economic, social, and political readjustments made during the twentieth century. Open to students who have completed 12 semester hours in history of have senior standing or have permission of instructor.

HY 424 - THE ATLANTIC WORLD
Semester Hours: 3
Examines interactions across the Atlantic Ocean among Africans, Americans, and Europeans. This course meets the requirements for either American or non-American credit in the history major.

HY 426 - COLONIAL AMERICA
Semester Hours: 3
Explores the founding of New World colonies, including political, social, economic, and religious developments during the colonial period.

HY 427 - AGE OF AMERICAN REVOLUTI
Semester Hours: 3
Explores the multinational connections and conflicts that lead some English colonists to revolt. Considers the political, social, and economic aspects of the time period.

HY 428 - EARLY AMERICAN REPUBLIC
Semester Hours: 3
Political, social, and economic changes between the American Revolution and the nineteenth century that laid the foundation for the United States.

HY 429 - CIVIL WAR & RECONSTRUCTION
Semester Hours: 3
An examination of the major political, economic, and social developments in the United States during the Civil War and Reconstruction eras.

HY 437 - THE RISE OF MODERN AMER
Semester Hours: 3
Economic and social changes, imperialism, and the growth in government in the United States from 1877 to the 1920s.

HY 438 - MODERN AMERICA
Semester Hours: 3
American society, politics, economics, and foreign affairs from the end of World War I to the origins of the Cold War.
HY 439 - RECENT AMERICAN HISTORY
Semester Hours: 3
Contemporary America from the 1950s to the present, analyzing both domestic and foreign affairs.

HY 440 - FOREIGN REL U.S. SINCE 1920
Semester Hours: 3
United States as a world power. American involvement in World War II, Vietnam, and the Cold War, and the growth of American presence in Asia, Latin America, and the Middle East.

HY 445 - COMPTVE MILITARY PLCY & STRAT
Semester Hours: 3
A comparative analysis of the military policy and strategy of states and empires in World History.

HY 451 - SCIENCE & RELIGION IN HISTORY
Semester Hours: 3
Integrated survey of the history of science and religion in mostly Western contexts from Greek Antiquity to present debates. Prerequisites: HY 290.

HY 472 - US MILITARY HISTORY SINCE 1920
Semester Hours: 3
The evolution United States armed forces from 1920 to the present. The class will enhance understanding of the development and evolution of American strategy, doctrine, and operational issues.

HY 473 - U.S.-LATIN AMERICAN RELATIONS
Semester Hours: 3
This class focuses on the history of political, economic, and cultural interactions between Latin America and the United States from 1800 to the present. Topics include military intervention, trade, cultural exchanges, the Cold War, the drug war, and immigration.

HY 474 - RENAISSANCE & REFORMATION
Semester Hours: 3
Selected topics in the Italian Renaissance and European Reformation.

HY 475 - SECTARIANISM ISLAMIC WORLD
Semester Hours: 3
This course focuses on sectarianism, the practice and rhetoric surrounding marginalization of certain social-religious groups in the Islamic world. It explores the historical foundations of sectarianism (from early 7th century to today) both within the Islamic world and across the globe.

HY 476 - BEING YOUNG MODERN MIDDLE EAST
Semester Hours: 3
This course focuses on the lives of young men and women of the Modern Middle East. It explores how children and youth experienced historical phenomena in the region, the ways in which these experiences affected the foundations of their adulthood, and how their actions shaped historical events.

HY 480 - ROMANS&BARBARIANS LATE ANTIQTY
Semester Hours: 3
This course explores the dynamic world of Late Antiquity including political developments, social and religious transformation, and exchange patterns in the Mediterranean. It is a history of cultural interaction, continuity, and change during a formative period in western civilization.

HY 481 - EMPIRES AND NATIONS
Semester Hours: 3
Thematic focus on empires and nations as political and cultural constructs in European and world history. Students may take HY 481 more than once for credit ONLY IF 1) a different instructor teaches each offering, and 2) the temporal and/or geographic focus is distinct each time.

HY 482 - COMPTV SLAVERY & ABOLITION
Semester Hours: 3
Explore what slavery has meant in the ancient world, Indian Ocean, Africa, the United States, and/or other locations over time.

HY 483 - WOMEN & GENDER LATIN AMERICA
Semester Hours: 3
This course studies the history of women and gender relations in Latin America from the colonial period to the present.
HY 484 - LATIN AMERICAN HIST THRU FILM  
Semester Hours: 3  
Latin American history through the perspective of fictional films.

HY 485 - NAZI GERMANY AND THE HOLOCAUST  
Semester Hours: 3  
Seminar course on the historiography of Nazi Germany and the Holocaust.

HY 486 - COMMUNISM LEGACY RUSSIA EAST EU  
Semester Hours: 3  
Overview and analysis of communist states and post-communist legacies in Russia and Eastern Europe.

HY 490 - RESEARCH SEMINAR IN HY  
Semester Hours: 3  
Research and writing with primary sources and historiography. Required of all history majors. Prerequisites: HY 290. Offered once annually.

HY 492 - PUB MEMORY & INTERP  
Semester Hours: 3  
Examines how public memory is created by looking at the social, political, and economic forces that shape public history and considers how historical knowledge is conveyed to the public. Prerequisites: 6 hours in History or Instructor's Permission.

HY 493 - FUNDAMENTALS OF ARCHIVES  
Semester Hours: 3  
Survey of basic archival theory and practice, with emphasis on the role of the archivist in contemporary society.

HY 494 - DEVELOPING DIGITAL ARCHIVES  
Semester Hours: 3  
Survey of the theory and practice of developing digital access tools in archives, libraries, and museums.

HY 495 - PUBLIC HISTORY INTERNSHIP  
Semester Hours: 3  
A semester-long public history internship for completing a significant project using historical skills as a professional usually in an off-campus setting. Students must complete 125 hours of work during their internship. Permission of instructor or chair is required.

HY 498 - STUDIES IN HISTORY  
Semester Hours: 1-3  
A readings or research class on a particular problem, period or topic in history. This course may be repeated for credit.

HY 499 - INDEPENDENT STUDY  
Semester Hours: 3  
In exceptional circumstances, a student and professor may work together on a specialized topic.

**History, BA**

- History, BA requires 120 credit hours.
- 6 semester hours in US history beyond HY 221 and HY 222
- 6 semester hours in Non-US History beyond HY 103 and HY 104
- Students should take HY 290 in their Sophomore year or, for transfer students, in their first semester at UAH.
- Students should take HY 490 in their Senior year.
- Three History courses (9 semester hours) at the 400 level
- No more than two classes from the following count toward the major: HY 310, HY 311, HY 312, HY 410, HY 492, HY 493, HY 494, HY 495
- Students in the History, BA are not permitted to take the Public History minor
- 36 of 120 credit hours must be taken at 300 level or higher.
- Must have a 2.0 GPA in major, minor, and overall.
- No more than 6 credit hours of HPE may count in degree requirements.
12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
No more than 60 credit hours from a two-year school can be applied toward a UAH degree.
For graduation application instructions, see here (p. 806).

**Additional Information**

A student majoring in history will find a variety of programs of study enabling her or him to develop depth and breadth in history and related areas from the other humanities, the social sciences, mathematics, and the natural sciences. Counseling is available in the History Department for programs of study in the following:
• general
• secondary school teaching
• graduate school preparation
• pre-professional and pre-law preparation
• international studies
• public history
• and more

Students are advised to declare a major and minor and obtain a Program of Study (POS) by the beginning of the sophomore year. Students initiate the POS by meeting with the College of Liberal Arts Academic Advisors in Morton Hall 220 and following up with a faculty advisor in the department to review and sign it. Note, that while a POS is a contract and maps out the selection of courses that a student needs to progress toward a degree, he or she can always change majors and/or minors, and even colleges, at any point.

**History, BA Secondary Education**

- History, BA Secondary Education requires 128 credit hours.
- 3 semester hours in US history beyond HY 221 and HY 222 and HY 325 are required.
- 6 semester hours in Non-US History beyond HY 103 and HY 104
- Students should take HY 290 in their Sophomore year or, for transfer students, in their first semester at UAH.
- Students should take HY 490 in their Senior year.
- Three History courses (9 semester hours) at the 400 level
- No more than two classes from the following count toward the major: HY 310, HY 311, HY 312, HY 410, HY 492, HY 493, HY 494, HY 495
- Students in the History, BA Secondary education are not permitted to take the Public History minor
- 39 of 128 credit hours must be taken at 300 level or higher.
- Must have a 2.5 GPA in major, minor, and overall.
- No more than 6 credit hours of HPE may count in degree requirements.
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- No more than 64 credit hours from a two-year school can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

### Additional Information

A student majoring in history will find a variety of programs of study enabling her or him to develop depth and breadth in history and related areas from the other humanities, the social sciences, mathematics, and the natural sciences. Counseling is available in the History Department for programs of study in the following:

- general
- secondary school teaching
- graduate school preparation
- pre-professional and pre-law preparation
- international studies
- public history
Students are advised to declare a major and minor and obtain a Program of Study (POS) by the beginning of the sophomore year. Students initiate the POS by meeting with the College of Liberal Arts Academic Advisors in Morton Hall 220 and following up with a faculty advisor in the department to review and sign it. Note, that while a POS is a contract and maps out the selection of courses that a student needs to progress toward a degree, he or she can always change majors and/or minors, and even colleges, at any point.

**History and Social Science Secondary Education, BA**

- History and Social Science, BA Secondary Education requires 129 credit hours.
- 3 semester hours in US history beyond HY 221 and HY 222 and HY 325 are required.
- 6 semester hours in Non-US History beyond HY 103 and HY 104
- Students should take HY 290 in their Sophomore year or, for transfer students, in their first semester at UAH.
- Students should take HY 490 in their Senior year.
- Three History courses (9 semester hours) at the 400 level
- No more than two classes from the following count toward the major: HY 310, HY 311, HY 312, HY 410, HY 492, HY 493, HY 494, HY 495
- Students in the History and Social Science Secondary Education BA are not permitted to take the Public History minor
- 39 of 128 credit hours must be taken at 300 level or higher.
- Must have a 2.5 GPA in major, minor, and overall.
- No more than 6 credit hours of HPE may count in degree requirements.
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- No more than 64 credit hours from a two-year school can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

Elective Courses

Elective hours vary by program, please see advisor. This History, BA requires 120 semester hours.

Total Semester Hours 120

Additional Information

A student majoring in history with a public history track will find a variety of programs of study enabling her or him to develop depth and breadth in history and related areas from the other humanities, the social sciences, mathematics, and the natural sciences. Counseling is available in the History Department for programs of study in the following:

- general
- graduate school preparation
- pre-professional training in library science and museum studies
- public history
- and more

Students are advised to declare a major and minor and obtain a Program of Study (POS) by the beginning of the sophomore year. Students initiate the POS by meeting with the College of Liberal Arts Academic Advisors in Morton Hall 220 and following up with a faculty advisor in the department to review and sign it. Note, that while a POS is a contract and maps out the selection of courses that a student needs to progress toward a degree, he or she can always change majors and/or minors, and even colleges, at any point.

History Minor

A history minor must take a minimum of 21 semester hours of history including:
Public History Minor

The UAH Public History program is designed for students who are interested in careers presenting historical knowledge outside the classroom to a public audience. The minor is inter-disciplinary because public history expresses itself in various ways. It is found, for example, in museum shows, photography and works of art, tour guide brochures, video documentaries, web sites, historic preservation, writing, and artifact collection. It is also inter-disciplinary because public historians have diverse careers working in archives and libraries, state and local historical organizations, museums, historic sites, media, businesses, and throughout all levels of government.

The goal of advising will be selection of a range of courses that will fit the student's interests and broaden skills and knowledge outside the major and beyond departmental minors. The Public History Advisor will help develop a thematic focus for the minor plan of study and help choose electives that support its fulfillment.

To complete the required classes in public history, students will petition for an internship in public history relevant to their thematic focus. Otherwise, students will complete a Special Topics course in Public History.

Public History Minor requires a minimum of 21 semester hours, at least 12 semester hours at 300 level or above.

Email: music@email.uah.edu

The University of Alabama in Huntsville is an accredited institutional member of the National Association of Schools of Music.

Students are advised to officially declare a major and to obtain a Program of Study by the beginning of the sophomore year, if not before. Students may initiate the Program of Study by meeting with the College of Liberal Arts Academic Advisor (Morton Hall, Room 216).

Degrees offered:

Music, BA

Students wishing to pursue a major in music should have pre-college training in their principal performing instrument or voice and have ability to read music fluently. Basic keyboard ability is helpful but not mandatory.

Entering freshmen and transferring students are required to take a placement examination in rudiments (scales, keys, intervals, triads, general notation), music reading, and performance (principal instrument or voice). Deficiencies may be removed through remedial instruction.

The University of Alabama in Huntsville offers a Bachelor of Arts in Music with several different emphases. Students choose one (or more) of these emphasis:

- Liberal Arts Emphasis (p. 156)
- Performance Emphasis (p. 169)
- Jazz Emphasis (p. 154)
- Music Technology Emphasis (p. 166)
- Music Business Emphasis (p. 160)
- Church Music Emphasis (p. 151)
- Piano Pedagogy Emphasis (p. 172)
- Music Education Emphasis (p. 163)

Entry Requirements for Music Majors and Minors

Admission to the University of Alabama in Huntsville does not guarantee admission to the UAH Department of Music. Auditions are required for all applicants majoring or minoring in music. The audition is one of the most important factors in the admission process. It will determine admission to the Department of Music as well as eligibility for a music scholarship. Those who have not auditioned and been accepted as music majors may not take studio instruction at the 200-level.

All applicants are strongly encouraged to audition in person. Taped auditions are acceptable if travel distance precludes a personal audition. For audition dates, please consult the audition application or visit the Department of Music website at www.uah.edu/music.

Majors in Music

- Music, BA - Liberal Arts Emphasis (p. 156)
- Music, BA - Performance Emphasis (p. 169)
- Music, BA - Jazz Emphasis (p. 154)
- Music, BA - Music Technology Emphasis (p. 166)
- Music, BA - Music Business Emphasis (p. 160)
- Music, BA - Church Music Emphasis (p. 151)
- Music, BA - Piano Pedagogy Emphasis (p. 172)
- Music, BA - Music Education Emphasis (p. 163)

Minors in Music

- Music (p. 174)
- Music Technology (p. 174)
MU 100 - INTRO TO MUSIC LITERATURE  
Semester Hours: 3  
Basic music appreciation. Exploration of ideas and issues in various types of western music through reading, listening, and discussion. Offered every semester.

MU 102 - INTRODUCTION TO WORLD MUSIC  
Semester Hours: 3  
Exploration of ideas and issues in various types of non-Western music through reading, listening, and discussion. Includes optional travel abroad. Offered summer semesters only.

MU 106 - INTRO TO MUSIC TECHNOLOGY  
Semester Hour: 1  
Introduction to Music Technology provides students with an overview of the technical and scientific aspects of music such as: acoustics, music psychology/sociology, and modern electronics. There will be particular emphasis on the use of electronic devices, MIDI and computer software to facilitate recording, playback, composition, storage, performance and analysis. Offered Fall and Spring semesters only.

MU 108 - INTRODUCTION TO MUSIC THEORY  
Semester Hours: 3  
Music fundamentals presented in a practical way for students who have no musical training as well as for majors/minors with limited theory knowledge. Mechanical aspects of clefs, notation, scales, intervals, chords, and rhythm with some aural skills, and practice in writing and harmonizing melodies. For students who expect to major or minor in music, this course may not be taken for degree credit. Offered Summer and Fall semesters only.

MU 110 - INTRO ARTS MANAGEMENT  
Semester Hours: 3  
Designed to explore arts management and administration, focusing primarily on non-profit considerations, but also addressing commercial activities in the arts.

MU 120 - BEGINNING CLASS VOICE  
Semester Hour: 1  
This course is designed to aid beginning singers in learning the fundamentals of solo singing.

MU 130 - PIANO CLASS  
Semester Hour: 1  
Techniques of performance, note reading, and basic musicianship.

MU 131 - PIANO CLASS II  
Semester Hour: 1  

MU 140 - BEGINNING GUITAR CLASS  
Semester Hour: 1  
The course objective is to provide basic guitar instruction for students who have had little or no experience playing the guitar. The course will cover note reading, posture, chords, strumming patterns, simple arpeggios, scales, and simple to intermediate solo playing.

MU 199 - MUSIC FORUM  
Semester Hours: 0  
Concert attendance is an indispensable aspect of a student's music education. Attendance requirements for this course include Thursday morning Music Forums as well as the number of formal concerts specified in the syllabus.

MU 201 - MUSIC THEORY I  
Semester Hours: 3  
Fundamentals of basic musicianship through practical as well as theoretical studies. Development of skills in written harmony and analysis. Appropriate Musicianship skills (e.g. MU 203) to be taken concurrently throughout theory program. Prerequisites: The approval of instructor or department chair. Offered Spring semesters only.

MU 202 - MUSIC THEORY II  
Semester Hours: 3  
Continuation of MU 201. Offered Fall semesters only. Prerequisites: MU 201 and MU 203.
MU 203 - MUSICIANSHIP SKILLS I  
Semester Hour: 1  
To be taken concurrently with MU 201 and designed to complement written studies. Exercises in sight singing using solfege, numbers or other systems. Basic conducting patterns, rhythmic execution and melodic, harmonic, and rhythmic dictation. Prerequisites: Approval of instructor or department chair. Offered Spring semesters only.

MU 204 - MUSICIANSHIP SKILLS II  
Semester Hour: 1  
Continuation of MU 203. Offered Fall semesters only. Prerequisites: MU 201 and MU 203.

MU 205 - JAZZ THEORY  
Semester Hours: 2  
This course serves as an introduction to the theoretical analysis of jazz harmony, with an emphasis on styles from the bebop era and later. Offered every other Fall semester. Prerequisites: MU 201.

MU 207 - MUSIC TECHNOLOGY I  
Semester Hours: 3  
Students will learn the basics of using a computer interface to create and edit music, using a software MIDI sequencer and Digital Audio Workstation. Students will learn the basics of MIDI sequencing and music production. Prerequisites: MU 106.

MU 208 - MUSIC TECHNOLOGY II  
Semester Hours: 3  
Students will learn advanced techniques in digital audio production, including (but not limited to): Advanced MIDI sequencing, audio sampling, and production/mastering. Prerequisites: MU 106, MU 207.

MU 301 - THEORY OF MUSIC III  
Semester Hours: 3  
A study on chromatic harmony and a continuation of the studies of MU 201 and MU 202. Prerequisites: MU 202 and MU 204.

MU 302 - MUSICAL MATLS OF MODERN ERA  
Semester Hours: 3  
Systems of tonal organization, compositional procedures, terminology, and analytical methods that related to music since 1900. Offered every other Fall semester only. Prerequisites: MU 301 and MU 303 and MU 304.

MU 303 - MUSICIANSHIP SKILLS III  
Semester Hour: 1  
Continuation of MU 204. Offered Spring semesters only. Prerequisites: MU 202 and MU 204.

MU 305 - MUSIC TECHNOLOGY I  
Semester Hours: 3  
This course will focus primarily on analogue and digital audio systems setup and implementation. Mixing consoles, amplifiers, loudspeakers, microphones, keyboards, playback equipment, processing, cabling, configuration, computer hardware and software will be discussed and demonstrated in depth. Prerequisite: MU 106.

MU 306 - MUSIC TECHNOLOGY  
Semester Hours: 3  
An exploration of music technology hardware and software, including and overview of acoustics, MIDI and digital audio data structures, and an introduction to multimedia authoring. Offered every other Spring semester only. Prerequisites: MU 106 and EE 100.

MU 311 - HISTORY OF MUSIC I  
Semester Hours: 3  
Focus on music as an art in western civilization to 1750. Representative musical works and style. Understanding of musical concepts in view of historical background and cultural context. Offered Fall semesters only. Prerequisites: MU 100 and MU 301.

MU 312 - HISTORY OF MUSIC II  
Semester Hours: 3  
Focus on music as an art in western civilization from 1750 to the present. Representative musical works and style. Understanding of musical concepts in view of historical background and cultural context. Offered Spring semesters only. Prerequisites: MU 100 and MU 301.
MU 313 - SURVEY OF CHURCH MUSIC  
Semester Hours: 3  
Explores Christian music from historical and musical perspectives. Prerequisites: MU 100 and MU 301.

MU 314 - THE BEATLES  
Semester Hours: 3  
The purpose of this course is to familiarize the student with the music, lyrics, recordings, personal and public lives, production techniques, career strategy, social ramifications, and technological impact of the musical group known as The Beatles. The course will provide the student with an appreciation for the music itself, and a broader comprehension of the social, economic, political, and cultural upheavals that gave rise to the musical trends of the Sixties.

MU 316 - HIST & APPRECIATION OF JAZZ  
Semester Hours: 3  
This course is designed to explore the history and development of jazz as an art form, from its origins as popular music to its evolution into an Art Music. Improvisation will be explained and explored in the context of the different styles of jazz. The course will focus on understanding through listening to jazz. Every other spring semester only. Prerequisite: MU 100.

MU 317 - JAZZ ARRANGING  
Semester Hours: 2  
This course provides the student with instruction in arranging for small and large jazz ensembles, both instrumental and vocal. Offered every other Spring semester only. Prerequisite: MU 205.

MU 320 - PIANO PEDAGOGY  
Semester Hours: 2  
Materials, techniques, and practices in teaching beginners and students through lower advanced grades of piano. Practical experience. Offered upon demand. Prerequisite: approval of instructor.

MU 321 - PIANO PEDAGOGY II  
Semester Hours: 2  
An examination of relevant methods in piano pedagogy and technique for all levels of instruction. The course will also assess the historical achievements made by previous pedagogues in the field of piano pedagogy. Prerequisite: MU 320.

MU 322 - DICTION FOR SINGERS  
Semester Hours: 2  
Intended as an overview for vocal and choral students who wish to learn the diction requirements for singing in Latin, Italian, German, French, and English. Offered every Fall semester only. Prerequisite: MUA 111.

MU 325 - CONDUCTING  
Semester Hours: 2  
Basic techniques of choral and instrumental conducting. Offered Fall semesters only. Prerequisite: MU 301.

MU 360 - CONDUCTING/OAKWOOD  
Semester Hours: 2

MU 399 - SPECIAL TOPICS IN MUSIC  
Semester Hours: 3  
Special topics in music. Focus and emphasis of topics announced in advance. Offered upon demand.

MU 401 - FORM AND ANALYSIS  
Semester Hours: 2  
Musical forms and analysis. Offered every other Fall semester only. Prerequisites: MU 303 and 312.

MU 402 - CHURCH MUSIC METDS, MATRL & AD  
Semester Hours: 3  
Church Music Methods, Materials, and Administration. Prerequisite: MU 301.

MU 404 - MUSIC TECHNOLOGY INDIV PROJECT  
Semester Hour: 1  
Three-semester sequence for students enrolled in music technology majors and minors. Students will create individual projects in MIDI, sound creation and editing, and multimedia. Prerequisite: MU 306.
MU 406 - INTERNSHIP IN MUSIC TECHNOLOGY  
Semester Hours: 3  
An internship of eight hours per week working in the music technology industry. Offered upon demand. Prerequisite: MU 306.

MU 407 - INTERNSHIP MUSIC BUSINESS  
Semester Hours: 3  
Internship in Music Business. Prerequisites: MU 100 and MU 110 and MU 301 and MKT 301 and MGT 301 and FiN 410.

MU 408 - INTERNSHIP CHURCH MUSIC  
Semester Hours: 3  
An internship of nine hours per week working in church music. Prerequisites: MU 100 and MU 301 and MU 313 and MU 402 and MUE 328.

MU 409 - INTERNSHIP GRP PIANO PEDAGOGY  
Semester Hour: 1  
An internship of three hours per week working with an approved group piano program. Prerequisites: MU 100 and MU 321 and MU 420 and MUE 328.

MU 410 - INTERNSHIP INDIVID PIANO PEDAG  
Semester Hours: 3  
An internship of nine hours per week working with a local piano teacher. Prerequisites: MU 100 and MU 321 and MU 420 and MUE 328.

MU 411 - INTNSHIP INDVL PIANO PEDAGOGY  
Semester Hours: 3  
Courses of study and activity developed by the student and submitted to music faculty for approval. Projects to reinforce learning and performance experiences. May be repeated, but no more than two hours count toward degree requirements. Offered upon demand. Prerequisites: MU 100 and MU 321 and MU 420 and MUE 328.

MU 416 - ORCHESTRATION  
Semester Hours: 2  
Instruments of the band and orchestra, their ranges, transpositions, and capabilities. Practical experience in arranging for instruments. Offered every other Fall semester only. Prerequisite: MU 302.

MU 420 - PIANO LITERATURE  
Semester Hours: 2  
Music for string keyboard instruments from the pre-pianoforte period to the present. Representative works from all periods. Offered upon demand. Prerequisites: MU 302 and MU 304 and MU 312.

MU 425 - ADVANCED CONDUCTING  
Semester Hours: 2  
Review of basic conducting patterns. Emphasis on communication as the role of the conductor. Detailed score preparation. Offered every other Spring semester only. Prerequisite: MU 325.

MU 440 - STUDIO INSTR-VOICE  
Semester Hours: 0.5  

Music, BA - Church Music Emphasis

The Bachelor of Arts in Music with an Emphasis in Church Music includes the standard College of Liberal Arts General Education Requirements, the Music Core, an additional 21 semester hours of music, sociology, and psychology coursework, and electives to total 120 semester hours. The core of this emphasis is a traditional music degree, with the same “classical” performance requirements as in the other music emphases. Students with an interest in church music will benefit from the degree offering.

- Music, BA requires 120 credit hours.
- No minor is required.
- Must have a 2.0 GPA in major and overall.
- No more than 6 credit hours of HPE may count in degree requirements.
- 36 of 120 credit hours must be taken at 300 level or higher.
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- No more than 60 credit hours from a two-year school can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

Students must pass this course 7 times, transfer students must pass this course for every semester they are in enrolled as a Music major at UAH.
### Music, BA - Jazz Emphasis

The Bachelor of Arts in Music with an Emphasis in Jazz includes the standard College of Liberal Arts General Education Requirements, the Music Core, an additional 25 semester hours of music coursework, and electives to total 120 semester hours. The core of this emphasis is a traditional music degree, with the same “classical” performance requirements as in the other music emphases. Students desiring additional studies in jazz beyond the standard music major will benefit from this degree offering.

- Music, BA requires 120 credit hours.
- No minor is required.
- Must have a 2.0 GPA in major and overall.
- No more than 6 credit hours of HPE may count in degree requirements.
- 36 of 120 credit hours must be taken at 300 level or higher.
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- No more than 60 credit hours from a two-year school can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

### Mathematics and Natural Sciences

Total: 11 credits

Mathematics: Choose one (3 credits)

- MA 107: ALGEBRA WITH APPLICATIONS
- MA 110: FINITE MATHEMATICS
- MA 112: PRECALCULUS ALGEBRA
- MA 113: PRECALCULUS TRIGONOMETRY
- MA 115: PRECALCULUS ALGEBRA & TRIG
- MA 120: MATH PROFESSIONAL APPLICATIONS
- MA 171: CALCULUS A

Natural Sciences: Choose any two (8 credits)

- AST 106: EXPLORING THE COSMOS I
- AST 107: EXPLORING THE COSMOS II
- BYS 119: PRINCIPLES OF BIOLOGY
- BYS 120: ORGANISMAL BIOLOGY
- CH 101: INTRO TO CHEMISTRY
- CH 105: INTRO CHEMISTRY LAB
- CH 123: GENERAL CHEMISTRY II
- CH 126: GENERAL CHEMISTRY LAB II
- ESS 103: ENVIRONMENTAL EARTH SCIENCE
- ESS 111: CLIMATE AND GLOBAL CHANGE
- PH 100: CONCEPTUAL PHYSICS
- PH 101: GENERAL PHYSICS I
- PH 102: GENERAL PHYSICS II
- PH 111: GEN PHYSICS W/CALCULUS I
- PH 114: GENERAL PHYSICS LAB I
- PH 112: GEN PHYSICS W/CALC II
- PH 115: GENERAL PHYSICS LAB II
- PH 113/116: GEN PHYSICS W/CALC III

### History and Social and Behavioral Sciences

Total: 12 credits

History: Choose one or two (3-6 credits)

- HY 103: WORLD HISTORY TO 1500
- HY 104: WORLD HISTORY SINCE 1500
- HY 221: UNITED STATES TO 1877
- HY 222: UNITED STATES SINCE 1877

Social and Behavioral Sciences: Choose two or three (6-9 credits)

- ECN 142: PRINC OF MACROECONOMICS
- ECN 143: PRINC OF MICROECONOMICS
- GS 200: GLOBAL SYSTEMS AND CULTURES
- GY 105: WORLD REGIONAL GEOGRAPHY
- GY 110: PRINCIPLES OF HUMAN GEOGRAPHY
- PSC 101: INTRO TO AMERICAN GOVERNMENT
- PSC 102: INTRO TO COMPARATIVE POLITICS
- PY 101: GENERAL PSYCHOLOGY I
- PY 201: LIFE-SPAN DEVELOPMENT
- SOC 100: INTRO TO SOCIOLOGY
- SOC 102: ANALYSIS OF SOCIAL PROBLEMS
Pre-Professional Courses
Any WLC 100 or 200 level course

Music Core

The Music Core consists of a common 40 semester hours of music courses that are included in every Bachelor of Arts degree in Music.

Principal Instrument
- MUA 200-level
- MUA 300-level
- MUA 400-level
- MUA 498

Music Theory
- MUA 200-level
- MUA 300-level
- MUA 400-level
- MUA 498

Music Forum

Students must pass this course 7 times, transfer students must pass this course for every semester they are enrolled as a Music major at UAH

Jazz Emphasis

At least three semesters

Elective Courses

Elective hours vary by program, see advisor.

Total Semester Hours

1 Must include at least one hour of MUX 396

Music, BA - Liberal Arts Emphasis

The Bachelor of Arts in Music with an Emphasis in Liberal Arts includes the General Education Requirements, the Music Core, a minor (or second major) in a discipline other than music, and electives to total 120 semester hours. This emphasis serves as a traditional liberal arts education. Students with dual interests and abilities will benefit from this degree offering.

- Music, BA requires 120 credit hours.
- 36 of 120 credit hours must be taken at 300 level or higher.
- Must have a 2.0 GPA in major, minor, and overall.
- No more than 6 credit hours of HPE may count in degree requirements.
• 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
• No more than 60 credit hours from a two-year school can be applied toward a UAH degree.
• For graduation application instructions, see here (p. 806).

Music, BA - Music Business Emphasis

The Bachelor of Arts in Music with an Emphasis in Music Business includes the standard College of Liberal Arts General Education Requirement, the Music Core, an additional 21 semester hours of music and business coursework, and electives to total 120 semester hours. The core of this emphasis is a traditional music degree, with the same “classical” performance requirements as in the other music emphases. Students with dual interests in music and business will benefit from this degree offering.

- Music, BA requires 120 credit hours.
- No minor is required.
- Must have a 2.0 GPA in major and overall.
- No more than 6 credit hours of HPE may count in degree requirements.
- 36 of 120 credit hours must be taken at 300 level or higher.
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- No more than 60 credit hours from a two-year school can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

1 Must include at least one hour of MUX 396

### Music, BA - Music Education Emphasis

The Bachelor of Arts in Music with an Emphasis in Music Education includes 38 semester hours of General Education Requirements, the 40 semester hour Music Core, an additional 21 semester hours of music and professional music education coursework, and 37 semester hours of courses within the Department of Education, for a total of 136 semester hours. The course of study integrates music and professional education courses to develop a superior music teacher, certified to teach at all levels P-12 (Class B Professional Teacher’s Certificate) with emphasis in either vocal or instrumental music. Students must demonstrate throughout their course of study competencies in both performance and teaching. Because of the demands of this program, there is little opportunity to elect courses other than those required and outlined below.

### General Education Requirements for Vocal and Instrumental Music Education

The General Education Requirements for the Music Education Emphasis are different from the General Education Requirements for other music emphases. The Music Education Emphasis leads to meeting the requirements for earning an Alabama Class B Professional Teacher’s Certificate.

- Music, BA requires 120 credit hours.
- No minor is required.
- Must have a 2.0 GPA in major and overall.
- No more than 6 credit hours of HPE may count in degree requirements.
- 36 of 120 credit hours must be taken at 300 level or higher.
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- No more than 60 credit hours from a two-year school can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

1 The Music Core consists of a common 40 semester hours of music courses that are included in every Bachelor of Arts degree in Music. This part of the curriculum includes private lessons, ensembles, and courses in music history and literature, music theory, conducting, and music technology. See the course lists below for specifics.

2 At least half must be large conducted ensembles and at least one semester hour must be chamber ensembles.

Music, BA - Music Technology Emphasis
The Bachelor of Arts in Music with an Emphasis in Music Technology includes the standard College of Arts, Humanities, and Social Sciences General Education Requirements, the Music Core, an additional 22 semester hours of music technology, electrical engineering, and computer engineering coursework, and electives to total 120 semester hours. The core of this emphasis is a traditional music degree, with the same “classical” performance requirements as in the other music programs. Students with dual interests in music and computer technology will benefit from this degree offering.

- Music, BA requires 120 credit hours.
- No minor is required.
- Must have a 2.0 GPA in major and overall.
- No more than 6 credit hours of HPE may count in degree requirements.
- 36 of 120 credit hours must be taken at 300 level or higher.
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- No more than 60 credit hours from a two-year school can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

**Pre-Professional Courses**

3

Any WLC 100 or 200 level course

**Music Core**

The Music Core consists of a common 40 semester hours of music courses that are included in every Bachelor of Arts degree in Music.

**Principal Instrument**

9

- MUA 200-level
- MUA 300-level
- MUA 400-level
- MUA 498 SENIOR RECITAL

**Music Theory**

12

- MU 201 MUSIC THEORY I
- MU 203 MUSICIANSHIP SKILLS I
- MU 202 MUSIC THEORY II
- MU 204 MUSICIANSHIP SKILLS II
- MU 301 THEORY OF MUSIC III
- MU 303 MUSICIANSHIP SKILLS III

**Ensembles**

7

- MUX 300-level

**Additional Music Requirements**

9

- MU 106 INTRO TO MUSIC TECHNOLOGY
- MU 311 HISTORY OF MUSIC I
- MU 312 HISTORY OF MUSIC II
- MU 325 CONDUCTING

**Music Forum**

0

Students must pass this course 7 times, transfer students must pass this course for every semester they are enrolled as a Music major at UAH

- MU 199 MUSIC FORUM

**Performance Emphasis**

21

- MUA 300 level
- MUA 302 MUSICAL MATLS OF MODERN ERA
- MU 401 FORM AND ANALYSIS
- MU 425 ADVANCED CONDUCTING
- MUA 400 level
- MUA 499 PERFORMANCE EMPHASIS RECITAL

**Elective Hours**

Upper Level Electives 300+

**Elective Courses**

Elective hours vary by program, see advisor.

**Total Semester Hours**

120

---

1 Must include at least one hour of MUX 396
Music, BA - Piano Pedagogy Emphasis

The Bachelor of Arts in Music with an Emphasis in Piano Pedagogy includes the standard College of Liberal Arts General Education Requirements, the Music Core, an additional 21 semester hours of music, sociology, and business coursework, and electives to total 120 semester hours. The core of this emphasis is a traditional music degree, with the same "classical" performance requirements as in the other music emphases. Students with an interest in church music will benefit from the degree offering.

- Music, BA requires 120 credit hours.
- No minor is required.
- Must have a 2.0 GPA in major and overall.
- No more than 6 credit hours of HPE may count in degree requirements.
- 36 of 120 credit hours must be taken at 300 level or higher.
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- No more than 60 credit hours from a two-year school can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

Music Minor

Students may select music as a supportive minor to their major discipline.

A total of 23 semester hours of music are necessary (12 semester hours upper-level), including the following courses:

- **MU 100** **INTRO TO MUSIC LITERATURE** 3
- **MU 201** **MUSIC THEORY I** 3
- **MU 203** **MUSICIANSHIP SKILLS I** 1
- **MUX 3XX** **Ensemble** 6
- **MU 3XX** **Upper Level Electives (not ensembles)** 6
- **MUA or MUJ 1x1 - Studio Instruction** 4

**Total Semester Hours** 23

Music Technology Minor

Students may select music technology as a supportive minor for Computer Engineering, Electrical Engineering and Computer Science.

The music technology minor includes the following courses:

- **MU 100** **INTRO TO MUSIC LITERATURE** 3
- **MU 106** **INTRO TO MUSIC TECHNOLOGY** 1
- **MU 201** **MUSIC THEORY I** 3
- **MU 203** **MUSICIANSHIP SKILLS I** 1
- **MU 202** **MUSIC THEORY II** 3
- **MU 204** **MUSICIANSHIP SKILLS II** 1
Philosophy

332 Morton Hall
Telephone 256.824.2335
Email: heikesd@uah.edu (heikesd@uah.edu)

Mission
To instruct people in critical and imaginative thinking, to teach Western and Eastern philosophical traditions, and to inspire the wonder at the world that Plato says begins all philosophical reflection.

The department of Philosophy offers the following degree programs:

• Philosophy, BA (p. 177)
• Philosophy Minor (p. 180)

Program Objectives
1. Enable our students both to understand and accept their responsibilities as citizens and future leaders and also to succeed in their professional lives with the skills of critical thinking, imaginative problem-solving, and rigorous thought, which philosophy instruction imparts.
2. Promote the active development and dissemination of high-quality research. Every member of the department should be actively engaged in the production and publication of original philosophical works.
3. Fulfill service responsibilities to the university, the wider philosophical community, and finally, by promoting educational programs aimed at the university and larger community, to educate the general public about the value of philosophy.

Major in Philosophy
• Philosophy, BA (p. 177)

Minor in Philosophy
• Philosophy (p. 180)

PHL 101 - INTRODUCTION TO PHILOSOPHY
Semester Hours: 3
Introduction to philosophical reflection focusing upon central problems in the major branches of the western tradition: metaphysics, epistemology and value theory.

PHL 102 - INTRO TO ETHICS
Semester Hours: 3
Major ethical positions in both classical and modern thought. The course may include a consideration of case studies drawn from practical contexts in engineering, medicine and other areas.

PHL 150 - TECH, SCIENCE & HUMAN VALUES
Semester Hours: 3
A philosophical examination of the intersection of human values with science and technology. Questions include: what exists, the nature and extent of knowledge, and moral problems posed by technical and scientific change.

PHL 201 - INTRODUCTION TO LOGIC
Semester Hours: 3
Methodology of formal and informal reasoning.

PHL 220 - CRIT THINKING FOR INTEL ANALYS
Semester Hours: 3
Examine critical reasoning strategies designed to correct cognitive biases and improve tradecraft skills in the context of intelligence analysis.
PHL 301 - ANCIENT PHILOSOPHY  
Semester Hours: 3  
Survey of classical philosophy from the Pre-Socratics through Aristotle. Prerequisite: 3 hrs of PHL, except PHL 201.

PHL 302 - MODERN PHILOSOPHY  
Semester Hours: 3  
Survey of the British and Continental traditions from Descartes through Kant. Prerequisite: 3 hrs of PHL, except PHL 201.

PHL 303 - CONTINENTAL PHILOSOPHY  
Semester Hours: 3  
Examination of important trends in the Continental tradition from nineteenth through twenty-first century thought.

PHL 310 - PHILOSOPHY OF ART  
Semester Hours: 3  
Major aesthetic theories of the western tradition, may include visual or non-visual arts. Prerequisite: 3 hrs of PHL, except PHL 201.

PHL 311 - PHILOSOPHY OF SCIENCE  
Semester Hours: 3  
Critical assessment of the historical and logical foundations of the natural and theoretical sciences. Prerequisite: 3 hrs of PHL, except PHL 201.

PHL 312 - AMERICAN PHILOSOPHY  
Semester Hours: 3  
Survey of American thought with emphasis upon the development of pragmatism in the work of Pierce, James, and Dewey. Prerequisite: 3 hrs of PHL, except PHL 201.

PHL 314 - ASIAN PHILOSOPHY  
Semester Hours: 3  
Survey of philosophical traditions from Asia, such as various schools of Buddhism and Hinduism, Confucianism, Daoism. Topics may include: conceptions of human nature and the good life, the nature of the self and its relation to society, comparisons to philosophies from Europe and North America. Prerequisite: 3 hrs of PHL, except PHL 201.

PHL 317 - PHILOSOPHY OF MIND  
Semester Hours: 3  
A philosophical examination of a range of models, theories, and arguments concerning the nature of mind and its relationship to the physical world. Prerequisite: 3 hrs of PHL, except PHL 201.

PHL 320 - SYMBOLIC LOGIC  
Semester Hours: 3  
Symbolic deductive logic, including propositional calculus (truth-functional logic), predicate calculus (propositional functions and quantification), and the logic of relations. Prerequisite: PHL 201.

PHL 330 - CLASSIC POLITI PHILOSOPHY  
Semester Hours: 3  
Careful analysis of the roots of political inquiry in selected works of ancient and medieval political philosophers. Major themes include the search for a just social order, the proper relationship between the citizen and the state, and other fundamental concepts of western political institutions. Prerequisite: PHL 101 or PHL 102 or PHL 202 or PSC 101.

PHL 332 - MODERN POLITICAL PHILOSOPHY  
Semester Hours: 3  
Critical examination of the philosophical foundations for modern politics that emerged from the 15th through the 19th century in western Europe. Major themes and theorists include the concepts of individual rights, property, representation, majority rule, limited government, and revolution. Prerequisite: PHL 101 or PHL 102 or PHL 202 or PSC 101.

PHL 335 - FEMINIST PHILOSOPHY  
Semester Hours: 3  
Philosophical examination of issues related to feminism and feminist theory. Topics may include: women in the history of philosophy, contemporary feminist political theory, feminist ethics, feminist epistemology, or gender theory (including racial and sexual identity). Prerequisite: 3 hrs of PHL, except PHL 201.
PHL 337 - PHILOSOPHY OF RACE
Semester Hours: 3
Philosophical examination of the nature and importance of race. Topics may include: the debate between essentialist and constructionist views of race, the political importance of race, and the intersection of race and other forms of identity. Prerequisite: 3 hrs of PHL, except PHL 201.

PHL 385 - SELECTED TOPICS
Semester Hours: 3
Intensive examination of particular problems, periods, or movements in the history of philosophy. Prerequisite: 3 hrs of PHL, except PHL 201.

PHL 395 - RESEARCH SEMINAR
Semester Hours: 3
Intensive examination of particular problems, periods, or movements in the history of philosophy. Intensive examination of selected topics leading to the preparation of a substantial philosophical paper. Required of all majors. May be taken twice for credit. Prerequisite: 3 hrs of PHL, except PHL 201.

PHL 397 - PHILOSOPHY INTERNSHIP
Semester Hours: 1-3
A supervised experience in a professional environment enhanced by a student's background in philosophy. Paid or unpaid. Prerequisites: 18 hrs of PHL, JR/SR standing, minimum 3.0 GPA in PHL Major, approval of department chair.

PHL 399 - DIR STUDY IN PHILOSOPHY
Semester Hours: 1-3
Independent study in an area of philosophy selected in consultation with faculty advisor. Requires approval of department chair. Prerequisite: 3 hrs of PHL, except PHL 201.

PHL 401 - METAPHYSICS
Semester Hours: 3
Critical examination of traditional and contemporary responses to questions about the nature of reality. Prerequisite: 6 hrs of PHL, except PHL 201.

PHL 402 - EPISTEMOLOGY
Semester Hours: 3
Investigation of fundamental problems of knowledge such as the relation of knowledge and belief, truth, certainty and skepticism, perception, logic, explanation, and justification. Prerequisite: 6 hrs of PHL, except PHL 201.

PHL 403 - ADV MORAL PHILOSOPHY
Semester Hours: 3
Critical examination of significant works in moral and political philosophy such as the relationship between morality and human nature, the individual and the state, and the consequences of actions. Prerequisite: 6 hrs of PHL, except PHL 201.

PHL 438 - CONTEMPORARY POLITICAL THOUGHT
Semester Hours: 3
Systematic study of recent and current thinking on issues and problems of politics, social theory, and ethics with special attention to the philosophical dimension of these issues and problems. Prerequisite: 6 hrs of PHL or PSC, except PHL 201.

Philosophy, BA
Students majoring in philosophy must complete a minimum of 30 semester hours in philosophy with at least 21 semester hours at the 300-level or above.

- Philosophy, BA requires 120 credit hours.
- 36 of 120 credit hours must be taken at 300 level or higher.
- Must have a minor consisting of 21 credit hours, at least 12 credit hours at the 300-level or higher.
- Must have a 2.0 GPA in major, minor, and overall.
- No more than 6 credit hours of HPE may count in degree requirements.
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- No more than 60 credit hours from a two-year school can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

**Philosophy Minor**

Students minoring in philosophy must complete at least 21 semester hours in philosophy including PHL 201 and PHL 102. Recommendations concerning which courses might best complement a student’s major and related interests are available from the philosophy faculty upon request. Appropriate philosophy courses may also be used as part of a program of cognate studies with other disciplines. Such a program must include at least 12 semester hours in courses numbered 300 or above.

| PHL 102 | **INTRO TO ETHICS** | 3 |
Science, Technology, and Society Minor

332 Morton Hall
(256) 824-2338
Dr. Nicholaos J. Jones, Coordinator

The Program in Science, Technology, and Society (STS) integrates concepts and methods from the humanities and the social sciences in order to provide an interdisciplinary perspective on science and technology as human activities with cultural and political consequences. Topics of interest include the varied social and historical contexts that produce scientific knowledge, the ways in which political and cultural values affect scientific and technological research, the impact of technological innovation on different social classes, and the significance of scientific and technological progress for what it means to be human. The STS minor responds to a growing need for professionals who integrate perspectives from multiple academic disciplines to address the contemporary social significance and political impacts of science and technology. Even for those majoring in a discipline with a clear career track, STS courses teach skills that open options for pivoting into other careers.

General Requirements

The STS minor requires 21 credit hours. This involves three core courses (9 credit hours) and at least four electives. No more than two courses from the same discipline can count toward the 12 hours of electives. The minor program also must be approved by the STS Coordinator.

At least 12 of the 21 credit hours must be in courses numbered 300 or above, and at least 6 of these 12 hours must be taken at UAH. Of the 21 credits, up to 6 hours may count toward a students’ major program and up to 6 hours may count toward GER credit, but no course may count toward all three areas (GER, Major, and the STS Minor).

Students can count up to 6 credits of mathematics, science, or engineering courses outside of their major toward the 12 elective credits; for majors in College of Arts, Humanities, and Social Sciences, these cannot include any courses applied toward GER Mathematics and Science requirements.

</tr>
</tbody>
</table>

With approval from the STS Coordinator, further courses also may be included as electives.

Total Semester Hours 21
The elective courses further explore the impact and significance of science and technology on society and human experience. Students may apply no more than 6 semester hours from any one discipline to their electives.

New courses may be added to this list when approved for inclusion by the Program in Science, Technology, and Society Advisory Committee. For a current listing of approved courses and for additional information on the STS minor, please contact the STS Coordinator or see our website at http://www.uah.edu/ahs/departments/sts.

Political Science

250 Morton Hall
Telephone: 256.824.6192
Email: polsci@uah.edu

The academic discipline of political science introduces students to critical thinking about the intellectual origins, defense, and critique of government, politics, and society in the United States and throughout the world. Political science classes focus on fundamental questions of governance: How should state and society be organized? How do the values of civil society and economy influence political thinking? Who should exercise political power and who should not? What constitutes justice?

The Department of Political Science offers the following degree programs:

• Political Science BA
• Political Science Minor
• Public Affairs MA

Program Objectives

The Department of Political Science offers the Bachelor of Arts in Political Science, the Minor in Political Science, and the Master of Arts in Public Affairs (public policy). Faculty members and students engage in empirical research and ethical critique of current events and competing explanations of those events with regard to government, politics, and society. They take into account politically relevant conceptual elements and practices embedded in or struggling against the intellectual foundations and elaborate edifices of diverse political arrangements and causes. Faculty members profess certain acumen in the discipline within which they teach and do research and thus have accumulated more accurate and sophisticated explanations and discoveries into the human condition, particularly as they relate to living socially and making decisions collectively.

Major in Political Science

• Political Science, BA (p. 185)

Minors in Political Science

• Political Science (p. 188)

PSC 101 - INTRO TO AMERICAN GOVERNMENT  
Semester Hours: 3

What motivates individuals and groups to act politically? This course introduces students to political structures, decision-making, and public policy in the U.S. The role of history in the development of current institutional structures and current political developments will be considered.

PSC 102 - INTRO TO COMPARATIVE POLITICS  
Semester Hours: 3

In this class we explore ways to compare countries and political systems. We study a wide variety of countries for a better understanding of political dynamics around the world. This includes countries at various stages of industrialization and democratization, in different regions of the globe.

PSC 103 - INTRO TO STATE & LOCAL GOVT  
Semester Hours: 3

Surveys the principles, forms, functions, and processes of state and local governments in the context of the American federal system, with specific emphasis on the political environment. Students will better understand the major functions of -and the issues facing- state and local governments.

PSC 260 - INTRODUCTION TO INTERNATIONAL RELATIONS  
Semester Hours: 3

Examination of the basic factors underlying the conduct of international relations, focusing on conflict and changes taking place due to globalization. This course also seeks to stimulate intellectual curiosity, enhance critical thinking, and improve oral and writing skills.
PSC 302 - THE AMERICAN CONGRESS
Semester Hours: 3

Studies the organization and role of the Congress, its leadership, internal processes, and relationships with other parts of the political system. The goal is to understand why Congress looks and acts the way it does, whose interests are represented, and how and why policies emerge as they do. Prerequisite: PSC 101.

PSC 304 - AMERICAN PRESIDENCY
Semester Hours: 3

Examination of the institution of the American presidency, its power, and the forces that shape it. Focus on developing students' ability to think conceptually and critically about the presidency, the president's role in the political system, and American politics in general. Prerequisite: PSC 101.

PSC 309 - POLITICAL PARTIES INTEREST GROUPS
Semester Hours: 3

A survey of major linkages between citizens and government, this course studies the formation, organization, activities, and impacts of political parties and interest groups and factors affecting them. Students will think critically about these institutions and their roles in the American system. Prerequisite: PSC 101.

PSC 330 - CLASSICAL POLITICAL PHILOSOPHY
Semester Hours: 3

Careful analysis of the roots of political inquiry in selected works of ancient and medieval political philosophers. Major themes include the search for a just social order, the proper relationship between the citizen and the state, and other fundamental concepts of western political institutions. Prerequisite: PSC 101 or PHL 101 or PHL 102 or PHL 202 or permission of instructor.

PSC 332 - MODERN POLITICAL PHILOSOPHY
Semester Hours: 3

Critical examination of the philosophical foundations for modern politics that emerged from the 15th through the 19th century in western Europe. Major themes and theorists include the concepts of individual rights, property, representation, majority rule, limited government, and revolution. Prerequisite: PSC 101 or PHL 101 or PHL 102 or PHL 202 or permission of instructor.

PSC 334 - AMERICAN POLITICAL THOUGHT
Semester Hours: 3

In-depth study of theorists, concepts and forces that have shaped American political values from the founding of the republic to the present. Major themes include the relationship between liberty and equality, rights and democracy, and industrialization and the public good. Prerequisite: PSC 101.

PSC 399 - CURRENT AFFAIRS
Semester Hours: 1

An examination of current national and international issues. Focus is on developing critical reading, listening, and writing skills. The course may be repeated up to three times.

PSC 404 - AMERICAN POLITICAL THOUGHT/A&M
Semester Hours: 3

PSC 420 - FEDERALISM & INTERGOVERNMENTAL RELATIONSHIP
Semester Hours: 3

Designed to help students navigate complex relationships among the 90,000+ government in the U.S., this course examines the framework of federalism and the tools available to governments to influence public policy outcomes. Students will investigate the impacts of these relationships on policy. Prerequisite: PSC 101.

PSC 436 - POLITICAL IDEOLOGIES
Semester Hours: 3

Critical examination of the philosophical foundations and political ethics of contemporary political ideologies. Among the major ideologies studied will be relevant examples of conservatism, liberalism, Marxism, Nazism, and religion, such as liberation theology and Islamism. Prerequisite: PSC 101.

PSC 438 - CONTEMPORARY POLITICAL THOUGHT
Semester Hours: 3

Systematic study of recent and current thinking on issues and problems of politics, social theory, and ethics with special attention to the philosophical dimension of these issues and problems.
PSC 440 - REGIONAL STUDIES  
Semester Hours: 3  
This class compares and examines the politics of Asia, Latin America, the Middle East, or Africa, depending on the term. We focus on select countries of themes within each region as part of our study of political structures, history, and culture, for a deeper understanding of each area. Prerequisites: PSC 101 and PSC 102.

PSC 451 - LAW, COURTS, & PUBLIC POLICY  
Semester Hours: 3  
Examines the role of the courts in the making of public policy in the United States, with an emphasis on the use of the courts by interest groups seeking to achieve specific policy goals. Prerequisite: PSC 101.

PSC 452 - AMER CONSTITUTIONAL LAW  
Semester Hours: 3  
Examination of the structure of the federal government and its powers through an analysis of leading cases from the Supreme Court. Topics include federalism, separation of powers, and the proper role and decision-making process of the Supreme Court. Prerequisite: PSC 101.

PSC 454 - CIVIL LIBERTIES  
Semester Hours: 3  
Examines the relationship between the government and individuals in American society through an analysis of Supreme Court cases. The focus is on contemporary questions about the rights of individuals and appropriate limits to freedom of action set by government. Prerequisite: PSC 101.

PSC 462 - DECISION-MAKING FORGN & SEC PLY  
Semester Hours: 3  
An examination of the history, culture, policies, and structures shaping the development of U.S. foreign and national security policies. Special attention will be placed on the roles of Congress, National Security Council, Defense Department, State Department, and the intelligence community. Prerequisite: PSC 101.

PSC 464 - AMERICAN FOREIGN POLICY  
Semester Hours: 3  
An examination of the substance of contemporary U.S. foreign policies and the goals the country seeks to achieve around the world. Students will attempt to evaluate the effectiveness of those policies and examine why it is often difficult for the country to achieve its goals. Prerequisite: PSC 101.

PSC 466 - NATIONAL SECURITY STRGY & PLY  
Semester Hours: 3  
An examination of current U.S. national security strategy and policy. The course will review current strategy and policy documents, examine specific responses to the variety of threats facing the United States, and evaluate whether those policies are effective at achieving their goals. Prerequisite: PSC 101.

PSC 470 - ISSUES IN SECURITY POLICY  
Semester Hours: 3  
Examination of select security-related policy issues. The content of this course will vary during different terms, and students may take the course multiple times so long as the content differs. Prerequisite: PSC 101.

PSC 480 - ADVANCED TOPICS IN PSC  
Semester Hours: 3  
Select topics in local, state, national and world politics. This course may be repeated for credit as long as content of the course has changed.

PSC 484 - SENIOR SEMINAR  
Semester Hours: 3  
This class engages students in an advanced examination of the subfields of political science that are offered by the department. The course may be repeated with different faculty for up to 6 hours of credit. Prerequisites: PSC 101 and PSC 102.

PSC 495 - INTERNSHIP IN GOVERNMENT  
Semester Hours: 1-6  
Students may receive academic credit for an internship with a local, state, or federal governmental agency, or with political, legal, or public policy related organizations. Prerequisite: Instructor Permission.
PSC 498 - DIRECTED READINGS & RESEARCH
Semester Hours: 3

Supervised in-depth readings and/or individual research in an area of specialized interest to both student and instructor. Open to all students who have completed 15 semester hours in Political Science and have permission of the instructor.

Political Science, BA

- Political Science, BA requires 120 credit hours.
- 36 of 120 credit hours must be taken at 300 level or higher.
- Students must have a 2.0 GPA in major, minor, and overall.
- No more than 6 credit hours of HPE may count in degree requirements.
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- No more than 60 credit hours from a two-year school can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

PSC 484 SENIOR SEMINAR

PSC Elective 100+

Choose four PSC Electives 300+

- PY 300 PSYCHOLOGICAL STATISTICS
- or SOC 303 STATISTICS/SOCIAL SCIENCES

**Minor Courses**

- Elective Courses
  - Elective hours vary by program, see advisor.

**Total Semester Hours** 120

Students with a major in Political Science must choose either a minor from another discipline or 21 semester hours of cognate studies involving courses from two or more disciplines, of which 12 semester hours must be in upper-level courses with a minimum of six semester hours from each discipline. Students are advised to officially declare a major and to obtain a Program of Study by the beginning of the sophomore year, if not before. Students may initiate a Program of Study by meeting with an advisor in the College of Arts, Humanities, and Social Sciences (Morton Hall 336). After the Program of Study is completed, a Political Science academic advisor will be assigned to the student and will meet with him or her in the Program of Study development process. Transfer students are advised to consult with the chair of the department before scheduling courses.

**JUMP Program in Political Science**

Through the Joint Undergraduate Master's Program (JUMP) undergraduate students majoring in Political Science may take up to 12 semester hours of approved courses at the graduate level while completing their BA degrees. These courses double-count toward both the BA in Political Science and the MA in Public Affairs (public policy) degrees at UAH, allowing students to earn their MA degree more rapidly.

Students admitted to the JUMP program continue to pay undergraduate tuition for the graduate courses they take as part of the program, do not have to take the Graduate Record Examination (GRE), and do not have to pay a Graduate School application fee.

Students must apply and be accepted into the program, before they may take coursework that will count toward both degree programs. Students must meet the following criteria:

- Have advanced Sophomore or Junior standing
- Have a GPA of 3.25 or better
- Have completed at least nine semester hours of PSC coursework at UAH, with at least six semester hours at the 300-level or above

**Psychology**

335 Morton Hall  
Telephone: 256.824.6191  
Email: psychol@uah.edu
The Department of Psychology offers the B.A. and M.A. degrees in psychology. Psychology is an exciting and interesting scientific field that concerns why people think and behave the way they do. It is a tremendously varied field and a discipline with a bright and promising future. Though relatively young, psychology is an expansive discipline that incorporates topics from other disciplines such as biology, business, engineering, and education. Studying psychology requires students to solve problems, reason verbally and quantitatively, organize material, think critically, communicate clearly, and work effectively with others. At UAH, the psychology department is small and very student-centered. Students may take courses in clinical, experimental, social, developmental, cognitive, perceptual, biological, personality, industrial, and counseling psychology. In particular, students are required to gain an appreciation of the methods and tools used by psychologists to perform research. Our capstone course in supervised research allows majors to demonstrate those skills working with individual faculty members.

The department of Psychology offers the following degree programs:

- Psychology, BA (p. 192)

Mission

The focus of the Department of Psychology is threefold:

- teaching
- scholarship
- service

Consequently, the mission of the department centers upon development of students, development of faculty and scholarly activities, and service to scholarly and professional societies as well as to appropriate communities including those within UAH.

The Department of Psychology supports the Mission of the College of Liberal Arts in a variety of ways. We provide close interactions between teachers and learners in our seminar courses, as well as in our research courses and internship opportunities. The Department of Psychology encourages personal and professional growth in its promotion of students' career exploration, knowledge acquisition, skill development (i.e., critical thinking, technical writing, oral communication, and statistical analyses), and valuation of diversity.

Social Science Composite for Secondary Education Majors

Students planning to teach psychology in secondary schools will need to complete the Social Science Composite which includes courses in history, psychology, sociology, political science, and economics. The psychology courses included in this composite are PY 101, PY 102, and PY 375. Students seeking certification in secondary education should contact the Education Department for specific requirements.

Major in Psychology

- Psychology, BA (p. 192)

Minor in Psychology

- Psychology (p. 196)

PY 101 - GENERAL PSYCHOLOGY I
Semester Hours: 3

Introduction to methods and research findings in the field. Topics include learning, memory, cognition, human development, personality theories, and abnormal behavior. Credit for PY 101 may be obtained by either Advanced Placement (AP) or the College Level Examination Program (CLEP).

PY 102 - APPLICATIONS IN PSYCHOLOGY
Semester Hours: 3

Introduction to applied topics in psychology, such as statistical analysis, counseling, human factors, health psychology, and industrial and organizational psychology. Career opportunities are discussed. Students are required to engage in approved experiential activities such as participating in current research studies and attending lectures. Prerequisite: PY 101.

PY 201 - LIFE-SPAN DEVELOPMENT
Semester Hours: 3

Examination of the psychological, social, and physical factors that affect human behavior and development from conception to death. Prerequisite: PY 101.

PY 300 - PSYCHOLOGICAL STATISTICS
Semester Hours: 3

Introduction to psychological statistics, with an emphasis on quantitative analysis of experimental data. Topics covered include probability, descriptive statistics, and hypothesis testing. Prerequisite: MA 107 or MA 110 or MA 112 or MA 113 or MA 115 or MA 120 or MA 171. Corequisite: PY 300L.
PY 300L - PSYCHOLOGICAL STATISTICS LAB
Semester Hour: 1

This course is an introduction to analyzing data with computerized statistical software. This course will provide students with a familiarity of SPSS, and the abilities to analyze experimental data, read computer statistical output, and write-up statistical results. Corequisite: PY 300.

PY 301 - PERSONALITY
Semester Hours: 3

Examinations of various theories of personality with possible implications for research. Prerequisite: PY 102.

PY 302 - EXPERIMENTAL PSYCHOLOGY
Semester Hours: 4

Design and execution of experiments in psychology. Data analysis and manuscript preparation. Prerequisite: PY 102 and PY 300 and PY 300L OR AHS 300.

PY 303 - PHCHOMETRICS
Semester Hours: 3

PY 310 - CHILD PSYCHOLOGY
Semester Hours: 3

PY 314 - LEARNING
Semester Hours: 3

Analysis of learning principles from simple relationships with animals to the complexities of human language and problem solving. Prerequisite: PY 102.

PY 315 - DEVELOPMENTAL PSYCHOLOGY
Semester Hours: 3

Examines sensory systems and elements of perception. Topics include vision research, audition, chemical senses, and body sensations. Prerequisite: PY 102.

PY 316 - PERCEPTION
Semester Hours: 3

Examines sensory systems and elements of perception. Topics include vision research, audition, chemical senses, and body sensations. Prerequisite: PY 102.

PY 317 - PHILOSOPHY OF MIND
Semester Hours: 3

The problem of the nature of mind and its relationship to the physical world has been a perennial concern of philosophy. This course examines, theories, and arguments concerning the nature of mind. Prerequisite: PY 102.

PY 324 - WORK DESIGN
Semester Hours: 3

Introduces the portion of the design process that uses basic principles of methods analysis and ergonomics to fit a task to the human operator. Methods analysis topics include: work measurement, job analysis, and job evaluation. Prerequisite: PY 300 or ISE 390.

PY 330 - NONVERBAL COMMUNICATION
Semester Hours: 3

Examines the diversity of human nonverbal behavior and its influences on everyday communication experiences. Same as CM 330. Prerequisite: PY 101.

PY 375 - SOCIAL PSYCHOLOGY
Semester Hours: 3

Examination of the social influences on both individual and group behavior. Topics may include attitudes, group processes, intergroup conflict, interpersonal attraction, aggression, altruism, and impression formation. Prerequisite: PY 101 or SOC 100.

PY 380 - COGNITION
Semester Hours: 3

Information processing: how information is acquired, encoded, organized, stored, and retrieved. This process will be applied to specific areas of psychology such as language, earning, or personality. Prerequisite: PY 102.
PY 399 - PROFESSIONAL DEV FOR PSY MAJOR  
Semester Hour: 1  
Development of skills related to graduate work and to occupations in psychology. Career and internship exploration, resume and graduate school exploration. Exposure to work and research related topics, such as teamwork and ethics. Prerequisite: PY 102.

PY 402 - INDUSTRIAL & ORGANIZA PSY  
Semester Hours: 3  
Application of basic principles of learning, motivation, and perception to typical industrial and organizational problems. Open to students who have completed 15 hours of psychology. Prerequisite: PY 102.

PY 403 - HUMAN FACTORS PSYCHOLOGY  
Semester Hours: 3  
Human performance in human-technology-environment systems. Includes consideration of human capabilities and limitations as related to controls and displays. Open to students who have completed 15 hours of psychology. Prerequisite: PY 102.

PY 405 - PSYCHOPHARMACOLOGY  
Semester Hours: 3  
Introduction to drug classification and action with emphasis on physiological psychological interactions. Open to students who have completed 15 hours of psychology. Prerequisite: PY 102.

PY 406 - PSYCHOLOGY OF WOMEN  
Semester Hours: 3  
Examines theory and research in the psychological functioning of women, both in the United States and other nations. Topics include achievement and education, mental and physical health issues, and victimization of women. Open to students who have completed 15 hours of psychology. Senior Standing Prerequisite: PY 102.

PY 407 - CROSS-CULTURAL PSYCHOLOGY  
Semester Hours: 3  
Examines psychological similarities and differences between members of industrialized and non-industrialized cultures. Comparisons will include development, social interaction, and perception. Open to students who have completed 15 hours of psychology. Senior Standing. Prerequisite: PY 102.

PY 408 - TEAMWORK & TEAM PROCESSES  
Semester Hours: 3  
This course provides an introduction to teams and teamwork processes. The foundation of the course is research-based; topics will be approached from the context of empirical research. The types of research designs that are typically used in team research are addressed. Junior Standing.

PY 420 - SPECIAL TOPICS  
Semester Hours: 3  
Pre-announced special areas in seminar discussion, laboratory work, or practicum. May be taken twice for credit. Open to students who have completed 15 hours of psychology. Prerequisite: PY 102.

PY 422 - INDIVIDUAL RESEARCH  
Semester Hours: 3  
With advice of instructor, design and execution of original experiment in psychology. May be taken twice for credit. Open to students who have completed 15 hours of psychology. Prerequisite: PY 102.

PY 426 - HISTORY & SYSTEMS IN PSY  
Semester Hours: 3  
Survey of psychological theory and experimentation regarding human behavior and mental processes from ancient times to the present. Open to students who have completed 15 hours of psychology. Prerequisite: PY 102.

PY 433 - ABNORMAL PSYCHOLOGY  
Semester Hours: 3  
Survey of major psychological approaches to conceptualizing abnormal behavior, with discussion of present diagnostic categories of psychological disorders. Open to students who have completed 15 hours of psychology. Prerequisite: PY 102.

PY 434 - PSYCHOLOGY AND LAW  
Semester Hours: 3  
This seminar is a survey of the major topics represented in the field of Psychology and Law. We will focus on how psychological research can contribute to a better understanding of issues related to law. Open to students who have completed 15 hours of psychology. Prerequisite: PY 302.
PY 436 - BIOLOGICAL PSYCHOLOGY  
Semester Hours: 3  
Neural and endocrinological systems underlying behavior. Open to students who have completed 15 hours of psychology. Prerequisites: (either a or b): (a) 15 hrs of PY or approval of instructor; (b) BYS 119 and BYS 120 and 6 hours of PY or approval of instructor. Same as BYS 436.

PY 437 - PSYCHOBIOLOGY STRESS & ILLNESS  
Semester Hours: 3  
Overview of physiological stress responses and their influence on health behavior and illness. Open to students who have completed 15 hours of psychology. Prerequisite: PY 102.

PY 490 - READINGS IN PSYCHOLOGY  
Semester Hours: 3  
Supervised in-depth readings in area of particular interest to student. May be taken twice for credit. Open to students who have completed 15 hours of psychology. Prerequisite: PY 102.

PY 491 - SPECIAL TOPICS IN PSYCHO  
Semester Hour: 1  
Pre-announced special areas in seminar discussion, laboratory work, or practicum. May be taken twice for credit. Open to students who have completed 15 hours of psychology. Prerequisite: PY 102.

PY 492 - SPECIAL TOPICS IN PSYCHO  
Semester Hours: 2  
Pre-announced special areas in seminar discussion, laboratory work, or practicum. May be taken twice for credit. Open to students who have completed 15 hours of psychology. Prerequisite: PY 102.

PY 498 - HUMAN RESEARCH I  
Semester Hours: 3  
Capstone course for the PY major. Human behavior observation and/or experimentation. Students engage in data collection and analysis, and report their findings. Offered Fall Semester only. Prerequisite: PY 302.

PY 499 - HUMAN RESEARCH II  
Semester Hours: 3  
Continuation of PY 498. Open to students who have completed 15 hours of psychology. Prerequisite: PY 498 and approval of instructor. Offered Spring Semester only.

Psychology, BA

The program of study for a psychology major includes 35 semester hours of psychology with at least 26 semester hours numbered 300 or above. In addition, the psychology major must be accompanied by a minor that meets the requirements designated by the selected discipline. Course work required for the major is specified below in Curriculum for Majors.

- Psychology, BA requires 120 credit hours.
- 36 of 120 credit hours must be taken at 300 level or higher.
- Must have a 2.0 GPA in major, minor, and overall.
- No more than 6 credit hours of HPE may count in degree requirements.
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- No more than 60 credit hours from a two-year school can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

Science, Technology, and Society Minor

332 Morton Hall
(256) 824-2338
Dr. Nicholas J. Jones, Coordinator

The Program in Science, Technology, and Society (STS) integrates concepts and methods from the humanities and the social sciences in order to provide an interdisciplinary perspective on science and technology as human activities with cultural and political consequences. Topics of interest include the varied social and historical contexts that produce scientific knowledge, the ways in which political and cultural values affect scientific and technological research, the impact of technological innovation on different social classes, and the significance of scientific and technological progress for what it means to be human. The STS minor responds to a growing need for professionals who integrate perspectives from multiple academic disciplines to address the contemporary social significance and political impacts of science and technology. Even for those majoring in a discipline with a clear career track, STS courses teach skills that open options for pivoting into other careers.

General Requirements

The STS minor requires 21 credit hours. This involves three core courses (9 credit hours) and at least four electives. No more than two courses from the same discipline can count toward the 12 hours of electives. The minor program also must be approved by the STS Coordinator.

At least 12 of the 21 credit hours must be in courses numbered 300 or above, and at least 6 of these 12 hours must be taken at UAH. Of the 21 credits, up to 6 hours may count toward a students' major program and up to 6 hours may count toward GER credit, but no course may count toward all three areas (GER, Major, and the STS Minor).

Students can count up to 6 credits of mathematics, science, or engineering courses outside of their major toward the 12 elective credits: for majors in College of Arts, Humanities, and Social Sciences, these cannot include any courses applied toward GER Mathematics and Science requirements.

The elective courses further explore the impact and significance of science and technology on society and human experience. Students may apply no more than 6 semester hours from any one discipline to their electives.

New courses may be added to this list when approved for inclusion by the Program in Science, Technology, and Society Advisory Committee. For a current listing of approved courses and for additional information on the STS minor, please contact the STS Coordinator or see our website at http://www.uah.edu/ahs/departments/sts.

Sociology

344 Morton Hall
Telephone: 256.824.6190
Email: soc@uah.edu

Sociology is a fascinating subject which explores patterns and trends in human behavior, society, and culture. Sociology takes a broad and holistic view of the contexts in which individuals, groups, organizations, and institutions operate. This understanding is indispensable to analysis and decision-making in a wide range of social settings and the development of thoughtful and engaged citizenship. Sociologists bring scientific tools and perspectives to understand causes and consequences of contemporary social issues and problems, and analyze the impact of social policies on groups and organizations. The best sociological analyses combine a focus on important details with analyses about how the details relate to "the big picture." A B.A. in Sociology provides a broad foundation for further studies in law, social work, social policy, psychology, criminology, or public health. Analytical and social science research skills prepare students for careers in market research, human services, government, health care, and law. The B.A. Sociology program at UAH emphasizes the development of both academic and applied skills that can be useful in a wide range of work settings.

The department of Sociology offers the following degree programs:

• Sociology, BA (p. 201)

Mission

We are committed to providing all students with the knowledge and skills that derive from a sociological perspective. Our curriculum encompasses core areas in the discipline with courses in sociological theory, social inequality, social institutions, social change and sociological methodology. Students may use the sociological perspective in pursuing further studies in the discipline, at work in diverse settings, and as thoughtful and involved members of their communities. Our instructional mission is enhanced by faculty with active research agendas, who explore a variety of social processes and apply to these studies a variety of research techniques. When they bring their expertise to bear on social issues, the faculty also serve the University and the community at large.

The UAH Department of Sociology offers the B.A. with a major in sociology and a minor in sociology.

Students majoring in sociology may optionally complete one of four informal tracks (http://www.uah.edu/images/colleges/liberal-arts/Sociology/Tracks_Pamphlet_9.01-30-2015.pdf):
1. The Community Services Track
2. The Global Structures Track
3. The Environmental Social Science Track
4. The Law and Justice Track

For more information on these tracks, the field of sociology, and the UAH Sociology Department, please consult our webpage, www.uah.edu/sociology.

Major in Sociology
• Sociology, BA (p. 201)

Minors in Sociology
• Sociology (p. 204)

SOC 100 - INTRO TO SOCIOLOGY
Semester Hours: 3
An introduction to the critical and scientific study of society, culture, social institutions and social change. Illuminates the social and cultural context of our lives and is useful for exploring contemporary social issues, problems and change in society.

SOC 102 - ANALYSIS OF SOCIAL PROBLEMS
Semester Hours: 3
Application of the sociological perspective to understanding important contemporary social issues and the social actions and policies that attempt to address them. This course will explore different approaches to understanding the causes of social problems as well as social responses to them. Prerequisite: SOC 100.

SOC 105 - INTRO CULTURAL ANTHROPOLOGY
Semester Hours: 3
Cultural anthropology is one of the four sub-fields of anthropology concerned with a deeper understanding of cultural differences. This course examines cultural diversity in human behavior, social institutions, belief systems, and cultural change from a global and comparative perspective.

SOC 150 - SOCIOLOGICAL PERSP TECH & SCI
Semester Hours: 3
Introduces sociological approach to science and technology; how social factors affect science and technology, and how science and technology affect our lives; the relationship of science and technology to social issues such as those related to class, race, gender, or religion.

SOC 206 - MARRIAGE AND FAMILY
Semester Hours: 3
Explores family forms and functions across history and across cultures. Students will learn how the family affects and is affected by other social institutions, recent trends in the American family, the contexts in which marriage and families evolve, and key inequalities within and between families. Prerequisite: SOC 100.

SOC 301 - RESEARCH METHODS
Semester Hours: 3
The object of this course is for students to be able to read, interpret, and explain scientific research in social science. Course covers key elements and process of sociological research methods, both qualitative and quantitative.

SOC 302 - SOCIOLOGICAL THEORY
Semester Hours: 3
This course traces the development of major trends of sociological theory, past and present, and major theoretical problem areas. It also addresses how the socio-historical context within which the texts were written influences the issues and ideas expressed. Prerequisite: SOC 100.

SOC 303 - STATISTICS/SOCIAL SCIENCES
Semester Hours: 3
Introduction to the basic quantitative data analysis techniques used by social scientists. Explore the ways researchers use statistics to examine and test ideas about the social world. In the lab, students learn how to use the statistical software SPSS to analyze social science datasets. Prerequisite: SOC 100 and one of the following math courses: MA 107, MA 110, MA 112, MA 113, MA 115, MA 120, MA 171.

SOC 304 - STATISTICS LAB
Semester Hour: 1
SOC 306 - SOCIOLOGY OF GENDER  
Semester Hours: 3  
Explores how social relationships create, structure and reinforce gender differences and inequalities. Students will learn about the social construction of gender, gender socialization, gender roles, and gender inequalities in income, poverty, occupation, and violence. Prerequisite: SOC 100.

SOC 307 - SOCIOLOGY OF LAW  
Semester Hours: 3  
This course examines the relationship between law and society from a variety of theoretical perspectives. Topics include the social organization of legal institutions, cultural meanings of law, and social interactions among different actors in the legal context (police, lawyers, judges, legislators, etc). Prerequisite: SOC 100.

SOC 319 - DEVIANCE & SOCIAL CONTROL  
Semester Hours: 3  
Examines several approaches to studying deviant behavior and its social control, with emphasis on the social construction of deviance and societal reactions to it. The focus is generally on deviation and control in the U.S. Prerequisite: SOC 100.

SOC 320 - SOCIOLOGY OF RELIGION  
Semester Hours: 3  
Study of religion as a social phenomenon. The course examines sociological theories of religious behavior, religious beliefs, religion as a social institution, religious organization, new religious movements, and religion and social change.

SOC 330 - RACE AND ETHNICITY  
Semester Hours: 3  
Examines the historical relationship between race, ethnicity and economic class/opportunity; and the social construction of ethnicity and race. The emphasis is on race and ethnicity in the U.S. with some discussion of international issues. Prerequisite: SOC 100.

SOC 340 - SPECIAL TOPICS  
Semester Hours: 1-3  
Nontraditional topics of current sociological interest. Title of course and number of credit hours when offered will appear in course schedule along with prerequisites necessary for admission to course. May be taken more than once for credit as long as subtitles differ. Prerequisite: SOC 100.

SOC 350 - SOCIAL STRATIFICATION  
Semester Hours: 3  
This course explores the causes and consequences of social stratification (focusing on economic inequality) in the United States, including: wealth and income disparities, labor markets, elites/power, impact of gender and race, privilege and oppression, and economic and social welfare policy. Prerequisite: SOC 100.

SOC 369 - ENVIRONMENTAL SOCIOLOGY  
Semester Hours: 3  
Examines the ways in which society and the natural environment interact and shape each other. This course engages with the major debates in the field of environmental sociology in order to better understand the challenges and options humans face as we head further into global environmental crisis. Prerequisite: SOC 100.

SOC 375 - SOCIAL PSYCHOLOGY  
Semester Hours: 3  
Fundamental principles of group processes, social influence, and group structure. Development of group solidarity, cohesion, intergroup conflict and cooperation, communication, leadership, opinion, propaganda, and suggestion. Prerequisites: SOC 100 or PY 101.

SOC 376 - MASS MEDIA IN AMERICA  
Semester Hours: 3  
Mass communication theory, history of American mass media, and criticism of contemporary forms and functions of mass media of communication in the U.S. Prerequisite: SOC 100.

SOC 390 - READINGS & INDIVIDUAL RES  
Semester Hours: 3  
Supervised readings or in-depth research or both in area of specialized interest to student or instructor. May be taken twice for credit with advisor's approval. Prerequisite: SOC 100.
SOC 395 - COMMUNITY SERVICES INTERNSHIP
Semester Hours: 3
An experiential-learning course for students who envision working in social service organizations. Internship opportunity is initiated by student and course includes an academic component of readings and assignments agreed upon by student, organizational representative and the internship Coordinator. Prerequisite: SOC 100.

SOC 415 - SOCIOLOGY OF GLOBALIZATION
Semester Hours: 3
Critical exploration of the processes of modernization and globalization and their impact on cultures, economies, and environments of developing societies. Topics include history and theories of development and case studies that examine the linkages among gender, class, culture, and development. Prerequisite: SOC 100.

SOC 425 - SOCIOLOGY OF EDUCATION
Semester Hours: 3
This course examines education systems and policies from a sociological perspective. We ask what and how students learn, the function of schools in society, results of recent policy decisions, and how educational systems interact with political, economic, cultural and family institutions. Prerequisite: SOC 100 and Junior or Senior Standing.

SOC 431 - ADVANCED SPECIAL TOPICS
Semester Hours: 3
Special topics of current sociological interest. Course title, credit hours and prerequisites will appear in course schedule. May be taken more than once for credit as long as subtitles differ. Different from SOC 340 Special Topics in terms of level of expectations and/or, prerequisites. Prerequisite: SOC 100.

SOC 435 - SOCIOLOGY OF SOCIAL MOVEMENTS
Semester Hours: 3
This course focuses on a variety of issues related to social movements, including questions about the origins and causes of social movements, the cultural, social and political contexts that impact movements, how movements mobilize people, and the use of strategies and tactics. Prerequisite: SOC 100 AND EITHER SOC 202 OR 300 OR 301.

SOC 439 - COMPLEX ORG INDUSTRIAL SOCIETY
Semester Hours: 3
Mainstream and critical sociological theories for understanding complex organizations in industrial society. Explores historical development, structure and processes, contradictions and conflict, and alternative forms of organizations in contemporary society. Prerequisite: SOC 100.

SOC 444 - SOCIOLOGY OF CULTURE
Semester Hours: 3
Examines the cultural dimensions of important social processes including race, class, gender, power, and resistance. Theoretical and empirical analyses of both high and popular cultural forms and processes of cultural production in various social settings. Prerequisite: SOC 100.

SOC 455 - SOC OF WORK & OCCUPATION
Semester Hours: 3
Contemporary work situations and experiences. Alienation in work, impact of technological change and bureaucratization, primary work groups and work culture, professionalization, unionization, workers' self-management experiments, work-leisure relationship. Prerequisite: SOC 100.

SOC 469 - ENVIRONMENTAL JUSTICE
Semester Hours: 3
Examination of (1) how social, economic, and political processes at the local and global levels contribute the distribution of both environmental 'goods' (e.g., clean air and water) and environmental 'bad's (e.g., toxic waste and pollution); (2) the principles and strategies of the environmental justice movement; (3) the interrelations between local and global level processes and their impact upon environmental inequality and the efforts and opportunities of the environmental justice movement. Prerequisites: SOC 100.

SOC 480 - SOCIOLOGY SCIENCE & TECHNOLOGY
Semester Hours: 3
Explores how social relations produce scientific knowledge, the role of science in politics, how men and women move through careers in science differently, how technologies are socially constructed, and the relationship between culture, technology, and the evolution of civilizations. Prerequisite: SOC 100.
SOC 495 - SENIOR CAPSTONE SEMINAR  
Semester Hours: 3

Senior majors employ skills and knowledge acquired from courses to develop independent research projects. Course is designed to guide the research process with a focus on literature review, hypothesis development, data collection and analysis, and writing of a research article or formal report resulting from an internship. Prerequisite: SOC 301.

Sociology, BA

Students who major in sociology must complete 34 semester hours of sociology courses. There are six required courses (SOC 100, SOC 301, SOC 302, SOC 303, SOC 304, SOC 495), and 21 of the 34 semester hours must be at the 300-level or above. Students who major in Sociology have the option to pursue a series of informal tracks:

- Community Service
- Law and Justice
- Environmental Social Science
- Global Structures

These tracks do not alter the basic degree requirements listed below. For details on track expectations please consult the Department of Sociology webpage, http://www.uah.edu/sociology. Sociology majors planning their course of study should contact the department to learn about the timing and frequency of required course offerings.

- Sociology, BA requires 120 credit hours.
- 36 of 120 credit hours must be taken at 300 level or higher.
- Must have a 2.0 GPA in major, minor, and overall.
- No more than 6 credit hours of HPE may count in degree requirements.
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- No more than 60 credit hours from a two-year school can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

Note(s):
Sociology courses may also be used in conjunction with courses from other disciplines to form a cognate area of study. Such a program should be developed with the advice of the sociology faculty and must be approved by the chair of the student’s major department.

Women's and Gender Studies Minor

344 Morton Hall
256.824.6190
The Women's and Gender Studies program brings together courses and faculty from several colleges of the university to provide an interdisciplinary experience leading to a minor in Women's and Gender Studies. As an area of scholarship, the principal focus is on the contributions, perspectives, and experiences of women in all areas of human endeavor, including the status, portrayal, or achievements of women in areas such as art, history, literature, science, business, engineering, and medicine. It also promotes greater understanding of gender as a fundamental category of meaning, examining the pervasive and often unacknowledged ways that gender shapes and changes our social institutions, individual knowledge, and interpersonal relationships. While the classes included as Women's and Gender Studies courses may be offered in various departments, the minor organizes these courses in a coherent structure such that the sum of the experiences offers a more comprehensive insight into the discipline of Women's Studies than the individual courses provide on their own.

A minor in Women's and Gender Studies consists of 21 semester hours, including one required course (WGS 200), three core courses, and three additional core or elective courses as shown in the following table. Core courses must include at least 3 semester hours of humanities and 3 semester hours of social sciences and management classes listed below. Note that 12 of the 21 semester hours must be at the 300-level or higher. Students must also complete a portfolio and portfolio conference during their final semester at UAH. A student interested in minoring in Women's and Gender Studies should contact the director of the program for advising.

**Required Course**

| WGS 200 | INTRO WOMEN'S & GENDER STUDIES | 3 |

**Core Courses** 3 courses required from the following, at least 3 hours in each category: 1,2,3

World Languages and Cultures

342 Morton Hall
Telephone: 256.824.1022
Email: leslie.kaiura@uah.edu

The World Languages and Cultures department offers the following degree programs:

• Foreign Languages, BA (p. 214)
• Foreign Languages, BA - Foreign Language and International Trade Concentration (p. 219)
• Certificate in Foreign Languages and Global Engagement (p. 225)

Introduction

The acquisition of a second language, and through it an understanding of another country’s culture, is a rich academic experience for all students, not only in the arts, humanities, and social sciences, but also in business, education, nursing, the natural sciences, and engineering. Knowing how to communicate effectively in another language significantly enhances one's career opportunities and contributions as a citizen. This page provides an overview of the academic offerings of the Department of World Languages and Cultures.

Mission Statement

The Department of World Languages and Cultures is dedicated to teaching students the language skills and cultural knowledge necessary for succeeding in today's multilingual world of cultural diversity, global markets, political interdependence, and international scientific and cultural collaboration.

Within the B.A. in Foreign Languages, students may choose French, German, Russian, or Spanish as a focus language, and may also concentrate in Foreign Language and International Trade in cooperation with the College of Business. Students can pursue foreign language teacher certification (http://catalog.uah.edu/undergrad/colleges-departments/education/curriculum-instruction/foreign-language) in French, German, or Spanish in conjunction with the College of Education, and they may minor in any of the four focus languages, or take Arabic or Japanese at the introductory and intermediate levels. Students studying languages offered up to the WLC 301 (Conversation) level may also complete the Certificate in Foreign Language and Global Engagement. The Department also serves nursing and pre-health students by offering Spanish for Medical Professionals at the introductory level.

In addition, the Department offers study abroad opportunities and domestic and international internships that give students cultural and professional experience that greatly enhances their career opportunities after graduation. World Languages and Cultures also sponsors language clubs and extracurricular activities that contribute to the university's rich campus life.

The Department offers an integrated curriculum comprising the teaching of linguistic proficiency and the promotion of a critical awareness of other cultures. Faculty use traditional methods as well as varied media and new technologies to engage students with world languages, literature, and film in their historical, social, and interdisciplinary contexts. World Languages and Cultures faculty promote academic pluralism by fostering a variety of interpretive and pedagogical approaches, and by virtue of their commitment to the highest standards in teaching, research, and service, they aim to uphold and further strengthen the national and international standing of UAH.
Languages Offered

Arabic, French, German, Japanese, Russian, Spanish

The Department of World Languages and Cultures offers the B.A. in Foreign Languages. A student may choose a focus language of French, German, Russian, or Spanish, and may also concentrate in Foreign Language and International Trade or pursue teaching certification. Arabic and Japanese cannot be taken as majors or minors, but can be taken to satisfy the language requirement for the B.A. degree or as electives.

General Education Requirements and Placement Procedures

Three semester hours of credit in one foreign language are required for the B.A. degree. Most introductory language sequences begin in the fall semester, but more limited offerings of 101 level courses are available in spring and summer for students who need to complete their requirements.

Placement Procedures

Placement procedures vary based on each student's level of experience with a language. Students with no previous instruction or experience are placed into WLC 101, while students with some level of instruction or experience are placed as follows:

Native or Near-Native Speakers: Native or near-native speakers of a foreign language may not take introductory and intermediate courses in that language, but are welcome to take upper level courses in their language or introductory level courses in another language. Students in this category should make an appointment with the appropriate language coordinator to take the standardized Web Cape International Foreign Language Placement Exam. They must still take a minimum of three (3) additional semester hours of foreign language course work to complete General Education Requirements for the B.A.

Prior Language Experience: Students with prior foreign language experience and heritage speakers may be placed into a higher level course by taking the Web Cape International Foreign Language Placement Exam. Heritage speakers are classified as individuals who have grown up speaking a language, but who have little or no formal education in that language. Students must still take a minimum of three (3) additional semester hours of foreign language course work to complete General Education Requirements for the B.A.

High School Experience: Students with 0-2 units of high school foreign language study will be placed in WLC 101, while students with 3-4 units will be placed in WLC 201. A minimum grade of C is required for a unit to be counted. Regardless of placement, students must take a minimum of three (3) additional semester hours of foreign language course work to complete General Education Requirements for the B.A. If an interval of two years or more occurs between study of a language in high school and continuation of that language in college, placement levels may be adjusted downward to entry level. Students in this situation, or others who may be uncertain of their skill level, are encouraged to take the Web Cape exam to confirm placement.

Advanced Placement and CLEP Examinations: The Department will award credit to students who have earned a score of three or higher on Advanced Placement (AP) Program examinations of the College Entrance Examination Board according to the following scale:

• Score of 3: 6 semester hours credit (i.e. through 102, 3 semester hours each course)
• Score of 4: 12 semester hours credit (through 202)
• Score of 5: 15 semester hours credit (through 301)

The credit thus awarded will satisfy General Education Requirements for the B.A. and count toward a major, minor, or certificate. However, it will be recorded without grades or quality points and will not be included in the calculation of the grade point average.

Students with CLEP examination scores in a foreign language will be placed on a case-by-case basis in consultation with World Languages and Cultures faculty.

Students Planning to Major or Minor: If students wish to major or minor in French, German, Russian, or Spanish, they may take the Web Cape placement exam to test out of a maximum of twelve (12) hours of course work (WLC 101, 102, 201, 202).

After taking the Web Cape exam, students majoring or minoring in a world language will be placed in an appropriate higher language course. They receive credit hours, without grade/quality points, for the two (2) highest elementary/intermediate language courses as is appropriate. If students test out of more than 6 hours, the remaining courses will be waived with no credit hours granted.

All students, irrespective of language background and placement, must take all remaining upper-level coursework to complete the major or minor.

Majors in World Languages and Cultures

• Foreign Languages, BA (p. 214)
• Foreign Languages, BA - Foreign Language and International Trade Concentration (p. 219)

Minors in Foreign Languages and Literatures

• Foreign Language (p. 224)
Certificate in Foreign Language and Global Engagement

- Foreign Language and Global Engagement (p. 225)

Semester Hours: 3
Teaches beginning listening, speaking, reading, and writing within cultural contexts. Conducted in the target language. Prerequisites: WLC 101J or placement by exam.

WLC 102R - INTRO FOREIGN LANG II: RUSSIAN
Semester Hours: 3
Teaches beginning listening, speaking, reading, and writing within cultural contexts. Conducted in the target language. Prerequisites: WLC 101R or placement by exam.

WLC 102S - INTRO FOREIGN LANG II: SPANISH
Semester Hours: 3
Teaches beginning listening, speaking, reading, and writing within cultural contexts. Conducted in the target language. Prerequisites: WLC 101S or placement by exam.
WLC 199A - SPECIAL TOPICS
Semester Hours: 3
Study of special topics in world languages, literature, or culture on campus or abroad. Prerequisites: Placement by exam.

WLC 199F - SPECIAL TOPICS
Semester Hours: 3
Study of special topics in foreign language, literature, or culture on campus or abroad. Prerequisites: Placement by exam.

WLC 199G - SPECIAL TOPICS
Semester Hours: 3
Study of special topics in foreign language, literature, or culture on campus or abroad. Prerequisites: Placement by exam.

WLC 199J - SPECIAL TOPICS
Semester Hours: 3
Study of special topics in world languages, literature, or culture on campus or abroad. Prerequisites: Placement by exam.

WLC 199R - SPECIAL TOPICS
Semester Hours: 3
Study of special topics in foreign language, literature, or culture on campus or abroad. Prerequisites: Placement by exam.

WLC 199S - SPECIAL TOPICS
Semester Hours: 3
Study of special topics in foreign language, literature, or culture on campus or abroad. Prerequisites: Placement by exam.

WLC 201A - INTERM FOREIGN LANG I: ARABIC
Semester Hours: 3
Teaches intermediate listening, speaking, reading, and writing within cultural contexts. Conducted in the target language. Prerequisite: WLC 102A or placement by exam.

WLC 201F - INTERM FOREIGN LANG:FRENCH
Semester Hours: 3
Teaches intermediate listening, speaking, reading, and writing within cultural contexts. Conducted in the target language. Prerequisite: WLC 102F or placement by exam.

WLC 201G - INTERM FOREIGN LANG: GERMAN
Semester Hours: 3
Teaches intermediate listening, speaking, reading, and writing within cultural contexts. Conducted in the target language. Prerequisite: WLC 102G or placement by exam.

WLC 201J - INTERM FOREIGN LANG: JAPANESE
Semester Hours: 3
Teaches intermediate listening, speaking, reading, and writing within cultural contexts. Conducted in the target language. Prerequisite: WLC 102 or placement by exam.

WLC 201R - INTERM FOREIGN LANG: RUSSIAN
Semester Hours: 3
Teaches intermediate listening, speaking, reading, and writing within cultural contexts. Conducted in the target language. Prerequisite: WLC 102R or placement by exam.

WLC 201S - INTERM FOREIGN LANG: SPANISH
Semester Hours: 3
Teaches intermediate listening, speaking, reading, and writing within cultural contexts. Conducted in the target language. Prerequisite: WLC 102S or placement by exam.

WLC 202A - INTERM FOREIGN LANG II: ARABIC
Semester Hours: 3
Teaches listening, speaking, reading and writing within cultural contexts. Conducted in the target language. Prerequisites: WLC 201A or placement by exam.
WLC 202F - INTERM FOREIGN LANG II: FRENCH  
Semester Hours: 3  
Teaches listening, speaking, reading and writing within cultural contexts. Conducted in the target language. Prerequisites: WLC 201F or placement by exam.

WLC 202G - INTERM FOREIGN LANG II: GERMAN  
Semester Hours: 3  
Teaches listening, speaking, reading and writing within cultural contexts. Conducted in the target language. Prerequisites: WLC 201G or placement by exam.

WLC 202J - INTERM FOREIGN LANG II: JAPANESE  
Semester Hours: 3  
Teaches listening, speaking, reading and writing within cultural contexts. Conducted in the target language. Prerequisites: WLC 201J or placement by exam.

WLC 202R - INTERM FOREIGN LANG II: RUSSIAN  
Semester Hours: 3  
Teaches listening, speaking, reading and writing within cultural contexts. Conducted in the target language. Prerequisites: WLC 201R or placement by exam.

WLC 202S - INTERM FOREIGN LANG II: SPANISH  
Semester Hours: 3  
Teaches listening, speaking, reading and writing within cultural contexts. Conducted in the target language. Prerequisites: WLC 201S or placement by exam.

WLC 204 - INTERNATIONAL CINEMA  
Semester Hours: 3  
Analyzes foreign language films centered on changing themes, such as gender issues, family, religion, children and society, the arts. Conducted in English. No prerequisite.

WLC 301F - CONVERSATION: FRENCH  
Semester Hours: 3  
Teaches conversational communication through cultural texts and media. Conducted in the target language. Prerequisite: WLC 202F or placement by exam.

WLC 301G - CONVERSATION: GERMAN  
Semester Hours: 3  
Teaches conversational communication through cultural texts and media. Conducted in the target language. Prerequisite: WLC 202G or placement by exam.

WLC 301J - CONVERSATION: JAPANESE  
Semester Hours: 3  
Teaches conversational communication through cultural texts and media. Conducted in the target language. Prerequisite: WLC 202J or placement by exam.

WLC 301R - CONVERSATION: RUSSIAN  
Semester Hours: 3  
Teaches conversational communication through cultural texts and media. Conducted in the target language. Prerequisite: WLC 202R or placement by exam.

WLC 301S - CONVERSATION: SPANISH  
Semester Hours: 3  
Teaches conversational communication through cultural texts and media. Conducted in the target language. Prerequisite: WLC 202S or placement by exam.

WLC 302F - COMPOSITION: FRENCH  
Semester Hours: 3  
Teaches writing skills through cultural texts and media. Conducted in the target language. Prerequisite: WLC 202F or placement by exam.
WLC 302G - COMPOSITION:GERMAN  
Semester Hours: 3  
Teaches writing skills through cultural texts and media. Conducted in the target language. Prerequisite: WLC 202G or placement by exam.

WLC 302R - COMPOSITION:RUSSIAN  
Semester Hours: 3  
Teaches writing skills through cultural texts and media. Conducted in the target language. Prerequisite: WLC 202R or placement by exam.

WLC 302S - COMPOSITION:SPANISH  
Semester Hours: 3  
Teaches writing skills through cultural texts and media. Conducted in the target language. Prerequisite: WLC 202S or placement by exam.

WLC 303F - FOREIGN LANG LIFE & PROF:FRENC  
Semester Hours: 3  
Teaches foreign language skills for careers in business, technology, politics, etc. Conducted in the target language. Prerequisite: WLC 202F or by placement.

WLC 303G - FOREIGN LANG LIFE & PROF:GERMA  
Semester Hours: 3  
Teaches foreign language skills for careers in business, technology, politics, etc. Conducted in the target language. Prerequisite: WLC 202G or by placement.

WLC 303R - FOREIGN LANG LIFE & PROF:RUSSI  
Semester Hours: 3  
Teaches foreign language skills for careers in business, technology, politics, etc. Conducted in the target language. Prerequisite: WLC 202R or by placement.

WLC 303S - FOREIGN LANG LIFE & PROF:SPANI  
Semester Hours: 3  
Teaches foreign language skills for careers in business, technology, politics, etc. Conducted in the target language. Prerequisite: WLC 202S or by placement.

WLC 304F - CULTURE:FRENCH  
Semester Hours: 3  
Teaches the arts, histories, social customs, and values of the target culture. Conducted in the target language. Prerequisites: WLC 301F or WLC 302F.

WLC 304G - CULTURE:GERMAN  
Semester Hours: 3  
Teaches the arts, histories, social customs, and values of the target culture. Conducted in the target language. Prerequisites: WLC 301G or WLC 302G.

WLC 304R - CULTURE:RUSSIAN  
Semester Hours: 3  
Teaches the arts, histories, social customs, and values of the target culture. Conducted in the target language. Prerequisites: WLC 301R or WLC 302R.

WLC 304S - CULTURE:SPANISH  
Semester Hours: 3  
Teaches the arts, histories, social customs, and values of the target culture. Conducted in the target language. Prerequisites: WLC 301S or WLC 302S.

WLC 305F - INTRO TO LITERATURE:FRENCH  
Semester Hours: 3  
Introduces the literature of the target language in cultural contexts. Conducted in the target language. Prerequisite: WLC 301F or WLC 302F.

WLC 305G - INTRO TO LITERATURE:GERMAN  
Semester Hours: 3  
Introduces the literature of the target language in cultural contexts. Conducted in the target language. Prerequisite: WLC 301G or WLC 302G.

WLC 305R - INTRO TO LITERATURE:RUSSIAN  
Semester Hours: 3  
Introduces the literature of the target language in cultural contexts. Conducted in the target language. Prerequisite: WLC 301R or WLC 302R.
WLC 305S - INTRO TO LITERATURE:SPANISH  
Semester Hours: 3  
Introduces the literature of the target language in cultural contexts. Conducted in the target language. Prerequisite: WLC 301S or WLC 302S.

WLC 404F - TEXTS & CONTEXTS:SEM LIT:FRENC  
Semester Hours: 3  
In-depth study of authors, genres, or movements in cultural contexts. Conducted in the target language. May be repeated when taught with a different topic. Prerequisite: WLC 301F or WLC 302F.

WLC 404G - TEXTS & CONTEXTS:SEM LIT/GERMA  
Semester Hours: 3  
In-depth study of authors, genres, or movements in cultural contexts. Conducted in the target language. May be repeated when taught with a different topic. Prerequisite: WLC 301G or WLC 302G.

WLC 404R - TEXTS & CONTEXTS:SEM LIT:RUSSI  
Semester Hours: 3  
In-depth study of authors, genres, or movements in cultural contexts. Conducted in the target language. May be repeated when taught with a different topic. Prerequisite: WLC 301R or WLC 302R.

WLC 404S - TEXTS & CONTEXTS:SEM LIT:SPANI  
Semester Hours: 3  
In-depth study of authors, genres, or movements in cultural contexts. Conducted in the target language. May be repeated when taught with a different topic. Prerequisite: WLC 301S or WLC 302S.

WLC 410 - INT'L INTERN:COMP LANG/CULT  
Semester Hours: 3-6  
Capstone for majors, offering practical experience in commercial or public organizations domestically or abroad. Conducted in English. Prerequisite: WLC 303.

WLC 499F - INDEPENDENT STUDY:FRENCH  
Semester Hours: 3  
Independent study and/or study abroad. Prerequisite: WLC 202F.

WLC 499G - INDEPENDENT STUDY:GERMAN  
Semester Hours: 3  
Independent study and/or study abroad. Prerequisite: WLC 202G.

WLC 499R - INDEPENDENT STUDY:RUSSIAN  
Semester Hours: 3  
Independent study and/or study abroad. Prerequisite: WLC 202R.

WLC 499S - INDEPENDENT STUDY:SPANISH  
Semester Hours: 3  
Independent study and/or study abroad. Prerequisite: WLC 202S.

Foreign Language, BA

The major is comprised of twelve courses of which ten will be taught in the focus language (French, German, Russian, Spanish) and two (WLC 204 and WLC 410) will utilize English for in-class discussions.

- Foreign Language, BA requires 120 credit hours.
- 36 of 120 credit hours must be taken at 300 level or higher.
- Must have a 2.0 GPA in major, minor, and overall.
- No more than 6 credit hours of HPE may count in degree requirements.
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- No more than 60 credit hours from a two-year school can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

**Foreign Languages, BA - Foreign Language and International Trade Concentration**

World Languages majors interested in enhancing their preparation for participation in the global economy may wish to consider a focus in international trade, which combines language courses with a study of business and international politics. The Foreign Language and International Trade Program includes the following courses. No minor is required for students who major in foreign languages with the international trade focus.

- Foreign Language, BA requires 120 credit hours.
- 36 of 120 credit hours must be taken at 300 level or higher.
- Must have a 2.0 GPA in major, minor, and overall.
- No more than 6 credit hours of HPE may count in degree requirements.
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- No more than 60 credit hours from a two-year school can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

Total Semester Hours: 117-120
Foreign Language and Global Engagement Certificate
(French/German/Russian/Spanish)

The Department of World Languages and Cultures, in collaboration with the Global Studies Program, offers a Certificate in Foreign Language and Global Engagement in French, German, Russian, and Spanish. Other languages such as Japanese and Arabic may also qualify for the certificate if the language is being offered up to the WLC 301 level at UAH, or if an equivalent upper-level course can be completed abroad.

All coursework must be done in a single language. The Certificate is aimed at UAH students and members of the larger community who wish to acquire officially certified world language and culture skills appropriate for global engagement in a breadth of academic contexts (from research collaboration across the disciplines and professions to medical practice, global trade, the arts, and diplomacy). The Certificate also facilitates UAH’s evolving study-abroad/research opportunities that require world language skills. Upon successful completion of the Certificate, the students will have acquired intermediate world language proficiency in both oral and written communication appropriate in a variety of everyday situations and professional environments. They will also have gained basic knowledge in the cultural, economic, political, and historical ramifications of globalization.

The requirements for the Certificate are:

WLC 101F    INTRO FOREIGN LANG I:FRENCH 3
or WLC 101G    INTRO FOREIGN LANG I:GERMAN
or WLC 101J    INTRO FOREIGN LANG I:JAPANESE
or WLC 101R    INTRO FOREIGN LANG I:RUSSIAN
or WLC 101S    INTRO FOREIGN LANG I: SPANISH
WLC 102F    INTRO FOREIGN LANG II:FRENCH 3
or WLC 102G    INTRO FOREIGN LANG II:GERMAN
or WLC 102J    INTRO FOREIGN LANG II:JAPANESE
or WLC 102R    INTRO FOREIGN LANG II:RUSSIAN
or WLC 102S    INTRO FOREIGN LANG II:SPANISH
WLC 201F    INTERM FOREIGN LANG:FRENCH 3
or WLC 201G    INTERM FOREIGN LANG:GERMAN
or WLC 201J    INTERM FOREIGN LANG: JAPANESE
or WLC 201R    INTERM FOREIGN LANG:RUSSIAN

**Total Semester Hours** 18

To qualify for the Certificate, a “B” average or higher is required for the world language courses; a grade of “B” or higher is required for GS 200. Students majoring or minoring in world languages can also pursue this Certificate. Native speakers of French, German, Russian, or Spanish cannot pursue the Certificate in their own language but are encouraged to pursue the Certificate in one of the other languages. Since the Certificate is not a Major/Minor, it does not presuppose GER courses or any other coursework prior to the Certificate sequence. It can also be earned as a post-Baccalaureate certificate. Standard UAH admission procedures for degree-seeking students apply.

Students with some prior knowledge of the language can test out of lower courses and be placed into higher courses. For the courses they test out of, students receive credit hours, but no grades or quality points towards completion of the Certificate.

---

**Mission**

The UAH College of Business serves business and society through the expertise of our alumni, students, and faculty. We provide academically rigorous programs emphasizing the application of theory and skills in scientific, technological, and traditional business environments. We are committed to offering degree programs that build analytical skills, develop an entrepreneurial mindset, and provide opportunities to engage with practice through projects, practica, and internships.

**Accreditation**

The College of Business is accredited by AASCB International - The Association to Advance Collegiate Schools of Business.* AASCB provides the highest standard of accreditation offered to business schools worldwide, with fewer than 25% of U.S. business schools and fewer than 5% of worldwide...
business schools achieving the distinction. To maintain AACSB accreditation, we must have a specific plan and sufficient resources to support high quality undergraduate and graduate programs, a highly qualified faculty who maintain credentials through continuous research or engagement with practice, and a process for assessing that our students are learning what we teach. We report to AACSB annually and undergo a comprehensive site visit every five years.

*AACSB International is a not-for-profit corporation comprised of member organizations and institutions devoted to the promotion and continuous improvement of higher education for business administration and management. Organized in 1916, AACSB International is the premier accrediting agency for bachelor’s, master’s and doctoral degree programs in business administration and accounting.

Degrees Offered

Bachelor of Science in Business Administration (BSBA)
The BSBA is a comprehensive four-year program that prepares graduates to be managers, leaders, and technical specialists in business, not-for-profit, and government organizations. The degree program includes a liberal arts and science foundation (called Charger Foundations), a business core curriculum, a business major, a concentration within the major, and a choice of elective courses. During the first two years, students focus on Charger Foundations with coursework in composition, the humanities and fine arts, history, social and behavioral sciences, natural and physical sciences, and mathematics. Charger Foundation courses are designed to broaden intellectual awareness and enhance the development of cultural literacy and analytical thinking. During the remaining two years, students first study the core foundations of business, then they focus on a specific major in either accounting, finance, management, information systems, or marketing. Within each major, students have an opportunity to further concentrate their program in an area of particular interest such as investments, federal contract accounting, human resource management, supply chain management, and other areas.

Bachelor of Science in Economics and Computational Analysis (BSECA)
The Economics and Computational Analysis (BSECA) degree (p. 243) is a comprehensive four-year program that teaches students how to combine economic models, computational tools, and econometric methods to improve business and social decision-making. Students evaluate economic development strategies, identify entrepreneurial opportunities, and analyze public policy in a world that continues to change the way people communicate, perceive their world, make decisions, and conduct business. During the first two years, students focus on Charger Foundations with coursework in composition, the humanities and fine arts, history, social and behavioral sciences, natural and physical sciences, and mathematics. Charger Foundation courses are designed to broaden intellectual awareness and enhance the development of cultural literacy and analytical thinking. In the junior and senior years, students move into higher level coursework in economics and complete the requirements for either a major or a minor in an area of interest. The BSECA program is designed to be coupled with a minor or double major to enrich the student’s perspective about defining and modeling complex problems. Some students select a double major in a business discipline such as finance or accounting whereas others choose a different context by selecting a double major or minor in sociology, philosophy, or political science.

Joint Undergraduate Master’s Program (JUMP)
The College of Business provides an opportunity for highly motivated, high performing undergraduate students to speed the transition into graduate programs. The JUMP Program (http://www.uah.edu/admissions/graduate/joint-undergraduate-masters-program) allows a maximum of four graduate-level courses to apply towards both the undergraduate and graduate degree. Students may be admitted to the JUMP Program (http://www.uah.edu/admissions/graduate/joint-undergraduate-masters-program) anytime prior to their final semester. For more information about the JUMP program, please contact the College’s Director of Academic Advising at GradBiz@uah.edu, by calling 256.824.6787 or visiting the Business Administration Building Room 102.

Bachelor of Science in Business Administration Requirement

Degree Requirements
The Bachelor of Science in Business Administration degree program is a comprehensive four-year program which includes a liberal arts and science foundation, a business administration core curriculum, a major, and a choice of elective courses.

The undergraduate curriculum is divided into the lower and upper division. The lower division is the first two years of courses (courses numbered 100-299); the upper division is the last two years (courses numbered 300-499). To prepare students for the challenges of the future, the College’s program provides a solid foundation in the diverse academic disciplines related to the needs of business, industry, and government. At the undergraduate level students concentrate the first two years of study on general course work in composition, the humanities and fine arts, history, social and behavioral sciences, and natural and physical sciences and mathematics. Successful completion of these courses broadens intellectual awareness and enhances the development of cultural literacy and analytical thinking. This general education component, along with the pre-professional business administration core curriculum, prepares the student for upper-division course work in the College of Business Administration.

The remaining two years of course work develop the student’s understanding of the diverse functions of business in the U.S. and world-wide economy. This is accomplished by studying the essential concepts of business administration as well as focusing on one of the major disciplines. The student may
declare a major in accounting, finance, management, information systems, or marketing. Students enrolling in the College's programs who have already chosen the major they wish to pursue may designate that major when they register. Students who are undecided about what major they wish to pursue should indicate Management in the registration process.

To be awarded a BSBA degree, each student must meet the following degree requirements established by the university and the faculty of the College of Business Administration:

1. Complete the lower-division general education requirement;
2. Complete the lower-division pre-professional business administration core curriculum;
3. Complete the upper-division general education requirement;
4. Complete the upper-division business administration core curriculum;
5. Complete the courses required for the major;
6. Complete a minimum of 128 semester hours of work with a minimum of 39 semester hours in courses numbered 300 and above;
7. Attain a minimum grade point average of 2.0 (C) in all course work attempted;
8. Attain a minimum grade point average of 2.0 (C) in the business administration core curriculum (42 semester hours).
9. Attain a minimum grade point average of 2.0 (C) in the major.
10. Complete the Competitive Strategy course (MGT 499) with a minimum grade of "C"; and
11. Comply with University residence requirements.

Three levels of requirements must be completed in order to receive the Bachelor of Science in Business Administration degree:

1. University general education and graduation requirements,
2. College of Business Administration core requirements, and
3. College of Business Administration major requirements.

The recommended sequence of courses is presented in the following sections.

| Total Semester Hours | 128 |

1. The lower-division courses provide a foundation for advanced study. While students broaden their intellectual background through the general education requirements, they also develop basic business skills in the pre-professional business administration core curriculum. The general education requirements expose students to composition, humanities and fine arts, natural sciences and mathematics, and history, social and behavioral sciences.

2. Work in the last two years of study builds upon the foundations established by the general education requirements and the pre-professional business administration core curriculum. Upper-division requirements include upper-division general education courses, the business administration core curriculum, and courses in the major.

3. It is recommended that EH 300 or EH 301 be taken the first semester of the Junior year.

4. For the Upper Division Economics requirement a student may not choose an economics course required in their major.

5. International Business Requirement: Business majors acquire a broad knowledge of international business and economic theories, problems, and practices by taking MGT 450 and through the integration of global issues in the business administration core curriculum.

6. No more than 6 semester hours of HPE courses below the 200 level may count toward graduation.

**Accounting**

**Department Chair, Allen Wilhite**

333 Business Administration Building

Telephone: 256.824.6590

Email: wilhitea@uah.edu

**Mission**

The Department of Accounting, Economics, and Finance provides academically rigorous programs in accounting, economics and finance. We strive to teach sound principles and concepts as well as the analytical tools for applications to practical business problems. Through its scholarly activity, the departmental faculty develops and disseminates knowledge related to accounting, economics and finance theory, pedagogy, and practice.

**Accounting**

Accounting careers vary widely in today's complex, global economy. Graduates may find themselves tracking illegal funds for the FBI or preparing financial statements for multi-billion dollar firms. Generally, accounting career paths can be described as financial reporting, assurance, budget analysis, management accounting, tax accounting, and federal contract accounting. Accountants may work for public accounting firms, public or private corporations, governments at all levels, or for themselves in a private practice.

Students considering the professional certification examinations upon graduation, such as the Certified Public Accountant (CPA), the Certified Management Accountant (CMA), or the Certified Internal Auditor (CIA), will need course work in accounting beyond the minimum requirements for the BSBA degree. Among other requirements, the Alabama State Board of Public Accountancy requires 150 semester hours of credit in order to be licensed as a CPA in Alabama. The College offers a Master of Accountancy (MAcc) degree that meets or exceeds requirements for professional accounting certification.

**Majors in Accounting**

There are two concentrations within the accounting major:

- Accounting, BSBA - General Accounting Concentration (p. 235)
- Accounting, BSBA - Federal Contract Accounting Concentration (p. 232)

Each of the concentrations may be used as part of a CPA Prep 4 + 1 program (4 years of undergraduate study plus 1 year of graduate study) ending with the Master of Accountancy (MAcc) degree.

**Certificates in Accounting**

Sometimes individuals find themselves proceeding along a career path that involves work in the field of accounting even though they may have earned a bachelor's degree in a discipline other than accounting. Similarly, others may decide to pursue a career in accounting even though they have a bachelor's degree in a discipline other than accounting. Several avenues for obtaining additional knowledge in the area of accounting are open to these individuals: pursue an undergraduate degree in accounting, pursue a graduate degree in accounting, or obtain a Certificate in Accounting. Since each of these options has its own merits, the Accounting faculty recommends students consult with the department chair to discuss the pros and cons of each alternative.
The Certificate in Accounting is a non-degree option designed to give students a strong foundation in accounting. It bypasses much of the coursework required for the BSBA degree, but it does not result in a degree. The program has four options, as described below:

- Accounting - General Accounting Option (p. 239)
- Accounting - Management Accounting Option (p. 239)
- Accounting - Public Accounting Option (p. 240)
- Accounting - Federal Contract Accounting Option (p. 239)
- Certificate in Public Accounting (CPA) (p. 238)

ACC 210 - ACCOUNTING FOR BUSINESS
Semester Hours: 4

An introduction to the role accounting information plays in business. Topics include both external and internal uses of accounting information with a particular focus on the accounting cycle, the preparation and interpretation of financial statements, and the role of accounting information in management decision making.

ACC 211 - PRINC OF FINANCIAL ACCOUNTING
Semester Hours: 3

Introduction to basic concepts that underlie accounting information. Topics include the statement of financial position, the income statement, the accounting cycle, internal control, and ethical and behavioral issues in financial reporting. Emphasis is placed on proper use of financial statement information.

ACC 212 - MANAGEMENT ACCOUNTING
Semester Hours: 3

An introduction to the use of accounting information for internal planning and control. Topics include cost behavior, cost-volume-profit analysis, cost measurement, relevant costs for decision-making, budgeting, and performance evaluation. Prerequisite: ACC 211.

ACC 307 - ACCOUNTING INFORMATION SYS
Semester Hours: 3

A detailed review and analysis of procedures required to capture, classify, summarize and report financial information. Topics include elements of accounting systems, business documents, consideration in systems design, flowcharting, and procedures to protect property and information. Extensive use is made of the personal computer and the SAP software to illustrate the concepts covered in the course. Prerequisite: ACC 210.

ACC 310 - INTERM FINANCIAL ACCT I
Semester Hours: 3

First in a two-course sequence to examine the measurement and reporting of income, cash flows, assets, liabilities, and owner's equity in financial statements. Topics include financial statements, current assets and liabilities, investments, revenue recognition, and error analysis. Prerequisite: ACC 210 (with a grade of B- or better).

ACC 310L - LABORATORY
Semester Hours: 0

Intermediate Accounting I Lab provides extra opportunities for students to practice and to develop their problem-solving skills.

ACC 311 - INTERM FINANCIAL ACCT II
Semester Hours: 3

Second in a two-course sequence to examine the measurement and reporting of income, cash flows, assets, liabilities, and owner's equity in financial statements. Topics include long-term assets and liabilities, leases, income taxes, pensions, and owner's equity. Prerequisite: ACC 310.

ACC 311L - LABORATORY
Semester Hours: 0

Intermediate Accounting II Lab provides extra opportunities for students to practice and to develop their problem-solving skills.

ACC 313 - INDIVIDUAL/SMALL BUS INCOME TA
Semester Hours: 3

Determination of taxable income, business and non-business deductions, and selected aspects of tax accounting for individuals and sole proprietorships. Prerequisite: ACC 210.

ACC 413 - CORP/PARTNERSHIP/ESTATE TAXES
Semester Hours: 3

Tax accounting for partnerships, corporations, S corporations, estates, and trusts. Tax administration and research are emphasized. Prerequisite: ACC 313.
ACC 414 - COST ACCOUNTING
Semester Hours: 3

Development and use of cost data for external reporting and internal planning and control. Topics include cost modeling, job and process costing, standard costing, activity-based costing, and budgeting. Development of relevant cost information for special purposes is also considered. Prerequisite: ACC 212.

ACC 415 - ADV FINANCIAL ACCOUNTING
Semester Hours: 3

Analysis of financial accounting issues and alternatives concerning business combinations, intercorporate investments, international business, and partnerships. Prerequisite: ACC 311.

ACC 417 - ACC ST/LOCAL GOV & NON-PROFITS
Semester Hours: 3

Fund accounting at federal, state, and local governments, hospitals, and universities. Special accounting principles, budgeting, accounting for various funds and account groups are emphasized. Prerequisite: ACC 212.

ACC 420 - STATE AND LOCAL TAXATION
Semester Hours: 3

Principles of state income tax, sales and other excise taxes and property tax. Taxation of interstate commerce will be examined along with US constitutional restrictions on the ability of states to tax interstate commerce.

ACC 431 - PRINCIPLES OF AUDITING
Semester Hours: 3

Conceptual foundations of auditing practice. Basic auditing concepts including professional ethics, legal ability, independence, and competence. Auditing of computer-oriented systems, audit sampling, and standards of reporting. Role of the internal and independent auditor. Prerequisite: ACC 307 & ACC 310.

ACC 432 - ADVANCED AUDITING
Semester Hours: 3

Practical applications of auditing concepts and standards. An understanding of auditing principles is reinforced and expanded by exposure to problems and cases. Prerequisite: ACC 431.

ACC 433 - FORENSIC ACCOUNTING
Semester Hours: 3

Study of the nature and types of fraud. The course covers the tools and techniques used to prevent, investigate, and detect fraud. Prerequisite: ACC 431.

ACC 440 - BASIC GOVERNMENTAL CONTRACT AC
Semester Hours: 3

Basic coverage and principles of government contract accounting with an emphasis on the Federal Acquisition Regulation (FAR). Prerequisite: ACC 314 or ACC 414.

ACC 441 - ADVANCED GOV CONTRACT ACCTG
Semester Hours: 3

Advanced issues in government contract cost accounting with an emphasis on the Federal Acquisition Regulation (FAR) and Cost Accounting Standards (CAS) cost allocation guidelines. Prerequisite: ACC 440.

ACC 470 - SEMINAR/CONT ACCTG ISSUE
Semester Hours: 3

Current topics in professional accounting. Prerequisite: ACC 311.

ACC 480 - PROFESSIONAL CERTIFICATION
Semester Hours: 3

ACC 490 - SPECIAL PROJECTS
Semester Hours: 1-3

Independent study in an area of interest to the student in the fields of accounting. Department chair permission required.
ACC 495 - INTERNSHIP IN ACCOUNTING
Semester Hours: 1-3

Active involvement in a project in a business enterprise, professional organization, or government agency that has particular interest and relevance to the student. Subject to College’s guidelines on internships. Course grade will be given on a satisfactory (S)/unsatisfactory (U) basis.

Accounting, BSBA - Federal Contract Accounting Concentration

BSBA, Accounting (Federal Contract Accounting Concentration) Requirements:
- BSBA degree requires 120 credit hours.
- 12 credit hours of 300 level and above must be taken in the major.
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- No more than 60 credit hours from a two-year college can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

Accounting, BSBA - General Accounting Concentration

BSBA, Accounting (General Accounting Concentration) Requirements:

- BSBA degree requires 120 credit hours.
- 12 credit hours of 300 level and above must be taken in the major.
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- No more than 60 credit hours from a two-year college can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

### Certificate in Public Accounting (CPA)

The Alabama State Board of Public Accountancy requires a minimum of both semester hours and course content in order to sit for the CPA examination. The current (2012) requirements are 150 semester hours and content coverage of financial accounting, auditing, taxation, management accounting, governmental and not-for-profit accounting, business law, and accounting electives. Therefore, students considering CPA certification will need course work in accounting beyond the minimum requirements for the BSBA degree. For complete details and requirements see the web page of the Alabama State Board of Public Accountancy: [http://asbpa.state.al.us/exam.html](http://asbpa.state.al.us/exam.html).

The College’s CPA Prep 4 + 1 Program provides an efficient way for students to complete their BSBA in accounting, complete the requirements to sit for the CPA exam, and obtain a Master of Accountancy degree, all in 5 years. The program includes 4 years of undergraduate study (leading to the BSBA
with a major in Accounting) plus 1 year of full-time graduate study (culminating in the Master of Accountancy degree). Students who complete the CPA Prep 4 + 1 Program and pass the CPA exam have assembled an impressive set of credentials.

Please refer to the UAH Graduate Catalog for more information on the graduate portion of the program.

**Accounting Certificate - Federal Contract Accounting Option**

In areas of the country with a high concentration of federal government contractors, accountants are frequently required to understand and comply with the Federal Acquisition Regulations. This knowledge is covered in the Federal Contract Accounting Option. This option is oriented toward individuals who wish to work in areas of the country with a heavy concentration of federal government contractors.

**Electives**

1. Electives may be selected from any 300- or 400-level course in the College of Business Administration or may be selected from outside the College with the approval of the department chair.

Completion of the Management Accounting Option, with a careful selection of electives, provides the basic educational background necessary to sit for the CMA examination. See the web page of the Institute of Management Accountants: [http://www.imanet.org/](http://www.imanet.org/). However, prior to taking the CMA examination, additional coursework or a rigorous preparatory course may be necessary in order to improve one's ability to pass the examination.

</tbody>
</table>

**Electives**

1. Electives may be selected from any 300- or 400-level course in the College of Business Administration other than accounting.
To be eligible for the CPA exam, a student must have a minimum of 150 semester hours from combined prior degree work and certificate work at UAH. If necessary to meet the total 150-semester hour requirement, electives may be selected from any 300 or 400 level course in the College of Business Administration or may be selected from outside the College with the approval of the department chair. Completion of the Public Accounting Option meets the (2012) requirements of the Alabama State Board of Public Accountancy to sit for the CPA examination in Alabama. See the web page of the Alabama State Board of Public Accountancy (http://www.asbpa.alabama.gov). However, prior to taking the CPA examination, a rigorous review course may be necessary to improve one's ability to pass the examination.

A student who has no course work from a prior degree that can be accepted toward the certificate program should seek counsel from the College's Graduate Advisor to determine whether the MAcc is preferable to completing the certificate program or to determine whether a second bachelor's degree in accounting is preferable to completing the certificate program.

**Economics**

**Department Chair, Allen Wilhite**  
333 Business Administration Building  
Telephone: 256.824.6590  
Email: wilhitea@uah.edu

**Mission**

The Department of Accounting, Economics, and Finance provides academically rigorous programs in accounting, economics and finance. We strive to teach sound principles and concepts as well as the analytical tools for applications to practical business problems. Through its scholarly activity, the departmental faculty develops and disseminates knowledge related to accounting, economics and finance theory, pedagogy, and practice.

**Economics**

Economics is a way of thinking about the world. By studying economics you learn how to take complex issues and boil them down to their essence—to see through the messy details to the core of a situation. You'll become a better thinker and a better decision maker. The Economics and Computational Analysis degree program teaches students how to combine economic models, computational tools, and econometric methods to improve business and social decision-making, evaluate economic development strategies, identify entrepreneurial opportunities, and analyze public policy in a world that continues to change the way people communicate, perceive their world, make decisions, and conduct business.

We teach two fundamental skills in our economics program:

1. how to think about complex problems and  
2. how to identify and analyze the data you need to solve those problems

These skills are needed desperately in almost all fields. Economists work in banking, international trade, as entrepreneurs, in the public sector, finance, national security, as consultants, and on and on. Many economists go to graduate school—law, medicine, more economics, and any business field values the skills possessed by an economist.

We encourage our students to take a minor or to double major in another discipline because economics blends so smoothly with other programs across the campus. To facilitate this combination of disciplines, our economics degree requirements are very flexible and most students can double major and still graduate in four years.

**Major in Economics**

The BS in Economics & Computational Analysis is designed to be coupled with a minor or a double major in another discipline such a finance, sociology, psychology, political science or many others. The degree requirements are very flexible and most students can double major and still graduate in four years.

- Economics and Computational Analysis, BS (p. 243)

**Minor in Economics**

The minor in Economics is available to students from any college, including students pursuing a degree in Business Administration.

- Economics (p. 246)

ECN 142 - PRINC OF MACROECONOMICS  
Semester Hours: 3

How does our economy function? Why do we have periods of unemployment and inflation and what can we do about it? Economics is a way of thinking about the world, how to identify and focus on fundamental issues so we can understand our economy and how monetary and fiscal policy affects our lives. Prerequisite: any 100 level or 200 level MA course.
ECN 143 - PRINC OF MICROECONOMICS
Semester Hours: 3
How do markets coordinate our unlimited wants with our limited capacity to produce? We study producer and consumer choice in a variety of market structures, the social welfare implications inherent in market systems and policies designed to correct those market failures. Prerequisite: Any 100 level or 200 level MA course.

ECN 340 - MACRO ECONOMIC ANALYSIS
Semester Hours: 3
A comprehensive study of the nation's economic system. How interdependent market systems determine income, consumption, saving, investment, interest, employment, and the aggregate price level. Determinants of economic growth and the effects of monetary and fiscal policy are central issues. Prerequisite: ECN 142 and ECN 143.

ECN 345 - MICRO ECONOMIC ANALYSIS
Semester Hours: 3
This course provides an informed perspective of, and ability to use, microeconomic theory. We develop the analytical tools needed solve problems and focus on the logical foundations of these tools. Core topics include consumer behavior, production, exchange, markets, and game theory. Prerequisite: ECN 142 and ECN 143.

ECN 352 - MONEY AND BANKING
Semester Hours: 3
Organization, operation, and economic significance of monetary and banking systems. Fractional reserve banking systems, money creation, the Federal Reserve System, U.S. financial intermediaries. Introduction to monetary theory and international finance. Prerequisites: ECN 142 and ECN 143.

ECN 406 - SPORTS ECONOMICS
Semester Hours: 3
The course uses economic tools to study market outcomes in sports: the market for talent, labor relations, and the role of government. Specific topics include the demand for sports, sports franchises, and the theory of the firm, compensation of player talent, economics of stadiums, and sports media. Prerequisite: ECN 143.

ECN 411 - ECONOMICS INFORMATION TECH
Semester Hours: 3
Explores economic theories of consumer and firm behavior and strategy in the information technology industry with emphasis on applying formal tools of analysis in real-world contexts. Core topics include cost structures, non-competitive markets, network effects, and game theory. Prerequisites: ECN 143 and MA 120.

ECN 445 - GAMES AND NETWORKS
Semester Hours: 3
An introduction to game theory and economic and social network analysis. Student will explore the use of simple games to understand serious games strategic interactions -- especially in social network settings. Prerequisite: ECN 143.

ECN 450 - INTERNATIONAL BUSINESS
Semester Hours: 3
Cross-discipline course combing theoretical and practical aspects of doing business in the global market. Three modules consisting of international management, marketing and economic/finance cover topics including the legal, socio-political environment, negotiations/diplomacy, import/export mechanics, international distribution, balance of payments, hedging, trade agreements (GATT), and international business strategy.

ECN 454 - INTERNATIONAL ECONOMICS
Semester Hours: 3
Behavior of foreign exchange rates under different monetary standards, methods of financing international trade, historical development of international financial institutions, current and proposed methods for fostering international trade, and problems of international liquidity. Prerequisite: FIN 301.

ECN 470 - SEMINAR IN ECONOMICS
Semester Hours: 3
Extensive readings and reports reflecting current developments and trends in economic theory and its application to the decision-making process in business and government.
ECN 475 - LABOR ECONOMICS  
Semester Hours: 3  
Economic analysis of labor markets; labor demand and labor supply at the market and individual level. Topics include individual decisions to supply labor, compensating wage differentials, human capital investment, discrimination in labor markets, pay and productivity, and the role of labor unions. Prerequisite: ECN 143.

ECN 480 - INTRO ECONOMETRICS  
Semester Hours: 3  
An introduction to the quantitative measurement and analysis of actual economic and business phenomena. Prerequisites: MSC 288.

ECN 481 - RESEARCH PRACTICUM  
Semester Hours: 3  
The economics research practicum is designed to give students research experience. With the approval of one of the economics' professors, a student teams up with a professor who mentors them through a research project. Prerequisites: ECN 340 and ECN 345.

ECN 490 - SPECIAL PROJECTS  
Semester Hours: 3  
Faculty guided Independent Study in an area of interest to the student and faculty member. Approval of department chair is required.

ECN 499 - AGENT-BASED COMPUTA ECON  
Semester Hours: 3  
Computational Economics introduces students to complex dynamic economic systems. Agent-based computational economics builds systems piece by piece - individual economic agents are constructed and placed in a virtual environment. This creates a virtual laboratory for economic experimentation. Prerequisites: ECN 340 and ECN 345.

Economics and Computational Analysis, BS  
BS, Economics and Computational Analysis:  
- BS degree requires 120 credit hours.  
- 12 credit hours of 300 level and above must be taken in the major.  
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.  
- No more than 60 credit hours from a two-year college can be applied toward a UAH degree.  
- For graduation application instructions, see here (p. 806).

Economics Minor

Students can minor in economics by taking 18 semester hours of economics courses. Twelve specific semester hours are required and the remaining six are electives. A total of twelve semester hours must be at the 300 level or above. Students in the College of Business Administration may obtain a minor in economics. ECN 142 and ECN 143 may be counted in both the General Education Requirement (GER) and in the economics minor. Furthermore, the Upper Division General Education Requirement economics course may be counted in the economics minor. However, any course that is utilized in the 21 semester hours for a business major may not be used in the Economics minor.

The 18 semester hour minor includes the following courses:

- **ECN 142** PRINC OF MACROECONOMICS 3
- **ECN 143** PRINC OF MICROECONOMICS 3
- **ECN 340** MACRO ECONOMIC ANALYSIS 3
- **ECN 345** MICRO ECONOMIC ANALYSIS 3

Select 6 semester hours from the following:

- **ECN 352** MONEY AND BANKING
- **ECN 406** SPORTS ECONOMICS
- **ECN 411** ECONOMICS INFORMATION TECH
- **ECN 445** GAMES AND NETWORKS
- **ECN 454** INTERNATIONAL ECONOMICS
- **ECN 470** SEMINAR IN ECONOMICS
- **ECN 475** LABOR ECONOMICS
- **ECN 480** INTRO ECONOMETRICS
- **ECN 499** AGENT-BASED COMPUTA ECON

**Total Semester Hours** 18

Finance

Department Chair, Allen Wilhite
333 Business Administration Building
Telephone: 256.824.6590
Mission
The Department of Accounting, Economics, and Finance provides academically rigorous programs in accounting, economics and finance. We strive to teach sound principles and concepts as well as the analytical tools for applications to practical business problems. Through its scholarly activity, the departmental faculty develops and disseminates knowledge related to accounting, economics and finance theory, pedagogy, and practice.

Finance
Finance careers vary widely in today's complex, global economy. The finance curriculum equips graduates with the modern analytic principles of the discipline that prepare them to function in a wide variety of institutional settings. Finance graduates may have careers in banking, investments, corporate finance, and federal contract management. Graduates may find themselves helping investment clients develop and monitor investment portfolios for retirement, managing a bank office and all its personnel, making multi-million dollar loans to corporations, taking a private firm public so its stock can be traded on stock exchanges, or managing the budget of a multi-billion dollar federal project.

Majors in Finance
Students who major in Finance may choose from four different concentrations. The details about each of the four options are described at the links below.

- Finance, BSBA - General Finance Concentration (p. 255)
- Finance, BSBA - Corporate Finance Concentration (p. 248)
- Finance, BSBA - Investments and Financial Institutions Concentration (p. 258)
- Finance, BSBA - Federal Government Finance and Contracts Concentration (p. 251)

FIN 100 - PERSONAL FINANCIAL PLANNING
Semester Hours: 3
An introduction to the study of personal money management. Topics include budgeting, home ownership, insurance, investing, and retirement planning. Cannot be used by finance majors as an elective in the major.

FIN 301 - PRINCIPLES OF FINANCE
Semester Hours: 3
A study of the basic principles of modern finance: financial statement analysis, time value of money, security valuation, risk and return, capital investment, cost of capital, and international finance. Prerequisites: ECN 143, MSC 287, and ACC 212.

FIN 352 - MONEY & BANKING
Semester Hours: 3
Organization, operation, and economic significance of monetary and banking systems. Fractional reserve banking systems, money creation, the Federal Reserve System, U.S. financial intermediaries, introduction to monetary theory and international finance. Prerequisites: ECN 143.

FIN 370 - COMMERCIAL BANK MANAGEMENT
Semester Hours: 3
A study of the financial management of commercial banks emphasizing both current events and principles of sound management. Topics range from measuring bank performance, asset and liability management, risk management, and international banking.

FIN 375 - FINANCIAL INSTITUTIONS
Semester Hours: 3
Role and activities of financial intermediaries as they affect flow of funds and capital formation money markets, in which these institutions operate.

FIN 378 - INTERMEDIATE CORPORATE FINANCE
Semester Hours: 3
Financial theory as it relates to long-term and short-term financial planning, capital investment decisions, and capital structure policy decisions. Prerequisites: FIN 301.

FIN 400 - INVESTMENT PRACTICUM
Semester Hours: 4
Small number of students work closely with finance faculty in the UAH Capital Management Group (CMG) to manage actual investment portfolios. Emphasis is placed on individual stock selection and management of the portfolio to meet objectives. Prerequisites: FIN 460 or permission of instructor.
FIN 431 - ADVANCED CORPORATE FINANCE
Semester Hours: 3

Financial principles applied to financial management problems such as cash management; payables and receivables management; cost of short-term credit; and forecasting and financial planning. Prerequisites: FIN 378.

FIN 454 - INTERNATIONAL FINANCE
Semester Hours: 3

An introduction to international finance for tomorrow's global business leaders, with a focus on the financial management dimensions of leading a multinational enterprise. Prerequisites: FIN 301.

FIN 460 - INVESTMENTS
Semester Hours: 3

A study of standard investment securities, as well as an overall view of the investment process. Securities covered include equities, fixed income, options, futures and mutual funds. Associated topics include financial markets, valuation models, and fundamental portfolio theory. Prerequisites: FIN 301.

FIN 461 - PORTFOLIO MANAGEMENT
Semester Hours: 3

A continuation of FIN 460 with an emphasis on the application of investment portfolio management. An understanding of the functional areas of portfolio management is stressed, including investment policy, investment strategy, portfolio construction, performance evaluation, and portfolio protection. Prerequisites: FIN 460.

FIN 490 - SPECIAL PROJECTS
Semester Hours: 3

Independent study in an area of interest to the student in the field of finance. Approval of department chair is required.

FIN 495 - INTERNSHIP IN FINANCE
Semester Hours: 1-3

Active involvement in a business enterprise, professional organization, or government agency that has particular interest and relevance to the student. Course grade will be given on a satisfactory (S)/unsatisfactory (U) basis. Subject to College's guidelines on internships.

Finance, BSBA - Corporate Finance Concentration

BSBA, Finance (Corporate Finance Concentration) Requirements:

- BSBA degree requires 120 credit hours.
- 12 credit hours of 300 level and above must be taken in the major.
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- No more than 60 credit hours from a two-year college can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

### Finance, BSBA - Investments and Financial Institutions Concentration

**BSBA, Finance (Investments and Financial Institutions Concentration) Requirements:**

- BSBA degree requires 120 credit hours.
- 12 credit hours of 300 level and above must be taken in the major.
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- No more than 60 credit hours from a two-year college can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

## Information Systems

**Department Chair, Fan Tseng**  
355 Business Administration Building  
Telephone: 256.824.6680  
Email: tsengf@uah.edu

In the BSBA in Information Systems, students may choose one of two concentrations:
• Business Analytics and Supply Chain Management (p. 263)
• Cybersecurity and Information Assurance (p. 267)

Mission

The Department of Management, Marketing and Information Systems provides academically rigorous instruction on the use of analytical tools and theoretical concepts in information systems, management, management science, and marketing to help students understand and apply them to practical business problems in scientific, technological and traditional business environments, non-profits, and government agencies. The departmental faculty also develops and disseminates knowledge on diverse topics related to the information systems and assurance, management, management science, and marketing.

Information Systems

The major in information systems (IS) is designed for students who want to become administrators or designers of information systems that utilize computers in business or administrative environment. IS subject matter includes computer hardware, computer software, database design, data communication, electronic commerce, systems analysis and design methodologies, information assurance, and behavioral issues and business or administrative context within which computer systems are applied.

We encourage Information Systems majors to use one of the electives in their degree program to take IS 495, Internship in Information Systems.

Majors in Information Systems

Students who major in Information Systems may focus their programs toward analytics or cybersecurity. The specifics about these two options are provided at the links below.

• Information Systems, BSBA - Business Analytics and Supply Chains Concentration (p. 263)
• Information Systems, BSBA - Cybersecurity and Information Assurance Concentration (p. 267)

IS 146 - COMPUTER APPL IN BUSINESS
Semester Hours: 3

Study of computer solutions to business problems. Overview of hardware/software systems and of data and information processing in organizations. Extensive use of Microsoft Office and other software for word processing, spreadsheet, presentation, and database applications related to business.

IS 210 - INTRO COMP PROG IN BUS
Semester Hours: 3

Fundamentals of business programming using languages such as Python, PHP, JavaScript, JQuery and HTML5. Prerequisite: IS 146.

IS 301 - INFO SYSTEMS IN ORGANIZATIONS
Semester Hours: 3

Understanding the role of information systems in organizations and how they relate to organizational objectives and organizational structure. Introduce information system applications and the SAP software to illustrate the concepts covered in this course. Prerequisite: IS 146.

IS 310 - ADV COMP PROGRAMMING IN BUS
Semester Hours: 3

Advanced business language features, control language and file handling, object oriented programming, software quality and maintenance. Workflow programming is also covered. Prerequisite: IS 210.

IS 340 - DATA BASES FOR MANAGEMENT
Semester Hours: 3

The management of data resources to effectively support the information systems of organizations. The course focuses on relational database model and Oracle SQL. It provides students with extensive experiences in formulating and executing SQL queries to retrieve and manipulate information from a relational database management system. Prerequisite: IS 310.

IS 351 - ENTERPRISE SYSTEMS
Semester Hours: 3

This course examines the concepts and uses of enterprise systems to integrate all aspects of an organization into one information system. Specific attention is given to how ERP systems facilitate the flow of information supporting core business processes and the organization’s supply chain. The course will emphasize the adaptation of ERP systems to support the organizational structures and business processes of the particular company to efficiently and effectively manage a firm’s business. Prerequisites: IS 301.
IS 401 - SURV OF INFORMATION ASSURANCE
Semester Hours: 3
Provides a managerial and technical overview of cybersecurity and introduces students to the complexity of the security issues facing organizations. Presents practices and standards for assessing security risks and managerial and technical approaches to minimize such risks. Prerequisite: IS 301.

IS 412 - MODERN SYSTEM ANALYSIS & DESGN
Semester Hours: 3
Identifying, analyzing, developing and acquiring information systems are central to the information systems discipline. The course covers identifying, conceptualizing and analyzing business opportunities where information systems applications can add value followed by design, development, and implementation of such applications. Planning for and management of this core IS activity is a critical organizational competence. Prerequisites: IS 301, IS 310, and IS 340.

IS 422 - SUPPLY CHAIN MANAGEMENT SYSTEM
Semester Hours: 3
This course presents the main concepts of supply chain management systems and software including ERP, CRM and SCM systems as well as the underlying technologies and managerial implications. It provides hands on familiarity with SAP supply chain modules. Prerequisite: IS 301.

IS 460 - TELECOMMUNICATIONS & NETWORKING
Semester Hours: 3
An overview of the IT infrastructure in modern organizations. The course starts from basic telecommunications networking concepts to digital platforms and ecosystems in the market. Prerequisite: IS 301.

IS 463 - COMPUTER FORENSICS
Semester Hours: 3
Provides an introduction to the area of computer forensics. Examines the problems and concerns related to computer investigations. Blends traditional investigation methods with classic systems-analysis problem-solving techniques and applies them to computing investigations. This course is lab intensive and students are expected to gain hands-on experience through learning to use various forensic software. Several information security topics nonspecific to forensics will also be covered. Prerequisite: IS 301.

IS 471 - BUSINESS INTELLIGENCE & ANALYTICS
Semester Hours: 3
Fosters data-analytical thinking. Uses real-world examples and cases to explore the use of big data for business decision-making and how Business Intelligence and Analytics (BIA) enhances business competitiveness. Provides hands-on experience mining data using many BIA tools. Prerequisite: IS 301.

IS 477 - NETWORK DEFENSE/OPERATING SYSTEMS
Semester Hours: 3
Introduction to network security issues and practical applications. Addresses translation, packet filtering, proxy servers, and firewalls, and Virtual Private Networks. This course assumes familiarity with Internet and basic networking concepts such as TCP/IP, gateways, routers, and Ethernet. Prerequisites: IS 301 and IS 460.

IS 480 - CURRENT TOPICS IN MGT INFO SYS
Semester Hours: 3
Prerequisite: IS 301.

IS 490 - SPECIAL PROJECTS
Semester Hours: 3

IS 491 - IS MANAGEMENT & STRATEGY
Semester Hours: 3
This course emphasizes the integration of various principles, theories, and techniques for implementing, deploying and managing enterprise information systems in organizations to gain strategic and operational advantages. Includes lectures, tours, readings, cases, and the completion of a major project. Normally taken during a student's last semester of studies. Prerequisites: IS 340 and either IS 351 or 460. Prerequisite with concurrency: IS 412.

IS 495 - INTERN IN INFO SYSTEMS
Semester Hours: 1-3

Information Systems, BSBA - Business Analytics and Supply Chains Concentration
BSBA, Information Systems (Business Analytics and Supply Chains Concentration) Requirements:

- BSBA degree requires 120 credit hours.
- 12 credit hours of 300 level and above must be taken in the major.
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- No more than 60 credit hours from a two-year college can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

Management

Department Chair, Fan Tseng
355 Business Administration Building
Telephone: 256.824.6680
Email: tsengf@uah.edu

The department of Management offers the following degree programs:

- BSBA, Management - Human Resources Management Concentration (p. 282)
- BSBA, Management - Acquisition Management Concentration (p. 275)
- BSBA, Management - Supply Chain Management Concentration (p. 285)
- BSBA, Management - General Management Concentration (p. 278)

Mission

The Department of Management, Marketing and Information Systems provides academically rigorous instruction on the use of analytical tools and theoretical concepts in information systems, management, management science, and marketing to help students understand and apply them to practical business problems in scientific, technological and traditional business environments, non-profits, and government agencies. The departmental faculty also develops and disseminates knowledge on diverse topics related to the information systems and assurance, management, management science, and marketing.

Management

A major in management prepares students for a wide range of professional managerial occupations. The management major is structured to provide the broad education students will need for flexibility and mobility as future managers in business, non-profit, or governmental organizations. Students may elect one of four concentrations.
The Human Resource Management (p. 282) concentration focuses on managing human behavior in organizations and the organizational functions of human resource management. This concentration is appropriate for students planning to work in positions with responsibilities for compensation management, employee relations, recruiting, staffing, human resource planning, training and development, and union-management relations.

The Acquisition Management (p. 275) concentration focuses the management of government contracts. It includes pre and post-award contract administration, cost and price analysis, contract negotiation, and government contract law. This concentration is designed to prepare students for entry-level professional positions in acquisition management with the Federal government or in similar positions with government contractors.

The Supply Chain Management (p. 285) concentration focuses on transportation, logistics, inventory management, distribution operations, and information systems as applied to supply chain integration, and on strategic decision making in the management of a firm's supply chain. The concentration is designed to prepare students for careers in military logistics with the Department of Defense and with managing supply chains in private sector firms.

The General Management (p. 278) concentration is offered for students whose career goals require a broad knowledge of the functional areas of management rather than a specialization in a particular field. This concentration allows students maximum flexibility in customizing their major field coursework to fit their particular career ambitions. For example, students considering careers in international business may wish to plan their program of study to accommodate such career goals.

Major in Management

Students who major in Management may focus their program on human resource management, acquisitions management (sometimes called federal procurement), supply chain management, or general management. These concentrations provide different perspectives and offer different entry-level career options. Details about each of the management major concentration options are provided at the links below.

- Management, BSBA - Human Resource Management Concentration (p. 282)
- Management, BSBA - Acquisition Management Concentration (p. 275)
- Management, BSBA - Supply Chain Management Concentration (p. 285)
- Management, BSBA - General Management Concentration (p. 278)

Minors in Management

The College of Business Administration offers several minors in business and management topics for students from across campus. Students in the College of Arts, Humanities, and Social Sciences and in the College of Science often couple one of the business minors with their undergraduate degree program. For students in the Colleges of Science and Engineering, the 4+1 progression described below provides graduates with a Pre-MBA minor that fulfills many of the foundation requirements of the UAH MBA.

These minors are not available to students enrolled in the B.S. Business Administration degree program (any major).

- Business (p. 288)
- Entrepreneurship (p. 289)
- Human Resource Management (p. 289)
- International Business (p. 290)
- Management and Leadership (p. 290)
- Pre-Law Business (p. 291)
- Pre-MBA (p. 291)
- 4 + 1 Recommended Progression for Science & Engineering Students to Achieve a Pre-MBA Minor and One-Year MBA (p. 292)

Certificate in Management

- Human Resource Management (p. 291)

MGT 100 - INTRO TO BUSINESS
Semester Hours: 1-3

Career options for students interested in business are stressed. Fundamentals of business organizations, effective management and the functions of business are explored.

MGT 101 - INTRO ENTREPRENEURSHIP
Semester Hours: 3

Introduction to the startup of a new business and the entrepreneurial career. Focuses on elementary concepts of planning, financing, developing, and managing a new business.
MGT 301 - MANAGING ORGANIZATIONS
Semester Hours: 3
Introduces management theories, roles, functions, and processes that facilitate the successful operation of organizations. Provides overviews of the following topics: managerial roles and functions, the strategic management process, organizational structure, organizational theory and behavior, and the human resource management function.

MGT 320 - CAREER DEVELOPMENT
Semester Hours: 3
Concepts drawn from theories on career development, human capital, social networks, labor markets, and strategic management will provide a theoretical foundation for students to formulate short- and long-term career goals and a strategic plan for achieving those goals.

MGT 361 - ORGANIZATIONAL BEHAVIOR
Semester Hours: 3
Behavioral science approach to the study of individual performance. Performance evaluation, job design, employee turnover, organizational culture, communication process, work motivation, leadership, group dynamics, and organizational development. Prerequisite: MGT 301.

MGT 363 - HUMAN RESOURCE & LABOR REL MGT
Semester Hours: 3
Theories and practices related to human resource management functions, including strategic planning, internal and external staffing, training and development, compensation management, employee and labor relations, and international human resource management. Prerequisite with concurrency: MGT 301.

MGT 401 - INTRO TO CONTRACT MANAGEMENT
Semester Hours: 3
General survey in contracting basics, covering procedures as described by Federal Acquisition Regulations, statutes, ethics, policies, and other pertinent authorities.

MGT 402 - CONTRACT EVALUATION & AWARD
Semester Hours: 3
Study of the evaluation, award, and post-award aspects of the contracting process, focusing on federal government contracting. Covers acquisition and past performance evaluation; the proposal receipt process; and post-award contract administration, closeout, modifications, and dispute resolution. Prerequisite: MGT 401.

MGT 403 - CONTRACT PRICING & COST ANALYS
Semester Hours: 3
Study of methods of price analysis and cost estimation and analysis. Covers data sources, legal requirements, rates, definitions, projection methods, factors affecting profits/fees, the weighted guidelines technique, statistical analysis methods, and learning curve theory.

MGT 405 - NEW VENTURE STRATEGIES
Semester Hours: 3
Theory and application of strategies for start-up, operation, and control of new ventures. Roles of entrepreneurship in the economy. Case studies of corporate and independent new ventures. Prerequisite: MGT 301 and MKT 301.

MGT 408 - TEAMWORK & TEAM PROCESSES
Semester Hours: 3
This course provides an introduction to teams and teamwork processes. The foundation of the course is research-based; topics will be approached from the context of empirical research. The types of research designs that are typically used in team research are addressed. Junior standing required.

MGT 410 - LEADERSHIP, PERSONAL DEV & ORG
Semester Hours: 3
The focus of this course is on the in-depth self-examination of skills, ability, personality, attitudes, values and behavior to increase self-awareness of leadership competencies. Students will also examine theories of leadership to develop insights for their personalized leadership development. Prerequisite: MGT 301.

MGT 411 - SUPPLY CHAIN MANAGEMENT
Semester Hours: 3
A study of problems and practices of operations and materials management. Topics include: materials acquisitions, inventory systems, demand management, aggregate planning, materials, logistics systems and current topics. Prerequisite: MSC 287.
MGT 450 - INTERNATIONAL BUSINESS
Semester Hours: 3
Explores the economic, social, political, cultural, and legal environment of global business operations and considers how environmental effects on business programs and strategies. Relies on a variety of conceptual, methodological and application perspectives. Prerequisite: MGT 301, MKT 301, and FIN 301.

MGT 460 - EMPLOYEE STAFFING & DEVELOP
Semester Hours: 3
The study of employee staffing and development concepts, issues and tools. Topics include forecasting staffing needs, recruitment strategies, development and validation of selection procedures, placement, socialization and development of employees, and the utilization of contingent workers. Prerequisite: MGT 301 and MGT 363, and either IS 301, MKT 301, or FIN 301.

MGT 461 - STRATEGIC COMPENSATION MGMT
Semester Hours: 3
Introduction to management of employees' compensation. Overview of compensation practices, behavioral and economic theories of compensation, and research on compensation programs. Prerequisite: MGT 301 and MGT 363.

MGT 462 - EMPLOYMENT LAW FOR MANAGERS
Semester Hours: 3
The study of government regulation of the management of human resources. Examines employer responsibilities and employee rights under federal state law pertaining to separations, discrimination, compensation and other terms of employment, worker safety and health, privacy, and unions.

MGT 470 - SPEC TOPICS SEMINAR IN MGMT
Semester Hours: 3
In-depth study of a selected topic relevant to contemporary management. Different sections of this course may address different topics.

MGT 490 - SPECIAL PROJECTS
Semester Hours: 1-3
Active involvement in an on-going project in a business enterprise that has particular interest and relevance to the student, or an in-depth investigation of contemporary management problems. Approval of department chair is required.

MGT 494 - PRACTICUM IN MANAGEMENT
Semester Hours: 3
Student teams will apply management concepts and skills in a semester-long business simulation or management project conducted for a client firm or non-profit. The teams will be closely supervised by a faculty member with expertise related to the simulation or project. Prerequisite: MGT 301, MSC 287, and MSC 288.

MGT 495 - INTERNSHIP IN MANAGEMENT
Semester Hours: 1-3
Under the direction of a faculty advisor, experience is gained with an entrepreneur in a small business firm or a manager in a large firm. Subject to College's guidelines on internships.

MGT 499 - COMPETITIVE STRATEGY
Semester Hours: 3
Addresses formulation & implementation of business/corporate level strategies: defining the mission, setting goals and objectives, analyzing current operating conditions and the organization's environment, and setting a unified strategic direction. Recommended taking during final semester of degree. Upper division standing required. Student must obtain a grade of C or higher. Prerequisite: MGT 301, MKT 301, FIN 301, EH 300, IS 301, and MSC 385.

MSC 287 - BUSINESS STATISTICS I
Semester Hours: 3
Introduction to probability & business statistics. Covers: tabular, graphical, and numerical methods for descriptive statistics; measures of central tendency, dispersion, & association; probability distributions; sampling & sampling distributions; and confidence intervals. Uses spreadsheets to solve problems. Prerequisite: Any 100 level MA course.

MSC 288 - BUSINESS STATISTICS II
Semester Hours: 3
Inferential statistics for business decisions. Topics include: review of sampling distributions and estimation; inferences about means, proportions, and variances with one and two populations; good of fit tests; analysis of variance and experimental design; simple linear regression; multiple linear regression; non parametric methods. Prerequisite: MSC 287.
MSC 385 - OPERATIONS ANALYSIS  
Semester Hours: 3  
Survey of the firm's production function and quantitative tools for solving production problems, quality management, learning curves, assembly and waiting lines, linear programming, inventory, and other selected topics (e.g., scheduling, location, supply chain management). Uses the SAP software. Prerequisite: MSC 288.

MSC 410 - TRANSPORTATION & LOGISTICS  
Semester Hours: 3  
An analysis of transportation and logistical services to include customer service, distribution operations, purchasing, order processing, facility design and operations, carrier selection, transportation costing, and negotiation. Prerequisite: MKT 301.

MSC 470 - SPECIAL TOPICS IN MGMT SCI  
Semester Hours: 3  
In depth study of a selected topic relevant to contemporary management science. Different sections of this course may address different topics.

MSC 490 - SPECIAL PROJECTS  
Semester Hours: 3  
Independent study in an area of interest to the student in the field of management science. Approval of department chair is required.

MSC 494 - PRACTICUM IN MANAGEMENT SCIENC  
Semester Hours: 3  
Student teams will apply management science concepts and skills in a semester-long simulation or management science project conducted for a client firm or non-profit. The teams will be closely supervised by a faculty member with expertise related to the simulation or project. Prerequisite: MSC 287, MSC 288 and MSC 385.

MSC 495 - INTERN IN MGMT SCIENCE  
Semester Hours: 3  
Active involvement in a project in a business enterprise, professional organization or in a government agency that has particular interest and relevance to the student. Subjunct to College's guidelines on internships.

MSC 500 - DEC SUPPORT SYS/EXPT SYS  
Semester Hours: 3  
Analysis of information support systems which aid the manager in the decision making process.

MSC 510 - TRANSPORTATION & LOGISTICS  
Semester Hours: 3  
An analysis of transportation and logistical services to include customer service, distribution operations, purchasing, order processing, facility design and operations, carrier selection, vehicle routing, and transportation costs. Understanding of business statistics is required.

MSC 570 - SPECIAL TOPICS IN MGMT SCI  
Semester Hours: 3  
In depth study of a selected topic relevant to contemporary management science. Different sections of this course may address different topics.

MSC 595 - INTERNSHIP IN MANAGEMENT SCIEN  
Semester Hours: 1-3  
Active involvement in a project in a business enterprise, professional organization or government agency that has particular interest and relevance to the student.

MSC 600 - QUANTITATIVE METHODS  
Semester Hours: 3  
An introduction to and application of several fundamental quantitative methods and business analytics tools in business. Topics include probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, ANOVA, linear regression, linear optimization, and simulation. Basic proficiency in Excel is required.

MSC 605 - OPERATIONS MANAGEMENT  
Semester Hours: 3  
This course discusses the management of the operations function for the creation of goods and services and its relationship with other business functions in service, manufacturing, and government organizations. Topics include operations strategy and infrastructure decisions, merging process technologies, planning and scheduling, inventory management, just-in-time systems, quality management, six sigma and lean operations. Concepts are illustrated using the SAP software. Prerequisite: MSC 600.
MSC 615 - DECISION MODELING
Semester Hours: 3

This course focuses on tools and methods for modeling, analyzing and solving problems involving business decision making. Spreadsheet analysis, optimization, and simulation techniques will be covered. Topics include linear and nonlinear optimization, network models, decision analysis and simulation of complex models in a spreadsheet environment as well as using other commercial software packages. Proficiency in Excel is required. Prerequisite: MSC 600.

MSC 641 - ADVANCED ANALYTICS
Semester Hours: 3

This course focuses on concepts and methods in business analytics. Topics include data quality and cleaning, predictive modeling, design of experiments, segmentation, forecasting, usage and limitations of models, and interpretation and presentation of results. This course provides a hands-on environment using real data to prepare students to apply these techniques in business environments. Proficiency in Excel is required. Prerequisite: MSC 600.

MSC 650 - SELECTED RESEARCH TOPICS
Semester Hours: 3

Research in a particular topic relevant to management science by one student or a group of students. Each students research paper must be an original contribution showing a research design and results that meet the highest standard of management science research.

MSC 692 - BUSINESS ANALYTICS PRACTICUM
Semester Hours: 3

A capstone course emphasizing rigorously interpreting the results of analytic models and intuitively communicating the derived business insights to business clients and corporate executives. The majority of this course is devoted to a major practical project in which students apply skills learned from previous analytics courses to a real world business problem, preferably in cooperation with a local organization. Prerequisite: Completion (or concurrent enrollment in) all other required courses. Normally taken during the student's last semester of studies.

MSC 699 - MASTER'S THESIS
Semester Hours: 1-3

Required each semester a student is working and receiving direction on a masters thesis. A minimum of two terms is required, but no more than six hours credit is allowed for the thesis.

Management, BSBA - Acquisition Management Concentration

BSBA, Management (Acquisition Management Concentration) Requirements:

- BSBA degree requires 120 credit hours.
- 12 credit hours of 300 level and above must be taken in the major.
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- No more than 60 credit hours from a two-year college can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

Management, BSBA - Human Resource Management Concentration

BSBA, Management (Human Resource Management Concentration) Requirements:

- BSBA degree requires 120 credit hours.
- 12 credit hours of 300 level and above must be taken in the major.
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- No more than 60 credit hours from a two-year college can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

**Business Minor**

Students may minor in business to facilitate career goals that require a broad knowledge of the functional areas of business. A minor in business includes the following courses:
ECN 142  PRINC OF MACROECONOMICS  3
ECN 143  PRINC OF MICROECONOMICS  3
ACC 210  ACCOUNTING FOR BUSINESS  4
MSC 287  BUSINESS STATISTICS 1  3
FIN 375  FINANCIAL INSTITUTIONS  3
MGT 301  MANAGING ORGANIZATIONS  3
MKT 301  PRINCIPLES OF MARKETING  3
Total Semester Hours  22

1  Students taking SOC 303, PY 300, MA 385, ISE 390 or equivalent introductory statistics should substitute a 300 or 400 level business elective.

Entrepreneurship Minor

Students who have an interest in becoming entrepreneurs or participating in the launch of a new product or service can minor in entrepreneurship by taking 18 semester hours of courses from the management, marketing, and finance departments. The course's aim is to help students to develop the research skills to identify entrepreneurial opportunities for small business startups, to develop the ability to integrate knowledge from the various business disciplines as they apply to small business management, to develop an understanding of financial decision making as it applies to entrepreneurship ventures, and to develop the ability to critically analyze competitive strategy. The entrepreneurship minor includes the following courses:

FIN 301  PRINCIPLES OF FINANCE  3
MGT 301  MANAGING ORGANIZATIONS  3
MGT 405  NEW VENTURE STRATEGIES  3
MKT 301  PRINCIPLES OF MARKETING  3
MKT 414  MARKETING EMERGING TECH  3
MKT 465  NEW VENTURES CHALLENGE  3
Total Semester Hours  18

Human Resource Management Minor

A minor in Human Resource Management (HRM) prepares students for careers in HRM. Human resource managers have responsibilities related to recruiting and selecting employees, designing and managing pay and benefits, and employee performance management. An HRM minor is also helpful to students who expect to work in small business where owners/managers have broad managerial responsibilities including management of employees and for students in Science, Engineering and Nursing who manage teams of employees.

The 18 semester hour minor includes the following courses:

Required Courses (12 credit hours)
MGT 301  MANAGING ORGANIZATIONS  3
MGT 361  ORGANIZATIONAL BEHAVIOR  3
MGT 363  HUMAN RESOURCE & LABOR REL MGT  3
MGT 462  EMPLOYMENT LAW FOR MANAGERS  3
Select 6 semester hours from the following:
CM 451  ORGANIZATIONAL TRNG & DEVELOP  3
ECN 475  LABOR ECONOMICS  3
MGT 320  CAREER DEVELOPMENT  3
MGT 410  LEADERSHIP, PERSONAL DEV & ORG  3
MGT 460  EMPLOYEE STAFFING & DEVELOP  3
MGT 461  STRATEGIC COMPENSATION MGMT  3
MGT 494  PRACTICUM IN MANAGEMENT  3
MGT 495  INTERNSHIP IN MANAGEMENT  1-3
Total Semester Hours  40-42

1  Students taking ECN 475 will also have to take its prerequisite, ECN 143. We encourage HRM minors to take this class as part of their social science general education requirements.
2 For students in the HRM Minor, we will allow the following requisites to substitute for the prerequisites specified in the catalog description of the MGT 460 class: Prerequisites - MGT 301 with a minimum grade of B- or higher. Prerequisite with concurrency - MGT 363.

**International Business Minor**

Students may minor in international business to facilitate careers in international trade that involve business firms, international organizations, or the U.S. government. For the international business minor, students may fulfill the foreign language requirements by taking 12 semester hours in one or more foreign languages.

A minor in international business includes the following courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>

</tr>
</tbody>
</table>

**Total Semester Hours** 43

Students interested in specializing in international trade should also consider the B.A. in Foreign Languages and International Trade (FLIT) which includes a composite major offered by the College of Liberal Arts in the Department of Foreign Languages in cooperation with College of Business Administration. For additional information on the FLIT degree program, see the section of this catalog for the Foreign Languages Department.

**Management and Leadership Minor**

Students planning for careers that require management and leadership skills may consider a minor in Management and Leadership. The Management and Leadership minor is a campus-wide undergraduate minor. The minor includes required courses from the field of management, and potential elective courses from communications, psychology, sociology, nursing, and political science.

The 18 semester hour minor includes the following courses:

<table>
<thead>
<tr>
<th>Course Code</th>

Pre-Law Business Minor

The work of successful lawyers is increasingly associated with the rendering of opinions and counsel on business matters such as banking, insurance, real estate titles, business contracts, etc. Corporations employ many lawyers full time for their contract and other legal work, and the young lawyer who has a degree in business will be at a distinct advantage in obtaining and doing such work.

Each law school determines its own requirements, such as admission criteria, number and type of semester hours required for entrance, etc. Students planning to enter a law school should be in communication with that school shortly after entering college to insure the program they take will meet all requirements of the law school the student plans to attend. For more detailed information the student should read the Pre-Law Program section of this catalog.

The pre-law business minor includes the following courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Semester Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECN 142</td>
<td>PRINC OF MACROECONOMICS</td>

Pre-MBA Minor

Students who do not major in business but plan to enter an MBA program should be in communication during their junior and senior years with the MBA schools they are considering attending. Depending upon the MBA school selected, a student may be able to shorten the required MBA coursework by 18 graduate semester hours, depending upon the undergraduate coursework.

The pre-MBA minor consists of the following courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Semester Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECN 142</td>

Human Resource Management Certificate

The Certificate in Human Resource Management is designed to serve the needs of individuals who desire to pursue a career in human resource management or who are currently working in the field of human resource management after having earned a bachelor’s degree that did not allow them to specialize in human resource management.

Admission Requirements for Certificate in Human Resource Management Candidates

Admission to the certificate in human resource management program requires that the student hold a bachelor’s degree in a discipline other than human resource management. The candidate must secure the approval of the Chair of the Department of Management and Marketing and must be admitted to UAH as a regular post baccalaureate student before enrolling in the human resource management certificate program.
### Curriculum for Certificate in Human Resource Management

To receive a certificate in human resource management, the student must complete the curriculum shown below with a grade of at least a “C” in each course to be applied to the certificate. A student may transfer a maximum of 6 semester hours toward the certificate. (Not all of the classes in this certificate program are offered at night.)

### 4 + 1 Recommended Progression for Science & Engineering students to achieve a Pre-MBA Minor and one-year MBA

Students in UAH’s Colleges of Science and Engineering who have an interest in business are encouraged to consider completing a minor in business at the undergraduate level. By following the outline of courses shown here, students can earn a minor in Business, especially the Pre-MBA minor, as part of their BS degree, and then earn their MBA graduate business degree in just one year instead of two.

#### Economics

- Taken as part of Area IV "History, Social and Behavioral Sciences" requirements
- ECN 142 PRINC OF MACROECONOMICS 3
- ECN 143 PRINC OF MICROECONOMICS 3

#### Calculus

- Taken as part of Area V "Science or Engineering Course Outside the Major" if not taken in Area III or in the major or minor
- 3

#### Microcomputer Skills

Pre-MBA students must be proficient in the use of operating systems, word processing, spreadsheets, and presentation software. Deficiency in computer skills can be remedied by taking the following:

- IS 146 COMPUTER APPL IN BUSINESS
- Or through some other method

#### Statistics

- Taken as part of Area V "Electives" requirement
- Select one of the following:
  - MSC 287 BUSINESS STATISTICS I 3
  - MA 385 INTRO TO PROBABILITY & STATIST
  - ISE 390 PROB & ENGR STATISTICS I
- And one of the following:
  - MSC 288 BUSINESS STATISTICS II 3
  - MA 487 INTRO TO MATH STATISTICS
  - ISE 391 PROB/ENGR STAT II

### Pre-MBA Minor for Science and Engineering Undergraduate Students
Marketing

Department Chair, Fan Tseng
355 Business Administration Building
Telephone: 256.824.6680
Email: tsengf@uah.edu

The University of Alabama in Huntsville

The department of Marketing offers the following degree programs:

- Marketing, BSBA - Corporate Marketing Concentration (p. 299)
- Marketing, BSBA - Supply Chain Management Concentration (p. 306)
- Marketing, BSBA - Acquisition Management Concentration (p. 295)
- Marketing, BSBA - General Marketing Concentration (p. 302)

Mission

The Department of Management, Marketing and Information Systems provides academically rigorous instruction on the use of analytical tools and theoretical concepts in information systems, management, management science, and marketing to help students understand and apply them to practical business problems in scientific, technological and traditional business environments, non-profits, and government agencies. The departmental faculty also develops and disseminates knowledge on diverse topics related to the information systems and assurance, management, management science, and marketing.

Marketing

A major in marketing allows those students with interests in developing and promoting products and services to gain the knowledge and skills needed to pursue careers in corporate and consumer marketing, supply chain management and acquisition. Since marketing is such a diverse area, the curriculum has been divided into four concentrations.

The Corporate Marketing (p. 299) concentration focuses on the marketing activities involved in the business-to-business exchange process. In order for businesses to successfully complete this process, they need to consider things such as buyer behavior, channels of distribution, promotional activities, product development and relationship management. Marketing managers also conduct market research to investigate customer needs and determine appropriate marketing strategies. Marketing managers are responsible for the total development process for a firm's products and services. With an emphasis on a high technology environment, this concentration prepares students for careers in a variety of business and public sector organizations.

The Supply Chain Management (p. 306) concentration involves all areas of the supply chain, from planning to distribution. The supply chain concentration prepares marketing students to manage inter-organizational relationships that are necessary to integrate the transportation, logistics, purchasing, information technology, and operations across the network of firms. This concentration is designed to prepare students for careers in supply chain management with industrial firms and public sector organizations such as the Department of Defense and NASA.

The Acquisition Management (p. 295) concentration focuses on activities and programs designed to obtain from suppliers the services and materials necessary to produce products and services. The program focuses on the management of government contracts. It includes contract administration, cost and price analysis, contract negotiation, and government contract law. This concentration prepares marketing students for entry level professional positions in acquisition management with the Federal government, government contractors and traditional industries.

The General Marketing (p. 302) concentration is designed for students in Marketing who are interested in business-to-consumer marketing. This concentration helps students develop research skills to identify market opportunities and prepares students with the managerial acumen to be successful in consumer product marketing or in retail management. This concentration gives students the flexibility to customize their major field coursework to fit their particular career ambitions.

Majors in Marketing

Students who major in Marketing may choose to concentrate their programs in corporate marketing (business-to-business), supply chain management, acquisitions management, or general marketing (business-to-consumer). The details about each of these concentration options is described at the link below.

- Marketing, BSBA - Corporate Marketing Concentration (p. 299)
- Marketing, BSBA - Supply Chain Management Concentration (p. 306)
- Marketing, BSBA - Acquisition Management Concentration (p. 295)
- Marketing, BSBA - General Marketing Concentration (p. 302)
Minor in Marketing

The minor in Marketing is a common choice for students majoring in communications in the College of Arts, Humanities, and Social Science. The Marketing minor is not available for students pursuing the B.S. in Business Administration (any major).

- Marketing (p. 309)

MKT 301 - PRINCIPLES OF MARKETING
Semester Hours: 3
Integration of professional selling techniques and concepts with sales management problems. Addresses objectives and policies for managing a sales force; market analysis methods used for sales forecasts and budgeting; and problems faced by sales management in competition, pricing, and promotions.

MKT 315 - SALES MGT/PROF SELLING
Semester Hours: 3
Integration of techniques and concepts of professional selling with problems of sales management. Objectives and policies for sales managers concerning managing sales force and methods of marketing analysis in terms of sales forecasts and budgeting. Problems faced by sales anagement in competition, pricing, and promotion. Prerequisite: MKT 301.

MKT 316 - RETAILING POLICY/MGT
Semester Hours: 3
Policies, practices, and problem solutions in efficient operation of chain and independent retail stores. Store location, organizational layout, merchandise planning and control, buying, pricing, and promotion.

MKT 332 - BUYER BEHAVIOR
Semester Hours: 3
Interdisciplinary and organizational approach to analyze and interpret consumer buying habits and motives and the resultant purchases of goods and services. Purchaser's psychological, economic, and sociocultural actions and reactions as they relate to better understanding of consumption. Prerequisite: MKT 301.

MKT 342 - PROMOTIONAL STRATEGY
Semester Hours: 3
Promotional techniques available to marketing management. Consumer behavior and communication process by which products can be effectively promoted. Specific tools of personal selling, advertising, sales promotion, and publicity as components of overall promotional strategy. Prerequisite: MKT 301.

MKT 343 - MARKET RESEARCH DESIGN
Semester Hours: 3
Introduction to the principles and purposes of marketing research; relationship to other marketing functions and marketing information systems, data sources, review of research methodologies and ethical considerations. Prerequisite: MKT 301 and either MSC 287&288 or CM 370 or PY 300 or SOC 303.

MKT 344 - MKT RESEARCH APPLICATION
Semester Hours: 3
Application of the principles and purposes of marketing research; laboratory, field and historical research methodologies, experimental design, sampling procedures, questionnaire design, and data analysis.

MKT 345 - MARKET CHAN STRU & STRAT
Semester Hours: 3
Marketing channels as a functional are and the alternative choices available to marketing management in developing overall marketing strategy. Institutional structures and dynamic interrelationships in distribution logistics.

MKT 405 - NEW VENTURE STRATEGIES
Semester Hours: 3
Theory and application of both marketing and management strategies for start up, operation and control of new ventures. The course also discusses the role of entrepreneurship in the economy. Prerequisite: MKT 301 and MGT 301.

MKT 414 - MARKETING EMERGING TECH
Semester Hours: 3
Comprehensive review of the new product development and marketing process. Emphasizes actual case examples showing how companies develop and market radically new products. Prerequisite: MKT 301.
MKT 415 - INTERNATIONAL MARKETING  
Semester Hours: 3

Procedures and problems associated with establishing and carrying out marketing operations in or with foreign companies. Institutions, principles, and methods involved in solving these business problems. Effect of national differences in business practices and regulation. Prerequisite: MKT 301.

MKT 420 - SERVICES MARKETING  
Semester Hours: 3

Addresses the challenge of delivering quality service to customers. Focuses on organizations whose core products are services (e.g., banks, hospitals, non-profit organizations) or which depend on service excellence for competitive advantage. Prerequisite: MKT 301.

MKT 465 - NEW VENTURES CHALLENGE  
Semester Hours: 3

Students will develop a plan for starting a new business. Relevant business concepts from finance, accounting, marketing, and management useful for business start-ups will be covered in a manner accessible to both non-business and business majors. Prerequisite: MKT 414, MGT 405, and FIN 301.

MKT 470 - MKTG IN AN ELECTRONIC ENVIRON  
Semester Hours: 3

Investigation of advanced marketing topics to include marketing in a high technology environment, relationship marketing, channel design and strategy, retailing, transportation, and logistics. Prerequisite: MKT 301 and EH 300.

MKT 475 - ADVANCED MARKETING SEMINAR  
Semester Hours: 3

Investigation of advanced marketing topics that are relevant to contemporary marketing practices. The course will focus on current issues related to marketing in a high technology environment, relationship marketing, channel design and strategy, transportation, and logistics. Prerequisite: MKT 301.

MKT 480 - MARKETING MANAGEMENT  
Semester Hours: 3

Study of management of marketing function. Addresses setting objectives, organization and control of marketing resources in coordination with other functional areas, identification and selection of market opportunities, competitive strategies, and development of marketing policies and programs. Prerequisite: MKT 301, MKT 332, MKT 343, and MSC 287. And either MGT 301, IS 301 or FIN 301.

MKT 490 - SPECIAL PROJECTS  
Semester Hours: 1-3

Independent study in an area of interest to the student in the field of marketing. Approval of Dept. Chair required.

MKT 494 - PRACTICUM IN MARKETING  
Semester Hours: 3

MKT 495 - INTERN IN MARKETING  
Semester Hours: 1-3

Active involvement in an project in a business enterprise, professional organization or in a government agency that has particular interest and relevance to the student. Course grade will be given on a satisfactory (S)/unsatisfactory (U) basis. Subject to College's guidelines on internships.

Marketing, BSBA - Acquisition Management Concentration

BSBA, Marketing (Acquisition Management Concentration) Requirements:

- BSBA degree requires 120 credit hours.
- 12 credit hours of 300 level and above must be taken in the major.
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- No more than 60 credit hours from a two-year college can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

## Fall
Marketing Minor

Many students with majors from the College of Arts, Humanities, and Social Sciences choose to minor in marketing to prepare themselves for careers in advertising, public relations, marketing management, international marketing, marketing on the internet, and supply chain management. Science and Engineering students with an interest in new product development, marketing high technology products, international marketing, and supply chain management also minor in marketing. A minor in marketing is also a good option for non-business majors who plan to start their own business or work in the family business.

The marketing minor includes the following courses:

**Required Courses (12 credit hours)**

**Total Semester Hours**

18

**NOTE:** Students are encouraged to take ECN 142 and ECN 143 as part of their social science general education requirements.

¹ This class is a prerequisite for most other classes in the minor. It should be taken as early as possible in the student's program.

² For students in the Marketing minor, we will accept either (PY 300 and PY300L), SOC 303 or CM 370 as substitutes for the (MSC 287 and MSC 288) prerequisites for MKT 343.
The mission of the College of Education is communicated through our shared vision and articulated in our theme, *Through Teaching, We Lead*. The establishment of this theme codifies the major purpose of our department: to graduate professionals who are exceptionally well-prepared in disciplinary, pedagogical, and professional knowledge, who understand and are prepared to address the needs of all learners and clients, and who are committed to serving as leaders in their professional community to ensure a high-quality public or private education or delivery of services.

**Accreditation**

Teacher education programs at UAH are accredited by the National Council for Accreditation of Teacher Education (NCATE) and approved by the Alabama State Board of Education, according to standards of the National Association of the State Directors of Teacher Education and Certification (NASDTEC) for the issuance of appropriate professional certificates for service in public schools.

**Degrees and Programs Offered**

Under the State of Alabama plan, there are five levels of teacher certification programs, namely, P-3, K-6, 4-8, 6-12, and P-12. The College of Education offers all options. In conjunction with the College of Arts, Humanities, and Social Sciences and the College of Science, the department offers both undergraduate and graduate certification programs. Candidates who complete the following undergraduate certification programs meet the requirements for the Highly Qualified Teacher in Alabama.

The College of Education offers degree programs in the following departments:

**Curriculum and Instruction:**

- Early Childhood Education/Early Childhood Special Education (PreK-3/birth to age 8)
- Elementary Education (K-6)
- Secondary/High School Education (6-12) with majors in biology, chemistry, English language arts, foreign language (German, French, Spanish), general science, history, mathematics, physics, social science.
- Collaborative Teacher – Special Education K-6 or 6-12
- Middle School Endorsement (4-8) with teaching fields biology, chemistry, English language arts, foreign language (German, French, Spanish), general science, history, mathematics, physics, and social science
- Music Education (P-12)
- A minor is not available in education.

**Kinesiology:**

- Kinesiology - Exercise Science
- Kinesiology - Physical Education Teacher Education (P-12)

**Curriculum and Instruction**

323 Roberts Hall
Telephone: 256.824.6180
Email: education@uah.edu

Department Chair: Derrick Smith

**Degrees and Programs Offered**

The State of Alabama offers five levels of teacher certification programs, namely, P-3, K-6, 4-8, 6-12, and P-12. The College of Education offers options in each of the five levels of teacher certification.

- Early Childhood Education/Early Childhood Special Education (PreK-3/birth to age 8)
- Elementary Education (K-6)
- Secondary/High School Education (6-12) with majors in biology, chemistry, English language arts, foreign language (German, French, Spanish), general science, history, mathematics, physics, social science.
- Collaborative Teacher – Special Education K-6 or 6-12
- Middle School Endorsement (4-8) with teaching fields biology, chemistry, English language arts, foreign language (German, French, Spanish), general science, history, mathematics, physics, and social science
- Music Education (P-12)
- A minor is not available in education.
Accreditation
Teacher education programs at UAH are accredited by the National Council for Accreditation of Teacher Education (NCATE) and approved by the Alabama State Board of Education, according to standards of the National Association of the State Directors of Teacher Education and Certification (NASDTEC) for the issuance of appropriate professional certificates for service in public schools.

Preadmission Requirements
File an Intent to Apply to the Teacher Education Program (TEP) with the Teacher Certification Officer as soon as a decision is made to seek teacher certification but no later than the end of the sophomore year. In addition, students must meet the following requirements:

1. No more than 2 courses of the General Education Requirements remain to be taken.
2. Minimum GPA of 2.75 and grades of C or higher in EH 101 & EH 102 (or EH 105), CM 113, MA 230, MA 231 and PY 201.
3. Elementary education candidates must earn a 2.75 GPA with grades of C or higher in each of the following areas: English, Mathematics, Science, and Social Sciences
4. Secondary education candidates must earn a 2.75 in their major.
5. Submit a finger print card to the Alabama State Department of Education with the appropriate fee in the form of a money order or cashier’s check made payable to the Alabama Department of Education and successfully pass a background review conducted by the Alabama Bureau of Investigation and the Federal Bureau of Investigation. Anyone convicted of a felony and/or misdemeanor other than a minor traffic violation may be denied certification or have certification revoked by the State Superintendent of Education.

Admission to the Teacher Education Program
Admission to the university does not qualify a student for admission to the Teacher Education Program. Students must submit an Application for Admission to the Teacher Education Program during the Block I semester of the education courses. They must also meet the following requirements:

1. Minimum 2.75 GPA in Block I ED courses with no grade lower than a C.
2. Minimum 2.75 GPA in teaching field or second area of study courses, with no grade lower than C.
3. Satisfactory completion of specified assignments in Block I, including writing and field experiences.
4. Satisfactory ratings on Admission Interview, Dispositions Ratings, and Application Essay.
5. Satisfactory external faculty recommendation.
6. Passing score on all required subtests of the AECP Basic Skills Test.

Admission by Reciprocity
Students who have been admitted to a teacher education program at an accredited university or college in Alabama may apply for reciprocal admission to the Teacher Education Program (TEP) with the Certification Officer or the Department Chair.

Continuation in the Teacher Education Program
Requirements include:

1. Minimum 2.75 GPA in Education courses, with no grade lower than C.
2. Minimum 2.75 GPA in teaching field or second area of study, with no grade lower than C.
3. Satisfactory completion of Blocks 2, 3, and 4 Field Experience hours and grade of C or higher on required field experience papers.
4. Satisfactory Dispositions Ratings by Education faculty and field experience mentor teachers.
5. Registration for Praxis II Test in Block 2-3; must pass Praxis II before admission for Internship.

If any of the above requirements are not met, a Professional Development Plan (PDP) will be initiated. Candidates who do not meet the conditions of the PDP may be dismissed from the Teacher Education Program.

Field Experiences
The Alabama State Department of Education requires that all teacher candidates complete a minimum of 200 hours of field experiences in diverse settings prior to the internship. To meet this requirement, candidates will systematically be placed in area schools for a minimum of 50 hours of experience each semester.

Internship Placement Requirements
In addition to satisfactory completion of required coursework and satisfactory completion of 200 hours of field experiences, candidates must meet the following requirements:
1. Minimum 2.75 GPA in Education courses, with no grade lower than C.
2. Minimum 2.75 GPA in second area of study or teaching field, with no grade lower than C.
3. Satisfactory Dispositions Ratings and field experience evaluations.
4. Satisfactory external faculty recommendations - secondary and P-12 candidates only.
5. Applications for Internship and graduation on file.
6. Passing Score on all required Praxis II exams.

Application Dates
Internships must be completed in the final semester before graduation. All internship placements are coordinated by the Coordinator of Field and Clinical Experiences. At UAH, the internship is a full-time, full semester assignment of 15 weeks. Candidates should not expect to enroll in other courses during the internship semester.

1. Elementary Education students must complete a primary and intermediate assignment.
2. Secondary Education students will complete a middle and high school assignment.
3. P-12 music education students must complete an early childhood/elementary and a middle/high school assignment.
4. Candidates adding the Collaborative Teacher certification will complete part of the internship in a special education setting.

Certification Requirements
Alabama teaching certificates are the legal responsibility of the Alabama State Department of Education. Colleges and universities cannot issue professional certificates. In order to be recommended for a professional teacher's certificate, candidates must complete a state approved program. Approved undergraduate programs offered by the UAH College of Education are designed to prepare candidates for professional Class B certification with a bachelor's degree.

Initial Certification
It is the candidate's responsibility to initiate the application for the initial certificate. To be recommended for an initial certificate, candidates must:

1. Meet all UAH Education program requirements including satisfactory completion of the internship with evaluations by university supervisors and cooperating teachers of 2.0 or higher.
2. Satisfactory completion of the UAH Exit Portfolio Review.
3. Candidates who expect to teach in states other than Alabama are responsible for knowledge of licensure requirements of those states. Such candidates should inform the certification officer of their intentions.

Ensuring the Competence of Graduates
For a period of two years of the valid date of the Professional Educator certificate, the University of Alabama in Huntsville, through the College of Education, shall warranty and provide remediation at no cost to students who are evaluated to be unsatisfactory or deficient in any area of preparation. Remediation in professional education and/or teaching field departments will be based upon recommendations from the performance evaluations conducted by public school administrators who use the Educate Alabama which is recognized and approved by the State Board of Education. This policy is consistent with the Alabama State Code of Education.

Teacher Education Programs at UAH
B.A. and/or B.S. programs are available for the following certification programs: biology, chemistry, collaborative teacher, elementary education, English-language arts, French, general science, German, history, mathematics, music, physical education, physics, social science, and Spanish. (General Education Requirements for teacher candidates may differ from those required of other students. Individuals interested in pursuing teacher education should consult the Department of Curriculum and Instruction about General Education Requirements for their program of study.)

Bachelor of Arts in Elementary Education (K-6) (p. 317)
Bachelor of Arts in Elementary Education (K-6) with Collaborative Education (K-6) (p. 320)
Bachelor of Arts in Elementary Education (K-6) with Language and Culture option (p. 322)
Bachelor of Science in Secondary Education (6-12) in the following fields of study:

- Biology (p. 325)
- Biology and General Sciences (p. 327)
- Chemistry (p. 330)
- English Language Arts (p. 332)
- Foreign Language (Spanish, French, or German) (p. 334)
UAH also offers teacher certification in Music Education (Choral or Instrumental) (p. 163).

ED 115 - EFFECTIVE RDG & STUDY SKILLS
Semester Hours: 3
Developmental course focusing on acquisition of strategies to expand an individual's ability to read and study materials encountered in higher education. Effective reading and study strategies which incorporate reading, writing, and listening skills are taught and applied, using college texts and related readings.

ED 250 - FUND OF CHRISTIAN ED- OAKWOOD
Semester Hours: 2

ED 300 - FOUNDATIONS OF EDUCATION/ATHEN
Semester Hours: 3

ED 301 - INTRO TO EDUCATION PRACTICUM
Semester Hour: 1
Initial practicum experience designed to provide the opportunity to explore the role of the classroom teacher in today's diverse school settings. The five-day observation will be integral to the content and objectives of ED 305 and 308, and will provide a foundation for the coursework and activities. Prerequisites: ED 305 & ED 308 (taken concurrently). This experience is a prerequisite for admission to the Teacher Education Program.

ED 305 - FOUNDATIONS OF EDUCATION
Semester Hours: 3
Survey of social, cultural, historical, and philosophical foundations of education; interrelationships of society and education, effects of social change and influences of social-cultural values upon education; educational ideas and processes as they attempt to shape curricula. The perennial search for the meaning of education, perceived not merely as schooling, but as a process of enculturation and socialization. Prerequisites with concurrency: ED 301 and ED 308.

ED 307 - MULTICULTURAL FND EDUCATION
Semester Hours: 3
This course will provide students with an understanding of selected philosophical, historical, social, cultural, political, and economic questions and influences on the development of educational policies and practices. Through an examination of constructs such as race, ethnicity social class, gender, sexual orientation, and religious affiliation, students will develop an understanding of the connections between identity, difference, power and privilege and the role(s) schools play in perpetuating or ending discriminatory practices.

ED 308 - EDUCATIONAL PSYCHOLOGY
Semester Hours: 3
Psychological principles basic to an understanding of the learner, the learning process, and the learning situation. Intensive field experience required. Prerequisites with concurrency: ED 301 and 305.

ED 309 - CLASSROOM & BEHAVIOR MGMT
Semester Hours: 3
This course focuses on instructional options that learners need in order to be successful. It takes a broad approach to classroom and behavior management that is grounded in both theory and reflective practice. Content will emphasize the study and implementation of a variety of classroom and behavior management strategies that are necessary for working with diverse populations. Intensive field experience in an assigned public school required. Prerequisites: Admission to the Teacher Education Program.

ED 310 - TCHG ART IN ELEM SCHOOL
Semester Hours: 3
ED 315 - EDUC EVALUATION & MEASUREMENT
Semester Hours: 3
This course is designed to help prospective teachers use and construct a range of assessments that will help them plan and teach more effectively, improve learning and meet state and national standards. The class will focus on more traditional assessment issues such as validity and reliability, as well as the alternative assessments that are likely used in today's classrooms. Furthermore, contextual issues such as educational accountability testing, the No Child Left Behind Act, and teacher testing and evaluation (PEPE) will be explored. Intensive field experience required. Taken concurrently with ED 373, 374, 405. Admission to the Teacher Education Program or permission of the chair.

ED 350 - TECHNOLOGY IN CLASSROOM
Semester Hours: 3
Introduces prospective teachers to current state of the art in educational technology. Designed as a laboratory course providing extensive hands-on experiences with microcomputers and other emerging technology. Emphasis is on enabling the student to effectively integrate technology into instructional settings. May be taken prior to entering Education Program.

ED 360 - EARLY CHILDHOOD EDUC PRACTICUM
Semester Hours: 3
A three-hour credit course in a state-approved or NAEYC-accredited pre-kindergarten or kindergarten placement. It includes a weekly one-hour seminar with a faculty member. Admission to Teacher Education required.

ED 371 - TCHG ELEM LANGUAGE ARTS
Semester Hours: 3
Introduction to current practices in language arts instruction with emphasis on the development of an integrated curriculum using children's literature as a foundation. Includes appropriate techniques for the teaching of grammar, spelling, and handwriting. Intensive field experience required. Prerequisites: Admission to the Teacher Education Program.

ED 372 - TCHG ELEM SOCIAL STUDIES
Semester Hours: 3
Teaching social studies in grades K-6. Helping beginning teachers acquire background skills in organizing and teaching units of work. Intensive field experience required. Prerequisites: Admission to the Teacher Education Program.

ED 373 - TCHG NATURL/HLTH SCIENCE
Semester Hours: 3
Integrates concepts from reflective practice with elementary science teaching. Opportunity to refine teaching skills in the planning, implementation, and evaluation of science lessons and units of instruction. Intensive field experience required. Prerequisites: Admission to the Teacher Education Program.

ED 374 - TCHG ELEM MATHEMATICS
Semester Hours: 3
Overview of the mathematics concepts and skills taught in grades K-6 with an emphasis on the principles, methods, and materials used in the teaching and evaluation of elementary school mathematics. Focuses on the attitudes and behaviors of students and teachers in the actual planning and implementation of mathematics instruction for an elementary school classroom. Intensive field experience required. Prerequisites: Admission to the Teacher Education Program.

ED 375 - TCHG READING IN PRIMARY GRADES
Semester Hours: 3
An introduction to the basic principles of literacy instruction in culturally and linguistically diverse primary grade classrooms, including theoretical bases for instruction, methods of instruction and organization, developmentally appropriate strategies and materials, and assessment of children's literacy needs. Class activities will include mini-lessons, discussions, group activities, and presentations. An intensive school-based practicum in grades pre K-2 is required.

ED 400 - SPECIAL TOPICS-INTERNSHIP
Semester Hours: 3
Innovative internship focused on working with students with disabilities. Observations, participation, and direct instruction and teaching in a middle or high school setting for a prescribed time.

ED 401 - FNDS OF REFLECTIVE TEACHING
Semester Hours: 3
This diversity elective is designed to develop reflective practitioners, who study teaching and student learning in an effort to improve teaching practices and also meet certification requirements. The course will use various lenses of professional teacher noticing to select and discuss evidence of effective teaching. Course topics include edTPA rubrics, lesson planning, video teaching episode analysis, student assessments and feedback, academic language for describing teaching, and professional writing about teaching.
ED 402 - SPECIAL TOPICS IN EDUCATION
Semester Hours: 3

Introduces students to current issues and trends within educational practice, policy and theory through a specific lens. Provides opportunities for students to investigate issues of teaching and learning within the broader social/cultural vantage point. Basic exploration of current research and debate within education. Topic may vary with each offering.

ED 405 - RDG STRATEGIES INTERMED GRADES
Semester Hours: 3

This course provides an in-depth study in and application of the process of reading and reading instruction, theoretical approaches, instructional strategies, classroom organization, and the formal/informal assessment of reading in intermediate grades. This course is required of all elementary education majors and secondary education candidates who are pursuing a middle school endorsement. Intensive field experience required. Prerequisites: Admission to the Teacher Education Program.

ED 408 - TCHG READING/CONTENT AREA
Semester Hours: 3

Provides knowledge of certain basic developmental and remedial reading skills, practices, and concepts. Extends those learned in previous, more fundamental, reading courses and shows how to apply fundamental skill and knowledge to the classroom. This will include adapting fundamentals of reading instruction to the various subject matter areas (i.e., the sciences, social studies, English, etc.). Survey of special reading programs such as remedial reading and reading instruction as practiced in special education. Intensive field experience required. Prerequisites: Admission to the Teacher Education Program.

ED 410 - FOUNDATIONS EDUC EVALUAT
Semester Hours: 3

Measurement process with emphasis on its relationship to problems of educational evaluation. Evaluation as an integral part of overall educational planning in addition to its use in measurement and evaluation of academic achievement. Prerequisites: Admission to the Teacher Education Program.

ED 413 - CHILDREN'S & ADOLESCENT LIT
Semester Hours: 3

Course content includes the study of various genres of children's and adolescent literature and their relationship to beginning reading, enhancement of reading comprehension, and intervention instruction in the various content areas. Intensive field experience required. Same as EH 413. Prerequisites: Admission to the Teacher Education Program.

ED 421 - TEACH ENGL MID & SEC SCHOOL
Semester Hours: 3

This course is designed to provide undergraduate level English Education majors with the theory, tools and techniques for teaching middle and secondary students. The focus of the course is primarily, though not exclusively, on designing lessons that allow for maximum student participation and control while remaining aligned to Alabama Content Standards. Students will study, discuss, and implement a variety of instructional methods for helping all students succeed. Given the technologically rich environments middle and secondary students reside in, special attention will be given to the use of various technologies as a means of content exploration and student evaluation. Prerequisite: Admission to the Teacher Education Program.

ED 422 - TEACH MATH MID & SEC SCHOOLS
Semester Hours: 3

The methods course provides background for middle school and secondary teaching from the perspective of theory, research, and practice. It is designed to provide an introduction to and practice in ways in which to engage students in learning in mathematics in middle and secondary classrooms. Topics include specific educational philosophies of mathematics education, lesson and unit planning, instructional strategies, use of mathematics manipulatives and technology and student assessment within the content area. Applications will include microteaching and intensive school-based experiences in area schools. Prerequisite: Admission to the Teacher Education Program.

ED 423 - TCHG SC MID & SEC SCHOOLS
Semester Hours: 3

This course is designed for students who are pursuing teaching certification in middle and/or secondary science. The course will first focus on how middle and secondary students learn science, and then from this knowledge base, the class context will focus on how to plan, design, and implement inquiry-based science instruction. Assessment development in science, the interpretation, and the use of assessment results to guide student understanding will also be incorporated in teaching methodology. Intensive field experience required. Must be admitted to Teacher Education Program.
ED 424 - TCHG SOC ST MID & SEC SCHOOLS
Semester Hours: 3

This course is designed to study effective techniques and strategies employed by social science teachers at the middle and secondary levels. As well as learning theoretical foundations in social studies education, students will learn pedagogic skills, instructional strategies, and modes of reasoning unique to the social studies classroom. Intensive field experience required. Students are required to observe, participate, and teach a lesson in a secondary social studies classroom. Must be admitted to Teacher Education Program.

ED 425 - METHODS TCHNG FGN LNG MID & HS
Semester Hours: 3

This course is designed to provide undergraduate level Foreign Language majors with the theory, tools, and techniques for teaching middle and secondary students. The focus of the course is primarily, thought not exclusively, on designing lessons that allow for maximum student participation and control while remaining aligned to Common Core and Alabama Content Standards. Students will study, discuss and implement a variety of instructional methods for helping all students succeed. Given the technologically rich environments middle and secondary students reside in special attention will be given to the use of various technologies as a means of content exploration and student evaluation. Applications will include microteaching and school-based experience in area schools.

ED 493 - ELEMENTARY SCHOOL INTERNSHIP
Semester Hours: 12

Observation, participation and teaching in elementary school (full time, 15 week semesters). Students will also attend campus-based seminars designed to meet specific needs of the interns.

ED 497 - HIGH SCHOOL INTERNSHIP
Semester Hours: 12

Observation, participation and teaching in middle/high school (full time, 15 week semester). Students will also attend campus-based seminars designed to meet specific needs of the interns.

ED 499 - P-12 INTERNSHIP
Semester Hours: 12

Observation, participation and teaching in elementary and middle/high school (full time, 15 week semester). Students will also attend campus-based seminars designed to meet specific needs of the interns.

EDC 301 - TCHG THE EXCEPTIONAL CHILD
Semester Hours: 3

Examines special education laws and methodology used in teaching special education students. Focus is primarily on those students with mild learning disabilities. Also examines requirements needed in the regular classroom for special teachers. Intensive field experience required. To be taken concurrently with ED 301, ED 307, ED 308 and EDC 311. Prerequisites: Completion of all general education classes.

EDC 302 - INTRO LOW INCIDENCE POPULATION
Semester Hours: 3

Students will learn about low incidence disabilities through reading, research, discussion, and the integration of specific learning strategies during class activities. Students are expected to complete a case study/practicum with a disabled student in addition to 15 hours of observation in classrooms for low incidence exceptional students. Intensive field experience required.

EDC 311 - INSTR STRATEGIES INCLUSIVE CLR
Semester Hours: 3

Students learn about low incidence disabilities through reading, research, discussion, and the integration of specific learning strategies during class activities. Students are expected to complete a case study/practicum with a disabled student in addition to 15 hours of observation in classrooms for low incidence exceptional students. Intensive field experience required.

EDC 321 - COLLAB CONSU(PARENT-TCHR-TEAM)
Semester Hours: 3

This class focuses on the description and rational for collaboration, including communication skills, group work, problem solving, and co-teaching. Each student will participate as a member of a collaborative team during the practicum. This course will also provide an examination of selected school district issues involving collaboration within traditional K-12 educational settings. Intensive field experience required. Prerequisites: Admission to the Teacher Education Program.
EDC 331 - CRITICAL ISSUES IN SPEC EDUC  
Semester Hours: 3

Provides an in-depth discussion and evaluation of current issues in special education such as litigation, legislation, personnel preparation, and research. School-based practicum required. Intensive field experience required. Prerequisites: Admission to the Teacher Education Program.

EDC 341 - ASSESS/PLN TRANSITION K-12 STU  
Semester Hours: 3

Teacher candidates will develop the skills necessary for transitional planning, including administering cognitive, social, and functional assessments. Results of assessments will be interpreted and utilized to plan transitions from one placement to another, to inform instruction in regular, inclusive and self-contained classrooms, and to develop Individualized Education Plans (IEPs) for eligible students. Field work is required. Prerequisites: Admission to the Teacher Education Program.

EDC 351 - BEHAVIOR ANAL & INTERVENTION  
Semester Hours: 3

This course focuses on the concepts of applied behavior analysis and how to implement those concepts in classrooms and other settings. Students learn how to conduct a functional behavior assessment and design, implement, and evaluate a behavioral-change project with an appropriate subject in a public school setting. Intensive field work required. Prerequisites: Admission to the Teacher Education Program.

ECH 306 - PRINCIPLES OF EARLY CHILDHOOD ED  
Semester Hours: 3

This introductory course will provide preservice early childhood educators with basic knowledge of the core principles and foundations of early childhood education. The course introduces students to the historical and sociocultural forces that have impacted the field along with contemporary early childhood programs and models, recent trends and issues, and theories of play. Admission to teacher education program required.

ECH 320 - DIFF INSTR FOR EARLY LEARNERS  
Semester Hours: 3

An early childhood education curriculum course designed to provide practical knowledge for blending content areas to maximize children's learning and prepare teacher candidates to meet the needs of children across the curriculum. Focus is on the implementation of a curriculum designed to promote learning and development in the social, emotional, physical, language, and cognitive domains. Additionally, the course will emphasize developmentally, culturally, and linguistically appropriate and effective teaching approaches to enhance each child's learning and development. Admission to teacher education program required.

ECH 330 - ASSESSMENT OF YOUNG LEARNERS  
Semester Hours: 3

This course provides candidates with an understanding of the forms, functions, methods, and roles of assessment for planning and implementing effective early childhood programs for young children, ages birth to five, from diverse cultures and with varied learning needs. Candidates will explore both quantitative and qualitative approaches to evaluation and assessment. They will learn about technological adaptations to enhance the assessment process. Students will gain an understanding of appropriate strategies for conducting, reporting, and decision making related to specific functions of assessment. They will learn about assessment strategies necessary for second language learners and about adaptations for children with disabilities. They will use selected assessment strategies with young children in their field placements and are expected to become competent in the use of authentic assessment strategies to describe a child's learning strengths and instructional needs. Admission to teacher education program required.

ECH 340 - LANGUAGE & SPEECH DEVELOPMENT  
Semester Hours: 3

This course provides an introductory examination of the development of language and speech in young learners. Pragmatic syntactic, and phonological analyses of children's language and speech development are required. Admission to teacher education program required.

ECH 490 - EARLY CHILDHOOD INTERNSHIP  
Semester Hours: 3

Observation, participation and teaching in at least two early childhood settings with children ranging from infancy to grade 3 (full time, 15 week semesters). Students will also attend campus-based seminars designed to meet specific needs of the interns. Admission to the teacher education program required.

Students complete a split internship between General Education (High School) and Collaborative Education (Middle School).
Health and Physical Education

Activity Courses

Our activity courses provide fun ways for students to improve overall health. Check out the variety of courses available!

Group Fitness
- Aerobics
- Butts and Guts Workout
- Weight Training
- Yoga

Sports and Recreation
- Racquetball
- Rock Climbing
- Speed and Plyometrics
- Swimming
- Tai Chi
- Tennis
- Volleyball
- Basketball
- Ballroom Dance
- Walk/Jog/Run
- Judo/Jujitsu
- Karate
- Kung Fu
- Ladies' Self-Defense

HPE 100 - AEROBICS
Semester Hours: 2
Improve cardiovascular fitness, flexibility, muscular strength and endurance, balance, and postural alignment. This class will focus on aerobic activity, specifically in the form of low- and high- impact aerobics. A wide variety of exercises will be included to provide a total-body workout.

HPE 109 - SPEED & PLYOMETRIC TRAINING
Semester Hours: 2

HPE 110 - WALK/JOG/RUN
Semester Hour: 1
A beginner and intermediate level course with emphasis placed on giving a positive introduction to walking, jogging, and running as a way to enhance fitness and promote weight control, and to provide a viable option for a lifetime fitness activity.

HPE 111 - BUTTS & GUTS WORKOUT
Semester Hours: 2

HPE 117 - WEIGHT TRAINING
Semester Hours: 2
Learn to safely and efficiently use strength training techniques to reach your fitness goals. Develop the skills needed to create a personalized weight training program.

HPE 120 - SWIMMING
Semester Hour: 1
Learn the basic or progress in your swimming by learning the common swim strokes and techniques. Introduction to conditioning and training and work toward improving skills and endurance bringing higher efficiency in the water.

HPE 127 - LADIES SELF-DEFENSE
Semester Hour: 1
Explore the concepts, strategies, and methods of self defense. Topics and skills include wrist spaces, falling skills, various strikes and kicks, groundwork, weaponry, and escape tactics. Further, an emphasis will be placed on developing and improving situational awareness.
HPE 129 - KUNG FU  
Semester Hours: 2  
Kung Fu has become one of the most popular forms of martial arts. Students will be introduced to Sil Lum Tao, the first in the three forms of Wing Chun Kung Fu. The name means "little imagination" and refers to the need of the student to use their imagination in the practice and application of techniques.

HPE 130 - KARATE  
Semester Hours: 2  
Learn karate techniques and acquire skills required to perform these techniques. The objective of Karate is to teach the student defensive skills through various stances and self-defense techniques.

HPE 133 - AIKIDO  
Semester Hour: 1

HPE 134 - T'AI CHI  
Semester Hours: 2  
Learn an ancient Chinese exercise and martial art which is used to develop one's internal energy, health and well-being. The 37 postures of the short form in the Yang style will be executed.

HPE 135 - INTERMEDIATE T'AI CHI  
Semester Hours: 2

HPE 136 - YOGA  
Semester Hour: 1

HPE 137 - JUDO/JUJITSU  
Semester Hours: 2  
Judo/Jujitsu provides students with an introduction to the Japanese martial arts of Judo and Jujitsu. Focus will be on both the competition aspect of Judo and the self-defense aspects of each art including throws, take-downs, joint manipulation and chokes.

HPE 140 - BALLROOM DANCE  
Semester Hours: 2  
An introduction to the most popular smooth and rhythm ballroom patterns danced in America including the Waltz, Fox Trot, Tango, Cha-Cha, Rumba, Samba, Merengue, Bolero, Polka, Swing, and Mambo. Learn the appropriate skills necessary to become a social dancer, including leading, following etiquette and partner dancing.

HPE 142 - SWING DANCE  
Semester Hours: 2

HPE 144 - COUNTRY WESTERN DANCE  
Semester Hour: 1

HPE 150 - RACQUETBALL  
Semester Hours: 2  
Learn the basic of racquetball, including rules, equipment and skills. Singles (2 players), Cut throat (3 players) and Doubles (4 players) versions of racquetball will be taught. Double games during class times will be played when both safety and skill level of the players are acceptable to the instructor.

HPE 153 - TENNIS  
Semester Hour: 1  
Students will learn the fundamentals of tennis including forehand, backhand, serve, volley, footwork, and ground strokes. There will be both singles and doubles play and a class tournament. Highlights include understanding the rules, regulations and strategies of the game.

HPE 156 - GOLF  
Semester Hour: 1  
Students will understand and learn the basic skills of golf, including rules, proper stance, grip and swing for all clubs. Clubs are available if needed.

HPE 167 - ROCK CLIMBING  
Semester Hours: 2  
$100 fee to be paid directly to Rock Climbing facility.

HPE 169 - BASKETBALL  
Semester Hour: 1
HPE 170 - VOLLEYBALL
Semester Hour: 1

Learn the fundamentals skills of volleyball including passing, setting, hitting, blocking, and serving with advanced skills in spikes and positioning also being covered. Scrimmage games will be played to practice learned skills. This course will cover the rules of volleyball and its advantage as a lifetime sport, with a focus on skill development.

HPE 174 - BILLIARDS
Semester Hour: 1

HPE 199 - SP TOP: HLTH & PHYS ED
Semester Hours: 1-3

HPE 221 - ADVANCED SCUBA
Semester Hour: 1

Presents skills and knowledge for deep diving (80 + feet). Limited visibility diving, and advanced navigation techniques. Earn YMCA advanced open water certification. Students must provide mask, fins, and snorkel. Cost of open water dives not included in lab fee.

HPE 223 - LIFEGUARD TRAINING
Semester Hours: 2

Certification as a Red Cross approved lifeguard upon successful completion of classroom and in-water instruction and testing.

HPE 224 - WATER SAFETY INSTRUCTOR
Semester Hours: 3

Techniques for teaching infant and pre-school aquatics. The American Red Cross Learn to Swim Program, and Basic Water and Emergency Water Safety courses. Includes pre-test and instructor candidate training course.

HPE 230 - PRIVATE PILOT GROUND SCHOOL
Semester Hours: 3

Prepares student for FAA Private Pilot written examination. Provides student with necessary knowledge to progress into primary pilot flight training. A kit for approximately $150 must be purchased.

HPE 231 - INSTR AIRPLANE(IFR) RATING GR S
Semester Hours: 3

Provides student with knowledge needed for instrument flight instruction air training. Prepares student for FAA Instrument Flying Examination.

HPE 400 - SPECIAL TOPICS - INTERNSHIP
Semester Hours: 3

Innovative internship focused on working with students with disabilities. Observations, participation, and direct instruction and teaching in a middle or high school setting for a prescribed time.

Kinesiology

311 Wilson Hall
Telephone: 256.824.6007
Email: kin@uah.edu

Programs Offered

The Bachelor of Science in Kinesiology offers the following two concentration areas:

- Exercise Science (p. 352)
- Physical Education Teacher Education (P-12) (p. 356)

The Exercise Science concentration prepares students for fields of study in the health sciences, such as physical therapy, occupational therapy, and cardiovascular rehabilitation. Students will also be prepared for graduate studies in exercise physiology, biomechanics, and exercise science. With a bachelor of science degree in exercise science, students are prepared for fitness and wellness professions, such as fitness training and instruction, corporate wellness, sports and strength coaching, and fitness and wellness center management. Program outcomes align with the standards of key professional associations such as the American College of Sports Medicine (ACSM) and the National Strength and Conditioning Association (NSCA).

The Physical Education Teacher Education (P-12) concentration prepares students to obtain the license required to teach physical education in Alabama. Students meet all Alabama Quality Teaching Standards and specific physical education standards established by the Alabama State
Department of Education (ALSDE). These standards are aligned with the Society of Health and Physical Educators (SHAPE) teacher education standards and the Alabama Course of Study for Physical Education. Students who choose the Physical Education concentration must satisfy the requirements for admission to the UAH Teacher Education Program as outlined in the Unit Assessment System of the Institutional Report submitted by the Department of Education to CAEP.

**Academic Advising**

Students who are interested in the kinesiology degree program should contact the Department of Kinesiology at (256) 824-6007 to consult our advisor about program admission, curricular, and degree requirements.

Please contact Liz Redding at liz.redding@uah.edu.

- Kinesiology, Bachelor of Science - Physical Education Teacher Education Concentration (p. 356)

**KIN 109 - SPEED & PLYOMETRIC TRAINING**  
Semester Hours: 2

**KIN 117 - WEIGHT TRAINING I**  
Semester Hours: 2

**KIN 118 - WEIGHT TRAINING II**  
Semester Hours: 2

**KIN 119 - WEIGHT TRAINING III**  
Semester Hours: 2

**KIN 200 - CONTEMPORARY NUTRITION**  
Semester Hours: 2

Introduction to the principles of nutrition as they relate to the growth, development, and maintenance of the human body throughout the lifespan. Emphasis is placed on the classes of nutrients, weight management, and nutritional planning.

**KIN 205 - FIRST AID & CPR**  
Semester Hour: 1

Students will focus on recognizing emergency situations. First Aid and CPR also provides skills and knowledge necessary in caring for injuries or sudden illness.

**KIN 210 - ATHLC INJURY PREVENTION & CARE**  
Semester Hours: 3

Presents the knowledge and techniques necessary to prevent and/or care for common athletic injuries. For coaches, athletes, and those working in recreation, physical education, or athletics.

**KIN 215 - FIRST RESPONDER/PROFESSN'L CPR**  
Semester Hours: 2

Learn the concepts and skills needed to function as a First Responder and Professional Rescuer. Emphasis is placed on preparing for, recognizing, and providing emergency care in various situations where needed. Additionally, this course fully addresses the objectives in the U.S. Department of Transportation's National Standards Curriculum.

**KIN 240 - HEALTH & WELLNESS CONCEPTS**  
Semester Hours: 3

This course provides students with an overview of individual and societal health and wellness and the impact of lifestyle choices. Laboratory experiences provide opportunity for assessment of individual health and fitness behaviors. Topics covered include: wellness, physical fitness, behavior modification, weight management, stress management, disease prevention, addictive behavior and sexual health.

**KIN 250 - ESSENTIALS OF PERSONAL TRAIN'G**  
Semester Hours: 2

This course is designed to provide theoretical knowledge and practical skills in preparation for a national certification exam in personal training. Topics include guidelines for instructing safe, effective, and purposeful exercise, essentials of the client-trainer relationship, conducting health and fitness assessments, and designing and implementing appropriate exercise programming.
KIN 260 - FOUNDATIONS OF KINESIOLOGY  
Semester Hours: 3  
An introductory course for students in the Kinesiology major. The course will provide an overview of the Kinesiology field, including all subdisciplines and an in-depth discussion of teacher v non-teacher career choices. The history and development of physical education, exercise science, and sport studies will be covered, as well as issues and trends in physical education, exercise science, and sport studies.

KIN 290 - EX TECHNIQUES & LEADERSHIP  
Semester Hours: 3  
This course provides a practical guide in leadership for group and individual exercise settings. Critical evaluation of a safe fitness environment, adult physical activity programs to promote health, and exercise techniques according to the American College of Sports Medicine and National Strength and Conditioning Association are included.

KIN 300 - NUTRITION FOR FITNESS & SPORT  
Semester Hours: 3  
Explores the theoretical and applied nutritional sciences as they relate to fitness and sport. Students will develop practical skills applicable to solving nutritional problems in exercising populations. Nutritional requirements and practices related to general fitness, athletic performance, and special needs individuals will also be covered. Prerequisite with concurrency: KIN 260.

KIN 315 - STRENGTH TRNG & CONDITION  
Semester Hours: 3  
This course provides a comprehensive overview of strength and athletic conditioning. Emphasis is placed on the exercise sciences (including anatomy, exercise physiology, and biomechanics) and exercise technique, program design, organization and administration, and testing and evaluation. Additionally, this course is designed to prepare students for the nationally accredited Certified Strength and Conditioning Specialist (CSCS) certification exam. Prerequisites: BYS 215 and BYS 216.

KIN 327 - INTRO TO EXERCISE PHYSIOLOGY  
Semester Hours: 3  
An introduction to the response and adaptations of the body systems to exercise and physical activity. Prerequisites: KIN 260, BYS 215 and BYS 216 with a grade of C- or better Co-requisite: KIN 328.

KIN 328 - INTRO EX PHYSIOLOGY LAB  
Semester Hour: 1  
Exercise physiology lab experience to accompany the introduction to exercise physiology course lectures. The course meets two hours weekly for one credit hour. Co-requisite: KIN 327.

KIN 340 - SCHOOL AND COMMUNITY HEALTH  
Semester Hours: 3  
Obtain information and skills related to school and community health programs with an emphasis on health instruction, strategies, and resources. Survey the components of a school health program: school health services, healthful school environment, principles of physical and movement education, nutrition services, counseling and social services, parent/community involvement, health promotion for staff. Examine the core functions of public health, prevention of diseases and injuries, health needs of special populations, and functions of various organizations.

KIN 351 - EXER TEST & PRECR HEALTHY POP  
Semester Hours: 3  
Provides students with techniques that evaluate aerobic capacity, muscular strength and endurance, flexibility, and body composition. The development of exercise prescriptions based on evaluation results will be emphasized. Prerequisite with concurrency: KIN 327 and KIN 328.

KIN 352 - EXER TEST & PRECR SPECIAL POP  
Semester Hours: 3  
This advanced-level course integrates both lecture and laboratory to prepare students with the knowledge and skills necessary to conduct fitness evaluations, exercise prescriptions, and risk stratification of at-risk individuals. Specific emphasis will be placed on the administration of safe fitness testing using protocols published by ACSM for the health related components of physical fitness. Prerequisites: KIN 351.

KIN 361 - TEACHING TEAM SPORTS  
Semester Hours: 3  
Teaching methods and strategies of sports that require more than one participant. While knowledge of how to play the sport will be taught, emphasis will be placed on the organization, management, and assessment of skills in activities such as, but not limited to soccer, handball, and basketball.
KIN 362 - TEACHING INDIVIDUAL ACTIVITIES
Semester Hours: 3
Teaching methods and strategies for games involving individuals rather than a team. Emphasis will be placed on the organization, management, and assessment of skills in activities including, but not limited to, aerobic dance, cross country/trail running, and tumbling/gymnastics.

KIN 363 - TEACHING FITNESS & WELLNESS
Semester Hours: 3
Learn to perform and instruct a variety of fitness activities. Emphasis will be placed on performing fitness skills and on the methods and techniques for instructing and teaching specific fitness activities. Techniques for evaluating the knowledge and skills of the activities will also be stressed.

KIN 370 - ADAPTED PHYSICAL EDUCATION
Semester Hours: 3
Develop knowledge of current concepts and trends in adapted physical education as well as the ability to plan and implement a physical education program designed to meet the unique needs of individuals.

KIN 371 - ADAPTED FITNESS
Semester Hours: 3
Develop knowledge of current concepts and trends in adapted physical fitness as well as the ability to plan and implement fitness and wellness programs designed to meet the unique needs of individuals, particularly those with disabilities and special needs. Prerequisite: KIN 260.

KIN 381 - FACILITIES AND EQUIPMENT MGT
Semester Hours: 3
This course will provide theories for the design, development, operation, maintenance, and management of sport and fitness facilities. Prerequisite: KIN 260.

KIN 382 - SPORT LEADERSHIP
Semester Hours: 3
This course focuses on the role of leadership in general, with a specific application to a sport setting. We will focus on the numerous approaches to leadership that have been used, and emphasize illustrating and applying them to different aspects of sports. Prerequisites: KIN 260.

KIN 420 - WELLNESS COACHING
Semester Hours: 3
Gain knowledge of the principles and practices of wellness coaching, including theory, research, facilitating behavior change, and developing and implementing programs for various populations and health needs. Students will develop instructional strategies to help clients, evaluate program effectiveness, and implement appropriate adjustments and progressions. Prerequisites: KIN 240, PY 101, PY 201.

KIN 421 - INST APP TO SPORT PEDAGOGY
Semester Hours: 3
This class is designed to expand and enrich the teaching repertoire. Special emphasis will be given to how selected models of teaching can be used to achieve multiple outcomes of teaching in physical education and other contexts (e.g., physical activity programs & youth sport). Additionally, the course will increase awareness in other instructional areas related to the profession (teaching underserved youth, youth sports programs, etc.). Prerequisites: KIN 361 or KIN 362 or KIN 363.

KIN 440 - MGT SPORT & PHYSICAL EDUCATION
Semester Hours: 3
This course provides the student with the knowledge of sport management and administration in both athletic and leisure-based sports. Topics include management concepts, roles and responsibilities, fiscal management, fund-raising, legal issues, event scheduling, and decision making.

KIN 442 - INTRO TO SPORT LAW
Semester Hours: 3
This course is designed to introduce students to the legal doctrines, major statutes, standards, and case law that establish legal responsibilities, rights, privileges and controls related to the field of exercise and sport sciences. Prerequisite: KIN 260.

KIN 443 - SP TOPICS IN SPORT ADMIN
Semester Hours: 3
This course will address a variety of topics based on emerging trends in Sport Administration. Potential course offerings will include coach education, advanced legal issues, sport sociology, sport finance and accounting and globalization of sport. Course content will be offered in rotation as needed. Prerequisite: KIN 260.
KIN 444 - SPORT ADMINISTRATION INTERNSHIP  
Semester Hour: 1  
Sport Administration Internship will introduce and promote professionalism through a hands-on experience with a local company. The student will be guided by a faculty member and company representative to achieve a strong overall work experience pertaining to the student's interests. Prerequisites: KIN 260.

KIN 445 - PRINCIPLES OF COACHING  
Semester Hours: 3  
Gain knowledge and skills specific to coaching: developing a coaching philosophy and objectives, motivating athletes, managing a team. Emphasis is placed on sport at the high school and club level with consideration given to coaching youth, recreational, and intercollegiate. Coursework provides preparation for the American Sport Education Program (ASEP) Coaching Principles exam which is required by the Alabama High School Athletic Association (AHSAA).

KIN 450 - EXERCISE PHYSIOLOGY INTERNSHIP  
Semester Hour: 1  
Designed to provide on-site practical experience in a wellness/fitness program, physical therapy clinic, and/or a cardiac rehabilitation facility for Kinesiology-Exercise Science majors. Prerequisites: KIN 351.

KIN 451 - RESEARCH EXERCISE SCIENCE I  
Semester Hours: 3  
Initial capstone course (part of a two-course sequence) providing a broad and balanced background in various types of research methods and the development of a research proposal. Development of a research question, hypothesis, and research methodology. Application of computers will be used to search databases for relevant literature. Completion of an Institutional Review Board application is required. Prerequisites: KIN 351.

KIN 452 - RESEARCH EXERCISE SCIENCE II  
Semester Hours: 3  
Final capstone course (part of a two-course sequence) in which students must integrate and apply skills acquired throughout the program to complete a comprehensive research project. The student will complete the research project proposed in KIN 451 by recruiting research participants to collect data, writing the results and conclusions for a manuscript. Results will be prepared for publication and presented in a professional setting. Prerequisites: KIN 451 and PY 300 (with concurrency).

KIN 455 - MOTOR LEARNING  
Semester Hours: 3  
Study the principles and practices that affect the learning and development of motor skills; theories of motor learning, motor control, and development; lifespan motor development perspective related to performing motor and sport skills; and professional applications of motor learning and development in exercise science, athletic training, and physical education.

KIN 457 - MEASUREMNT & EVAL IN PHYS ACTV  
Semester Hours: 3  
Measure and evaluate learning or skill improvement based on accepted standards. Gain an understanding of the logic behind measurement instruments in order to better interpret and implement results and to achieve improved learning or physical fitness improvement. These methods of measurement and evaluation are important skills in health, physical education, and exercise science fields.

KIN 460 - SP TOPICS EXERCISE SCIENCE I  
Semester Hours: 3  
This course is intended to cover a variety of topics based on emerging topics in Exercise Science. Potential course offerings will include environmental exercise physiology, cardiovascular exercise physiology, childhood and adolescent exercise physiology, psychology of injury, illness, and disability, and resources for the personal trainer. Course content will be offered in rotation. Prerequisites: KIN 327.

KIN 461 - SP TOPICS EXERCISE SCIENCE II  
Semester Hours: 3  
This course is developed to cover a variety of topics based on emerging topics in Exercise Science. Potential course offerings will include environmental exercise physiology, cardiovascular exercise physiology, childhood and adolescent exercise physiology, psychology of injury, illness and disability and resources for the personal trainer. Course content will be offered in rotation. Prerequisites: KIN 327.
KIN 462 - TEACHING PHYS ED IN ELEM SCH
Semester Hours: 3
Physical education teacher candidates will acquire the ability to understand, recognize, analyze, and demonstrate the range of teaching skills employed by successful physical educators in the preschool and elementary setting. Emphasis is placed on understanding the theoretical implications of different teaching skills and the contexts in which they are effective. Teacher candidates will design lessons that allow for maximum student participation while remaining aligned with Alabama Consent Standards. Field experience is required. Candidates will observe, participate in, and teach lessons in physical education classrooms. Prerequisite: Admission to the Teacher Education Program. Prerequisite: KIN 370.

KIN 463 - PSYCHOLOGICAL ASPECTS SPORT
Semester Hours: 3
Provides students with an introductory experience in sport, exercise, and fitness psychology based on the latest research and practice. Practical examples and case studies for individual and group sports are provided. The aim is to bridge science and practice to teach students the role of a sport and fitness psychologist. Prerequisites: KIN 327.

KIN 465 - TEACHING SECONDARY PE
Semester Hours: 3
Physical education teacher candidates will acquire the ability to understand, recognize, analyze, and demonstrate the range of teaching skills employed by successful educators in the secondary setting.

Bachelor of Science in Kinesiology with Exercise Science option

- A Bachelor of Science in Kinesiology with a concentration in Exercise Science requires 122 credit hours.
- For transfer students, no more than 60 credit hours from a two-year school can be applied toward a UAH degree.
- In order to graduate, 12 of the last 18 credit hours must be taken at UAH, and 25% of all coursework must be taken at UAH.
- For graduation application instructions, see here (p. 806).

### Bachelor of Science in Kinesiology with Physical Education (P-12) licensure

- Bachelor of Science in Kinesiology: Physical Education Teacher Education requires 123 credit hours.
- 12 credit hours of 300 level and above must be taken in the major.
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- No more than 61 credit hours from a two-year school can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

Mission & Vision
The mission of the College of Engineering is to advance knowledge through research and education in core engineering disciplines. The College promotes ethical, innovative, and multidisciplinary approaches in an environment of collaboration with local and global partners to address society's technological problems.

The vision of the College of Engineering is to attain national and international recognition through innovative, multi-disciplinary research and education, while promoting professional integrity, and inspiring students to become leaders in their profession.

Degree Programs
The College of Engineering offers eight undergraduate programs built around a core consisting of courses in mathematics, the physical sciences, liberal arts, and engineering. Student may pursue one of the following engineering degree programs that leads to a Bachelor of Science degree:

- Aerospace Engineering (BSAE) (p. 422)
- Chemical Engineering (BSCheE) (p. 360)
- Civil Engineering (BSCE) (p. 373)
- Computer Engineering (BSCpE) (p. 398)
- Electrical Engineering (BSEE) (p. 402)
- Industrial and Systems Engineering (BSISE) (p. 413)
- Mechanical Engineering (BSME) (p. 426)
- Optical Engineering (BSOE) (p. 406)

History & Objectives
UAH has been an independent and autonomous campus since 1968 with the first engineering degrees awarded in Electrical Engineering. The College of Engineering was established as an independent college in 1981 and is now the largest of the five academic colleges at UAH. Over 8,000 undergraduate and graduate degrees have been awarded in the College of Engineering's history. Close proximity to the Marshall Space Flight Center, the U.S. Army Research, Development & Engineering Command and Redstone Arsenal, and much of Alabama’s fastest growing technological industry gives the College of Engineering a special character that leads to outstanding educational opportunities for its students. This special setting, combined with high quality research-active faculty, affords maximum growth potential for students interested in pursuing a career in engineering.

The goals of the College of Engineering are to:

- Enhance the national and international recognition of the research activities of the College to advance towards the top 50 engineering colleges/schools.
- Be recognized nationally for graduating highly sought after professionals with excellent engineering skills, integrity, and a strong work ethic
- Improve the quality, diversity, and number of students at all levels with an emphasis on increasing full time student enrollment
- Create an engaging educational environment fostering a highly diverse group focusing on nurturing innovation and leadership through core engineering and multidisciplinary research and education

Working with students, our faculty conduct both fundamental and applied research in disciplinary and cross disciplinary fields, developing solutions to many grand challenges. The College of Engineering is strongly committed to the advising of both undergraduate and graduate engineering students.

Undergraduate Engineering Advising
The College of Engineering is committed to student success, which starts with effective and supportive academic advising. Engineering students are advised by a team of professional advisors from the Center for Undergraduate Engineering Education (CUE²) which is located in Room 157 of the Engineering Building. The CUE² advisors will work with you throughout your entire undergraduate career to define and implement sound educational plans that are consistent with your personal goals and career plans. Our advisors are also available to answer questions about degree requirements as well as academic policies and procedures. They can also suggest enrichment opportunities or make referrals to academic and other campus support resources. They're here to offer guidance and support.

More information about CUE² advisors as well as a host of advising and curricular information for UAH engineering students may be found on the Undergraduate Engineering website (http://www.uah.edu/eng/departments/undergraduate-engineering). Prospective students may email the CUE² office at engineering@uah.edu.
Admissions

**Freshman Students**

Each applicant is evaluated based on individual merit and demonstrated success in a rigorous academic environment. High school coursework, grade point average, and ACT/SAT scores are weighed heavily; however, these criteria do not constitute the entire foundation for an admission decision. An applicant with a grade point average of 2.9 and a composite score of 20 on the ACT or equivalent SAT, for example, is considered a strong candidate for admission.

**Transfer Students**

Students may transfer to the UAH College of Engineering from another two-year or four-year institution. Students must have a C grade point average (2.0 on a 4.0 scale) for all coursework previously attempted. Students must also provide an official transcript sent directly to the UAH Admissions office. Transfer credit will be applied as appropriate to the specific engineering program and at the discretion of the College of Engineering. Students must earn a C in any transferred course that serves as a prerequisite to a course required for the engineering degree program.

Students transferring from a two-year, regionally accredited school may, at most, transfer 50% of the total number of hours (maximum of 64 hours) required for an undergraduate engineering degree. UAH follows the Alabama Articulation and General Studies Committee (http://stars.troy.edu) agreement for students transferring credit from a State of Alabama community college. Transfer credit from other two-year institutions will be evaluated by the UAH Registrar’s Office and the College of Engineering.

Students transferring from an ABET-accredited four-year institution may transfer no more than 70% of course work towards an engineering degree program. Students must also complete 12 of their last 18 semester hours towards their degree requirements at UAH. More information and requirements may be found at the UAH Admission website (http://www.uah.edu/admissions).

**Engineering Common First Year**

The Engineering Common First Year is designed to motivate and engage engineering students. All Engineering students will take a common set of courses including FYE 101 for Engineers and ENG 101. The goals of the Common First Year program are to:

- Introduce students to UAH, the College of Engineering, and the fields of engineering
- Give students flexibility to choose a major at the end of the first year
- Keep students in a loosely defined cohort for the first year
- Emphasize the importance of computing for engineers
- Ensure that students have the skills necessary to be successful in second year engineering courses

**Engineering Academic Progress Policy**

It is important for engineering students to make good academic progress. Repeating courses increases the time and cost to earn a degree and can negatively impact a student’s grade point average. The College of Engineering defines good academic progress as completing 66% or more of the courses for which a student is registered. Completion is defined as earning the minimum grade necessary to have the course satisfy a degree requirement. Withdrawing from course and receiving a W on the transcript is not considered completion.

Engineering students will be limited to three attempts of any math, science or engineering course that is required for the degree. If a student is not successful at completing a course on the third attempt (including Ws), the student will not be able to continue in any engineering degree program for which that course is required. Exceptions to this policy will be considered for unusual or emergency situations.

**Chemical and Materials Engineering**

117 Engineering Building  
Telephone: 256.824.6810  
Email: krishnan.chittur@uah.edu  
http://www.uah.edu/eng/departments/cme

**Department Chair:** Krishnan Chittur

**Chemical Engineering Program**

Chemical engineering deals with any situation in which changes in the chemical composition or the physical state of matter (or both) are involved and, hence, finds unusually wide application. Heat and mass transfer, fluid mechanics, thermodynamics, chemical reaction kinetics, and process control constitute the heart of chemical engineering. Chemical engineers work in many diverse fields ranging from production of many basic chemical products required by today’s industrial society to research on major technical and social problems, including energy resources development, space applications, pollution control, and biotechnology.
Students pursuing a UAH Chemical Engineering bachelor's degree may choose one of two concentrations:

1. Materials (p. 368)
2. Biotechnology (p. 364)

Program Educational Objectives

The program educational objectives (PEOS) are designed to prepare graduates to be successful in their professional careers and for them to have the skills needed to contribute to the economic advancement of their firms, their local region, the state and the nation. The PEOS are:

- Graduates have gained a core competency and are expected to advance professionally in positions of increasing technical and/or managerial responsibilities within their chosen field.
- Graduates are expected to engage in educational, business, or technical activities with an understanding of global and economic impacts, civic responsibility, and environmental and human safety.
- Graduates are expected to pursue life-long learning for continuous improvement which is a requisite for a successful engineer to become a leader in the work force or graduate education.

Majors in Chemical Engineering

- Chemical Engineering, BSChE - Biotechnology Concentration (p. 364)
- Chemical Engineering, BSChE - Materials Concentration (p. 368)

CHE 201 - INTRO CHEMICAL ENGR PROCESS
Semester Hours: 2
Introduction to industrial processes used in the production of commodity chemicals important to chemical engineers. Computer programming, spreadsheets, symbolic math, and drawing packages to model fundamental stages of these processes will be presented. Prerequisites: ENG 101 and CH 123.

CHE 244 - INTRO TO CHEM ENGRG SYSTEMS
Semester Hours: 3
Introduction to basic analysis of chemical engineering systems, emphasizing material balances on physical and chemical process systems. Analysis includes single-component and multi-component systems, single-phase and multi-phase systems, single unit operations and complete flow sheet systems. Prerequisites: PH 111, CH 123, and CHE 198.

CHE 294 - NATURE & PROPERTIES OF MATLS
Semester Hours: 3
Introduction to the fundamental nature and properties of materials including bonding, composition, and phase diagrams. Composite materials and aspects of materials processing, including diffusion, nucleation, and transformation diagrams, will be presented. Prerequisites: CH 121 and PH 111.

CHE 295 - NATURE & PROPERTIES MATLS LAB
Semester Hour: 1
Experiments include characterizing material structures, testing mechanical properties and mapping phase diagram boundaries. Emphasis on numerical and statistical analysis of the data. Written reports are required, and elements of materials design are presented.

CHE 342 - TRANSPORT PHENOMENA
Semester Hours: 3
Fundamental aspects of heat and mass transfer and the use of these basic principles in solving problems in transport operations. Heat transfer with phase change. Diffusive and convective mass transfer with applications. Prerequisites: CH 341 and CHE 244 and MAE 310 w/concurrency.

CHE 344 - CHEM ENGR THERMODYNAMICS
Semester Hours: 3
Thermodynamics of phase equilibria, chemical reactions and thermodynamic analysis of chemical processes, with emphasis on topics of special interest to chemical engineers. Prerequisites: CHE 244 and CH 341.

CHE 347 - QUANTITATIVE MODELING FOR CHE
Semester Hours: 3
Modeling and analysis of physical phenomena that arise in chemical engineering and an introduction to computer-aided design. Prerequisites: CHE 244, and MA 238.
CHE 359 - INDEPENDENT STUDIES IN CHE
Semester Hours: 1-3

Independent studies or research on a topic that requires the application of basic principles in chemical engineering. A written report, analytical or experimental analysis, and oral presentation will be required. Prerequisites: CHE 244 and CHE 294.

CHE 439 - UNIT OPERATIONS I
Semester Hours: 2

Experimental studies cover fluid mechanics and heat transfer in unit operations. Theoretical classes provide an introduction to engineering economy as well as standard laboratory practice, probability and statistical data analysis. Emphasis placed on written and oral laboratory report presentation techniques. Prerequisites: CHE 295, CHE 441, and CHE 446.

CHE 440 - UNIT OPERATIONS II
Semester Hours: 2

Experimental studies covering reaction kinetics, mass separation, biotechnology, and special material properties. Applications of laboratory practices, probability and statistical data analysis, and ethics in professional practice. Emphasis placed on technical communications. Prerequisites: CHE 439, CHE 441, and CHE 443.

CHE 441 - CHEM KINETICS & REACTOR DESIGN
Semester Hours: 3

Fundamental principles of chemical kinetics and chemical reactor engineering along with the design of both thermal and catalytic reactors. (Same as CHE 541) Prerequisites: CHE 344 and CHE 347.

CHE 442L - LABORATORY
Semester Hours: 0

CHE 443 - MASS TRANSFER OPERATIONS
Semester Hours: 3

Theory of mass transfer phenomena, with applications to both stage-wise and diffusion controlled distillation, gas absorption/desorption, humidification, and extraction processes. Prerequisites: CHE 342, CHE 344, and MAE 310.

CHE 445 - CHEMICAL PROCESS CONTROL
Semester Hours: 3

Fundamental principles of chemical process control; control system design for chemical processes. Prerequisite: CHE 441 and CHE 446.

CHE 446 - ANAL & DESIGN TRANSPORT EQUIP
Semester Hours: 3

Theory of transport phenomena from a unified approach to momentum, heat and mass transfer. Application of theory to the design of various transport equipment. Prerequisites: CHE 342 and CHE 443.

CHE 448 - CHEMICAL ENGINEERING DESIGN
Semester Hours: 3

Capstone design course. Design of chemical engineering components, concluding with an overall team design effort using modern CAD techniques includes preliminary design, simulation, and economic evaluation of a chemical production flow sheet, and a study of ethical issues. Prerequisites: CHE 441, CHE 443, CHE 445 and CHE 446.

CHE 459 - ADVANCED INDEPENDENT STUD CHE
Semester Hours: 1-3

Independent studies or research on a topic that requires a solid background in the foundations of chemical engineering. A written report, analytical or experimental analysis, and oral presentation will be required. Prerequisites: CHE 347 and either CH 363 or CH 440.

CHE 460 - INTRO TO BIOPROCESS ENGRG
Semester Hours: 3

Application of engineering principles to analysis of and development and design of processes using biological catalysts including enzymes, plant and animal cells, and genetically engineered cells. Other topics include fermentation and biological mass transport processes. (Same as CHE 560). Prerequisite: CH 361.
CHE 461 - BIOSEPARATIONS  
Semester Hours: 3

Characteristics of separation processes used in biotechnology industries including removal of insolubles, isolation and purification of thermally sensitive products, and preparation for customer use. Applications for biological separations, recombinant DNA techniques, and protein engineering. (Same as CHE 561). Prerequisite: CHE 460.

CHE 485 - PROCESS SAFETY & TOXICOLOGY  
Semester Hours: 3

Fundamentals of process safety and aspects of toxicology. Requires the application of chemical engineering concepts to review and analyze case studies to learn from industrial accidents. Introduces regulatory and design concepts. Prerequisites: CHE 448.

CHE 494 - APPLIED MATERIALS ENGINEERING  
Semester Hours: 3

Synthesis and processing methods of materials. Selection and use of materials performance factors for design of structural and functional components. Use of computational methods in solving open-ended design problems using nature and properties of materials will be emphasized. (Same as CHE 594) Prerequisites: CHE 294 and CHE 344.

CHE 495 - POLYMER ENGINEERING  
Semester Hours: 3

Engineering principles of polymers and their role in manufacturing processes. Aspects of polymer phenomena and their relationship to processing of structural and functional components. (Same as CHE 595) Prerequisites: CH 341 and CH 440.

Chemical Engineering, BSCHeE

To obtain a Bachelor of Science degree in Chemical Engineering, students are required to complete the general education requirements for engineering majors and the following courses:

**Civil and Environmental Engineering**

S201 Technology Hall  
Telephone: 256.824.6854  
Email: cee@uah.edu  
URL: http://www.uah.edu/eng/departments/cee  
Interim Chair: Shankar Mahalingam

**Civil Engineering Program**

Civil engineers are involved in many fields including structural engineering, transportation planning, environmental systems, and geotechnical analysis. The modern civil engineer uses traditional design and analysis methods as well as advanced experimental and computational techniques. At UAH, students are exposed to all of these areas of civil engineering and introduced to techniques that will make them competent practicing professional engineers. The civil engineering curriculum consists of general engineering classes (required of all engineering students), the civil engineering core classes, and the civil engineering concentration selected. The concentration requirements may be met by completing either a broad civil engineering curriculum or by specializing in structural, transportation, or environmental engineering.

The department of Civil Engineering offers the following degree programs:

- Civil and Environmental Engineering, BSCE
- C (p. 376) Civil and Environmental Engineering, BSCE - Environmental Track (p. 380)
- C (p. 376) Civil and Environmental Engineering, BSCE - Structural Track (p. 384)
- C (p. 376) Civil and Environmental Engineering, BSCE - Transportation Track (p. 388)

The structural engineering concentration provides students with a strong background in many aspects of structural analysis, foundations, reinforced concrete, steel design, bridge design, and advanced structural design. Students may take additional courses in such areas as advanced concrete design, design of wood structures, wind and seismic loads, advanced cementitious and composite materials, experimental mechanics, and finite element methods.
The environmental engineering concentration provides students with a strong foundation in environmental management and remediation. Within the framework of the program, students are introduced to environmental engineering aspects such as water quality, atmospheric pollution, hydrology, environmental systems, and environmental sampling.

The transportation engineering concentration provides students with the skills necessary to tackle tomorrow's data management and transportation issues. Students are introduced to various topics, including transportation modeling and simulation, application of GIS to transportation issues, use of traffic crash data, and urban transportation planning.

**Mission**

The mission of the Civil Engineering Program is to educate students with the fundamental knowledge and analytical skills necessary for successful careers in civil and environmental engineering. Through rigorous scholarship, innovative instruction and service, we advance knowledge to improve our global community.

**Program Educational Objectives**

*Within a few years of graduation, Civil Engineering graduates will have:*

- Developed creative solutions in their profession through application of civil engineering knowledge and skills,
- Attained successful careers and recognition as emerging leaders in industry and in the civil engineering community, and
- Impacted the global community by addressing societal needs through a combination of professional practice, research, and/or service.

**Undergraduate Major in Civil Engineering**

- Civil Engineering, BSCE (p. 376)
- Civil Engineering, BSCE - Environmental Track (p. 380)
- Civil Engineering, BSCE - Structural Track (p. 384)
- Civil Engineering, BSCE - Transportation Track (p. 388)

**CE 211 - CIVIL ENGINEERING GRAPHICS**

Semester Hours: 2

Fundamental concepts in computer-aided graphics as they apply to civil engineering. Topics include lettering, sketching, manipulation of elements, rotation of views and input of data. Students will gain engineering practice through AutoCad laboratory exercises. Prerequisite: ENG 101 with minimum grade of C-.

**CE 271 - STATICS**

Semester Hours: 3

Topics include: forces, resultant forces, moments, couples, equivalent forces systems, equilibrium, distributed loads, two force members, trusses, centroids, moments of inertia, shear and bending moment diagrams, static and kinematic friction. (Same as MAE 271). Prerequisite: ENG 101, PH 111 and MA 201 w/concurrency.

**CE 272 - DYNAMICS**

Semester Hours: 3

Kinematics and kinetics of a particle and systems of particles with applications to central force motion, impact, relative motion, vibrations, and variable mass systems. Dynamics of rigid body in plane motion, relative motion in rotating coordinates, and gyroscopic motion. Same as MAE 272 Prerequisites: MA 201 and (CE 271 or MAE 271).

**CE 284 - SURVEYING**

Semester Hours: 2

Basic theory and practical field methods for engineering applications. Measurements and errors in surveying. Leveling, traversing, stadia, topographic surveys, mapping, and circular curves. 1.5 hour lecture and 2 hour lab. Consent of instructor/advisor. Prerequisite: CE 111.

**CE 284L - SURVEYING LAB**

Semester Hours: 0

**CE 321 - INTRO TO TRANSPORTATION ENG**

Semester Hours: 3

Theory, design, and operation of various modes of transportation with emphasis on traffic flow. Prerequisites: CE 284 and MA 171.
CE 370 - MECHANICS OF MATERIALS  
Semester Hours: 4  
Stress and strain, Hooke's law, stresses and deformations in bodies loaded by single and combined loads, and analysis of statically interdeterminate systems. Laboratory includes experimental verification of lecture concepts, test procedures, instrumentation, and interpretation of results. Same as MAE 370. Prerequisites: (CPE 211 or MAE 211) and (MAE 271 or CE 271) and MA 244, corequisite CE 370L.

CE 370L - LABORATORY  
Semester Hours: 0

CE 372 - SOIL MECHANICS & FOUNDATION  
Semester Hours: 3  
Index properties and characteristics of soils. Compaction shear, compressibility and permeability. Application to analysis and design of foundation elements. Laboratory included. Prerequisites: (CE 370 or MAE 370) and MAE 310.

CE 373 - SOIL MECHANICS LAB  
Semester Hour: 1  
Laboratory classification of soils. Determinations of soil properties.

CE 380 - CIVIL ENGINEERING MATERIALS  
Semester Hours: 3  
Performance properties and selection criteria of various materials used in the practice of civil engineering including aggregates, Portland cement, concrete, bituminous materials, and timber. Emphasis will be placed on standard methods of testing and characterization. Includes a weekly lab. Prerequisites: CE 370 or MAE 370.

CE 380L - CE MATERIALS LAB  
Semester Hours: 0  
Standard methods of testing and characterization of various materials used in the practice of civil engineering. Determination of civil engineering materials properties.

CE 420 - URBAN TRANSPORTATION PLANNING  
Semester Hours: 3  
Planning of highways systems and terminals as part of a complete planning approach; public transportation system planning; transportation planning studies, projection analysis, plan formulation, and programming. Same as CE 520. Prerequisite: CE 321.

CE 441 - HYDRAULIC ENGINEERING DESIGN  
Semester Hours: 3  
Water-hammer analysis, open channel flow, hydraulic structures such as dams, spillways, stilling basins, flood control devices, locks, pipe-flow systems and water-supply facilities, computational methods. Prerequisite: MAE 310.
CE 449 - INTRO ENVIRONMENTAL ENGR
Semester Hours: 3
Engineering aspects of air, water, and thermal pollution. Hydrologic cycle, water sources and uses; industrial and other sources of primary and secondary pollutants. Transport process in environmental problems and their control. (Same as CE 549 and CHE 449/549) Prerequisites: MAE 310 and MAE 341.

CE 452 - CREDIT EXPERIENTAL LEARNING
Semester Hours: 1-3
Students are engaged in research and creative projects as meaningful experiential learning opportunities. The course fosters cooperation between students and faculty in a research or creative endeavor, and enhances the students' education via active participation in a research, creative or scholarly project.

CE 456 - WATER QUALITY CONTROL PROC
Semester Hours: 3
Principles of public water-supply design. Source selection, collection, purification, and distribution for municipal use. Collection of waste waters, their treatment and disposal. (Same as CE 556). Prerequisite: CE 449.

CE 457 - HYDROLOGY
Semester Hours: 3
Occurrence and movements of water over the earth's surface for engineering planning and design. Relationship of precipitation to stream-flow with frequency analysis, flood routing, and unit hydrograph theory. (Same as CE 557) Prerequisite: MAE 310.

CE 458 - ENVIRONMENTAL ENGR DESIGN
Semester Hours: 3
Engineering design and project management of environmental quality/restoration systems. Design project focusing on: sanitary landfill, municipal incinerator, or groundwater/site remediation. Develops skills for technical communications, process design and decision making. (Same as CE 558) Prerequisite: CE 449.

CE 459 - SEL TOP IN CIVIL ENGR
Semester Hours: 1-6
Special topics in Civil Engineering.

CE 471 - ADVANCED SOIL MECHANICS
Semester Hours: 3
Continuum mechanics applied to soil behavior. Theoretical approaches to consolidation, shear strength, slope stability and soil stabilization. Prerequisites: CE 372.

CE 472 - SOIL DYNAMICS
Semester Hours: 3

CE 473 - EARTH STRUCTURES ENGRG
Semester Hours: 3
Earth structure design. Theories of earth pressures and the design of retaining wall systems including gravity, cantilever, mechanically stabilized earth, flexible-sheet pile, and anchored wall systems. Stability analyses for retaining walls, earth slopes, and embankment designs. (Same as CE 573) Prerequisites: CE 372 and CE 373.

CE 474 - APP MECHANICS OF SOLIDS
Semester Hours: 3
Stresses and strains at a point, theories of failures, stress concentration factors, thick-walled cylinders, torsion of noncircular members, curved beams, unsymmetrical bending and shear center. (Same as CE 574 and MAE 474/574) Prerequisites: CE 370 or MAE 370.

CE 481 - STRUCTURAL ANALYSIS II
Semester Hours: 3
Reactions, shears, moments and deformations in complex structural systems. Statically indeterminate systems, advanced geometric and energy methods. Prerequisites: CE 381.
Civil and Environmental Engineering, BSCE

CE 483 - REINFORCED CONCRETE DESIGN
Semester Hours: 3
Theory and practice of reinforced concrete design. Theory and design of high strength concrete mixtures. Design of reinforced concrete beams, slabs, and columns using the ultimate strength design code of the American Concrete Institute. Same as CE 583. Prerequisites: CE 380 and CE 381.

CE 484 - STEEL DESIGN
Semester Hours: 3
Principles of design of steel structures using ASD methods. Analysis and design of structural elements using beams, columns, connection details. (Same as CE 584). Prerequisites: CE 381 and MA 244.

CE 485 - FOUNDATION ENGINEERING
Semester Hours: 3
Design of foundations with emphasis on reinforced concrete, footings, caissons, piles retaining walls, and mat foundations. Effect of bearing pressure on foundations. (Same as CE 585) Prerequisites: CE 372 and CE 483.

CE 487 - BRIDGE DESIGN
Semester Hours: 3
Bridge loads, load distribution, composite beam bridges, bridge bearings, reinforced and prestressed concrete slab and T-beam bridges, bridge evaluations and ratings, and upgrade methodology. (Same as CE 583) Prerequisite: CE 483.

CE 498 - CIVIL ENGINEERING DESIGN I
Semester Hour: 1
Planning and analysis for a preliminary civil engineering design project. Topics include fundamentals of management, public policy, cost estimation, environmental impacts, soils analysis, and ethical considerations. Part 1 of a 2-part course. Prerequisites: CE 321, CE 372, and CE 483.

CE 499 - CIVIL ENGINEERING DESIGN II
Semester Hours: 2
Analysis and design of a complete civil engineering project including establishment of design criteria, cost estimates, specifications, and plans. Topics include ethical considerations in engineering design and practice. Emphasis on developing written and oral communication skills. Prerequisites: CE 483 and CE 498.

CE 499L - DESIGN II LABORATORY
Semester Hours: 0

Civil and Environmental Engineering, BSCE

To obtain a Bachelor of Science degree in Civil Engineering, students are required to complete the following courses:

CE 457  HYDROLOGY
CE 458  ENVIRONMENTAL ENGR DESIGN
CE 473  EARTH STRUCTURES ENGRG
CE 481  STRUCTURAL ANALYSIS II
CE 487  BRIDGE DESIGN

Total Semester Hours 128

1. Students must take one literature and one history course. Students must also take either a second literature or history course to complete a sequence. (EH 207 + EH 208, EH 209 + EH 210, HY 103 + HY 104, or HY 221 + HY 222)

2. Based on Math placement (http://www.uah.edu/science/departments/math/undergraduate-students/placement), prerequisite (MA 112 and/or MA 113) Mathematics courses may be required.

3. For choices see the World Languages and Culture (p. 210) department.

### Electrical and Computer Engineering

272 Engineering Building  
Telephone: 256.824.6316  
Email: ece@uah.edu  
URL: http://www.uah.edu/eng/departments/ece

**Department Chair:** Dr. Ravi Gorur

**Mission**

The mission of the Electrical and Computer Engineering Department is to develop and maintain high quality undergraduate and graduate programs in Electrical, Computer, and Optical Engineering to meet the needs of its constituents, and to participate in scholarly and productive research that contributes to the economic well-being and quality of life for the residents of Huntsville, the State of Alabama, and the citizens of the United States of America.

### Computer, Electrical & Optical Engineering Programs

The Department of Electrical and Computer Engineering (ECE) offers three undergraduate programs. The Computer Engineering program deals with the analysis, design, and application of both computer hardware and software and computer systems through a blend of Computer Engineering, Computer Science, and Electrical Engineering courses. The Electrical Engineering program offers coursework that enables students to pursue careers in any of the many diverse facets of Electrical Engineering such as electronics, networks, power systems, instrumentation, communications, and controls. The Optical Engineering program prepares students for careers in opto-electronics, including the design and application of systems for optical fiber communications, optical instrumentation, holography, image forming and processing, lasers and optical detection, as well as areas such as optical testing.

The Department of Computer, Electrical, and Optical Engineering offers the following degree programs:

- Bachelor of Science in Computer Engineering (p. 398)
- Bachelor of Science in Electrical Engineering (p. 402)
- Bachelor of Science in Optical Engineering (p. 406)

### Program Educational Objectives

**Within a few years of graduation, computer engineering graduates will have:**

- Established successful careers as computer engineers and received recognition as emerging leaders in government, industry and academia
- Created viable solutions through the application of their knowledge base and capacity for communicating ideas effectively to advance the state-of-the-art
- Demonstrated continuous professional development and pursued advanced-study opportunities

**Within a few years of graduation, electrical engineering graduates will have:**

- Established successful careers as electrical engineers and received recognition as emerging leaders in government, industry and academia
- Created viable solutions through the application of their knowledge base and capacity for communicating ideas effectively to advance the state-of-the-art
- Demonstrated continuous professional development and pursued advanced-study opportunities

**Within a few years of graduation, optical engineering graduates will have:**

- Established successful careers as optical engineers and received recognition as emerging leaders in government, industry and academia
- Created viable solutions through the application of their knowledge base and capacity for communicating ideas effectively to advance the state-of-the-art
• Demonstrated continuous professional development and pursued advanced-study opportunities

**Majors in Electrical, Computer and Optical Engineering**

- Computer Engineering, BSCpE (p. 398)
- Electrical Engineering, BSEE (p. 402)
- Optical Engineering, BSOE (p. 406)

CPE 211 - INTRO COMPUTER PROG FOR ENGR
Semester Hours: 3

Advanced programming in a high level language such as C++ with an emphasis on practice in solving engineering problems using top-down design and algorithms. Prerequisites: ENG 101 and MA 171 with concurrency.

CPE 211L - LABORATORY
Semester Hours: 0

This lab is the 0-credit lab component of the 3 credit course.

CPE 212 - FUNDAMENTALS SOFTWARE ENGRG
Semester Hours: 3

Introduction to structured programming using C++. Search and sort algorithms. Introduction to data structures. Applications to engineering related problems. Prerequisite: CPE 211.

CPE 221 - COMPUTER ORGANIZATION
Semester Hours: 3

Functional organization of stored-program digital computers including number representation, assembly language programming, computer hardware, micro-operations, and control logic; microprocessor architecture. Prerequisite: CPE 211.

CPE 322 - DIGITAL HDWR DESIGN FUNDMTLNS
Semester Hours: 3

Advanced concepts in Boolean algebra, use of hardware description languages as a practical means to implement hybrid sequential and combinational designs, digital logic simulation, rapid prototyping techniques, and design for testability concepts. Focuses on the actual design and implementation of sizeable digital design problems using representative Computer Aided Design (CAD) tools. Laboratory required. Prerequisite: CPE 221.

CPE 323 - INTRO TO EMBEDDED COMPUTER SYS
Semester Hours: 3

Hardware and software aspects in building embedded computer systems. Includes methods to evaluate design tradeoffs of different technology choices and technology capabilities and limitations of system components necessary to design and implement an embedded system and interface it to the outside world. Laboratory required. Prerequisite: CPE 221.

CPE 324 - ADV LOGIC DESIGN LABORATORY
Semester Hour: 1

Laboratory component of CPE 322 includes experimentation of fundamental concepts in digital logic design. Use of hardware description languages as a practical means to implement hybrid sequential and combinational digital designs, digital logic simulation, and rapid prototyping techniques. Prerequisite: CPE 322.

CPE 325 - EMBEDDED SYSTEMS LAB
Semester Hour: 1

Laboratory component of CPE 323 includes experience working with modern integrated software development environments and hardware platforms to solve practical problems.

CPE 353 - SOFTWARE DESIGN & ENGINEERING
Semester Hours: 3

Hands-on experience developing a substantial software project using software design tools such as SQL database system and the Qt graphical interface development environment. Introduction to a software process including requirements elicitation and testing techniques. Prerequisites CPE 212 and CS 317 (with concurrency).

CPE 381 - FUND SIGNALS & SYS FOR COMP EN
Semester Hours: 3

Introduction to the fundamental concepts in continuous and discrete signals and systems, and methods of signal and system analysis for computer engineers. No credit for EE or OPE students. Prerequisites: EE 213 and MA 238.
CPE 412 - INTRO TO PARALLEL PROGRAMMING
Semester Hours: 3

Introduction to processing in parallel and distributed computing environments. Design and analysis of parallel algorithms. Parallel programming environments: Pthreads for shared memory multiprocessor systems and PVM/MPI for distributed networked computers. (Same as CPE 512) Prerequisites: CPE 212 and CS 317.

CPE 423 - HARDWARE/SOFTWARE CO-DESIGN
Semester Hours: 3

Study and design of Systems On A Chip (SOC). Emphasis on Field Programmable realizations of SOC systems. (Same as CPE 523) Prerequisites: CPE 322 and CPE 426.

CPE 426 - VLSI HARDWARE DESC LANG/MODL/S
Semester Hours: 3

Modern VLSI design techniques and tools, such as silicon compilers, (V)HDL modeling languages, placement and routing tools, synthesis tools, and simulators. Students will design, simulate, and layout using both programmable logic families and ASIC libraries. (Same as CPE 526) Prerequisites: EE 202 and EE 315.

CPE 427 - VLSI DESIGN I
Semester Hours: 3

Introduction to VLSI design using CAD tools, CMOS logic, switch level modeling, circuit characterization, logic design in CMOS, systems design methods, test subsystem design, design examples, student design project. Laboratory required. (Same as EE 427 and CPE 527) Prerequisites: EE 202 and EE 315.

CPE 427L - LABORATORY
Semester Hours: 0

Students enrolling in CPE 427L must enroll concurrently in CPE 427.

CPE 431 - INTRO COMPUTER ARCHITECTURE
Semester Hours: 3

Study of existing computer structures. Computer organization with emphasis on busing systems, storage systems, and instruction sets. Performance models and measures, pipelining, cache and virtual memory, introduction to parallel processing. (Same as CPE 531) Prerequisites: CPE 322 and CPE 323.

CPE 434 - OPERATING SYSTEMS
Semester Hours: 3

Study of the fundamentals of operating systems. Emphasis on processes, file management, interprocess communication, input-output, virtual memory, networking and security. Course must be taken concurrently with CPE 435. Prerequisites: CPE 221 and CPE 353.

CPE 435 - OPERATING SYSTEMS LABORATORY
Semester Hour: 1

Laboratory component of Operating Systems course. Experiments include implementation of device drivers, process and thread management, virtual memory management, dynamic memory management, file-systems. Students must take this course concurrently with CPE 434.

CPE 436 - INTERNALS OF MODERN OPER SYS
Semester Hours: 3

In-depth study of the design of modern operating systems such as Unix, NT and Linux. Emphasis on the internals and implementation details of interrupt processing, real-time clocks, device independent I/O, process management, memory management, file management. (Same as CPE 536) Prerequisite: CPE 434.

CPE 448 - INTRO TO COMPUTER NETWORKS
Semester Hours: 3

Introduction to the concepts and architecture of computer networks. Review of communication protocols using the Internet and the TCP/IP model as major examples. High-speed networking, congestion control, data compression, security and distributed processing. (Same as EE 468, CPE 548, EE 548) Prerequisites: CPE 211 and CPE 221.

CPE 449 - INTRO TO CYBERSECURITY ENGINRG
Semester Hours: 3

Introduction to cryptography and computer security through hardware and physical security to a knowledge of audit methods, security management, and public law. Includes skills such as business process analysis, software security, IAE evaluation, and IAE testing. (Same as CPE 549) Prerequisite: CPE 448.
CPE 449L - INTRO CYBERSECURITY ENG LAB  
Semester Hours: 0

Students enrolling in CPE 449 must enroll concurrently in CPE 449L.

CPE 453 - SENIOR SOFTWARE STUDIO  
Semester Hours: 3

Basic concepts of software engineering. Software project management including specifications, design, implementation, testing and documentation. Software design and management tools. Includes a multi-student software project. Prerequisites: CPE 353 and CS 317.

CPE 455 - SECURE SOFTWARE DEVELOPMENT  
Semester Hours: 3

Overview of methodologies for development of high-assurance software. Major topics include analysis of security and safety risks, software certification criteria, the software development lifecycle, risk mitigation, design and coding best practices, verification techniques, and auditing of software for insecure and unsafe coding constructs. Prerequisites: CPE 353 or CS 307.

CPE 457 - SOFTWARE REVERSE ENGINEERING  
Semester Hours: 3

This course provides fundamental knowledge of software reverse engineering. The course provides the ability (a) to understand software of unknown origin or software for which source code is unavailable, (b) to determine how something works, (c) to discover data used by software, and (d) to aid in the analysis of software. The course introduces tools for reverse engineering, including disassemblers, debuggers, monitors, virtual machines and modern tools for software analysis. Prerequisites: CPE 353 and CS 307.

CPE 459 - SYSTEMS SECURITY  
Semester Hours: 3

This course (1) introduces cyber physical, industrial control, embedded, and Supervisory Control and Data Acquisition (SCADA) control systems, (2) examines common vulnerabilities and threats associated with these systems, and (3) examine techniques to defend these systems from cyber-attacks. Prerequisites: CPE 448.

CPE 490 - SPECIAL TOPICS IN COMP ENGR  
Semester Hours: 1-3

Topics will vary. The course may be repeated when topics vary. Consent of advisor.

CPE 490L - SPECIAL TOPICS LABORATORY  
Semester Hours: 0

CPE 495 - COMPUTER ENGINEERING DESIGN I  
Semester Hours: 3

First course in the senior capstone design sequence. Application of techniques to the design of electronic systems that have digital hardware and software components. Application of engineering courses to solve real-world design problems. Must be taken in the same academic year as CPE 496. Prerequisites: CPE 323, CPE 353 and EE 315.

CPE 496 - COMPUTER ENGINEERING DESIGN II  
Semester Hours: 3

Second course in the senior capstone design sequence. Must be taken in the same academic year as CPE 495. Prerequisite: CPE 495.

CPE 497 - COMPUTER ENGR INTERNSHIP  
Semester Hours: 1-3

Active involvement in an engineering project in an engineering enterprise, professional organization, or government agency that has particular interest and relevance to the student. Junior/senior standing and approval from Engineering Faculty advisor.

CPE 499 - PROJECT IN COMPUTER ENGRG  
Semester Hours: 3

Individual design project under the direction of an ECE faculty membeer. Senior standing and permission of instructor required.

EE 202 - INTRO DIGITAL LOGIC DSGN  
Semester Hours: 3

Engineering approaches to design and analysis of digital logic circuits. Boolean algebra, Karnaugh maps, design using Hardware Description Languages, digital computer building blocks, standard logic (SSI MSI) vs. programmable logic (PLD, PGA0, finite state machine design. Prerequisites: CPE 112 and EE 100.
EE 203 - DIGITAL LOGIC DESIGN LAB
Semester Hour: 1
Experiments in applying Boolean logic concepts to digital design. The course introduces students to small-scale prototyping and simulation techniques that are used to implement and evaluate digital combinational and sequential logic designs. Prerequisite: EE 202.

EE 213 - ELECTRICAL CIRCUIT ANALYSIS I
Semester Hours: 3
Basic concepts of DC and AC circuit theory and analysis. Includes both DC and AC power. Prerequisites: MA 201 and PH 112 w/concurrency.

EE 223 - DES & MOD ELEC CIR & SYS
Semester Hours: 3
Electrical circuit and systems design and modeling. Includes using modern tools (i.e. Matlab and simulink) to design and model circuits. Introduces and reinforces engineering design principles. Prerequisites: EE 202 & EE 213.

EE 305A - SEMICONDUCTOR ENGINEERING/A&M
Semester Hours: 3

EE 307 - ELECTRICITY & MAGNETISM
Semester Hours: 3
Basic concepts of electrostatics, electric potential theory, electric fields and currents, fields of moving charge, magnetic fields, time varying electromagnetic fields, Maxwell's equations. Prerequisites: EE 213, MA 238 and MA 244.

EE 308 - ELECTROMAGNETIC ENGR
Semester Hours: 3
Review of Maxwell's equations, uniform plane waves in different types of media, reflection, and transmission of uniform plan waves, transmission lines, waveguides, and antennas. Prerequisites: EE 307.

EE 310 - SOLID STATE FUNDAMENTALS
Semester Hours: 3
Introduction to semiconductors including crystalline structure, energy bands and charge carriers, excess carriers, and thermal properties. Introduction to semiconductor junctions, the bipolar junction transistor, the MOSFET. Prerequisites: PH 113 and MA 238.

EE 315 - INTRO ELECTRONIC ANAL & DESIGN
Semester Hours: 3
Properties of diode, bipolar transistors, FET and operational amplifiers, analysis of DC and AC small-signal operation and circuit models for the design and analysis of electronic circuits. Prerequisite: EE 213.

EE 316 - ELE CIRCUITS & ELTRNC DSGN LAB
Semester Hour: 1
Electric circuit experiments including first and second order DC circuits, maximum power transfer, impedance measurements, transformers, measurement of electronic device characteristics and design and testing of operational amplifier circuits and single-stage amplifiers using MOSFETs and BJTs. Prerequisite: EE 315.

EE 382 - ANALY METH CONTINUOUS TIME SYS
Semester Hours: 3
Fourier Series, Fourier and Laplace transforms with emphasis on their physical interpretation. System representation by transfer functions and impulse response functions. Convolution integral. Transient response. Modeling and simulation. Prerequisites: EE 213, MA 238 and MA 244.

EE 383 - ANALY METH MULTIVARIABLE
Semester Hours: 3
Discrete time signals and systems, sampling techniques, Z and discrete Fourier transforms, multivariable systems. Introduction to digital signal processing. Prerequisite: EE 382.

EE 384 - DIG SIGNAL PROCESS LAB
Semester Hour: 1
Design and programming of digital processing algorithms such as DFT, FFT, IIR, and FIR filtering. Prerequisites: EE 383 or CPE 381.
EE 385 - RANDOM SIGNALS & NOISE
Semester Hours: 3
Random variables and probabilities description of signals. Introduction to random processes; autocorrelations, cross correlation, power spectral density. Noise analysis, thermal, shot, white, and colored. Response of electrical systems to random inputs. Prerequisites: EE 382 or CPE 381.

EE 386 - INTRO CONTROL/ROBOTIC SYS
Semester Hours: 3
Theory and analytical techniques for modeling, analysis and control of dynamical systems. Transfer functions, block-diagrams, frequency response, stability criteria, series and feedback controller design, and digital control. Introduction to the dynamic analysis and control of robotic systems. Prerequisites: EE 382 or CPE 381.

EE 401 - REAL-TIME DIGITAL SIGNAL PROCE
Semester Hours: 3
Introduction to digital signal processor architectures, applications, assembly language programming, and development tools for designing and implementing DSP systems. Prerequisites: EE 383 or CPE 381.

EE 410 - SELECTED TOPICS/ECE
Semester Hours: 1-6
Special topics in Electrical Engineering.

EE 410L - SELECTED TOPIC LABORATORY
Semester Hours: 0

EE 411 - ELECTRIC POWER SYSTEM
Semester Hours: 3
Power generation, transmission and distribution. Three-phase circuits and per unit analysis, loadflow studies, symmetrical components, and power systems stability. Prerequisite: EE 313.

EE 412 - SR DSGN PROJ ELECT ENGR
Semester Hours: 1-6
Individual design project under the direction of an ECE faculty member. Senior standing and permission of instructor.

EE 414 - ANALOG & DIGITAL FILTER DESIGN
Semester Hours: 3
Analog filter design via Butterworth, Chebyshev, and elliptical approximation. Active filter design using operational amplifiers. Digital filter design methods. Prerequisites: EE 315 and EE 383.

EE 416 - ELECTRONICS II
Semester Hours: 3
Integrated circuits and micro-devices related to multistage amplifiers, oscillators, design specifications, operational amplifiers, and microunits. Computer simulation. Prerequisites: EE 313 and EE 315.

EE 423 - COMM SYS & SIMULATION W/ LAB
Semester Hours: 3
Modern test equipment and computer-based simulation methods are used to conduct experiments in the area of communication systems. Includes experiments to investigate signal modulation and demodulation, and filters. (Same as EE 523) Prerequisite: EE 426.

EE 424 - INTRO DATA COMMUN NETWORKS
Semester Hours: 3
Overview of historic development of modern telephone and data communication system, system architecture, standards, broadband switching systems, modems, protocols, personal and mobile communications, digital modulation techniques. (Same as EE 504) Prerequisites: EE 383 and EE 385.

EE 426 - COMMUNICATION THEORY
Semester Hours: 3
Signals and systems including the Hilbert transform, cross and auto correlation, power density spectrum, and the Wiener-Khintchine theorem. Filter design. Linear and nonlinear modulation and demodulation methods and circuits. Phase lock and frequency feedback techniques. (Same as EE 506). Prerequisites: EE 382 or CPE 381.
EE 436 - DIGITAL ELECTRONICS
Semester Hours: 3

Introduction to digital electronics. The Metal-Oxide-Semiconductor (MOS) transistor. MOS inverters and gate circuits. Bipolar junction transistors, ECL inverters, and bipolar digital gates. Semiconductor Memories. (Same as EE 516) Prerequisites: EE 202 and EE 315.

EE 437 - ELECTRONICS MANUF PROCESSES
Semester Hours: 3

Concepts, facilities, and technology utilized in the manufacture of electronic components and products. Includes printed wiring board fabrication and component mounting methods, automation, quality and reliability, product testing, and economic issues. Senior standing. (Same as ISE 437 and EE 537).

EE 451 - OPTOELECTRONICS
Semester Hours: 3

Basic concepts for understanding electro-optic devices and systems. Blackbody radiation; light sources; quantum and thermal detectors, noise in detectors; optical heterodyning; acousto-optic, magneto-optic, and electro-optic modulation. (Same as OPE 451) Prerequisites: EE 307 and EE 315.

EE 453 - LASER SYSTEMS
Semester Hours: 3

Spontaneous and stimulated emission, population inversion, optical resonators, three- and four-level systems, Q-switching and mode-locking, semiconductor lasers, integrated optic waveguides and couplers, scanning systems, high-power industrial application. Prerequisite: EE 307.

EE 454 - OPTICAL FIBER COMMUNICATIONS
Semester Hours: 3

Introduction to optical fibers and their transmission characteristics, optical fiber measurements, sources and detectors, noise considerations for digital and analog communication, optical fiber systems. (Same as OPE 454) Prerequisites: (EE 307 or PH 432) and (EE 382 or CPE 381).

EE 486 - INTRO MODERN CONTROL SYSTEMS
Semester Hours: 3

Modern control theory including techniques for modeling, analysis and control of MIMO dynamic systems, state-variable feedback control design and state observers. Kalman-filtering. Fundamentals of nonlinear systems analysis and discrete-time system modeling, analysis and control. Prerequisites: EE 386.

EE 494 - EE DESIGN PROJECTS
Semester Hours: 3

Senior Capstone Course. Design, simulation, and construction of technical projects. Review of legal, economic, and ethical issues. Students work as individuals or teams to design, implement, test, and evaluate their projects. Oral presentation and written reports are required. Senior Standing. Prerequisites: ISE 321, EE 308, EE 310, EE 313, EE 315, CPE 323, EE 383, and EE 386.

EE 497 - ELEC ENGR INTERNSHIP
Semester Hours: 1-3

Active involvement in an engineering project in an engineering enterprise, professional organization, or government agency that has particular interest and relevance in the student. Junior/senior standing and Approval of Engineering Faculty Advisor.

Computer Engineering, BSCpE

To obtain a Bachelor of Science degree in Computer Engineering, students are required to complete the following courses:

Computer Engineering Electives
Select 12 semester hours of 300-level or above CPE, EE, CS or other upper-level courses approved by the Department 12

Total Semester Hours 128

1 Students must take one literature and one history course. Students must also take either a second literature or history course to complete a sequence. (EH 207 + EH 208, EH 209 + EH 210, HY 103 + HY 104, or HY 221 + HY 222)
2 Based on Math placement (http://www.uah.edu/science/departments/math/undergraduate-students/placement), prerequisite (MA 112 and/or MA 113) Mathematics courses may be required.
3 For choices see the World Languages and Culture (p. 210) department.

**Spring**

- CPE 381  FUND SIGNALS SYS FOR COMP EN
- CPE 322  DIGITAL HDWR DESIGN FUNDMNTLS
- & CPE 324 and ADV LOGIC DESIGN LABORATORY
- EE 316   ELE CIRCUITS ELTRNC DSGN LAB
- or EE 385 or RANDOM SIGNALS & NOISE
- HSBS/HFA

**Term Semester Hours:** 16

**Year 4**

**Fall**

- CPE 495  COMPUTER ENGINEERING DESIGN I
- CPE 431  INTRO COMPUTER ARCHITECTURE
- CPE Elective I
- CPE Elective II
- EE 384   DIG SIGNAL PROCESS LAB
- HSBS/HFA

**Term Semester Hours:** 16

**Spring**

- CPE 496  COMPUTER ENGINEERING DESIGN II
- CPE 434  OPERATING SYSTEMS
- & CPE 435 and OPERATING SYSTEMS LABORATORY
- CPE 448  INTRO TO COMPUTER NETWORKS
- CPE Elective III
- CPE Elective IV

**Term Semester Hours:** 16

**Total Semester Hours:** 129

**Electrical Engineering Electives**

Select one ECE approved track (see approved list at CUE2 website): 6

Select 6 hours of 300-level or above EE, CPE, or OPE classes approved by advisor (CPE 212 is also allowed) 6

**Technical Elective**
Select 3 hours at the 200-level or above from the College of Science or Engineering (Note: ESS 210 is not allowed)  

| Total Semester Hours | 128 |

1. Students must take one literature and one history course. Students must also take either a second literature or history course to complete a sequence. (EH 207 + EH 208, EH 209 + EH 210, HY 103 + HY 104, or HY 221 + HY 222)

2. Based on Math placement (http://www.uah.edu/science/departments/math/undergraduate-students/placement), prerequisite (MA 112 and/or MA 113) Mathematics courses may be required.

3. For choices see the World Languages and Culture (p. 210) department.

**Optical Engineering Elective**

Select one 3 semester hour technical elective at the 300-level or higher approved by an advisor.

**Total Semester Hours**

1 Students must take one literature and one history course. Students must also take either a second literature or history course to complete a sequence. (EH 207 + EH 208, EH 209 + EH 210, HY 103 + HY 104, or HY 221 + HY 222)
Based on Math placement (http://www.uah.edu/science/departments/math/undergraduate-students/placement), prerequisite (MA 112 and/or MA 113) Mathematics courses may be required.

For choices see the World Languages and Culture (p. 210) department.

Department Chair: Paul D. Collopy

Industrial and Systems Engineering

Industrial & Systems Engineering is a branch of engineering dealing with the optimization of complex processes or systems. It is concerned with the development, improvement, implementation and evaluation of integrated systems of people, money, knowledge, information, equipment, energy, materials, analysis and synthesis, as well as the mathematical, physical, and social sciences together with the principles and methods of engineering design to specify, predict, and evaluate the results to be obtained from such systems or processes. Its underlying concepts overlap considerably with certain business-oriented disciplines such as operations management.

Depending on the sub-specialties involved, industrial engineering may also be known as, or overlap with, operations management, management science, operations research, systems engineering, manufacturing engineering, ergonomics or human factors engineering, safety engineering, or others, depending on the viewpoint or motives of the user. For example, in health care, the engineers known as health management engineers or health systems engineers are, in essence, industrial engineers by another name.

The Industrial and Systems Engineering Department offers the following degree programs:

- Industrial and Systems Engineering, BSISE (p. 413)

Mission

To provide integrated, applications-oriented education and research programs in the areas of industrial engineering, systems engineering, and engineering management to support the needs of students and organizations in the Huntsville area and beyond.
ISE Program Educational Objectives

To realize the mission of the department, the following educational objectives have been adopted for the undergraduate program. These objectives cover the fundamentals of both engineering and the humanities that characterize a university education, plus the specialized knowledge of industrial and systems engineering needed for a successful career in industry, the government, or academia.

• Graduates will have utilized a foundation in the knowledge and skills of industrial and systems engineering to improve lives and advance professionally in positions of increasing responsibility within their chosen field.
• Graduates will have become effective collaborators and innovators, leading or participating in efforts to address social, technical, and business challenges.
• Graduates will have engaged in lifelong learning and professional development through self-study, continuing education, or graduate and professional studies.

Major in Industrial and Systems Engineering

• Industrial and Systems Engineering, BSISE (p. 413)

ISE 224 - INTRO INDUSTRIAL & SYSTEMS
Semester Hours: 3
Overview of industrial engineering concepts. Includes history and development of classical industrial engineering; documentation and computational methods; basic work methods and measurement; manufacturing systems; and economic decision analysis. Prerequisites: ENG 101.

ISE 321 - ENGINEERING ECONOMY
Semester Hours: 3

ISE 324 - WORK DESIGN
Semester Hours: 3
Principles of methods analysis and ergonomics to fit a task and workstation to the human operator including work measurement and tools, work sampling, job analysis, anthropometric data, and workplace design. Laboratory exercises focus on the implementation of lean principles. (Same as PY 324) Prerequisites: ISE 390 or PY 300.

ISE 327 - MANAGEMENT SYSTEMS ANALYSIS
Semester Hours: 3
Formal organization structures and functions. Analysis of organization planning leading toward the accomplishment of goals. Techniques for making decisions within formal organizations, together with ethical constraints. Emphasis on technical writing. Prerequisite: ISE 390.

ISE 340 - OPERATIONS RESEARCH
Semester Hours: 3
Fundamental methods, models and computational techniques of operations research. Linear programming including transportation, assignment of simplex algorithms. Queuing theory. Prerequisite: ISE 390.

ISE 390 - PROB & ENGR STATISTICS I
Semester Hours: 3
Engineering uses of probability, discrete and continuous probability distributions including the binomial, Poisson, hypergeometric, normal, uniform, lognormal, and exponential distributions. Statistical sampling, distributions of means, variances, and proportions. Hypothesis testing and confidence intervals. Prerequisite: MA 201.

ISE 391 - PROB/ENGR STAT II
Semester Hours: 3
Continuation of ISE 390 with regression analysis, analytics of variance, and nonparametric statistics. Introduction to design of engineering experiments, and computer-based solution of large-scale problems. Prerequisite: ISE 390.

ISE 402 - INDUSTRIAL & ORGANIZA PSY
Semester Hours: 3
Application of basic principles of learning, motivation, and perception to typical industrial and organizational problems. Senior standing. (Same as PY 402/502).
ISE 403 - HUMAN FACTORS PSYCHOLOGY
Semester Hours: 3

ISE 423 - INTR STATISTICAL QUALITY CONTR
Semester Hours: 3
Introduces statistical theory and techniques to control quality of manufacturing products. Provides a solid foundation in Statistical Quality Control. The Six Sigma methodology is also introduced in this course. Students can take the certification exam to earn Green Belt in Six Sigma. Prerequisite: ISE 391.

ISE 426 - DSGN & ANALY OF EXPERIM
Semester Hours: 3
Advanced topics in statistical experiments with emphasis on the design aspect. Factorial designs, including fractional replication and confounding. Includes computer laboratory exercises. (Same as ISE 526). Prerequisite: ISE 391.

ISE 428 - SYSTEMS ANALYSIS & DESIGN I
Semester Hours: 3
Philosophy and methods of industrial and non-industrial systems analysis and design. Methods of systems definition, analysis, simplification, evaluation, and optimization. Design project required. Ethics and technical writing are emphasized. Senior Standing. Prerequisites: ISE 124, ISE 321, ISE 340, and ISE 391.

ISE 429 - SYS ANALYSIS/DESIGN II
Semester Hours: 3
Continuation of design project begun in ISE 428. Prerequisite: ISE 428.

ISE 430 - MANUF SYS & FACILITIES DESIGN
Semester Hours: 3
Modern manufacturing systems design with emphasis on facility location and plant layout. Includes classical systems, just-in-time systems, principles of integrated manufacturing systems design, and an analysis of process flow and productivity, and available space to determine facility layout. (Same as ISE 530).

ISE 433 - PROD & INVENTORY CONTROL SYS
Semester Hours: 3
Inventory models including classical optimal economic order quantity models, manufacturing resource planning systems, production scheduling, material requirements, and purchase order control. Emphasis on manufacturing system revisions, continuous process improvement, and implementation of lean principles. Prerequisite: ISE 390.

ISE 437 - ELECTRONICS MANUF PROCESSES
Semester Hours: 3
Concepts, facilities, and technology utilized in the manufacture of electronic components and products. Includes printed wiring board fabrication and component mounting methods, automation, quality and reliability, product testing, and economic issues. Senior Standing. (Same as ISE 537).

ISE 428 - SYSTEMS ANALYSIS & DESIGN I
Semester Hours: 3
Philosophy and methods of industrial and non-industrial systems analysis and design. Methods of systems definition, analysis, simplification, evaluation, and optimization. Design project required. Ethics and technical writing are emphasized. Senior Standing. Prerequisites: ISE 124, ISE 321, ISE 340, and ISE 391.

ISE 447 - INTRO TO SYSTEMS SIMULATION
Semester Hours: 3
Philosophy and elements of digital, discrete-event simulation. Emphasis on modeling and analysis of stochastic systems, including probabilistic models, output analysis, and the use of simulation software. (Same as ISE 547) Prerequisites: CPE 112 and ISE 391.

Industrial and Systems Engineering, BSISE
To obtain a Bachelor of Science degree in Industrial and Systems Engineering, students are required to complete the following courses:

**Total Semester Hours: 128**

1. Students must take one literature and one history course. Students must also take either a second literature or history course to complete a sequence. (EH 207 + EH 208, EH 209 + EH 210, HY 103 + HY 104, or HY 221 + HY 222)

2. Based on Math placement (http://www.uah.edu/science/departments/math/undergraduate-students/placement), prerequisite (MA 112 and/or MA 113) Mathematics courses may be required.

3. For choices see the World Languages and Culture (p. 210) department.

**Mechanical and Aerospace Engineering**

N274 Technology Hall
Telephone: 256.824.6154
Mechanical and Aerospace Programs

Aerospace Engineering is a diverse and rapidly changing field that consists of four fundamental technical disciplines: aerodynamics, structures and materials, propulsion, and flight mechanics and control. Aerospace engineers have traditionally applied their knowledge of these disciplines to the design and development of high performance flight systems such as aircraft, rotorcraft, spacecraft, missiles and rockets.

Mechanical Engineering applies the principles of physics and materials science for design, analysis and manufacturing of mechanical and thermal systems. Mechanical engineers use core concepts: mechanics, kinematics, thermodynamics, and fluid mechanics and tools: computer-aided design and modeling to design and build machines, weapons, medical devices, and robotics.

The department of Mechanical and Aerospace Engineering offers the following degree programs:

- Bachelor of Science in Aerospace Engineering (p. 422)
- Bachelor of Science in Mechanical Engineering (p. 426)

Mission Statement

The mission of the Department of Mechanical and Aerospace Engineering is to provide undergraduate and graduate education, research, and public service in the mechanical and aerospace engineering disciplines and to support the mechanical and aerospace engineering needs of Huntsville, the State of Alabama, the region, our nation, and the international community.

Program Educational Objectives

Within a few years of graduation, Aerospace and Mechanical Engineering graduates will have:

- attained successful careers and recognition as young leaders in industry and in the community;
- created innovative solutions through the application of their knowledge base and capacity for critical thinking;
- established collaborative working relationships wherein they communicate their ideas effectively; and
- pursued continuous professional development and advanced-study opportunities.

Majors in Mechanical and Aerospace Engineering

- Aerospace Engineering, BSAE (p. 422)
- Mechanical Engineering, BSME (p. 426)

MAE 115 - INTRODUCTION TO MACHINING
Semester Hour: 1

Safety and familiarity with the machine shop environment, equipment, tools, and practices. Correlate student design with consequences of design choice. Basic turning, milling, welding, and sheet metal operations. Programming and operation of numerically controlled machines. Prerequisites: MAE 310 and MAE 198.

MAE 200 - PRINC AERONAUTICS & ASTRONAUTICS
Semester Hours: 3

Fundamental concepts of aerospace engineering including the history of flight, standard atmosphere, fluid and flow properties, lift and drag, propulsion, and structures; elementary aircraft performance, stability and control; basic aeronautics and space environment; and aerospace vehicle design. Prerequisites: PH 111, ENG 101, MA 172 and MAE 211.

MAE 211 - INTRO COMPUTATIONAL TOOLS
Semester Hours: 2

Computer-aided design and solid modeling concepts including: model definition through constraints and dimensioning, and development of subassemblies and assemblies. Prerequisites: ENG 101 and MA 171.

MAE 271 - STATICS
Semester Hours: 3

Topics include: forces, resultant forces, moments, couples equivalent force systems, equilibrium, distributed loads, two force members, trusses, centroids, moments of inertia, shear and bending moment diagrams, static and kinematic friction. (Same as CE 271) Prerequisites: PH 111, MA 201 and ENG 101.
MAE 272 - DYNAMICS
Semester Hours: 3

Kinematics and kinetics of a particle and of systems of particles with applications to central force motion, impact, relative motion, vibrations, and variable mass systems. Dynamics of rigid body in plan motion, relative motion in rotating coordinates, and gyroscopic motion. (Same as CS 362) Prerequisites: (CE 271 or MAE 271) and MA 201.

MAE 284 - NUMERICAL METHODS
Semester Hours: 3

Use computational tools to solve mathematical problems of engineering interest. Discussion and application of root finding and optimization techniques. Other topics include curve fitting, Gauss Elimination, LA decomposition, and Cholesky decomposition, numerical integration and numerical differentiation. Solving initial and boundary value problems. Course includes a lab experience using modern computational tools. Prerequisites: MA 244, ENG 101, MAE 211 and MA 238.

MAE 284L - NUMERICAL METHODS LAB
Semester Hours: 0

MAE 310 - FLUID MECHANICS I
Semester Hours: 3

Fluid properties and fundamental principles governing fluid behavior. Fluid statics, basic equations in integral form and differential form, potential flow, dimensional analysis, and internal incompressible viscous flows. Prerequisites: (CE 271 or MAE 271) and MA 238.

MAE 311 - PRIN MEASUREMENT & INSTRUMENTATION
Semester Hours: 3

Instrumentation and techniques for measurement of mechanical phenomena. Calibration, standards, computerized data acquisition, error analysis, signal conditioning, dynamic response, and experimental design. Laboratory included. Prerequisites: EE 213 and MAE 284.

MAE 311L - PRINC MEASUREMENT & INSTR LAB
Semester Hours: 0

MAE 330 - FUNDAMENTALS AERODYNAMICS
Semester Hours: 4

Fundamentals of incompressible flow, conservation laws, potential flow, similarity, airfoil and finite wing lift and drag, thin airfoil and panel methods, introduction to viscous flows and boundary layers, and modern airfoil and wing design. Integrated lab sessions allow students to investigate aerodynamic principles through wind tunnel experiments. Prerequisites: MAE 200, MAE 272 and MA 238 (all with minimum grade of C-).

MAE 330L - LABORATORY
Semester Hours: 0

This lab is a 0 credit lab component of the 4 credit MAE 330 course.

MAE 341 - THERMODYNAMICS I
Semester Hours: 3

Basic laws of energy that apply in all branches of engineering and science. Properties of matter, state variables, reversible processes, first and second laws of thermodynamics with applications to closed and open systems. Availability of energy and irreversibility. Prerequisites: CH 121, PH 112, and MA 201.

MAE 342 - THERMODYNAMICS II
Semester Hours: 3

Continuation of MAE 341. Thermodynamic cycles, thermodynamic relations among properties, chemical reactions, and phase and chemical equilibrium. Prerequisites: MAE 341 and MA 238.

MAE 343 - COMPRESSIBLE AERODYNAMICS
Semester Hours: 3

Compressible flow including area change, friction, and heat transfer. Fundamentals of acoustic waves, 1- and 2-D shock and expansion waves, shock-expansion theory, and linearized flow with applications to inlets, nozzles, wind tunnels, and supersonic flow over aerodynamic bodies and wings. Prerequisites: MAE 200, MAE 341 and MA 238 (all with minimum grade of C-).
MAE 364 - KINEMATICS/DYNAM MACHINE
Semester Hours: 4
Kinematics and dynamics of planar machinery including principles of mechanisms, cam design, gears and epicycle gear trains, determination of velocity and acceleration in mechanisms. Inertia forces in machines, balancing of rotating masses and reciprocating masses, and vibration analysis. Prerequisites: MAE 211 and (MAE 272 or CE 272).

MAE 364L - KINEMATICS/DYN MACHINE LAB
Semester Hours: 0

MAE 360 - MECHANICS OF MATERIALS
Semester Hours: 4
Stress and strain, Hooke's law, stresses and deformations in bodies loaded by single and combined loads, and analysis of statically indeterminate systems. Laboratory includes experimental verification of lecture concepts, test procedures, instrumentation, and interpretation of results. (Same as CE 370). Prerequisites: (MAE 211 or CE 211) and (CE 271 or MAE 271), and MA 244.

MAE 360L - LABORATORY
Semester Hours: 0

MAE 370 - MECHANICS OF MATERIALS
Semester Hours: 4
Stress and strain, Hooke's law, stresses and deformations in bodies loaded by single and combined loads, and analysis of statically indeterminate systems. Laboratory includes experimental verification of lecture concepts, test procedures, instrumentation, and interpretation of results. (Same as CE 370). Prerequisites: (MAE 211 or CE 211) and (CE 271 or MAE 271), and MA 244.

MAE 371 - AEROSPACE STRUCTURES
Semester Hours: 3
Analysis and design of lightweight aerospace structures including sandwich structures, stiffened panels, and tubing stress and deflection analysis. Design of members in tension, torsion, and bending. Space structures. Prerequisites: MAE 200 and (MAE 370 or CE 370).

MAE 378 - MATERIALS & MFG PROCESS
Semester Hours: 3
Engineering properties of materials, sources of information for properties of materials, cost considerations for material selection, manufacturing processes, casting, forming, machining, cost considerations for machining operations. One or more field trips included. (Same as ISE 378). Prerequisites: MAE 370 or CE 370.

MAE 385 - SEL TOPICS:MECH & AEROSPACE EG
Semester Hours: 1-3
Special topics in Mechanical or Aerospace Engineering.

MAE 395 - DESIGN OF MACHINE ELEMENTS/A&M
Semester Hours: 3

MAE 425 - DESIGN OF MACHINE ELEMENTS/A&M
Semester Hours: 3

MAE 440 - ROCKET PROPULSION I
Semester Hours: 3
Introduction to the operation, analysis, and design of liquid and solid rockets. Incorporates design and realization of a thermal system, in which students work in teams to design a rocket motor or component. Prerequisite: MAE 343.

MAE 441 - AIRBREATHING PROPULSION
Semester Hours: 3
Air breathing propulsion systems with emphasis on gas turbine engines for air-and rotor-craft. Includes thermodynamic power cycles, components design, and engine performance analysis. Incorporates a turbine engine design and realization team project. Prerequisite: MAE 343.

MAE 444 - INTRO TO ELECTRIC PROPULSION
Semester Hours: 3
Elements of electrically-driven rocket propulsion for applications from low earth orbit to the outer planets will be discussed. The physics of ionizing and heating gases and plasmas for electrothermal, electrostatic and electromagnetic acceleration will be studied. Characteristics of Resistojet, Arcjet, Magnetoplasmodynamic thrusters, Electrothermal, Pulsed plasma, Electrostatic, and Hall thrusters will be covered. Review thruster system performance, power requirements and selection for space missions. Overview of current research efforts, including thruster systems, physics, and performance. Prerequisite: MAE 420.

MAE 449 - AEROSPACE LABORATORY
Semester Hours: 2
Experimental investigation of aerospace structures, airfoils and bodies in subsonic flow, and performance of various aerospace propulsion systems. An experiment design project is included. Concurrent registration in MAE 449L is required.
MAE 450 - INTRO TO HEAT & MASS TRANSFER
Semester Hours: 4
Principles of heat and mass transfer; application of principles to problems in conductive, convective, and radioactive heat transfer and mass transfer; laminar and turbulent flow processes; boiling and condensation; heat exchangers. One credit hour laboratory included. Prerequisites: MAE 283, MAE 311, MAE 341 and (MAE 310 or MAE 330).

MAE 450L - INTRO HEAT & MASS TRANSFER LAB
Semester Hours: 0

MAE 455 - DESIGN OF THERMAL SYSTEMS
Semester Hours: 3
Heat transfer, thermodynamics, and fluid mechanics applied to analysis and design of systems for storage and transport, and exchange of thermal energy. Modeling of thermal equipment, simulation of system performance, optimization of system design, and comprehensive design of thermal systems. Prerequisites: MAE 342 and MAE 450.

MAE 461 - VIBRATIONS ELASTIC SYS
Semester Hours: 3
Formulation of the equations of motion of discrete and continuous systems, analytical and numerical methods of solution, eigenvalue problems and dynamic response. Prerequisite: MAE 488.

MAE 463 - INTERMEDIATE DYNAMICS
Semester Hours: 3
Kinematics and dynamics of particles, system of particles, and rigid-bodies. Variational principles and Langrangian mechanics. Prerequisites: MAE 272 and MAE 488.

MAE 466 - MECH & DSGN MACH ELEMENT
Semester Hours: 3
Detailed design and selection of machine elements such as gears, shafts, and bearings. Analysis of stresses and deformations under combined static and dynamic loads, stress concentrations, and fatigue. Prerequisites: MAE 364 and (MAE 370 or CE 370).

MAE 468 - ELEMENTS OF SPACECRAFT DESIGN
Semester Hours: 3
Fundamentals of spacecraft engineering and design. Topics include: orbital mechanics, space environment, attitude determination and control, communications, space structures, thermal control, propulsion and power, and systems and mission design. Prerequisites: MAE 371 and (MAE 272 or CE 272).

MAE 471 - ADV AEROSPACE STR & MTRLRS
Semester Hours: 3
Composite materials and applications in aerospace structures including: material types and properties and fabrication techniques, micromechanics, constitutive behavior, and classical laminated plate theory. Introduction to failure concepts, sandwich panels and finite element modeling of 1-and 2-D aerospace structures. Prerequisites: MAE 311 and MAE 371.

MAE 474 - APP MECHANICS OF SOLIDS
Semester Hours: 3
Stresses and strains at a point, theories of failures, stress concentration factors, thick-walled cylinders, torsion of noncircular members, curved beams, unsymmetrical bending, and shear center. Prerequisites: MAE 370 or CE 370.

MAE 477 - EXP TECH SOLID MECHANICS
Semester Hours: 3
Experimental methods to determine stress, strain, displacement, velocity, and acceleration in various media. Theory and laboratory applications of electrical resistance strain gages, brittle coatings, and photo elasticity. Application of transducers and experimental analysis of engineering systems. Prerequisites: MAE 370 or CE 370.

MAE 480 - AIRCRAFT STABILITY & CONTROL
Semester Hours: 3
The stability and control of aerodynamic vehicles. The design of aircraft to obtain good flying characteristics. The complete governing equations and analog solutions of linearized equations. Prerequisites: MAE 430 and MAE 488.
MAE 488 - ANALY ENGINEERING SYSTEM
Semester Hours: 3

Development of mathematical engineering models of physical systems including: mechanical, electrical, and fluid systems and combined systems. Determination of the dynamic response of physical systems. Prerequisites: EE 213, MAE 284 and (MAE 272 or CE 272).

MAE 489 - COMPUTER AIDED ENGR
Semester Hours: 3

Analysis of design of structural, thermal, and dynamical systems using finite element and finite difference computer programs. Practical guidelines for discrete modeling; analysis of modeling errors. Comparison of exact and approximate solutions to boundary value problems. Prerequisites: MAE 370 or CE 370 and MAE 284 w/concurrency.

MAE 490 - INTRO TO ENGINEERING DESIGN
Semester Hours: 3

Application of basic design principles and concepts. Design methodology, decision making, creativity, product liability, human factors, patents, ethics, technical writing, and others. Team design projects. Prerequisites: ISE 321, MAE 310, MAE 311, MAE 341, MAE 370, (MAE 364 & MAE 378 OR MAE 200 & MAE 371).

MAE 491 - PRODUCT REALIZATION
Semester Hours: 3

Senior Capstone Course Option. Students work on a team design project with a focus on the fabrication, assembly, testing, refinement, and delivery of a product developed according to customer requirements. Oral presentation and written detailed documentation of the product will also be completed. Prerequisites: MAE 490.

MAE 492 - MISSION DESIGN & DEVELOPMENT
Semester Hours: 3

Senior Capstone Course Option. Students work design teams to develop missions of interest to NASA, DoD and industry. Includes defining the mission architecture and associated vehicles and components required to meet the customer requirements. Prerequisites: MAE 490.

MAE 493 - ROCKET DESIGN
Semester Hours: 3

Senior Capstone Course Option. Design, build, test and fly a high-powered rocket with a payload to a specified altitude. Students work on multi-disciplinary teams to design payloads, avionics, recovery systems, structures and other sub-systems and then integrate them into the final vehicle. Prerequisites: MAE 490.

MAE 494 - AIRCRAFT DESIGN
Semester Hours: 3

Senior Capstone Course Option. Design, build, and test an unmanned aircraft to meet specified requirements. Students work on multi-disciplinary teams. Systems engineering aspects including simulation, fabrication, integration, scheduling and cost estimation are also emphasized.

MAE 495 - SEL TOPICS: MECH & AEROSPACE EG
Semester Hours: 1-4

MAE 496 - IND STUDY: MECH & AEROSPACE EG
Semester Hours: 1-4

Special independent project in a topic of Mechanical or Aerospace Engineering. Must work with a MAE faculty member with project approved by MAE department chair.

MAE 499 - UNDERGRADUATE THESIS
Semester Hours: 3

Required for students completing an Honors Program Bachelors Thesis. Senior standing and permission of thesis advisor required.

Aerospace Engineering, BSAE

To obtain a Bachelor of Science degree in Aerospace Engineering, students are required to complete the general education requirements for engineering majors and the following courses:

MAE 371  AEROSPACE STRUCTURES 3
MAE 440  ROCKET PROPULSION I (or) 3
MAE 441  AIRBREATHING PROPULSION 3
MAE 468  ELEMENTS OF SPACECRAFT DESIGN 3
MAE 471  ADV AEROSPACE STR & MTRLS 3
MAE 480  AIRCRAFT STABILITY & CONTROL 3
MAE 488  ANALY ENGINEERING SYSTEM 3
MAE 490  INTRO TO ENGINEERING DESIGN 3

Select one of the following:

MAE 491  PRODUCT REALIZATION 3
MAE 492  MISSION DESIGN & DEVELOPMNT 3
MAE 493  ROCKET DESIGN 3
MAE 494  AIRCRAFT DESIGN 3

**Aerospace Technical Electives**

Select two 3-semester hour technical electives from the College of Engineering or the College of Science at the 300-level or higher. 6

AE students may not take both MA 385 and ISE 390 for credit. AE students may not take MAE 310 for credit.

**Total Semester Hours** 128

1. Students must take one literature and one history course. Students must also take either a second literature or history course to complete a sequence. (EH 207 + EH 208, EH 209 + EH 210, HY 103 + HY 104, or HY 221 + HY 222)
2. Based on Math placement (http://www.uah.edu/science/departments/math/undergraduate-students/placement), prerequisite (MA 112 and/or MA 113) Mathematics courses may be required.
3. For choices see the World Languages and Culture (p. 210) department.

**Honors College**

Dr. William S. Wilkerson, Dean  
104 Frank Franz Hall  
Telephone: 256.824.6450
The Honors College at the University of Alabama in Huntsville provides academically talented undergraduate students with an elite college experience at a large research university. It offers enriched coursework, research opportunities, and a community of like-minded students.

The Honors College serves students in all the colleges. While students are encouraged to join the Honors College at the beginning of their freshman year to gain full advantage of its benefits and enhanced curriculum, the College welcomes qualified transfer students. All interested students must apply through the Honors College website: uah.edu/honors. While there is no strict minimum GPA and ACT/SAT score, first-time Freshmen Honors Students have an average ACT over 28 and a high school GPA over 3.5. Current and transfer students must have a college GPA of 3.25 or higher and must complete the full application.

The Honors College grants either an Honors Diploma or an Honors Certificate, depending on the number of Honors Credits earned. The Diploma and the Certificate are in the student’s chosen field or fields and appear on both the physical Diploma and the official transcript. The Honors Diploma or the Certificate add little extra coursework to the degree; both are mostly accomplished by taking Honors sections of courses students would already take. Please see the tabs above for more information about the requirements for the Diploma and the Certificate.

Whether students seek the Honors Diploma or the Certificate, they must complete an Honors Capstone Project or Thesis. This is independent work students typically do in their major field. It is done under close faculty supervision, and it can be either a traditional research thesis or a project, such as a computer application, an art installation, or a collection of stories. More information about the thesis can be found at uah.edu/honors.

Honors courses come in three kinds:

1. Self-standing Honors Sections, which replace courses students would already take. These are smaller, more intensive, but not more work. They are designated with an “H” (“Philosophy 101 H” vs. “Philosophy 101”).

2. Honors contract courses: any course can be made an Honors Course if the instructor and the student agree on a way to enrich the course and obtain the Honors Dean’s signature on the contract. The forms for this contract can be found on the Honors College website or in Honors College office.

3. Courses offered by the Honors College. These can be special, interdisciplinary seminars, such as “The Art of Writing Science” or “Poverty in the U.S.,” or they can take the form of the Honors Internship or Honors Thesis course. See the tab above to see Honors offerings for this academic year.

Honors Diploma Requirements

The following summarizes the requirements for receiving the Honors Diploma. For college specific information, refer to the Honors Advisement webpage or the Honors Student Handbook at uah.edu/honors.

- 24 semester hours of Honors course credit
- Satisfactory completion of the Honors Capstone Project or Thesis
- An overall 3.25 GPA at graduation
- Required courses:
  - EH 105: Honors English Seminar - 3 semester hours
  - 300/400 level Honors courses – 6 semester hours
  - HON 499 (3 semester hours in HON or your department)
- Honors courses may come in the following categories:
  - Honors sections of regular courses (ex: PHL 101)
  - Specially designed courses just for Honors (ex: EH 209/PH 210)
  - Honors lab sections including lecture credit (ex: PH 111/PH 114)
  - Honors Interdisciplinary Seminars
  - Honors Contracts
  - Honors Internships

Honors Certificate Requirements

Students who want to participate in the Honors College but who may not be able to complete the entire 24 honors credit hour requirement have the choice to pursue the Honors Certificate of Completion of Upper-Level Requirements. Please talk to the Honors Office first; you may still be able to complete the full Honors Diploma. Requirements for the Certificate are as follows:

- 12 semester hours of Honors courses
- Satisfactory completion of the Honors Capstone Project or Thesis
- An overall 3.25 GPA at graduation
Additional requirements involve:

- 3 hours from any 300 or 400 level course (or Honors contract)

Honors Courses

HON 101 - INTRO TO HONORS RESEARCH
Semester Hour: 1
Introduction to research methods and information literacy for new Honors Students. Helps students transition to research and coursework commensurate with Honors College standards.

HON 301 - HONORS SPECIAL SEMINAR
Semester Hour: 1
Intensive, discussion-based, interdisciplinary exploration of contemporary topics in the sciences, social sciences, humanities, and engineering. Topics will be decided by instructors and will vary by term. May be team taught. Open only to Honors Students.

HON 399 - HONORS INTERDISCIPLINARY SEM
Semester Hours: 3
Interdisciplinary study of a selected topic. The seminar will facilitate serious appraisal of an issue that crosses disciplinary boundaries and that can be explored using different scholarly methodologies. Prerequisites: Admission to the Honors College.

HON 400 - HONORS INTERNSHIP
Semester Hours: 1-6
Active involvement in a business enterprise, professional organization, or government agency that has particular interest and relevance to the student's course of study. The outside entity must identify a mentor who will keep regular contact with the student. Requires the student to maintain a log of activities and produce a semester-end report. Course grade will be given on a satisfactory (S)/unsatisfactory (U) basis. Approval of the Honors College Dean. Prerequisites: Admission to the Honors College.

HON 499 - HONORS THESIS
Semester Hours: 1-3
Individual research under direction of a faculty advisor. May be taken for up to 6 semester hours of credit. Prerequisites: Admission to the Honors College.

Honors Sections offered in the following courses:

ARS 160 - DRAWING: FOUNDATIONS
Semester Hours: 3
Introduction to principles, materials, and techniques of drawing. Observational drawing and exercises teach students visual skills and introduce aesthetics and artistic expression. Class covers visual and manual skills, problem solving, critical thinking, and the tools and materials artists use.

BYS 119L - LABORATORY
Semester Hours: 0
Laboratory exercised to introduce students to accurate measurement techniques, observation, and the development of relevant hypotheses. Several formal lab reports are required as an introduction to scientific writing.

BYS 120L - ORGANISMAL BIOLOGY LAB
Semester Hours: 0
Introduction to the basic concepts of natural selection, population biology, and the biodiversity of animals and plants. Several formal lab reports are required as a further introduction to scientific writing, along with a lab practical on the biodiversity of animals and plants.

BYS 499 - UNGRAD HONORS RES & THESIS
Semester Hours: 2-4
Individual investigations into biological problems under direct supervision of instructor. For honors students majoring in the biological sciences. Prerequisites: Approval of instructor, chair, and director of honors program; Senior Standing.

CM 113 - Intro to Rhetorical Communication
Semester Hours: 3
Develops public speaking skills through an examination of rhetorical theory, training, and practice. Includes informative, persuasive, and other forms of speeches to prepare students for oral presentations in college and post-college ("real world") settings.
ECN 142 - PRINC OF MACROECONOMICS  
Semester Hours: 3  
How does our economy function? Why do we have periods of unemployment and inflation and what can we do about it? Economics is a way of thinking about the world, how to identify and focus on fundamental issues so we can understand our economy and how monetary and fiscal policy affects our lives. Prerequisite: any 100 level or 200 level MA course.

ECN 143 - PRINC OF MICROECONOMICS  
Semester Hours: 3  
How do markets coordinate our unlimited wants with our limited capacity to produce? We study producer and consumer choice in a variety of market structures, the social welfare implications inherent in market systems and policies designed to correct those market failures. Prerequisite: Any 100 level or 200 level MA course.

EE 213 - ELECTRICAL CIRCUIT ANALYSIS I  
Semester Hours: 3  
Basic concepts of DC and AC circuit theory and analysis. Includes both DC and AC power. Prerequisites: MA 201 and PH 112 w/concurrency.

EH 105 - HONORS ENGLISH SEMINAR  
Semester Hours: 3  
Interpretive and comparative readings in texts of enduring intellectual, esthetic, and ethical importance; critical and analytic writing and research projects. Grading Scale: A, B, C, D, F. Minimum grade of C- required to advance to 200-level English classes. Prerequisites: Formal admission to the University Honors Program.

EH 209 - HONORS SEM READINGS LIT/CUL I  
Semester Hours: 3  
Critical analysis of texts from ancient times through the Age of Discovery. The course offers an in-depth examination of important works and their cultural contexts in a seminar format. Prerequisite: EH 101/101S and EH 102 OR EH 105.

EH 210 - HONORS SEM READINGS LIT/CUL 2  
Semester Hours: 3  
Critical analysis of texts from the Age of Discovery through the present. The course offers an in-depth examination of important works and their cultural contexts in a seminar format. Prerequisite: EH 101/101S and EH 102 OR EH 105.

EH 301 - TECHNICAL WRITING  
Semester Hours: 3  
Practical writing, especially technical or scientific reports and proposals, with emphasis on organization, research, and presentation. Qualifies as elective in English major. Does not count toward English minor except Cognate Studies in Technical Writing. Junior Standing. Prerequisite: EH 102 or EH 105.

ESS 103L - LABORATORY  
Semester Hours: 0  

FYE 101 - CHARGER SUCCESS  
Semester Hour: 1  
The purpose of Charger Success 101 is to help new students make a successful transition to the University of Alabama in Huntsville, both inside and outside the classroom. This course aims to foster a sense of belonging, promote engagement in the academic life of the university, and articulate to students the expectations of the University. In addition, the course will assist students to develop and apply critical thinking skills, as well as to help students to clarify their academic goals and eventual career direction. This course is mandatory for all freshman students.

HY 103 - WORLD HISTORY TO 1500  
Semester Hours: 3  
Explore the historical development of peoples and cultures from their beginnings to 1500. Trace cross-cultural interactions among societies, states, and economies of Asia, Europe, Africa, the Americas and Oceania.

HY 104 - WORLD HISTORY SINCE 1500  
Semester Hours: 3  
Explore global interdependence from the period of transoceanic exploration to the present. Trace cross-cultural interactions among societies, states, and economies of Asia, Europe, Africa, the Americas, and Oceania.

</tbody>
</table>
PH 112 - GEN PHYSICS W/CALC II  
Semester Hours: 3-4  
Continuation of PH 111. Heat and thermodynamics, basic electricity, electric and magnetic fields. Offered all terms. Prerequisite: MA 172, PH 111, PH 114. Corequisite: PH 115.  

PH 115 - GENERAL PHYSICS LAB II  
Semester Hour: 1  
Laboratory instruction in support of material covered in PH 112. Offered all terms. Corequisite: PH 112.  

SOC 100 - INTRO TO SOCIOLOGY  
Semester Hours: 3  
An introduction to the critical and scientific study of society, culture, social institutions and social change. Illuminates the social and cultural context of our lives and is useful for exploring contemporary social issues, problems and change in society.  

Nursing

1610 Ben Graves Drive  
Telephone: 256.824.6345  
Email: nursing@uah.edu  

Dean:  
Marsha Howell Adams, PhD, RN, CNE, ANEF, FAAN, Professor  

Mission  
Educate and inspire individuals to become nurse leaders who act with integrity, discover through scientific methods, and advocate for the best health care experiences of people and communities in a complex and evolving health care environment. In collaboration with our university colleagues and community partners, we are committed to excellence through our teaching, scholarship, practice, and service.  

Vision  
To have a global reputation for transforming health care through innovative nursing practice, education, and research.  

Core Values  
- Integrity - Resolutely adhering to moral, ethical, and professional standards.  
- Inspiration - Encouraging, role-modeling, and mentoring others to pursue their professional dreams.  
- Caring - Acting with compassion and respecting all persons by embracing cultural humility, diversity, and person-centered care.  
- Excellence - Pursuing and achieving goals of the highest caliber.  
- Wellness - Maximizing well-being in different states of health.  

Degrees and Certificates Offered  
The College of Nursing offers the Bachelor of Science in Nursing (BSN), Master of Science in Nursing (MSN), and Doctor of Nursing Practice (DNP) degrees. The College of Nursing also offers a Post-Master's Family Nurse Practitioner Certificate Program, and a Graduate Certificate in Nursing Education. The bachelor's program includes a track for students who are completing their initial nursing education (pre-licensure) and a track for students currently licensed as registered nurses (RN-BSN).  

Accreditation  
The Bachelor of Science in Nursing program offered by the College of Nursing is accredited by the Commission on Collegiate Nursing Education (CCNE). The undergraduate program is also approved by the Alabama Board of Nursing.  

Bachelor of Science in Nursing  
The College of Nursing offers the Bachelor of Science in Nursing (BSN) degree. The BSN degree includes a track for students who are completing their initial nursing education (pre-licensure) and a track for students currently licensed as registered nurses (RN-BSN).  

The undergraduate pre-licensure program prepares graduates to assume entry-level positions in a variety of health care settings. The program is divided into two components: the lower and upper divisions. Lower division general studies (prerequisite) courses provide a broad background in general education and form the foundation for the professional nursing component of the program. Upper division courses provide the theoretical and practical basis for nursing practice in the complex U.S. health care system. In addition to focusing on essentials of nursing in the hospital including the intensive care area, the curriculum also emphasizes community and primary care. Opportunities to provide care to diverse clients are provided. Use of technology,
including simulation and telehealth is integrated throughout the program. The program prepares graduates for professional positions immediately after graduation and provides a firm foundation for graduate study. Students who earn the BSN degree are eligible to sit for the National Council Licensure Examination for Registered Nurses (NCLEX-RN). The guiding framework for the BSN Program is the *The Essentials of Baccalaureate Education for Professional Nursing Practice.*

The RN-BSN program is specifically designed for Registered Nurses with a diploma or associates degree and is offered online. Students who enroll in the full-time option may complete the nursing component of the program in one year. Part-time options are available as well. The college awards up to 42 semester hours of validated nursing credit to each registered nurse upon successful completion of the first semester.

A RN-MSN option is available for students who wish to continue to graduate education. More detailed information about opportunities for accelerated studies may be obtained from the College of Nursing Office of Graduate Programs 256.824.6669.

**Program Objectives**

Upon completion of the BSN program, the graduate will be able to:

1. Practice nursing as a generalist using the nursing process and clinical reasoning based on ethical, legal, and professional standards and principles.
2. Translate research and utilize evidence based practice to promote quality healthcare across diverse, vulnerable populations, and cultures.
3. Examine healthcare policy, care delivery models, and organizational systems for current and future healthcare needs within a clinical setting.
4. Demonstrate characteristics of leadership and accountability to promote effective interprofessional collaboration in healthcare systems.
5. Display proficiency in the use of patient care technologies, healthcare information systems, and communication devices to support safe and competent nursing practice.
6. Engage in lifelong learning and participate in professional activities that enhance the nursing profession.
7. Recognize the nurse's role in bio-immunogenetic technology to promote safe and competent nursing practice.

**Advising and Assistance**

The focus of advising in the College of Nursing is to assist students to successfully make progress toward their educational objectives. The Bachelor of Science in Nursing (BSN) Program is divided into two components: the lower division and the upper division. All students taking classes at UAH in the lower division (100 and 200 level classes), those seeking admission to the upper division (UAH or transfer students), and Registered Nurses (RNs) are advised in the College of Nursing Office of Undergraduate Programs. Advisors in the Nursing Office of Undergraduate Programs assist students to define and develop realistic educational and career plans. In addition, they monitor progress toward educational and career goals, approve all designated educational transactions such as schedules, drop/adds, withdrawals, and they maintain advising records for each student. Advisors also refer students to other campus resources when needed.

Once students are admitted to BSN Program and enroll in upper division nursing courses, they meet with faculty who will provide guidance for future academic success, educational endeavors, and employment opportunities. Group advising occurs each semester in upper division for general academic progression.

All students use the the Degree Evaluation tool (CAPP) in Banner Self Service to track their progress toward meeting the requirements of the program of study (POS).

**Majors in Nursing**

- Nursing, BSN (p. 442)
- Nursing, RN-BSN (p. 449)

**NUR 000 - NURSING-CREDIT BY VALIDATION**

Semester Hours: 4-40

**NUR 001 - NURSING TESTING BLOCK**

Semester Hours: 0

Nursing Testing Block is a common block of time for students in different cohorts to take their examinations.

**NUR 102 - MULTIDIMENSIONS OF NURSING**

Semester Hours: 3

This course is designed for the student who has declared nursing as a major. Emphasis will be placed on the role of professional nurses working with clients and other health care professionals. The evolution of nursing as a profession will be examined and the student introduced to the health care delivery system.
NUR 201 - MULTIDIM ASPECTS HL CAREER OPT
Semester Hours: 3

This course is designed for the student who wishes to explore a career in the health care professions as a potential career path. Particular emphasis will be placed on the role of health care providers working in partnership with clients to promote health states and prevent disease.

NUR 202 - HEALTHY LIVING LIFESPAN
Semester Hours: 3

This class will focus on health and wellness across the lifespan, with an emphasis on promoting healthy living and preventing illness. It is designed to develop health literacy and to identify ways to put healthy ideas into practice. Diverse perceptions and beliefs related to health are explored and strategies to optimize health are presented.

NUR 220 - HEALTH PROMOTION NUR MAJORS
Semester Hours: 3

The focus of this class is on health and high-level wellness across the lifespan, with an emphasis on promoting healthy living and preventing illness. Diverse perceptions and beliefs related to health and wellness are explored, and ways to put healthy ideas into practice are applied. Medical terminology to improve healthcare communication is incorporated into the course.

NUR 301 - CONCEPTS IN NURSING
Semester Hours: 3

This course will focus on development using concepts and theories basic to the art and science of nursing. Students are introduced to the concepts of communication, teaching/learning, clinical decision making, ethical, legal, nursing history, and philosophy for knowledge development of the discipline. Prerequisites with concurrency: NUR 303, 304, 309, and 311.

NUR 302 - NURSING & HEALTH PROMOTION
Semester Hours: 3

Focus on nursing, health, and wellness across the life span. Emphasis on health promotion and prevention of illness. Strategies to optimize health are presented. Perceptions and beliefs related to health, illness, disease, and cultural diversity are explored as are mechanisms for promoting health through politics and the health care delivery system.

NUR 303 - HEALTH ASSESSMENT
Semester Hours: 3

Focus on holistic assessment of culturally diverse clients across the life span. Communication & psychomotor skills are developed in clinical laboratory settings with an emphasis on normal findings and health promotion.

NUR 303L - CLINICAL
Semester Hours: 0

NUR 304 - APP PATHOPHYSIOLOGY LIFESPAN
Semester Hours: 3

The course is designed to help the student build on previous knowledge of anatomy and physiology and microbiology. Adaptations and alterations in health status throughout the lifespan are emphasized. Students explore the implications of lifestyle to pathology within a nursing framework, and learn to relate normal body functioning to the pathophysiological changes that occur in, and as a result of disease.

NUR 305 - NUR PROC MENTAL HLTH/ILLNESS
Semester Hours: 4

Nursing process in the promotion of psychosocial integrity. Emphasis is on the therapeutic use of self through providing interventions for individuals and groups in a variety of settings. Prerequisites: NUR 310 and NUR 312 and NUR 321.

NUR 305L - CLINICAL
Semester Hours: 0

NUR 307 - INQRY TO EVIDNC BASED NURS PRC
Semester Hours: 3

This course identifies various modes of inquiry and critical analysis used in the development of nursing science. Explore evidence based models to examine the evidence from a variety of research designs used to formulate nursing decisions. Emphasis is on identifying and synthesizing the best evidence to solve complex health problems in order to deliver safe, competent nursing care to diverse populations. Prerequisites: NUR 310 and NUR 312 and NUR 321.
NUR 308 - NURS CARE ADULTS ALTER HLTH I
Semester Hours: 9

This course focuses on the application of the nursing process in the collaborative nursing management of adult clients experiencing simple to complex physiological health alterations. Clinical experiences provide opportunities for beginning to intermediate clinical reasoning in the acute care environment. The embodiment of professionalism and professional values are emphasized. Prerequisites: NUR 310 and NUR 312 and NUR 321.

NUR 308L - CLINICAL
Semester Hours: 0

NUR 309 - CLINICAL INFORMATICS
Semester Hours: 2

This course is designed to introduce clinical informatics as a tool to improve healthcare systems through safe, ethical, and evidence-based practice. Advances in technology, data management, and decision support software are explored. Competencies in basic computer skills are also included in the course to improve information literacy. Prerequisites with concurrency: NUR 301, 303, 304, and 311.

NUR 310 - PROFESSIONAL PRACTICE NURS I
Semester Hours: 6

This course will begin the process of learning foundational nursing skills to be used in nursing practice. Psychomotor nursing skills needed to assist individuals meet basic human needs will be taught with expectation the student will demonstrate competency in performing skills. Laboratory and clinical experiences are included. Prerequisites: NUR 301, NUR 303, NUR 304, NUR 309, NUR 311.

NUR 310L - CLINICAL
Semester Hours: 0

NUR 311 - CLINICAL CALCULATIONS
Semester Hour: 1

In this course, students will learn to accurately calculate medication dosages. Testing in this course will establish minimal medication calculation proficiency required to progress to the second semester of the nursing program. Prerequisites with concurrency: NUR 301, 303, 304, and 309.

NUR 312 - GEROMI NURSING CARE
Semester Hours: 3

This course is designed to focus on current health care issues affecting the older adult. Physical, psychological, sociocultural, and spiritual aspects of aging are examined within the context of the family and society. The course applies the nursing process with emphasis on optimal health for the older adult. Prerequisites: NUR 301, 303, 304, 309, and 311. Prerequisite with concurrency: NUR 310 and 321.

NUR 312L - CLINICAL
Semester Hours: 0

This is the clinical component of the Gerontological Nursing Care course. The course will focus on current health care issues affecting the older adult. Physical, psychological, sociocultural, and spiritual aspects of aging are examined within the context of the family and society. The course applies the nursing process with emphasis on optimal health for the older adult.

NUR 321 - PHARMACOLOGY IN NURS
Semester Hours: 3

This course comprises pharmacological concepts incorporating an overview of historical and current issues in drug therapy. Pharmacotherapeutics, pharmacodynamics, pharmacokinetics, contraindications and precautions for prototype drugs for multiple body systems are presented. Major emphasis is placed on nursing management practices using nursing process as well as the nurses’ role in optimizing reliable medication administration. Prerequisites: NUR 301, 303, 304, 309, 311.

NUR 336 - SPIRITUALITY IN NURSING
Semester Hours: 3

Spirituality aspects of client, family and community care are the focus of this course. The course reviews the history of spirituality in nursing care. The nurses’ role in meeting the spiritual needs of clients throughout the lifespan is explored.

NUR 339 - INFO MGMT IN HEALTHCARE
Semester Hours: 3

Provides experience in the use of basic and versatile software programs which have wide applicability within nursing practice and within the students’ educational process. Elective, open to all university students. Prerequisite: NUR 410.
NUR 390 - INDEPENDENT STUDY  
Semester Hours: 1-4  
Individualized independent study of specific nursing problem under sponsorship of a nursing faculty member with special preparation in the field. Elective.

NUR 400 - SPECIAL TOPICS  
Semester Hours: 3

NUR 401 - NURS CARE ADULTS ALTER HLTH II  
Semester Hours: 4  
This course explores the evidence-based collaborative nursing management of clients experiencing complex physiological health alterations. Clinical experiences will provide opportunities for advanced clinical reasoning in the acute and critical care environments. Prerequisites: NUR 305 and NUR 307 and NUR 308.

NUR 401L - CLINICAL  
Semester Hours: 0

NUR 402 - POPULATION BASED HLTH CARE  
Semester Hours: 3  
Promotion of health, prevention of disease in at-risk aggregate populations. Examines complex problems and health care policy. Open to all university students.

NUR 402L - CLINICAL EXPERIENCE  
Semester Hours: 0

NUR 403 - FAM CENTER/PARENT-INFANT NUR  
Semester Hours: 4  
This course explores internal and external factors, which impact the health of the family during the antepartal, intrapartal, postpartal and neonatal periods of childbearing. Emphasis is placed on nursing care of these clients, normal physiology, pathophysiology, psychological and sociocultural needs, and risk identification and reduction. Prerequisites: NUR 305 and NUR 307 and NUR 308 and NUR 321.

NUR 403L - CLINICAL  
Semester Hours: 0

NUR 404 - FAMILY-CENTER NUR CARE CHILDRE  
Semester Hours: 4  
This course is designed to introduce the concept of family centered pediatric care that is developmentally appropriate for a culturally diverse population. Clinical experiences in selected agencies. Prerequisites: NUR 301 and NUR 307 and NUR 308 and NUR 321.

NUR 404L - CLINICAL  
Semester Hours: 0

NUR 405 - COMMUNITY HEALTH NURS  
Semester Hours: 4  
The course explores the community as client and teaches concepts and knowledge necessary to promote the health of the public and communities. Emphasis is on community health theory, individual, family, and community assessment, aspects of epidemiology, program planning and evaluation, trends and issues, legislation, ethics, research, health care economics and disaster management. Prerequisites: NUR 401 and NUR 403 and NUR 404.

NUR 405L - CLINICAL EXPERIENCE  
Semester Hours: 0

NUR 406 - LEADERSHIP & MGMT IN NURSING  
Semester Hours: 3  
Describes and analyzes selected theories of management and leadership in health care systems with focus on broadening students' knowledge base and skills as they relate to entry-level nursing management. Organization structures and dynamics as well as pertinent issues and trends are addressed.

NUR 407 - PROF PRACTICE IN NURSING II  
Semester Hours: 8  
The focus of this course is the leadership and management functions of professional nursing. Essential skills are communication, interprofessional collaboration, delegation, coordination, and the application of evidence-based practice models. Clinical experiences will focus on performance of the professional nurse role in a concentrated practicum. Prerequisites: NUR 401 and NUR 403 and NUR 404.
NUR 407L - CLINICAL EXPERIENCE  
Semester Hours: 0

NUR 408 - PROF PRAC IN NURS III SEMINAR  
Semester Hours: 2

The purpose of this class is to facilitate the synthesis of knowledge, the application of critical thinking to decisions about patient care, and to ensure safe and competent nursing practice. Test-taking skills and time management concepts will be applied in preparation of the NCLEX-RN licensure exam. Prerequisites: NUR 407.

NUR 410 - TRANSITION INTO PROFESS ROLES  
Semester Hours: 3

For the registered nurse student, designed to synthesize previous experiences in nursing with selected theoretical knowledge. Examines the multidimensional role of the professional nurse in health systems. Through analysis of paradigm case(s) and development of a professional portfolio, the student evaluates his/her professional practice and develops goals designed to guide learning and professional development. Philosophical, social, political, legal, and ethical issues inherent in the practice of professional nursing in health systems. Thirty-two hours of nursing credit for prior learning will be conferred upon successful completion of this transition course.

NUR 411 - THEORETICAL APPL IN PROF NURS  
Semester Hours: 3

Designed for registered nurse students to synthesize knowledge gained from previous nursing experience when analyzing theories, issues and concepts that influence professional nursing practice. Theoretical concepts, which influence critical thinking, are applied to the nursing process. Analysis of normal processes and professional nursing responses to alterations in life processes across the lifespan are examined. Caring for diverse clients is emphasized. Ethical and legal issues which impact the care for client systems are examined when synthesizing theoretical and nursing practice issues.

NUR 412 - CARE FOR AGGREGATES, FAM & POP  
Semester Hours: 7

Designed for registered nurse students to apply theoretical concepts related to primary, secondary, and tertiary care of aggregates. Emphasis is on application of the nursing process in promoting community health for at-risk aggregate populations and is delivered in an on-line format. Course objectives are designed to meet the individual learning needs of the student in delivering and managing care of selected families with emphasis on the aggregate. Prerequisites: NUR 339 and NUR 410.

NUR 412L - CLINICAL EXPERIENCE  
Semester Hours: 0

NUR 413 - NUR LEADERSHIP PROF PRACT  
Semester Hours: 5

4 Course/1 Clinical. Designed for registered nurse students, this course focuses on the development and enhancement of leadership skills for the professional nurse in a variety of culturally diverse health care systems. Exploration of theories related to organizational models, change, and critical thinking; leadership in directing and controlling care; ethical, legal, and political influences on leadership; and enhancing self-awareness of leadership styles. Students are provided opportunities to apply nursing leadership concepts through a case study experience and in a clinical practice setting by conducting a clinical project. Prerequisite: NUR 410.

NUR 414 - HTH ASSESS PRACTICING PROF NUR  
Semester Hours: 3

Lecture/Lab 2 lecture/1 lab for the registered nurse student, the focus is on holistic health assessment of culturally diverse clients across the lifespan. Communication and psychomotor skills are developed in clinical laboratory settings.

NUR 414L - CLINICAL  
Semester Hours: 0

NUR 415 - HONORS DIRECTED RESEARCH  
Semester Hours: 2

This course allows for implementation of the student's research proposal as developed in the Honors section of NUR 307. The focus is on data collection and preliminary data analysis. The seminar format will provide students access to expert researchers.

NUR 416 - HONORS RESEARCH SEMINAR  
Semester Hour: 1

The focus of this seminar is completion of final research report, as begun in NUR 307 and NUR 415.
NUR 417 - NURS CARE VUL POP  
Semester Hours: 4  
This course investigates factors related to increased vulnerability arising from threats to well-being for selected populations. Factors will include individual characteristics and conditions (such as profound and chronic illnesses, genetic factors, health behaviors), those attributable to group identify (such as age or socioeconomic status), and those due to environmental exposures (such as high risk occupations, exposure to toxins and pollution, and occurrences of nature). Students will examine strategies aimed at risk reduction and improvement in disparities in outcomes. Relevant professional and agency/organizational resources are explored. Prerequisite: NUR 410.

NUR 418 - GLOBAL HEALTH: INTERN'L STUDY  
Semester Hours: 3  
This course will focus on global health concepts and issues, and on selected international health care systems in comparison to the U.S. health care system. These systems will be examined and analyzed in relation to economic, social, cultural, policy, and environmental influences. Culmination of the course will center on international experiences with health care facilities, historical and cultural influences, and policy making bodies in another country. This course in an accepted elective in the nursing program (not all electives are offered each year).

NUR 419 - SCHOLRY INQUIRY IN NURSING PRA  
Semester Hours: 3  
Focuses on the various modes of inquiry used in the development of nursing science. Emphasis on the critical examination of nursing research including methodologies, utilization, and theoretical bases.

NUR 420 - EVIDENCE BASED NURS PRACTICE  
Semester Hours: 3  
This course focuses on developing the nurse to be an “evidence user” for the purpose of improving healthcare outcomes. Emphasis is on the critical analysis of evidence to be used in formulating nursing decisions and the design of client care guidelines. Structured for the registered nurse student.

NUR 421 - AC CARE NURS RNBSN  
Semester Hours: 3  
The nursing process is applied to clients experiencing physiological health alterations requiring complex and collaborative nursing strategies and appropriate resource management. Application experiences are focused in the acute care environment. Prerequisite: NUR 410.

NUR 422 - COMMUNITIY HEALTH FOR PRCTNG RN  
Semester Hours: 6  
4 course/1 clinical. This course is designed for registered nurses to apply theoretical concepts related to primary, secondary, and tertiary care of families and aggregates. Emphasis is on application of the nursing process in promoting community health for at-risk populations. Application activities are designed to meet individual learning needs of the registered nurse student in delivering and managing care of selected families with emphasis on the aggregate. Prerequisite: NUR 410.

NUR 423 - EVID BASED RN  
Semester Hours: 3  
This course fosters the application of the best clinical evidence into practice in order to promote improvement in healthcare experiences and patient outcomes. Various modes of scientific inquiry used in the development of nursing science are incorporated into a survey of research techniques, methodologies, and ethical concerns. This will enable students to select and evaluate appropriate information relevant to evidence based practice. Students will develop skills in the use of electronic databases to facilitate acquisition of current information. Emphasis is placed on the critical analysis of evidence to be used in formulating nursing decisions and the design of client care guidelines. Prerequisite: NUR 410.

NUR 426 - SPACE LIFE SCIENCES  
Semester Hours: 3  
Theories and concepts of contemporary issues in health and nursing related to space life sciences.

NUR 427 - INTRODUCTION TO FORENSICS  
Semester Hours: 3  
This course provides an overview of the field of forensic nursing. Concepts of care for victims and family members of violence, abuse, traumatic accidents, and criminal activity are discussed. Current healthcare practices and medical/legal/ethical issues are reviewed. Elective, open to all university students.

NUR 428 - GERONTOLOGICAL NURSING  
Semester Hours: 3  
Nursing care of older adults in multiple settings. Issues and trends are incorporated.
NUR 430 - HLTH CARE WKFR:ISS/LDRSH STRAT
Semester Hours: 3
Description and analysis of contemporary issues regarding the health care workforce. Particular focus will be placed on the multifaceted nature of health care workforce shortages. Various models for analysis of workforce issues will be used and strategies being used will be examined. An evaluation of the nurse leader role in creating positive work environments and implementing solutions concludes the student experience.

NUR 434 - PALLIATIVE CARE
Semester Hours: 3
Palliative care is when there is no longer a medical treatment or cure for a physical problem. This palliative care course includes meeting the physical, emotional, social cultural and spiritual needs of individuals and their families. A course focus will be coping, grief, bereavement pain relief and managing living implications for individuals with life-threatening illnesses. There will be recognition of the importance of individuality, vulnerability, and resilience in the quality of living during the dying process.

NUR 437 - NURSING AS A POLITICAL FORCE
Semester Hours: 3
Overview of the legislative process and legislation relative to health care issues. The role of the professional nurse in the political climate is explored. Elective, open to all university students.

NUR 439 - NURSING MEDICAL MISSIONS
Semester Hours: 3
This course will focus on global health and humanitarian concepts and issues, and the nursing care needed to impact those issues. These issues will be examined and analyzed in relation to the mission country's economic, social, cultural, policy and environmental influences. Culmination of the course will center on international experiences with supervised nursing care for a medical mission in another country. This course is an accepted elective in the Nursing program.

Nursing, BSN

Programs of Study for Lower Division Courses for UAH and Transfer Students
Students completing the lower division general studies (prerequisite courses) of the program at UAH should follow the program of study outlined below. All transfer students seeking admission to UAH should read and follow the Admissions Information section of this catalog. Specific UAH courses that satisfy admission requirements are listed under the degree description. Students transferring from Alabama two-year colleges should follow the general studies curriculum approved by the Articulation and General Studies Committee (AGSC). A copy of this curriculum is available in the UAH Office of Admissions. Students transferring from other institutions are encouraged to complete courses equivalent to those listed below:

Total BSN Semester Hours: 126

Admission Policies

Admission as a Freshman

Entering UAH freshmen interested in nursing as a career must meet the general entrance requirements of the University. Each student in the lower division (freshman and sophomore years) interested in nursing as a career is advised in the College of Nursing Office of Undergraduate Programs. Students enrolled in the lower division of the College should meet with an advisor in planning a program of study. The program of study will ensure that each student registers for the correct prerequisite courses for the upper division major. Students are encouraged to meet with a nursing advisor each semester. Students must complete all lower division general studies (prerequisites) courses prior to enrolling in the upper division of nursing. For information and assistance, call the College of Nursing Office of Undergraduate Programs 256.824.6742.

Early Promotion into UAH Nursing Program (EPNP)

Highly qualified students who enter UAH as freshmen, declare Nursing as their major, take all lower division Nursing coursework as listed in the BSN lower division program of study on the UAH campus, and meet the requirements listed below will be guaranteed a slot in the upper division Nursing courses as long as they continue to meet the criteria for EPNP. Since students will also be eligible to enroll in the UAH Honors College, students enrolling in the EPNP should consider applying for the UAH Honor's College.

Enrollment in the UAH Honors College, provides students an opportunity to have enriched freshman and sophomore years and additional academic support in preparation for admittance into upper division Nursing. Students may apply online at http://www.uah.edu/honors/application-forms. The combined EPNP/Honors College is not an accelerated Nursing program. It expects students to spend four years as an undergraduate Nursing Student.
Rather, the EPNP assures highly motivated undergraduates promotion into the UAH College of Nursing after successful completion of lower division Nursing program of study while maintaining a 3.25 GPA and scoring an 80 or higher on the HESI Admission Assessment (A2) Exam.

University merit scholarships are available for in-state and out-of-state students who meet the criteria. Additional scholarships are available for in-state students who meet the requirements and conditions of the program and are Alabama residents who have completed their high school education in Alabama. Scholarship support can be used to cover tuition and fees. The following requirements and conditions are to be met by UAH EPNP students in order to maintain good standing status for promotion into the upper division of Nursing:

- A high school GPA of 3.5.*
- A minimum composite ACT score of 28.*
- Maintain a minimum cumulative GPA of 3.25 on all lower division Nursing and Charger Foundations required courses given in the BSN lower division program of study.
- Successful completion of the required BSN lower division program of study for promotion into upper division Nursing courses.
- An overall cumulative score of at least 80% on the HESI Admissions Assessment (A2) exam (comprised of seven required parts).
- Students who do not meet these criteria are eligible for admission, but they are placed in the pool of applications.

* Requirements and conditions are subject to change.

Admission as a Transfer Student

All transfer students seeking admission to UAH should read and follow the Admissions Information section of this catalog. Specific UAH courses that satisfy admission requirements are listed under in the degree description. All transfer students are encouraged to complete courses equivalent to those listed in that summary. Students transferring from Alabama two-year colleges should follow the general studies curriculum approved by the Articulation and General Studies Committee (AGSC). You may visit UAH Office of Admissions online to access the Transfer Equivalency (https://sierra.uah.edu:9021/PROD/wxfer_artic.main) page to see how the courses you have taken at your previous institution may transfer here at UAH. For information and assistance, call the College of Nursing Office of Undergraduate Programs 256.824.6742.

Admission to the Upper Division BSN Program

Students must apply and be admitted to the nursing program to be eligible to enroll in upper division or level 300 and 400 courses with clinical labs. Admission into the upper division nursing major is competitive, and spaces are limited. A separate application for the upper division of the nursing major must be submitted by published dates, on forms provided by the College of Nursing. Each year’s junior class is selected from all applicants who meet or exceed the minimum requirements. When the number of students applying to the upper division exceeds the number of spaces available, the most qualified applicants will be admitted. Those applicants who present the strongest academic records and who show the most promise for success in the upper division will be admitted. Enrollment at UAH as a nursing major in the lower division component does not assure admission to the upper division/professional component. Students admitted into the Early Promotion into Nursing Program (EPNP) as freshman are exempt from these criteria unless they do not maintain their eligibility for EPNP. Students will be notified within four weeks of the application deadlines of admission status.

Enrollment in the upper division nursing component is limited and competitive. Students are admitted without regard to race, color, creed, national origin, sex, or qualified disability.

The criteria for admission are shown below.

Admission Criteria

1. Students must meet the following criteria to be considered eligible for admission:
   a. Admission to the University prior to the application deadline.
   b. Submission of a completed nursing application by posted deadlines.
   c. A minimum cumulative calculated nursing GPA of 3.0 on all nursing prerequisite courses.
   d. A minimum cumulative GPA of 2.75 in all required science courses.
   e. A minimum grade of "C" in all nursing prerequisite courses.
   f. A minimum cumulative score of 70% on the HESI Admission Assessment (A2) Exam (comprised of seven required parts).

2. Once students have been selected for promotion to the upper division, grades on prerequisite courses are checked just prior to the start of the semester for which they were accepted. Promotion to the upper division will be forfeited if any prerequisite is found lacking or less than a "C" is earned.

3. Students seeking transfer from the upper division of another nursing education program must submit a letter of good standing indicating that the student is in good standing and eligible for continued enrollment in that program. Students who were dismissed (failed out) of another nursing program are not eligible for admission to the UAH College of Nursing undergraduate program. Nursing courses requested for transfer will be reviewed individually for equivalency by the College of Nursing. Transfer requests are to be submitted to the College of Nursing Office of Undergraduate Programs.

4. The nursing application requires evidence of eligibility listed above in 1.a - 1.f. plus a professional statement and application fee. Applications are accepted twice a year for fall or spring entry into the upper division nursing curriculum.
5. Changes in curricula and/or admission requirements will be published as far in advance as possible. Refer to admission application for details of admission criteria.

Advising in the Upper Division BSN Program

Once students are admitted to BSN Program and enroll in upper division nursing courses, they meet with faculty who will provide guidance for future academic success, educational endeavors, and employment opportunities. Group advising occurs each semester in upper division for general academic progression.

Progression Standards

I. Grading Scale (to be implemented fall 2019):

The faculty of the College of Nursing adopted a grading scale for the upper division nursing courses in the traditional BSN program, which is consistent with major universities across the United States. The scale is listed below:

- A = 90 - 100
- B = 80 - 89
- C = 75 - 79
- D = 60 - 74
- F <60

II. Students must follow the program of study (POS) under which they were admitted (see A below). Students who withdraw or fail courses must follow the policies outlined in sections B-D below.

A. Progression according to the Program of Study (POS):

1. A grade of “C” or above must be earned in all required nursing courses.
2. Students must meet standards of professional conduct as described in the American Nurses Association Code of Ethics for Nurses, the Alabama Board of Nursing Practice Act, and standards of student behavior as described in the UAH Undergraduate Student Handbook.
3. Throughout the program, student must meet health and other requirements as identified in the Health and Other Requirements, as well as requirements specified in clinical agency contracts.

B. Failure of One Course:

1. A student who receives a grade below “C” in a required nursing course may repeat the course only once and must meet with the Associate Dean of Undergraduate Programs to develop a revised program of study based on space-availability and progression constraints. Before considering placement of any students who have not succeeded in a course, preference for spaces will be given to those applicants who meet all progression criteria. Any alteration of the initial program of study will lengthen the student's program. A progression agreement may be required.

C. Dismissal from Nursing Program:

1. A student who receives two or more grades below “C” in required nursing courses, in either the same course or in separate courses, at any time during the program will be dismissed from the College of Nursing (except NUR 311 and NUR 408). Students may petition for readmission to the College of Nursing by following the policy and completing the form found in the College of Nursing Undergraduate Student Handbook and submitting it to the Director of Undergraduate Admissions and Advisement in the College of Nursing. Readmission into the upper division nursing program is not guaranteed and is based on the availability of space in a cohort and on the information submitted in the application. Students who are readmitted and subsequently earn another grade below “C” in any nursing course will be permanently dismissed from the program.

2. Academic dismissal from the College of Nursing precludes progression in the nursing curriculum. Retroactive withdrawal or other related progression decisions from courses after academic dismissal from the nursing program does not result in a reversal of the dismissal.

D. Withdrawal from Nursing Program:

1. Any student who withdraws from a course must meet with the Associate Dean of Undergraduate Programs to develop a revised program of study based on space-availability and progression constraints. Before considering placement of any students who have not succeeded in a course, preference for spaces will be given to those applicants who meet all progression criteria. Any alteration of the initial program of study will lengthen the student's program. A progression agreement may be required.

E. Graduation from the Nursing Program:

1. Students are required to take national standardized examinations in selected courses. These examinations are counted as a portion of the overall course grade for each course. Remediation will be required if scores fall below UAH Nursing passing standard.
2. An overall "C" (2.0) grade point average (GPA) on all courses taken at UAH is required for graduation.

Health and Other Requirements for Students in Upper Division Nursing Courses

Clinical agencies require students to meet various health related requirements. Students must complete and maintain currency of all health documentation requirements prior to enrollment in upper division level courses and throughout the program for progression. Students are responsible for maintaining original health records. Some of these records will be managed by the Office of Undergraduate Programs, an external clearing house, or by the UAH Student Health Center. The following are required as part of admission, enrollment, and progression in the upper division nursing major:

1. Physical examination: within the past three (3) months prior to starting the upper division curriculum. Any medical or mental health status change from the time of enrollment in the nursing program must be shared with the Associate Dean and documentation of release from healthcare provider for program progression. If a status change is not reported in a timely manner, the student may not be allowed to progress in the program.

2. Hepatitis B: Three (3) doses of vaccine or titer results demonstrating immunity. For initial enrollment a minimum of first 2 immunizations is required prior to entry to the upper division curriculum.

3. Evidence of immunity to measles, mumps, rubella (MMR), and varicella (chickenpox/VZV).

4. Evidence of negative for tuberculosis (TB/PPD). Each student is required to have a 2-step tuberculin (TB) skin test or a T-spot less than three months prior to the first day of class of upper division nursing courses. Instead of skin testing, students may provide evidence of a blood test indicating negative for tuberculosis. If the skin test or the blood test is positive, a chest x-ray is required and possible other medical evaluation may be requested. An annual one-step TB renewal test is required while enrolled in the Nursing Program.

5. Annual Influenza Vaccination (Flu): Students are required to provide evidence of influenza vaccination each year while enrolled in the Nursing Program.

6. Current health insurance: Students are required to provide evidence of current health insurance each year while enrolled in the Nursing Program.

7. CPR certification: Basic Life Support for the Healthcare Provider through the American Heart Association while enrolled in the Nursing Program.

8. Drug testing and criminal background check: Students are required to submit to drug testing and criminal background checks upon admission and annually. In addition, drug testing and criminal background checks can be administered for reasonable suspicion of drug/alcohol use and as required by affiliating clinical agencies while enrolled in any Nursing Program. The College of Nursing Undergraduate and Graduate Student Handbooks provide detailed policies. Violations of the policies are serious and will result in dismissal of students from the College of Nursing.

9. Other health requirements may be implemented based on community or clinical agency requirements.

Standards of Conduct and Accountability

The nursing student shall comply with legal, moral, and legislative standards that determine unacceptable behavior of the nurse and that may be cause for denial of a license to practice as a registered nurse, in accordance with the Alabama law regulating practice of registered and nursing as provided below.

The Alabama Board of Nursing may deny a license and/or temporary permit by examination or endorsement based on Alabama rule 610-x-8-.02 and rule 610-x-8-.03. Examples of grounds for denial and discipline of a license may include:

1. Engaging in fraud, misrepresentation, deception, or concealment of a material fact in applying for or securing licensure or taking any examination required for licensure.

2. Having engaged in conduct that is inconsistent with good moral character such as having a criminal history or pattern of illegal conduct or disregard for the law.

3. Having disciplinary action pending or having had a license, registration, or certification for any health-related profession denied, conditionally issued, fined, reprimanded, censured, restricted, limited, placed on probation, suspended, revoked, voluntarily surrendered, or otherwise encumbered in any state, territory or country.

4. Having been court-martialed or administratively discharged by a branch of the United States Armed Forces for any act or conduct that would constitute grounds for discipline Alabama under Rule 610-X-8-.03.

5. Any other reasons authorized by law.

Failure to comply with any of the Alabama Board of Nursing rules while in the nursing program constitutes grounds for dismissal from the program.

Completion of the nursing program does not guarantee licensure based on the Alabama Board of Nursing’s regulations governing review of candidates for eligibility for initial and continuing licensure.

Core Performance Standards

Core Performance Standards may also be referred to as essential functions define selected attributes and behaviors necessary for students to demonstrate in order to successfully complete their education and subsequently enter nursing practice. These essential functions are determined to be required for initial and continued enrollment in the College of Nursing. Students must be able to perform each of the following essential functions with or without reasonable accommodations.
1. Critical thinking ability for effective clinical reasoning and clinical judgment consistent with level of education preparation. Examples (not all inclusive) of necessary activities include identifying cause-effect relationships in clinical and classroom situation, use of scientific method in developing patient care plans; evaluation of effectiveness of nursing interventions.

2. Professional relationships, Interpersonal skills sufficient for professional interactions with a diverse population of individuals, families, and groups. Examples (not all inclusive) include the ability to establish rapport with patients/clients and colleagues; capacity to engage in successful conflict resolution; peer accountability.

3. Communication adeptness sufficient for verbal and written professional interaction. Examples (not all inclusive) include explaining treatment procedures, initiating health teaching, and documenting and interpreting nursing actions and patient/client responses.

4. Mobility as physical abilities sufficient to move from room to room and maneuver in small spaces. Examples (not inclusive) include moving around in clients' rooms, work spaces and treatment areas; and administering cardiopulmonary procedures.

5. Gross and fine motor abilities sufficient for providing safe, effective nursing care. Examples (not all inclusive) include completing examinations/evaluations by writing, typing or demonstration; calibrating and using equipment, and therapeutic positioning of clients.

6. Auditory ability sufficient to monitor and assess health needs. Examples (not all inclusive) include hearing basic conversation; monitoring alarms, emergency signals and auscultatory sounds; and hearing cries for help.

7. Visual abilities sufficient for observation and assessment necessary in patient care. Examples (not all inclusive) include reading documents such as patient charts and laboratory reports, reading calibrations on syringes, sphygmomanometers, and thermometers, and equipment outputs such as waves, printouts, and digital readings; and accurately observing client behaviors such as color changes and nonverbal communication and responses to treatments.

8. Tactile abilities sufficient for physical assessment. Examples (not all inclusive) include performing palpation, percussion, temperature changes, complete physical examinations and other activities related to therapeutic interventions.

9. Behavioral/Social abilities sufficient to demonstrate emotional stability, maintenance or composure under stress, development of mature, empathetic and effective nurse-patient relationships and use of sound and unimpaired judgment in classroom and clinical activities.

These core performance standards are not intended to be complete listing of all nursing behaviors, but they are a sampling of the types of abilities needed by nursing students to meet program objectives and requirements. The College or its affiliated agencies may identify additional critical behaviors or abilities. The identified core performance standards are revised and adopted from the Americans with Disabilities Act implications for Nursing Education (revised 2008).

Responsibility Compliance with Clinical Agencies

Students are responsible for complying with policies and procedures required by clinical agencies. The College of Nursing may not be able to provide alternative placements for students. Failure to meet this requirement may lead to exclusion from required clinical educational experiences and prevent completion of the program.

Total Semester Hours

Total hours for graduation

Admission of RN-BSN Students

1. Prospective students should contact the College of Nursing Office of Undergraduate Programs at 256-824-6742 to determine eligibility for the online program based on state residency and work location.

2. Admission to the upper division nursing major for registered nurse students requires admission to the University as well as the following minimum requirements:
   a. Minimum grade point average (GPA) of 2.0 for admission to the University.
   b. Graduation from an accredited associate degree nursing program or a diploma program in nursing.

3. Registered nurse students must submit proof of an unencumbered current license and maintain this status throughout the program. A registered nurse student will not be allowed to continue in the program if the nursing license is placed on probation, suspended, or revoked status. An unencumbered license must be maintained throughout the program.

Progression and Graduation Standards

1. Outstanding prerequisite courses may be completed while taking upper division nursing courses. However, it is advised that outstanding prerequisite courses be completed prior to beginning the curriculum. Student are strongly encouraged to work closely with RN-BSN advisor to ensure transfer credits and residency requirements are met.

2. A minimum grade of “C” or above must be earned in all required nursing courses and any outstanding prerequisite courses.

3. An overall “C” (2.0) grade point average (GPA) is required for graduation.

Health and Other Requirements for RN-BSN students:

Student must complete and maintain currency of all health documentation requirements throughout the program for progression. Students are responsible for maintaining original health records. Some of these records will be managed by the Office of Undergraduate Programs, an external clearinghouse, or by the UAH Student Health Center. The following are required as part of admission, enrollment, and progression in the nursing curriculum:

1. Physical examination: The physical exam should be done within the past three (3) months prior to starting the upper division curriculum. Any medical or mental health status change from the time of enrollment in the nursing program must be shared with the Associate Dean and documentation of release from healthcare provider for program progression. If a status change is not reported in a timely manner, the student may not be allowed to progress in the program.

2. Hepatitis B: Three (3) doses of vaccine or titer results demonstrating immunity. For initial enrollment a minimum of first 2 immunizations is required prior to entry to the upper division curriculum.

3. Evidence of immunity to measles, mumps, rubella (MMR), and varicella (chickenpox/VZV).

4. Evidence of negative for tuberculosis (TB/PPD). Each student is required to have a 2-step tuberculosis (TB) skin test or a T-spot less than three months prior to the first day of class of upper division nursing courses. Instead of skin testing, students may provide evidence of a blood test indicating negative for tuberculosis. If the skin test or the blood test is positive, a chest x-ray is required and possible other medical evaluation may be requested. An annual one-step TB renewal test is required while enrolled in the Nursing Program.

5. Annual Influenza Vaccination (Flu): Students are required to provide evidence of influenza vaccination each year while enrolled in the Nursing Program.

6. Current health insurance: Students are required to provide evidence of current health insurance each year while enrolled in the Nursing Program.
7. CPR certification: Basic Life Support for the Healthcare Provider through the American Heart Association while enrolled in the Nursing Program. CPR certification must cover the entire semester that the student is enrolled.

8. Drug testing and criminal background check: Students are required to submit to drug testing and criminal background checks upon admission and annually. In addition, drug testing and criminal background checks can be administered for reasonable suspicion of drug/alcohol use and as required by affiliating clinical agencies while enrolled in any Nursing Program. The College of Nursing Undergraduate and Graduate Student Handbooks provide detailed policies. Violations of the policies are serious and will result in dismissal of students from the College of Nursing.

9. Other health requirements may be implemented based on clinical requirements.

Standards of Conduct and Accountability

The nursing student shall comply with legal, moral, and legislative standards that determine unacceptable behavior of the nurse and that may be cause for denial of a license to practice as a registered nurse, in accordance with the Alabama law regulating practice of registered and nursing as provided below.

The Alabama Board of Nursing may deny a license and/or temporary permit by examination or endorsement based on Alabama rule 610-x-8-.02 and rule 610-x-8-.03. Examples of grounds for denial and discipline of a license may include:

1. Engaging in fraud, misrepresentation, deception, or concealment of a material fact in applying for or securing licensure or taking any examination required for licensure.
2. Having engaged in conduct that is inconsistent with good moral character such as having a criminal history or pattern of illegal conduct or disregard for the law.
3. Having disciplinary action pending or having had a license, registration, or certification for any health-related profession denied, conditionally issued, fined, reprimanded, censured, restricted, limited, placed on probation, suspended, revoked, voluntarily surrendered, or otherwise encumbered in any state, territory or country.
4. Having been court-martialed or administratively discharged by a branch of the United States Armed Forces for any act or conduct that would constitute grounds for discipline Alabama under Rule 610-X-8-.03.
5. Any other reasons authorized by law.

Failure to comply with any of the Alabama Board of Nursing rules while in the nursing program constitutes grounds for dismissal from the program.

Completion of the nursing program does not guarantee licensure based on the Alabama Board of Nursing's regulations governing review of candidates for eligibility for initial and continuing licensure.

Core Performance Standards

Core Performance Standards may also be referred to as essential functions define selected attributes and behaviors necessary for students to demonstrate in order to successfully complete their education and subsequently enter nursing practice. These essential functions are determined to be required for initial and continued enrollment in the College of Nursing. Students must be able to perform each of the following essential functions with or without reasonable accommodations.

1. Critical thinking ability for effective clinical reasoning and clinical judgment consistent with level of education preparation. Examples (not all inclusive) of necessary activities include identifying cause-effect relationships in clinical and classroom situation, use of scientific method in developing patient care plans; evaluation of effectiveness of nursing interventions.
2. Professional relationships, Interpersonal skills sufficient for professional interactions with a diverse population of individuals, families, and groups. Examples (not all inclusive) include the ability to establish rapport with patients/clients and colleagues; capacity to engage in successful conflict resolution; peer accountability.
3. Communication adeptness sufficient for verbal and written professional interaction. Examples (not all inclusive) include explaining treatment procedures, initiating health teaching, and documenting and interpreting nursing actions and patient/client responses.
4. Mobility as physical abilities sufficient to move from room to room and maneuver in small spaces. Examples (not inclusive) include moving around in clients' rooms, work spaces and treatment areas; and administering cardiopulmonary procedures.
5. Gross and fine motor abilities sufficient for providing safe, effective nursing care. Examples (not all inclusive) include completing examinations/evaluations by writing, typing or demonstration; calibrating and using equipment, and therapeutic positioning of clients.
6. Auditory ability sufficient to monitor and assess health needs. Examples (not all inclusive) include hearing basic conversation; monitoring alarms, emergency signals and auscultatory sounds; and hearing cries for help.
7. Visual abilities sufficient for observation and assessment necessary in patient care. Examples (not all inclusive) include reading documents such as patient charts and laboratory reports, reading calibrations on syringes, sphygmomanometers, and thermometers, and equipment outputs such as waves, printouts, and digital readings; and accurately observing client behaviors such as color changes and nonverbal communication and responses to treatments.
8. Tactile abilities sufficient for physical assessment. Examples (not all inclusive) include performing palpation, percussion, temperature changes, complete physical examinations and other activities related to therapeutic interventions.
9. Behavioral/Social abilities sufficient to demonstrate emotional stability, maintenance or composure under stress, development of mature, empathetic and effective nurse-patient relationships and use of sound and unimpaired judgment in classroom and clinical activities.

These core performance standards are not intended to be complete listing of all nursing behaviors, but they are a sampling of the types of abilities needed by nursing students to meet program objectives and requirements. The College or its affiliated agencies may identify additional critical behaviors or abilities. The identified core performance standards are revised and adopted from the Americans with Disabilities Act implications for Nursing Education (revised 2008).

**Professional Studies**

145 Wilson Hall  
Telephone: 256.824.6013  
Email: PCSDeansOffice@uah.edu (pcsdeansoffice@uah.edu)  
Dean: Dr. Karen M. Clanton, Ed.D.
Mission
The mission of the College of Professional and Continuing Studies is to increase student access, external partnerships, community outreach, and extended learning that leverage the University’s areas of expertise for the mutual benefit of the community and the institution.

Degree
Bachelor of Arts in Professional Studies
Bachelor of Science in Professional Studies

The Bachelor of Arts or Science in Professional Studies (BPS) is designed for adults who have prior college and/or work experience, but have yet to obtain a four-year degree. Students may transfer up to 75% of previously completed coursework, including up to 34 hours of technical credits. The program offers a well-rounded education through an interdisciplinary curriculum with established concentrations areas that provide an alternative pathway for adults to complete a bachelor’s degree. Concentration areas include Leadership Strategies and Dynamics; Organizational Studies; and Technology, Science and Society.

The College of Professional and Continuing Studies provides adult learners the opportunity to expand their knowledge base across an array of academic disciplines to meet professional and personal goals. Graduates will learn how to communicate effectively, make informed decisions, and use analytical and critical thinking.

Accreditation
The University of Alabama in Huntsville has institutional accreditation from the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) to award baccalaureate, masters, and doctoral degrees.

Organizational Studies
Prepare for careers that involve finding solutions to human problems in organizations and communities. Coursework will focus on business (emphasis on management and information systems) and humanities/social sciences (emphasis on communications, philosophy, political science, psychology, education, and/or sociology). The curriculum will include organizational theory and behavior, professional ethics, management, information systems, individual and group dynamics, and communication skills. Students will acquire an understanding of human behavior in groups, organizations, and larger systems.

Leadership Strategies and Dynamics
Develop an understanding of foundational leadership theory in your chosen context. Focus on the nature of leadership in a variety of settings and prepare for leadership responsibility in the community and in your selected profession. Coursework will focus on business (emphasis on leadership and management) and social sciences/humanities (emphasis on communications, history, philosophy, political science, psychology, and/or sociology). Courses will provide an educational experience in theories of motivation, leadership styles, organizational and group behavior, professional ethics, communication, theories of cultural difference and multicultural communication, human resources, and/or budgeting.

Technology, Science and Society
Integrate the study of science, engineering, and/or technology with its social and cultural impact on humanity. Focus on developing a broad understanding of the technical, historical and social dimensions of science and technology. Curriculum options include engineering, the natural sciences, computer science, information sciences, business, the social sciences, and/or humanities. The curriculum provides an interdisciplinary approach to explore the significance, challenges, and effects that science and technology present to society. Courses allow students to incorporate technical scientific knowledge with analytical thinking from a social perspective.

B.A. or B.S. in Professional Studies Courses
PRO 301 - THRY & PRAC ADULT LEARNING
Semester Hours: 3

This course presents an overview of five foundational learning theories and related research in adult education and development. The conceptual framework is centered on discovering what motivates the adult learner and the impact social perspectives have on adult learning through analysis and discussion. Students will define competencies needed for success in academic study and professional leadership, in setting educational goals, and in planning a learning experience to achieve them. Emphasis is placed on issues unique to adult re-entry students and the university services available to support nontraditional students.

PRO 310 - ACADEMIC WRITING PROFESS STUDI
Semester Hours: 3

Students will learn academic writing skills by engaging in the process of academic inquiry and argument. The course will cover a broad perspective of writing by exploring various writing and research styles used through different academic professions. Prerequisites: EH 102 or EH 105.
PRO 320 - INDS PERSPECT & CRITICAL THINKING
Semester Hours: 3

Interdisciplinary studies fosters foundational knowledge acquisition by which individuals draw on multiple disciplinary perspectives and integrate their insights and modes of thinking to advance the studies and the fundamental development of critical and analytical thinking skills. Complex issues are addressed from multi-facted perspectives that stimulate problem solving, problem defining and problem posing. Emphasis is placed on how to synthesize evidence drawn from multiple sources as a basis for informed decision-making.

PRO 325 - INDS RESEARCH & APPLICATIONS
Semester Hours: 3

Interdisciplinary research is a contemporary decision-making process for transcending the scope of a single discipline or program to develop insights that offer bold advances in knowledge, solutions to urgent societal problems, an edge in technological innovations, and a more integrative knowledge of multidisciplinary theories and concepts. This course introduces the primary drivers for interdisciplinary research and examines the interdisciplinary research process. Students will apply an integrated model for conducting research that draws on multiple disciplines. Prerequisites: PRO 310 and PRO 320.

PRO 498 - INQUIRY AND LEARNING
Semester Hours: 3

Inquiry-based learning accelerates understanding, fosters critical thinking skills, and facilitates self-direction and discovery. Using this method, students will identify an interdisciplinary problem related to their approved concentration area, perform the foundational research, and formulate a research proposal. This is the first of a two-semester progression to complete a Capstone research thesis/project in PRO 499. Prerequisite: PRO 325.

PRO 499 - CAPSTONE EXP: RSCH THESIS/PROJ
Semester Hours: 3

Students majoring in Professional Studies are required to complete a senior research thesis in their approved interdisciplinary concentration. This Capstone course requires the student to demonstrate his/her ability to integrate the core knowledge and skills gained in their interdisciplinary areas of study using inquiry-based learning methods. Research is conducted and a thesis-style paper is written and orally presented. Prerequisite: PRO 498 with minimum grade of C-.

Specialized Credit Courses

UAH offers specialized credit courses that support various educational partnerships. The following courses have distinct admission and registration requirements. For details, email CPCS.Programs@uah.edu, phone 256-824-2808, or visit www.PCS.uah.edu/USSRC.

ESS 100 - INTRODUCTION TO SPACE SCIENCE
Semester Hour: 1

Covers physiology in space, computer systems, and materials in space, robotics, thermodynamics, astrophysics, and solar physics. Laboratory experiments and simulated missions. Offered in cooperation with the U.S. Space & Rocket Center. Prerequisite: Available only to high school students with U.S. citizenship enrolled in Advanced Space Academy.

ENG 105 - INTRODUCTION TO AERONAUTICS
Semester Hour: 1

Introduction to a variety of aviation subjects, including flight physiology, computer systems, aerodynamics, aeronautics, jet propulsion, thermodynamics, navigation, and survival skills. Lectures and simulated missions. Offered in cooperation with U.S. Space & Rocket Center. Prerequisite: Available only to high-school students with U.S. citizenship enrolled in Aviation Challenge Mach III.

SCI 199 - INTRODUCTION TO PHYSICAL SCIENCE AND RESEARCH METHODS
Semester Hours: 3

Understand the segmentation of research through concepts such as heat transfer, Newtonian mechanics, chemical propulsion, computer modeling and simulation, biology in space, research ethics, technical writing, and data analysis. Students will be equipped with skills critical to contributing to scientific research projects. Prerequisite: Available online to high school students that have previously participated in the U.S. Space & Rocket Center - Aviation Challenge Mach III or Advanced Space Academy.

Graduate Level Course:

ED/SPA 532 - SPACE ORIENTATION FOR EDUCATORS
Semester Hours: 3

An online course for pre-service and in-service teachers that builds on the knowledge and experience gained for participation in Space Academy for Educators at the U.S. Space & Rocket Center (USSRC). The USSRC week-long program provide inquiry based workshops designed around the theme of space exploration and hands-on activities across various curriculum. Course activities are correlated with STEM related curricula. Topics include moon, Mars, rocketry, propulsion, hydroponics, math, biology, history, and literature. This follow-on course provides a formal framework for reflection, weekly discussions, and the development of lesson plans to adapt educators' new expertise in space science into effective and exciting methods for classroom implementation and discovery. Prerequisite: Previous participation in Space Academy for Educators.
Non-Credit Programs

UAH College of Professional and Continuing Studies (CPCS) provides access to quality education and training for individuals; partners with businesses and government for workforce development; enhances public awareness of the instructional and research strengths of the University; promotes lifelong learning fostering continued growth, human fulfillment, and positive social change; and supports economic development throughout North Alabama. These objectives are carried out through the following programming departments: Professional Development Solutions, Conferences and Special Programs, Osher Lifelong Learning Institute, and Testing and Certification Services. For more information about any of the CPCS programs please visit www.uah.edu/pcs.

PCS Registration Services

103 Wilson Hall
Telephone: (256) 824-6010 or 800-448-4031
FAX: (256) 824-6760
Email: Kathy.Hosch@uah.edu (Rita.Campbell@uah.edu)
Kathy Hosch, Senior Associate Director

UAH College of Professional and Continuing Studies (CPCS) Registration Office provides registration services for non-credit programs and select credit courses. Registration options include online, phone, fax, or in person. There is no formal application process for non-credit courses and enrollments are taken throughout the year. Transcripts for continuing education units (CEUs) are available upon written request for a $5 fee per transcript. Visit www.uah.edu/pcs for registration information and related policies.

Professional Development Solutions

139 Wilson Hall
Telephone: (256) 824-4430
Email: Lane.Fabby@uah.edu
Lane Fabby, Director

Mission

Professional Development Solutions develops and presents professional training and educational activities in areas including leadership, management, engineering, cybersecurity, information technology, and certification exam preps. Programs are designed to allow a participant the choice of attending individual courses of interest or completing a more structured certificate program leading to a Certificate of Professional Achievement. Programs are offered in an atmosphere conducive for meeting professional training needs, and available in various classroom and online formats. CPCS maintains state-of-the-art computer labs and classrooms, and its instructors are known and respected industry practitioners and researchers in their respective fields.

Visit uah.edu/PDSolutions for the most up-to-date schedule of course offerings.

Exam Preps

- A+ Exam Prep
- Certified Authorization Professional (CAP®) Exam Prep
- Certified Ethical Hacker (CEH™) Exam Prep
- Certified Information Systems Security Professional (CISSP®) Exam Prep
- Certified Network Defender (CND) Exam Prep
- Cloud+ Exam Prep
- Certified Systems Engineering Professional (CSEP) Exam Bootcamp
- Network+ Exam Prep
- PMP® Certification or Platinum Bootcamp
- Security+ Exam Prep

Certificate Programs

LEADERSHIP

- Executive Leadership
- Leadership Essentials

MANAGEMENT

- Earned Value Management
- Federal Contract Management Essentials
- Federal Contract Management Specialization
- Management of Engineering and Technology
The University of Alabama in Huntsville

- Project Management
- Integrated Supply Chain Management
- Interior Design

ENGINEERING
- Aegis Combat System
- Applied Systems Engineering
- Modeling and Simulation
- Rocket Propulsion
- Systems Test and Evaluation

INFORMATION TECHNOLOGY
- Android™ Mobile Developer
- C++ Developer
- Java Developer
- Master Programmer
- Microsoft Excel
- Microsoft Project
- Microsoft Word
- Oracle Applications Developer

Customized Training & Facilitation
UAH’s customized training solutions offer organizations ways to seize new opportunities and systematically address key problems. Professional Development specialists work directly with corporate, government, and professional organizations to develop high quality certificate programs and short courses that meet specific training goals. These programs can be offered on site, on campus, or via distance learning. Through targeted learning experiences, the individual or team can bring new tools and competencies back into the organization, providing an immediate on-the-job impact.

Conferences and Special Programs
149 Wilson Hall
Telephone: (256) 824-2808
Email: Fathia.Hardy@uah.edu
Fathia Hardy, Assistant Director of Outreach and Event Management

The Outreach and Event Management unit embodies collaborative projects and mutually beneficial partnerships among The University of Alabama in Huntsville and external groups that enrich both our academic and research missions and the communities we serve. Our management team hosts and co-hosts various conferences, training sessions, symposiums, continuing education, special events, meetings, and workshops. Visit www.PCS.uah.edu/conferences-special-programs for the most up-to-date information.

Osher Lifelong Learning Institute (OLLI)
113 Wilson Hall
Telephone: (256) 824-6183
Email: Maxine.Doherty@uah.edu
Maxine Doherty, Outreach Manager

Mission
The Osher Lifelong Learning Institute (OLLI) and the College of Professional and Continuing Studies partner to provide lifelong learning courses and enrichment activities designed to fulfill the educational needs of adults 50 and above. OLLI at UAH is a member-led, non-profit, volunteer-based organization that advances the educational, cultural, and social interests of its members by sponsoring short courses, socials, speaker series, industrial tours, and travelogues designed to fit the interests and needs of its members. CPCS supports OLLI’s efforts by providing support services and a safe, comfortable, and intellectually stimulating on-campus environment that supports adult lifelong learning and enhances community outreach.

Curriculum
Curriculum includes a wide range of courses:
- Arts and Crafts
- Computers
- Current Events
- Finance and Economics
• Foreign Languages
• Genealogy
• Health and Fitness
• History, Civics, and Religion
• Literature and Writing
• Science and Math

Courses are offered during fall, winter, spring, and summer. Most meet 1.5 hours per class, once a week, for six to eight weeks. We also offer courses in our popular “OLLI After Five” format. OLLI courses are taught by qualified volunteer instructors. Courses are not graded, and no tests are administered.

Testing and Certification Services
214 Wilson Hall
Telephone: (256) 824-6373
Email: TestingAndCertificationServices@uah.edu
Maria Bricker, Assistant Director

Mission
The University of Alabama in Huntsville Testing and Certification Services (TaCS) unit is committed to providing exceptional, accessible, and comprehensive testing services for students, graduates, professionals, and individuals from our surrounding communities. We are dedicated to upholding high standards of security and academic integrity by maintaining and adhering to all standards set forth by the National College Testing Association (NCTA).

Tests
The TaCS office offers numerous testing opportunities to include:
• ACT
• Residual ACT
• CLEP/DANTES
• SAT
• MAT
• GRE
• HESI
• Alabama State Dept of Insurance Exam
• National Center for Competency Testing
• Pearson VUE Testing
• Castle Worldwide
• Proctored Exams

Visit www.uah.edu/pcs/testing-certification-services for a full list of available tests, test schedule, policy and guidelines, and ways to register.

College of Science

C 207 and C 206 Materials Science Building
Telephone: 256.824.6605

Mission
The College of Science provides quality education with leading-edge research opportunities through interdisciplinary programs administered by seven departments and vibrant collaborations across campus and community. Faculty bring their innovative research into the classroom, equipping students with advanced knowledge, skills and abilities, and preparing leaders for this generation and beyond.

College of Science offers undergraduate degrees in the following disciplines:
• Atmospheric Science (p. 459)
• Biology (p. 465)
• Chemistry (p. 506)
• Computer Science (p. 562)
• Earth System Science (p. 459)
• Mathematics (p. 604)

Atmospheric Science

NSSTC - Cramer Hall, Room 4044
Telephone: 256.961.7877
Email: ats@uah.edu

Note: The Earth System Science degree programs are administered by the Atmospheric Science department.

The Atmospheric Science department offers the following undergraduate degrees:

- Earth System Science, BS - Atmospheric Science/Meteorology Concentration (p. 587)
- Earth System Science, BS - Geographic Information Systems (GIS) & Remote Sensing Concentration (p. 592)
- Earth System Science, BS - Human Dimensions - Societal Impacts Concentration (p. 596)

Program Objectives

The two primary objectives of the ESS program are to meet important national, regional and statewide needs for highly technically-educated professionals who understand the Earth as a system, and to produce graduates who will be able to perform a variety of functions in research centers and industry centered in our impact on the Earth system.

Learning Outcomes

Earth System Science BS Graduates will:

- Demonstrate the ability to deal quantitatively with real-world problems
- Integrate knowledge from multiple disciplines to scientifically address Earth system issues quantitatively
- Work collaboratively in interdisciplinary teams
- Successfully carry out research projects to completion

Majors in Earth System Science

- Earth System Science, BS - Atmospheric Science/Meteorology Concentration (p. 587)
- Earth System Science, BS - Geographic Information Systems (GIS) & Remote Sensing Concentration (p. 592)
- Earth System Science, BS - Human Dimensions - Societal Impacts Concentration (p. 596)

ESS 100 - INTRODUCTION TO SPACE SCIENCE
Semester Hour: 1
Covers physiology in space, computer systems, materials, in space, robotics, thermodynamics, astrophysics, and solar physics. Laboratory experiments and simulated missions. Offered in cooperation with the Alabama Space and Rocket Center. Open only to students enrolled in Space Academy II.

ESS 101 - EXPLORING SPACE SC & ENGR
Semester Hour: 1
Exploring Space Science and Engineering courses 1-9. Each course examines an aspect of space exploration including but not limited to space science, human factors, medicine and engineering. Each course focuses on a single aspect. No more than three of the courses in the ESS 101 group may be taken for credit. The courses are offered through distance learning.
ESS 103 - ENVIRONMENTAL EARTH SCIENCE
Semester Hours: 4
Principles and foundations of Earth and environmental science with lectures and labs on concepts in Earth system science. Applied science labs use applications and real-world examples from ecosystems, geology, soil science, water, pollution, agriculture, population, natural disasters and energy.

ESS 103L - LABORATORY
Semester Hours: 0

ESS 110 - PHYSICAL SCIENCE/CALHOUN
Semester Hours: 4

ESS 111 - CLIMATE AND GLOBAL CHANGE
Semester Hours: 4
Intro to climate system including natural and human-induced changes in this system. Includes greenhouse effect, ozone depletion, pollution, urban heat island processes, continental drift effects, glacial melting and sea level changes, atmospheric and ocean circulations, solar activity variability.

ESS 111L - LABORATORY
Semester Hours: 0

ESS 210 - COLLAPSE OF CIVILIZATIONS
Semester Hours: 3
This course will investigate why some cultures succeed and others fail. From archeological and historical records of past civilizations we will examine the factors which lead to collapse in an attempt to determine the future of current societies.

ESS 212 - SEVERE WEATHER ANALYSIS
Semester Hours: 4
Meteorological analysis and beginning forecasting of weather systems, severe weather, snowstorms, hurricanes, and tornadoes through the interpretation of surface, upper air, satellite, and radar weather observations. Strong emphasis placed on unique observations of severe weather from UAH radar and profiling systems. Prerequisites: ESS 111.

ESS 212L - LABORATORY
Semester Hours: 0
Laboratory. Prerequisite: ESS 111.

ESS 301 - INTRO TO EARTH & ATMOSPHERIC PHYS
Semester Hours: 3
This course will provide a survey of earth and atmospheric science for undergraduate students. Topics that will be covered will focus on how the earth-atmosphere system works in an integrated fashion. Prerequisites: ESS 103, ESS 111, (PH 101 or PH 111), and (MA 120 or MA 171).

ESS 302 - PEOPLE, PLANTS, & ENVIRONMENT
Semester Hours: 3
This course is designed to introduce students from multiple departments to the vital roles that plants have in our ecosystems through the study of basic plan and soil science. Special attention is placed on the impact plants have on our technology-based society. Sophomore standing or above.

ESS 303 - CLASSICAL & PHYSICAL CAUSES CLIM
Semester Hours: 3
Basic atmospheric structure and physical processes, surface processes, climate history and climate change, land use and land change, microclimates, topoclimates, Ecoclimatology. Prerequisites: ESS 103, ESS 111, MA 120 or MA 171, and PH 101 or PH 111.

ESS 305 - HYDROLOGY
Semester Hours: 3
Introduction to hydrologic cycles and concepts of how water interacts with the environment. Covers water properties, precipitation, groundwater and runoff, currents, waves, sediment processes, and conservation strategies. Prerequisites: ESS 103, ESS 111, MA 120 or MA 171, and PH 101 or PH 111.

ESS 307 - ENVIRONMENTAL ARCHEOLOGY
Semester Hours: 3
Archeologists today need a wide range of scientific approaches in order to delineate and interpret the ecology of their sites. This approach is revolutionizing archeology making it relevant to the modern-day world. Investigated in this course includes climate modeling, remote sensing, and GIS. Prerequisite: ESS 103.
ESS 312 - PRINCIPLES OF ECOLOGY  
Semester Hours: 4  
Lecture/Lab One 3 hour lab a week. Ecological principles controlling plant and animal populations. Development of ecosystems, communities and habitats. Field trips required. Strongly recommend CH 101 or 121. Prerequisite: BYS 120.

ESS 313 - GEOGRAPHIC INFORMATION SYSTEMS  
Semester Hours: 3  
Introduction to scientific spatial analysis concepts and spatial data processing with focus on ESRI ArcGIS software. Basic concepts in GIS data management and creation, with topics including raster and vector data, projections, data query, data acquisition, and cartography. Prerequisites: ESS 103 and either CS 102 or CS 103.

ESS 321 - POLLUTION PROBLEMS  
Semester Hours: 3  
Quantitative study of environmental conditions, processes, and problem-solving techniques related to specific pollution problems in air, water, and land. Prerequisites: ESS 111, ESS 103 and (MA 120 or MA 171) and (CH 101 or CH 121) and (PH 101 or PH 111).

ESS 351 - DYNAMIC METEOROLOGY  
Semester Hours: 3  
Dynamics and kinematics of atmospheric flow. Meteorological coordinate systems. Fundamental governing equations of atmospheric motion, circulation, and vorticity. Prerequisites: PH 111, ESS 301, CS 102 or CS 103, and MA 201 (with concurrency).

ESS 352 - SYNOPTIC METEOROLOGY  
Semester Hours: 3  
Analysis, interpretation and forecasting synoptic-scale and mesoscale phenomena, including air masses, frontal systems, cyclones, anti-cyclones, tropical cyclones, and associated mesoscale phenomena. Emphasis is placed on the use of remote sensing data from satellites, radars, and profilers using state-of-the-art workstations. Prerequisite: ESS 212 and ESS 351.

ESS 370 - INTRODUCTION TO REMOTE SENSING  
Semester Hours: 3  
This course introduces the fundamental physics of remote sensing systems and incorporates hands-on exercises of image processing, information extraction and interpretation, and basic applications of airborne and satellite data in Earth System Science and Atmospheric Science. Prerequisites: ESS 103, ESS 111, (MA 120 or MA 171), (PH 101 or PH 111), and CS 102.

ESS 402 - SCI & SOC ASPTS NATRL DISASTER  
Semester Hours: 3  
Students will understand causes of major natural events and evaluate effects of disasters on populations and possible mitigation measures. GIS software will be used to show progression of events and/or their impacts, with course case studies. Prerequisites: ESS 103 and ESS 111.

ESS 407 - ENV THRTS, PUB POLY, & DEC MKG  
Semester Hours: 3  
Researchers, policymakers and environmental campaigners have identified 25 potential future threats to the global environment. This course examines the nature and consequences of these threats and their potential impacts for the survival of the human race. Prerequisite: ESS 103.

ESS 408 - PYTHON FOR GIS  
Semester Hours: 3  
Introduction to GIS model building, Python programming, and automation of scripts for ArcGIS. Techniques in Model Builder, Python, and the methods for automation will be taught using data from numerous available data sources across the internet with heavy emphasis on the Earth Sciences. Prerequisites: ESS 313.

ESS 409 - SCI PROGRAMING FOR EARTH & ATMOS  
Semester Hours: 3  
Survey of data types and languages commonly used in the meteorological community along with practical applications to meteorology. Course is designed to prepare students for graduate work and research in atmospheric science. Prerequisite: CS 102 or 103; ESS 301; MA 172; PH 112 and PH 115. Or consent of instructor.

ESS 410 - OPERATIONAL WEATHER FORECAST'G  
Semester Hours: 3  
Subjective and objective methods of atmospheric prognosis. Techniques for forecasting critical weather elements. Interpretation, use and systematic errors of computer-generated products, human factors with forecasting, and application of meteorological theory in an operational setting. Prerequisites: ESS 111, ESS 212, ESS 352, MA 172, PH 112 and PH 115.
ESS 414 - GEOSPATIAL APPLICATIONS
Semester Hours: 3

An introductory look at the ways in which GIS can be put to use in different fields of study, drawing examples from Demography, Sociology, Archaeology, History, and Ecology. Focus on cartography and map creation principles and public geospatial data acquisition. Prerequisite: ESS 313.

ESS 415 - ADVANCED TOPICS IN GIS
Semester Hours: 3

Advanced continuation of concepts applied in Geospatial Applications. Students will learn through modules of real world scientific research how to use further tools in ArcGIS including: 3D Analyst, Spatial Analyst, Network Analyst. Topics include web data dissemination, spatiotemporal analysis and some basic spatial statistics measures. Prerequisite: ESS 414.

ESS 420 - INTRO ATMOSP CHEM & AIR POLLU
Semester Hours: 3

This self-contained introductory course in atmospheric chemistry and air pollution is designed to provide students the basics of atmospheric chemistry and air pollution concepts. Topics include air pollutants, air-pollution meteorology, atmospheric gases and aerosols, and atmospheric processes. Prerequisites: PH 112, PH 115, CH 121, ESS 301 and ESS 321.

ESS 441 - ATMOSP THERMODY & CLOUD PHYSIC
Semester Hours: 3

General aspects of thermodynamics and cloud physical processes occurring within the atmosphere; atmospheric statics and stability, saturation point analysis, aerosols, nucleation, and the behavior/growth of cloud particles and hydrometeors. Prerequisites: ESS 301, MA 238, PH 112 and PH 115.

ESS 451 - ATMOSPHERIC FLUID DYNAMICS I
Semester Hours: 3

Fluid dynamics in the atmosphere. Coriolis acceleration, scale analysis and appropriate approximations of the complete governing equations. Numerical analysis and interpretation of weather phenomena. Same as ATS 451. Prerequisites: ESS 351, MA 238, PH 112 and PH 115.

ESS 454 - FORECASTING MESOSCALE PROC
Semester Hours: 3

Detection and forecasting of atmospheric mesoscale phenomena including the structure and evolution of clouds, precipitation (including floods) thunderstorms and severe weather. Includes basics of instruments used to detect mesoscale phenomena, most notably satellite and radar. Prerequisite: ESS 352.

ESS 461 - ATMOSPHERIC RADIATION I
Semester Hours: 3

Fundamentals of terrestrial atmospheric radiation. Topics include: basic concepts, radiative transfer equation, gaseous absorption, scattering by molecules and particles, band models, transmittance along an inhomogeneous path. Prerequisite: ESS 301, MA 238, PH 112 and PH 115.

ESS 471 - INTRO TO RADAR METEOROLOGY
Semester Hours: 3

Introduction to principles of radar meteorology, including radar operations, hardware, interpretation and analysis. Doppler, dual-polarization and dual-wavelength radar theory, methods and applications are covered. Prerequisite: ESS 301 and ESS 441.

ESS 490 - SELECTED TOPICS IN ENVIRON SCI
Semester Hours: 1-3

Special offerings to students in areas of interest not covered in the present curriculum. Prerequisite: permission of instructor.

ESS 495 - DIRECTED STUDY
Semester Hours: 2-4

Specialized research for undergraduates often is offered to undergraduates who have senior standing.

ESS 498 - RESEARCH & PROF DEV CAPSTONE
Semester Hour: 1

Applied concepts for professional and research development. Includes evaluation and discussion of published literature and department seminars, with focus on research synthesis and critique. Also includes development of professional and career skills focused on the Earth and Atmospheric Sciences. Senior Standing required.
ESS 499 - UNDERGRADUATE RESEARCH
Semester Hours: 2-4

For advanced Earth System Science students. Individual investigations into Earth systems science problems under direct supervision of a research mentor. Research is conducted and thesis-style paper is written and orally presented. Students identify and obtain consent from a faculty research mentor.

ESS 501 - SURVEY ATMOSPHERIC SCIENCE
Semester Hours: 3

General survey of the field of atmospheric science includes thermodynamics, atmospheric dynamics, cloud physics, and atmospheric radiation. Quantitative examination of atmospheric properties including atmospheric composition, structure and dynamics.

ESS 502 - SCI & SOC ASPTS NATRL DISASTER
Semester Hours: 3

Examination of the physical causes of major natural geophysical hazards and their impact on the natural and built environment, society and the economy. Evaluation of the ability to forecast events, and develop sound mitigation and recovery measures. Specific case studies are considered.

ESS 507 - ENVRNMTL THRTS PBL PY DEC MKG
Semester Hours: 3

Researchers, policymakers and environmental campaigners have identified 25 potential future threats to the global environment. This course examines the nature and consequences of these threats and their potential impacts for the survival of the human race.

ESS 508 - PYTHON FOR ID ESS APPLICATIONS
Semester Hours: 3

Introduction to GIS model building, Python programming, and automation of scripts for ArcGIS. Techniques in Model Builder, Python, and the methods for automation will be taught using data from numerous available data sources across the internet with heavy emphasis on the Earth Sciences.

ESS 509 - APPLI COMPUTERS IN METEOROLOGY
Semester Hours: 3

Survey of data types and languages commonly used in the meteorological community along with practical application to meteorology. Course is designed to prepare students for graduate work and research in atmospheric science.

ESS 510 - OPERATIONAL WEATHER FORECAST'G
Semester Hours: 3

Operational Meteorology covers subjective and objective methods of atmospheric prognosis, including techniques for forecasting operationally-important weather elements. Course explores interpretation, use and systematic errors of computer-generated products, human factors within forecasting, and application of meteorological theory in an operational setting. Course instruction is accomplished through analysis of various weather events from beginning to completion.

ESS 513 - GIS & IMAGE PROCESSING
Semester Hours: 3

Spatial data processing with focus on ESRI ArcGIS and ENVI software. Basic concepts in GIS data management and creation and scientific use of satellite imagery. Topics include image interpretation, classification, transformations, raster and vector data, projections, data query, and cartography.

ESS 514 - GEOSPATIAL APPLICATIONS
Semester Hours: 3

Advanced concepts in Earth science geospatial applications, primarily using ArcGIS. Topics can include geostatistical analysis, 3D terrain analysis, advanced data sources, raster manipulation, geodatabase design, suitability and network modeling.

ESS 515 - ADVANCED TOPICS IN GIS
Semester Hours: 3

Advanced concepts in Earth science geospatial applications, primarily using ArcGIS. Topics can include geostatistical analysis, 3D terrain analysis, advanced data sources, raster manipulation, geodatabase design, suitability and network modeling. Prerequisite: ESS 514 or consent of instructor.

ESS 561 - ATMOSPHERIC RADIATION I
Semester Hours: 3

ESS 590 - SPECIAL TOPICS IN ESS
Semester Hours: 3

Selected topics of interest not included under other courses.
ESS 610 - LAND USE APP & SUSTAINABILITY
Semester Hours: 3
Study of land use and sustainability issues using satellite image processing and GIS. International examples of urbanization, agriculture, transportation, water management, and natural resources exploitation. Discussions of current literature and quantitative analyses of satellite and situ data. Prerequisite: ESS 515 or consent of instructor.

ESS 612 - ADV GIS EARTH ATMOSPHERE PROBL
Semester Hours: 3
Advanced GIS and remote sensing/image processing. Discussion, guided readings, and group labs to interact with student peers and instructor to develop geospatial solutions to problems relevant to their thesis research including appropriate research design, data collection, and analysis. Prerequisites: ESS 515 and ESS 610.

ESS 625 - AIR POLL APP & DEC MAKG REMOTE
Semester Hours: 3
Course will review principles of air pollution, measurement methods, regulation, national and international standards and how research is used to make decisions regarding air quality. The course will use ground-based, satellite, and numerical modeling information through a case study approach. Prerequisites: ESS/ATS 501.

ESS 630 - PHYSICAL CLIMATOLOGY
Semester Hours: 3
This course examines the physical aspects of the global climate system, including the global energy balance, surface energy balance, hydrologic cycle, climate classification, ocean circulation, natural and anthropogenic climate change and other selected topics such as climate sensitivity. Prerequisites: ATS 501 or ATS 541.

ESS 632 - ENERGY, CLIMATE, ENVIRONMENT
Semester Hours: 3
This course focuses on energy and its impact on the environment including climate change and air pollution. Specific energy forms, such as fossil fuels, nuclear energy, solar energy, are discussed.

ESS 670 - SATELLITE REMOTE SENSING I
Semester Hours: 3
Using a hands on approach, this course covers a broad range of topics concerning digital image processing applied to the remote sensing of atmospheric, cloud and surface properties using various satellite data sets. Prerequisites: ESS 509.

ESS 680 - NUMERICAL MOD APPL ESS
Semester Hours: 3
This course will provide the physical basis for numerical model applications in the earth-atmosphere system including spatial and temporal scales. Prerequisites: ESS 501 and ESS 509.

ESS 690 - SPECIAL TOPICS IN ESS
Semester Hours: 3
Selected topics of interest not included under other courses.

ESS 699 - MASTER'S THESIS
Semester Hours: 3-6
A minimum of six thesis credit hours is required for MS degree.

ESS 780 - SEMINAR
Semester Hour: 1
Speakers are invited to report on research relevant to the field of Atmospheric and Earth System Science. Students are expected to attend at least twelve seminars and to write short descriptions of the presentations.

ESS 781 - STUDENT SEMINAR
Semester Hour: 1
Guest speakers reports on research relevant to the fields of Atmospheric and Earth System Science. Students are expected to attend weekly seminars, submit a paper based on at least ten talks, and make a 15 minute conference-type presentation on a research topic in atmospheric science selected in agreement with their advisor.
ESS 782 - PROFESSIONAL DEVELOPMENT
Semester Hour: 1

Topics concerning professional ethics, writing scientific journal articles, proposals and resumes, preparing budgets, networking, time management, conference presentations, research administration, funding agencies, stress and burnout will be discussed.

Biological Sciences

369A Shelby Center
Telephone: 256.824.6260
Email: biology@uah.edu

The Biological Sciences department offers the following undergraduate degrees:

- Biological Sciences, BS (p. 472)
- Biological Sciences, BS - Biochemistry Concentration (p. 476)
- Biological Sciences, BS - Pre-Professional Health Careers Concentration (p. 494)
- Biological Sciences, BS - Ecology and Evolution Concentration (p. 481)
- Biological Sciences, BS - Microbiology Concentration (p. 490)
- Biological Sciences, BS - Secondary Education Concentration (p. 501)
- Biological Sciences, BS - Exercise Physiology Concentration (p. 485)

Program Objectives

The UAH Department of Biological Sciences aspires to provide one of the best programs in the southeastern U.S. for both undergraduate and graduate students in terms of both quality and efficacy. Our goal is to provide forward-looking, comprehensive curricula that includes both instruction and laboratory experience for our undergraduates and meets the highest national standards.

Learning Outcomes

Biological Sciences graduates will demonstrate the ability to

- Correctly use and apply key words, concepts, and theories from the biological sciences
- Write in a scholarly manner
- Engage in effective oral presentation of scientific topics or research results

Majors in Biological Sciences

- Biological Sciences, BS (p. 472)
- Biological Sciences, BS - Biochemistry Concentration (p. 476)
- Biological Sciences, BS - Pre-Professional Health Careers Concentration (p. 494)
- Biological Sciences, BS - Ecology and Evolution Concentration (p. 481)
- Biological Sciences, BS - Microbiology Concentration (p. 490)
- Biological Sciences, BS - Secondary Education Concentration (p. 501)
- Biological Sciences, BS - Exercise Physiology Concentration (p. 485)

For more information about the department of biology, visit uah.edu/biology.

Minor in Biological Sciences

- Biological Sciences (p. 505)

UAH's Joint Undergraduate Master's Program (JUMP) allows undergraduate students to study at the graduate level. By taking graduate courses in your senior year you could reduce the time taken to get a graduate (MS) degree. Please visit JUMP (p. 20) page for general information.

Requirements For Admissions

1. Cumulative Overall 3.3 GPA
2. Major GPA of 3.5
3. Student shall complete BYS 120, BYS 219, BYS 300, BYS 361 + BYS 362, CH 121 + CH 125, CH 123 + CH 126, CH 331 + CH 335, CH 332 + CH 336 by Junior year
Additional Information

• Maximum of 12 credit hours count toward both degrees

Designated Faculty Contact/Advisor

Dr. Debra Moriarity debra.moriarity@uah.edu 256.824.6045

BYS 202 - STATISTICS MICROBIOLOGY
Semester Hours: 4

BYS 100 - INTRO HEALTH PROFESSIONS
Semester Hour: 1

Career options for undergraduate students interested in health professions. Basics of health-care delivery systems and terminology of health care. No BYS major or minor credit. Primarily for freshman and sophomores.

BYS 103 - PRINCIPLES OF BIOLOGY/CALHOUN
Semester Hours: 4

BYS 111 - ANATOMY & PHYSIOLOGY I/OAKWOOD
Semester Hours: 3

BYS 112 - ANATOMY & PHYSIOLOGY II/OAKWOOD
Semester Hours: 4

BYS 112A - HUMAN ANATOMY-PHYS II/OAKWOOD
Semester Hours: 3

BYS 112L - ANATOMY & PHYSIOLOGY II/OAKWOOD
Semester Hours: 0

BYS 119 - PRINCIPLES OF BIOLOGY
Semester Hours: 4

Lecture/Lab/Recitation. Introduction to biological principles of cell structure, function, metabolism and reproduction. One two hour lab and a one hour recitation per week.

BYS 119L - LABORATORY
Semester Hours: 0

Laboratory exercised to introduce students to accurate measurement techniques, observation, and the development of relevant hypotheses. Several formal lab reports are required as an introduction to scientific writing.

BYS 119R - BYS 119 RECITATION
Semester Hours: 0

Homework turned in and discussed; exams discussed and further assistance with course material available.

BYS 120 - ORGANISMAL BIOLOGY
Semester Hours: 4

Lecture/Lab/Recitation. Discussion of biological function with special emphasis on contrasting strategies employed by organisms in meeting similar biological needs. One two-hour lab and a one hour recitation per week. Prerequisite: BYS 119.

BYS 120L - ORGANISMAL BIOLOGY LAB
Semester Hours: 0

Introduction to the basic concepts of natural selection, population biology, and the biodiversity of animals and plants. Several formal lab reports are required as a further introduction to scientific writing, along with a lab practical on the biodiversity of animals and plants.

BYS 120R - BYS 120 RECITATION
Semester Hours: 0

Homework turned in and discussed; exams discussed and further assistance with course material available.

BYS 202 - HUMAN ANAT & PHYS II/CALHOUN
Semester Hours: 4
BYS 214 - INFECTION & IMMUNITY
Semester Hours: 4

Lecture/Lab. Two 2-hour labs a week. Principles of microbiology with emphasis on infectious disease of humans; epidemiological and immunological aspects. No credit for students who have credit for BYS 321 or advanced microbiology courses. Recommended for students in the College of Nursing. Prerequisites: BYS 119 and either CH 101 or 121.

BYS 214L - LABORATORY
Semester Hours: 0

BYS 215 - HUMAN ANATOMY & PHYSIOLOGY I
Semester Hours: 4

Structure and function of the human body with emphasis on their relationship to disease. Part 1 of a two course sequence. Anatomy and physiology of major organs and organ systems and their relationship to each other. Emphasizes relationships of human systems to applications and simulations. Prerequisites: BYS 119, CH 101 and CH 105.

BYS 215L - HA&P I LABORATORY
Semester Hours: 0

An introduction to anatomical terminology; basic histology of normal tissues versus common pathologies. Focus on the human skeletal and muscular systems. Students are engaged in recognition of individual bones, surface markings and major muscles through dissection and use of muscular models.

BYS 216 - HUMAN ANATOMY & PHYSIOLOGY II
Semester Hours: 4

Structure and function of the human body with emphasis on their relationship to disease. Part II of a two course sequence. Anatomy and Physiology of major organs and organ systems and their relationship to each other. Emphasizes relationships of human systems to applications and simulations. Prerequisite: BYS 215.

BYS 216L - HA&P II LABORATORY
Semester Hours: 0

Study of the anatomy of the nervous, cardiovascular, respiratory, renal and digestive systems. Dissections of eye, brain, heart, lung and kidney. Basic EKG/ECG reading and a study of factors affecting blood pressure. Enzymatic action of the digestive system; basic urinalysis determinations.

BYS 219 - GENETICS AND EVOLUTION
Semester Hours: 4

Lecture/Lab/Recitation. Two labs and one recitation per week. Hereditary basis of organisms; genes as the discrete units of inheritance and genes in organisms and populations. Medelian principles and evolutionary processes. Replication, transcription and translation of DNA, RNA, and proteins. Prerequisites: BYS 120 and (CH 101 or CH 121) and (MA 107 or 112).

BYS 219L - LABORATORY
Semester Hours: 0

Laboratory activities include experiments to further students understanding in Mendelian genetics, molecular biology and Human genetic diseases. Counted as part of the overall grade fro BYS 219.

BYS 219R - BYS 219 RECITATION
Semester Hours: 0

Homework turned in and discussed; exams discussed and further assistance with course material available.

BYS 220 - GENERAL MICROBIOLOGY/CALHOUN
Semester Hours: 4

BYS 221 - HUMAN ANATOMY & PHYSIOLOGY/A&M
Semester Hours: 3

BYS 221L - A & P I LAB/A&M
Semester Hour: 1

BYS 241 - GENERAL MICROBIOLOGY/OAKWOOD
Semester Hours: 4

BYS 281 - INTRO TO FORESTRY/A&M
Semester Hours: 3
BYS 292 - INTRO TO BIOLOGICAL RESEARCH
Semester Hours: 3
Introduction to the principles and practices of biological research. Covers experimental design, statistical analysis, critical review of journal articles, responsible conduct of research, and writing for the biological sciences. Recommended for students planning to do undergraduate research. Prerequisites: BYS 119, MA 112, EH 101.

BYS 300 - CELL & DEVELOPMENTAL BIOLOGY
Semester Hours: 4
Lecture/Lab. One lab per week. Introduces the student to topics in cell and developmental biology. Subjects include cell structure, organelles, cytoskeleton, secretory pathway, cell division, cell cycle, cell interaction and control of differentiation. Prerequisites: BYS 219 and either CH 123 or 201.

BYS 300L - CELL & DEVELOPMENT BIO LAB
Semester Hours: 0

BYS 301 - ELEMENTARY BIOCHEMISTRY
Semester Hours: 3
Biochemistry and energetics of living cells, metabolism, structure and function of carbohydrates, lipids, proteins and nucleic acid. Enzymes, coenzymes, vitamins, blood, endocrine glands, DNA synthesis and gene expression. Same as CH 301. Prerequisites: BYS 120 and either CH 201 or 331.

BYS 302 - PEOPLE, PLANTS & ENVIRONMENT
Semester Hours: 3
This course is designed to introduce students from multiple departments to the vital roles that plants have in our ecosystems through the study of basic plant and soil science. Special attention is placed on the impact that plants have on our technology-based society.

BYS 311 - INTRO MOLECULAR UNDST BIO SYST
Semester Hours: 3
Introduction to a molecular understanding of genes, gene expression and genetic engineering in selected procaryotic and eucaryotic systems. Includes examples of biotechnology applications. Prerequisites: CH 331.

BYS 312 - PRINCIPLES OF ECOLOGY
Semester Hours: 4
Lecture/Lab. One lab a week. Population structure and growth, competition, predation, symbiosis, biogeochemical cycling and energy flow, disturbance and community dynamics, biodiversity and conservation. Field trips required. Prerequisites: BYS 120, and BYS 219.

BYS 313 - ANATOMY & PHYSIOLOGY I
Semester Hours: 4
Lecture/Lab. One lab a week. Structure and function of the human body. Anatomy of the skeletal and muscular systems, physiology of membranes, cellular and epithelial transport and nervous system function. Appropriate preparation for professional schools/graduate study in biological sciences. Prerequisites: BYS 119. Prerequisites with concurrency: BYS 300, and either CH 201 or 331.

BYS 313L - LABORATORY
Semester Hours: 0
Laboratory activities on the basic concept of system physiology including a rat dissection. Focuses on membrane transport and histology, and include gross anatomy and a study of the muscles and bones of the human body. Capstone student research project on electromyography of muscles.

BYS 314 - ANATOMY & PHYSIOLOGY II
Semester Hours: 4
Lecture and one lab a week. Continuation of BYS 313 stressing structural and functional relationships of major organ systems, focusing on heart, brain, lungs, kidney and the gastrointestinal tract. Appropriate for students preparing for professional schools or graduate study in biological sciences. Prerequisites: BYS 313.

BYS 314L - ANATOMY/PHYSIOLOGY II LAB
Semester Hours: 0
Research-intensive system based laboratory course. Includes brain dissection and student EEG project and a heart dissection and a cardiovascular physiology project. This is followed by a pulmonary function lab and a renal function lab where students calculate their own glomerular filtration rate.

BYS 315 - ICHTHYOLOGY
Semester Hours: 4
Classification, anatomy, physiology, and ecology of freshwater and marine fishes. Emphasis fishes of north Alabama. Laboratory and field trips required. Prerequisites: BYS 120 and BYS 219. Prerequisite with concurrency: BYS 300.
BYS 317 - VERTEBRATE ZOOLOGY
Semester Hours: 5
Lecture/Lab. Two three-hour labs a week. Morphology of vertebrate animals. Relationship of organs and systems and their phylogenetic significance. Prerequisites: BYS 120 and BYS 219. Prerequisite with concurrency: BYS 300.

BYS 318 - VERTEBRATE REPRODUCTION
Semester Hours: 3
General treatment of the major concepts and controversial areas of comparative vertebrate reproduction: ecological and evolutionary aspects, development of reproductive functions and sexual behavior, seasonal breeding and other topics of current interest. Prerequisites: BYS 120 and BYS 219. Prerequisite with concurrency: BYS 300.

BYS 320 - MEDICAL TERMINOLOGY
Semester Hours: 3
The meaning, spelling, etymology and pronunciation of major medical terms related to anatomy, pathology, medical professions, procedures and pharmaceuticals; body systems, their associated diseases and disorders. Correct usage of terms and interpretation of documents containing these terms. Hybrid course with online and in-class portions. Prerequisites: BYS 300 or BYS 215 & 216.

BYS 321 - GENERAL MICROBIOLOGY I
Semester Hours: 4
Structure, biochemistry, and genetics of microorganisms, control of microbial growth, and microorganisms as pathogens. Lab covers basic and diagnostic methods in microbiology, environmental factors controlling microbial growth and survival, and characteristics of medically important microorganisms. Prerequisites: BYS 120, BYS 219. Prerequisite with concurrency: BYS 300.

BYS 321L - LABORATORY
Semester Hours: 0

BYS 322 - GENERAL MICROBIOLOGY II
Semester Hours: 4
Emphasizes diversity of microorganisms with respect to ecology, physiology, and phylogeny. Prerequisites: BYS 321.

BYS 322L - GENERAL MICROBIOLOGY II LAB
Semester Hours: 0

BYS 325 - KINESIOLOGY/ATHENS
Semester Hours: 3

BYS 347 - BIOPHYSICAL CHEMISTRY I
Semester Hours: 3

BYS 348 - BIOPHYSICAL CHEMISTRY II
Semester Hours: 3

BYS 351 - NUTRITION & METABOLISM/ A&M
Semester Hours: 3

BYS 361 - GENERAL BIOCHEMISTRY
Semester Hours: 3
Biochemical structure and function of amino acids, proteins, carbohydrates, lipids, and nucleic acids; Enzyme catalysis and kinetics; major catabolic pathways, their integration and control mechanisms: Glycolysis, Citric Acid Cycle, Fatty Acid Oxidation and Oxidative Phosphorylation. Same as CH 361. Prerequisites: BYS 120, CH 332 and CH 335 or BYS 311, CH 332 and CH 335.

BYS 362 - GENERAL BIOCHEMISTRY LAB
Semester Hour: 1
One 3-hour lab a week. Practical experience in isolation, qualitative identification, and quantitative estimation of biomolecules. Same as CH 362. Prerequisites: CH 335 and CH 336. Prerequisite with concurrency: CH 361.
BYS 363 - GEN BIOCHEMISTRY II  
Semester Hours: 3  
A continuation of BYS 361 to include amino acid oxidation, biosynthesis of biomolecules, integration of metabolism, DNA and RNA metabolism, protein biosynthesis, and gene structure. Same as CH 363. Prerequisites: BYS 361.

BYS 364 - BIOGEOGRAPHY  
Semester Hours: 3  

BYS 365 - GEN BIOCHEMISTRY LAB II  
Semester Hour: 1  
Experimental course illustrating the topics in BYS 363. Prerequisites: BYS 361 and BYS 362. Prerequisite with concurrency: BYS 363.

BYS 401 - EXERCISE PHYSIOLOGY  
Semester Hours: 4  
Lecture/Lab. One lab per week. Basic human physiology as differentiated by the effects of exercise. Physiology of major systems of the body that may act as a limiting factor or enhance the performance, of human movement. Strongly recommended: BYS 301 or CH 301. Prerequisites: BYS 215 & BYS 216 OR BYS 313 & BYS 314.

BYS 401L - LABORATORY  
Semester Hours: 0

BYS 402 - KINESIOLOGY & BIOMECHANICS  
Semester Hours: 4  
Lecture/Lab. One lab per week. A study of the structural and functional relationships of the human skeletal, muscular and neural systems as they relate to movement of the human body. Prerequisites: BYS 215 & BYS 216 OR BYS 313 & BYS 314.

BYS 402L - LABORATORY  
Semester Hours: 0

BYS 403 - ADV EXERCISE PHYSIOLOGY  
Semester Hours: 4  
Lecture/Lab. One lab per week. Human physiology, addressing the effects of environmental variables such as altitude, thermal stress and terrain on the major physiological systems of the body; in-depth analysis of resistance training, aerobic and anaerobic training; integration of multiple systems. Prerequisites: BYS 401, and BYS/CH 301 or 361.

BYS 405 - PSYCHOPHARMACOLOGY  
Semester Hours: 3  
Introduction to drug classification and action with emphasis on physiological and psychological interactions.

BYS 408 - BIOCHEMISTRY II /A&M  
Semester Hours: 3

BYS 411 - CELL BIOLOGY/A&M  
Semester Hours: 4

BYS 419 - MICROBIAL GENETICS  
Semester Hours: 3  
Transmission, expression, and evolution of genes in microorganisms. Studies of chromosomes, plasmids, transporons, bacteriophages, and other genetic elements. Prerequisites: BYS 219, BYS 300 and BYS 321.

BYS 430 - IMMUNOLOGY  
Semester Hours: 4  
Lecture/Lab. One 3-hour lab per week. Innate, humoral and cell-mediated immunity. Immune deficiencies and hypersensitivities. Autoimmunity, transplantation, and tumor immunology. Prerequisites: BYS 219, BYS 300 and BYS 321. Prerequisite with concurrency: CH 361.

BYS 431 - PRINCIPLES OF IMMUNOLOGY/A&M  
Semester Hours: 4
BYS 436 - BIOLOGICAL PSYCHOLOGY
Semester Hours: 3

Functional analysis of neural and endocrine systems underlying behavior. Same as PY 436. Prerequisites: (either a or b): (a) 15 hours of PY or approval of instructor; (b) BYS 120 or BYS 313, and 6 hours of PY.

BYS 437 - PSYCHOBIOLOGY STRESS & ILLNESS
Semester Hours: 3

Overview of psychological stress responses and their influence on health, behavior and illness. Same as PY 437. Prerequisites: approval of instructor.

BYS 464 - EVOLUTION
Semester Hours: 3

BYS 465 - MOLECULAR MTHDS ECLGY & EVOLU
Semester Hours: 4

This lecture and laboratory course is intended as an intense introduction to modern molecular methods in biological research. Topics include: genetic variation, evolutionary genetics, ecological genetics, genomics, gene expression, phylogenetics, and bioinformatics. Prerequisites: BYS 464.

BYS 490 - SENIOR CAPSTONE
Semester Hours: 2

Discussions, readings, and presentations of topical biological subjects using scientific literature. Capstone course emphasizing refinement of oral and written communication skills and critical thinking. All students will take ETS Major Field Test in Biology as part of the course grade. Prerequisites: BYS 119, 120, 219, and 300. Senior standing.

BYS 491 - SP TOPICS BIOLOGICAL SCI
Semester Hours: 1-4

Directed readings and/or written reports on topics of interest to individual students carried out under supervision of an instructor. Prerequisites: Permission of instructor required before registration.

BYS 492 - UNDERGRADUATE RESEARCH
Semester Hours: 2-4

For advanced-level biological sciences students with biological sciences GPA of 3.5 or above. Individual investigations into biological problems under direct supervision of instructor. May also be taken at the Marine Environmental Sciences Consortium, Dauphin Island, Alabama. Prerequisites: Permission of instructor required before registration.

BYS 499 - UNGRAD HONORS RES & THESIS
Semester Hours: 2-4

Individual investigations into biological problems under direct supervision of instructor. For honors students majoring in the biological sciences. Prerequisites: Approval of instructor, chair, and director of honors program; Senior Standing.

Marine Sciences

Select courses in marine sciences, available through the Marine Sciences Consortium at The Dauphin Island Sea Lab (http://www.disl.org), may be taken for credit at UAH toward a biological sciences major or minor, a minor in marine sciences, or a Master of Science degree in biological sciences. Marine sciences coursework must be approved by the Marine Sciences Consortium UAH liaison officer in the Biological Sciences Department prior to enrollment in the courses.

MS 202 - MARINE BIOLOGY
Semester Hours: 4

Survey of invertebrates, vertebrates, and marine plants as communities with local examples. Examination of marshland, estuarine, beach, dune, inlet and neritic habitats, and niches. Lecture/Lab/field work. Offered only at the Marine Environmental Sciences Consortium Sea Lab at Dauphin Island, AL. Prerequisites: BYS 119 and BYS 120.

MS 204 - COM MARINE FISHERIES/ALA
Semester Hours: 2

Biology, harvesting technology, and processing of commercially valuable fish and shellfish species of Alabama. Offered only at the Marine Environmental Sciences Consortium Sea Lab at Dauphin Island, Alabama. No credit for biological sciences major or minor; can be used for marine science minor.
MS 301 - MARINE TECH METHODS I  
Semester Hours: 2

Marine science research equipment, methods, and techniques. Operation and field maintenance of major sampling gear. Only at the Marine Environmental Sciences Consortium Sea Lab at Dauphin Island, Alabama. No credit for biological sciences major or minor; can be used for a marine science minor. Prerequisites: BYS 119 and BYS 120.

MS 303 - COASTAL CLIMATOLOGY  
Semester Hours: 2

Physical factors resulting in climactic conditions in and near coastal region. Emphasis on northern Gulf of Mexico. Only at the Marine Environmental Sciences Consortium Sea Lab at Dauphin Island, Alabama. No credit toward a biological sciences major or minor; can be used for a marine science minor.

MS 304 - COASTAL ZONE MANAGEMENT  
Semester Hours: 2

Examination of ecological features and physical management policies design for coastal communities and a review of the federal and state programs that impinge upon coastal ecological communities. Only at the Marine Environmental Sciences Consortium Sea Lab at Dauphin Island, Alabama.

MS 491 - SPECIAL TOPICS IN MARINE SCIEN  
Semester Hours: 1-4

Biological Sciences, BS

Biological Sciences, BS Requirements:

- Biological Sciences, BS degree requires 128 credit hours.
- 39 of 128 credit hours must be taken at 300 level or higher (39 credits includes courses taken at the 300+ level in major, minor (if chosen), Pre professional area and electives).
- 12 credit hours of 300 level and above must be taken in the major or 6 credit hours in the major and 6 credit hours in the minor (if chosen).
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- Unless otherwise noted a C- or better is required for all College of Science prerequisite courses.
- No more than 64 credit hours from a two-year college can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

Biology Elective Course Requirements 18

Choose BYS classes, Ex: BYS 321, BYS 312, etc. Enough credits to reach 18 credit hours.

Elective Courses 36-37

Elective courses 300+ level. If 18 credits of BYS electives and CH 331/CH 335 is chosen, take an additional 8 credits at 300+ level. If 18 credits of BYS electives and CH 201/CH 205 is chosen take an additional 12 credits at the 300+ level.

Additional Elective courses 100+ level to reach 128 credit hours. Electives can be taken from any department and do not have to be taken in your major or minor. No more than 4 credits of 100 level HPE courses can count toward degree requirements.

Total Semester Hours 128

1 Students must take one literature and one history course. Students must also take either a second literature or history course to complete a sequence. (EH 207 + EH 208, EH 209 + EH 210, EH 242 + EH 208, EH 242 + EH 210, HY 103 + HY 104, or HY 221 + HY 222)

2 Based on Math placement, (http://www.uah.edu/science/departments/math/undergraduate-students/placement) prerequisite MA 112 and/or MA 113 Mathematics courses may be required. If the student intends to pursue a course of study requiring more advanced mathematics background, MA 171 is recommended. Otherwise, MA 120 may be used to meet this requirement.

3 No more than 6 credit hours can be taken in a single discipline.

4 For choices see the World Languages and Cultures (http://catalog.uah.edu/undergrad/colleges-departments/arts-humanities-social-sciences/foreign-languages-literatures) department.

5 Biology pre requisites require a minimum grade of D- or higher. BYS 301 and BYS 314 pre requisites require a minimum grade of C- or higher.

Sample four year plan for Biological Sciences, BS degree:

Note: This is only an example and variations are possible.

¹ Students must take one literature and one history course. Students must also take either a second literature or history course to complete a sequence. (EH 207 + EH 208, EH 209 + EH 210, EH 242 + EH 208, EH 242 + EH 210, HY 103 + HY 104, or HY 221 + HY 222)+ HY 222)

² Based on Math placement, (http://www.uah.edu/science/departments/math/undergraduate-students/placement) prerequisite MA 112 and/or MA 113 Mathematics courses may be required.

³ No more than 6 credit hours can be taken in a single discipline.
For choices see the World Languages and Cultures (http://catalog.uah.edu/undergrad/colleges-departments/arts-humanities-social-sciences/foreign-languages-literatures) department.

Biology prerequisites require a minimum grade of D- or higher. BYS 301 (http://catalog.uah.edu/search/?P=BYS%20301) and BYS 314 (http://catalog.uah.edu/search/?P=BYS%20314) prerequisites require a minimum grade of C- or higher.

Sample four year plan for Biological Sciences, Biochemistry Concentration BS degree:

Note: This is only an example and variations are possible.

## Biological Sciences, BS - Ecology and Evolution Concentration

**Biological Sciences, Ecology and Evolution Concentration, BS Requirements:**
- Biological Sciences, Ecology and Evolution concentration BS degree requires 128 credit hours.
- 39 of 128 credit hours must be taken at 300 level or higher (39 credits includes courses taken at the 300+ level in major, minor (if chosen), Pre professional area and electives).
- 12 credit hours of 300 level and above must be taken in the major or 6 credit hours in the major and 6 credit hours in the minor (if chosen).
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- Unless otherwise noted a C- or better is required for all College of Science prerequisite courses.
- No more than 64 credit hours from a two-year college can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

| BYS 364 | BIOGEOGRAPHY |
| BYS 464 | EVOLUTION |
| BYS 465 | MOLECULAR MTHDS ECLGY & EVOLU |

**Elective Courses**

Elective courses 300+ level. 8 credits at 300+ level if CH 331/CH 335 chosen. 12 credits at 300+ level if CH 201/CH 205 is chosen.

Additional Elective courses 100+ level to reach 128 credit hours. Electives can be taken from any department and do not have to be taken in your major or minor. No more than 4 credits of 100 level HPE courses can count toward degree requirements.

**Total Semester Hours**

128

1. Students must take one literature and one history course. Students must also take either a second literature or history course to complete a sequence. (EH 207 + EH 208, EH 209 + EH 210, EH 242 + EH 208, EH 242 + EH 210, HY 103 + HY 104, or HY 221 + HY 222)+ HY 222)

2. Based on Math placement, (http://www.uah.edu/science/departments/math/undergraduate-students/placement) prerequisite MA 112 and/or MA 113 Mathematics courses may be required. If the student intends to pursue a course of study requiring more advanced mathematics background, MA 171 is recommended. Otherwise, MA 120 may be used to meet this requirement.

3. No more than 6 credit hours can be taken in a single discipline.

4. For choices see the World Languages and Cultures (http://catalog.uah.edu/undergrad/colleges-departments/arts-humanities-social-sciences/foreign-languages-literatures) department.

5. Biology pre requisites require a minimum grade of D- or higher. BYS 301 (http://catalog.uah.edu/search/?P=BYS%20301) and BYS 314 (http://catalog.uah.edu/search/?P=BYS%20314) pre requisites require a minimum grade of C- or higher.

---

**Biological Sciences, BS - Exercise Physiology Concentration**

The concentration emphasizes sports health to prepare for Professional schools such as Athletic training or Physical therapy. Additional coursework may be required for entry into such programs. See the Pre professional Advising office (http://www.uah.edu/ppa) for additional information.

**Biological Sciences, Exercise Physiology Concentration, BS Requirements:**

- Biological Sciences, Exercise Physiology concentration BS degree requires 128 credit hours.
- 39 of 128 credit hours must be taken at 300 level or higher (39 credits includes courses taken at the 300+ level in major, minor (if chosen), Pre professional area and electives).
- 12 credit hours of 300 level and above must be taken in the major or 6 credit hours in the major and 6 credit hours in the minor (if chosen).
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- Unless otherwise noted a C- or better is required for all College of Science prerequisite courses.
- No more than 64 credit hours from a two-year college can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

2nd History

3rd Social and Behavioral Science

Pre Professional

Computer Science: Choose one

- CS 100 INTRO COMPUTERS & PROGRAM
- or CS 102 INTRO TO C PROGRAMMING
- or CS 103 INTRO PROGRAMMING USING JAVA

Technical Writing

- EH 301 TECHNICAL WRITING

Biology Core

- BYS 119 PRINCIPLES OF BIOLOGY
- BYS 120 ORGANISMAL BIOLOGY
- BYS 219 GENETICS AND EVOLUTION
- BYS 300 CELL & DEVELOPMENTAL BIOLOGY
- BYS 490 SENIOR CAPSTONE

Microbiology Concentration Requirements

- BYS 321 GENERAL MICROBIOLOGY I
- BYS 322 GENERAL MICROBIOLOGY II
- BYS 361 GENERAL BIOCHEMISTRY
- BYS 430 IMMUNOLOGY

Biology Elective course 300+ level or higher, 3 credits

Chemistry Minor Requirements

- CH 121 GENERAL CHEMISTRY I
  & CH 125 and GENERAL CHEMISTRY LAB I
- CH 123 GENERAL CHEMISTRY II
  & CH 126 and GENERAL CHEMISTRY LAB II
- CH 223 QUANTITATIVE ANALYSIS
  & CH 224 and QUANTITATIVE ANALYSIS LAB
- CH 331 ORGANIC CHEMISTRY I
  & CH 335 and ORGANIC CHEMISTRY LAB I
- CH 332 ORGANIC CHEMISTRY II
  & CH 336 and ORGANIC CHEMISTRY LAB II
- CH 362 GENERAL BIOCHEMISTRY LAB

Elective Courses

- Elective course 300+ level or higher, 3 credits

Additional elective courses, 100+ level, 21-22 credits. Electives can be taken from any department and do not have to be taken in your major or minor. No more than 4 credits of 100 level HPE courses can count toward degree requirements.

Total Semester Hours

1 Students must take one literature and one history course. Students must also take either a second literature or history course to complete a sequence. (EH 207 + EH 208, EH 209 + EH 210, EH 242 + EH 208, EH 242 + EH 210, HY 103 + HY 104, or HY 221 + HY 222)

2 Based on Math placement, (http://www.uah.edu/science/departments/math/undergraduate-students/placement) prerequisite MA 112 and/or MA 113 Mathematics courses may be required. If the student intends to pursue a course of study requiring more advanced mathematics background, MA 171 is recommended. Otherwise, MA 120 may be used to meet this requirement.

3 No more than 6 credit hours can be taken in a single discipline.

4 For choices see the World Languages and Cultures (http://catalog.uah.edu/undergrad/colleges-departments/arts-humanities-social-sciences/foreign-languages-literatures) department.

5 Biology pre requisites require a minimum grade of D- or higher. BYS 301 (http://catalog.uah.edu/search/?P=BYS%20301) and BYS 314 (http://catalog.uah.edu/search/?P=BYS%20314) pre requisites require a minimum grade of C- or higher.

### Total Semester Hours:

- **128 hours**
### Biological Sciences, Pre Professional Health Careers Concentration, BS Requirements:

- Biological Sciences, Pre Health concentration BS degree requires 128 credit hours.
- 39 of 128 credit hours must be taken at 300 level or higher (39 credits includes courses taken at the 300+ level in major, minor (if chosen), Pre professional area and electives).
- 12 credit hours of 300 level and above must be taken in the major or 6 credit hours in the major and 6 credit hours in the minor (if chosen).
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- Unless otherwise noted a C- or better is required for all College of Science prerequisite courses.
- No more than 64 credit hours from a two-year college can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).
- See the Pre Professional Advising office (http://www.uah.edu/ppa) for additional information.

**Biological Sciences, BS - Secondary Education Concentration**

**Biological Sciences, Secondary Education Concentration, BS Requirements:**

- Biological Sciences, Secondary Education Concentration BS degree requires a minimum of 131 credit hours.
- 39 of 131 credit hours must be taken at 300 level or higher (39 credits includes courses taken at the 300+ level in major, minor (if chosen), Pre professional area and electives).
- 12 credit hours of 300 level and above must be taken in the major or 6 credit hours in the major and 6 credit hours in the minor (if chosen).
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- Unless otherwise noted a C- or better is required for all College of Science prerequisite courses.
- No more than 64 credit hours from a two-year college can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

---

1. Students must take one literature and one history course. Students must also take either a second literature or history course to complete a sequence. (EH 207 + EH 208, EH 209 + EH 210, EH 242 + EH 208, EH 242 + EH 210, HY 103 + HY 104, or HY 221 + HY 222)

2. Based on Math placement, prerequisite MA 112 and/or MA 113 Mathematics courses may be required. If the student intends to pursue a course of study requiring more advanced mathematics background, MA 171 is recommended. Otherwise, MA 120 may be used to meet this requirement.

3. No more than 6 credit hours can be taken in a single discipline.

4. For choices see the World Languages and Cultures (http://catalog.uah.edu/undergrad/colleges-departments/arts-humanities-social-sciences/foreign-languages-literatures) department.

5. Biology pre requisites require a minimum grade of D- or higher. BYS 301 (http://catalog.uah.edu/search/?P=BYS%20301) and BYS 314 (http://catalog.uah.edu/search/?P=BYS%20314) pre requisites require a minimum grade of C- or higher.

**Sample four year plan for Biological Sciences, Secondary Education Concentration, BS degree:**

Note: This is only an example and variations are possible.

Chemistry

203-C Materials Science Building
Telephone: 256.824.6153
Email: jeffrey.champoux@uah.edu (chem@uah.edu)

The Chemistry department approved by the American Chemical Society offers a Chemistry degree in the following concentrations:

- Chemistry, BS - Biochemistry Concentration (p. 516) (Leading to an ACS-certified degree, includes Biology minor, possible double major)
- Chemistry, BS - Pure Chemistry Concentration (p. 555) (Leading to an ACS-certified degree)
- Chemistry, BS - Chemical Physics Concentration (p. 531) (Leading to an ACS-certified degree)
- Chemistry, BS - Chemical Education Concentration (p. 527) (Leading to an ACS-certified degree)
- Chemistry, BS - Environmental Chemistry Concentration (p. 536) (Leading to an ACS-certified degree)
- Chemistry, BS - Chemical Business Concentration (p. 523) (includes Business minor)
- Chemistry, BS - Basic Chemistry Concentration (p. 512)

Program Objectives

The mission of the Department of Chemistry is to provide high quality undergraduate and graduate education in all aspects of chemistry, with a special emphasis in materials science and biotechnology. Our goal is to educate our students in chemistry, and to provide them with life-long learning skills allowing them to adapt to an ever-changing environment. Our faculty and students strive to generate new knowledge through research and other creative activities that will benefit the residents of Huntsville, the state of Alabama, the nation, and the world.

Learning Outcomes

Graduates in Chemistry will demonstrate:

- Sound conceptual understanding of basic concepts, methods, terminology, and theories of modern chemistry
- Ability to operate a suite of modern chemical instrumentation
- Ability to effectively present chemical knowledge

Majors in Chemistry

- Chemistry, BS - Biochemistry Concentration (p. 516) (Leading to an ACS-certified degree, includes Biology minor, possible double major)
- Chemistry, BS - Pure Chemistry Concentration (p. 555) (Leading to an ACS-certified degree)
- Chemistry, BS - Chemical Physics Concentration (p. 531) (Leading to an ACS-certified degree)
- Chemistry, BS - Chemical Education Concentration (p. 527) (Leading to an ACS-certified degree)
- Chemistry, BS - Environmental Chemistry Concentration (p. 536) (Leading to an ACS-certified degree)
- Chemistry, BS - Chemical Business Concentration (p. 523) (includes Business minor)
- Chemistry, BS - Basic Chemistry Concentration (p. 512)

Minors in Chemistry

- Chemistry Minor (p. 561)
- Chemistry Minor for Chemical Engineering Majors (p. 560)

UAH's Joint Undergraduate Master's Program (JUMP) allows undergraduate students to study at the graduate level. Taking graduate courses during the senior year reduces the time to get a graduate (MS) degree. Please visit JUMP (p. 20) page for general information.

Requirements For Admissions

1. Cumulative overall 3.5 GPA
2. Major GPA of 3.5
3. Student shall complete CH 121 + CH 125, CH 123 + CH 126, CH 223 + CH 224, CH 331 + CH 335, CH 332 + CH 336 by Junior year

Additional Information

- Maximum of 12 credit hours count toward both degrees

Designated Faculty Contact/Advisor

Dr. Carmen Scholz carmen.scholz@uah.edu 256.824.6188
CH 101 - INTRO TO CHEMISTRY
Semester Hours: 3
Properties of solids, liquids, gases, and solutions, atomic theory and bonding, concentration concepts, and physical and chemical properties of the more common elements and their compounds. No placement examination is required. Prerequisite: MA 110 or prerequisite with concurrency MA 112 or higher and CH 105.

CH 101R - RECITATION
Semester Hours: 0

CH 105 - INTRO CHEMISTRY LAB
Semester Hour: 1
Complements the lecture material for CH 101. Laboratory fundamentals and basic chemical principles. Prerequisite with concurrency: CH 101.

CH 121 - GENERAL CHEMISTRY I
Semester Hours: 3
For science and engineering majors. Chemical properties of elements, their periodic groups, and their compounds. Reactions and stoichiometry. Nature of the chemical bond, molecular structure, thermochemistry. Properties of gases, liquids, and solids. Prerequisite: CH 101 or placement test. Prerequisite with concurrency: MA 113 or higher, and CH 125.

CH 121R - RECITATION
Semester Hours: 0

CH 122 - GENERAL CHEMISTRY ENGINEERS
Semester Hours: 3
This course is designed as a one semester presentation of key aspects in general chemistry and is recommended for all engineering majors except chemical engineers. Covers topic on atoms and molecules: reactions and stoichiometry; gases; the periodic table; atomic structure, chemical bonding and molecular structure; materials; energy, entropy, and free energy; kinetics and equilibrium; and electrochemistry. Substitutes for CH 121 when transferred to any other curriculum.

CH 123 - GENERAL CHEMISTRY II
Semester Hours: 3
Continuation of CH 121 with in-depth study of topics listed. To be taken concurrently with CH 126. Prerequisite: CH 121.

CH 123R - RECITATION
Semester Hours: 0

CH 125 - GENERAL CHEMISTRY LAB I
Semester Hour: 1
Complements the lecture material for CH 121. Includes the determination of chemical and physical properties of materials, synthesis and characterization, and introduction to spectroscopy. Prerequisite with concurrency: CH 121.

CH 126 - GENERAL CHEMISTRY LAB II
Semester Hour: 1
Complements the lecture material of CH 123. Includes an introduction to qualitative and quantitative analytical techniques. Prerequisite with concurrency: CH 123.

CH 191 - FUNDAMENTALS OF CHEMICAL RES
Semester Hour: 1
Personalized programs to introduce beginning students to undergraduate research. Introduction to laboratory research techniques. Approval of supervising faculty member and chemistry chair required. Registration utilizes last digit of course number to designate semester-hour credit.

CH 192 - FUNDAMENTALS OF CHEMICAL RES
Semester Hours: 2
Personalized programs to introduce beginning students to undergraduate research. Introduction to laboratory research techniques. Approval of supervising faculty member and chemistry chair required. Registration utilizes last digit of course number to designate semester-hour credit.

CH 193 - FUNDAMENTALS OF CHEMICAL RES
Semester Hours: 3
Personalized programs to introduce beginning students to undergraduate research. Introduction to laboratory research techniques. Approval of supervising faculty member and chemistry chair required. Registration utilizes last digit of course number to designate semester-hour credit.
CH 201 - ELEM ORGANIC CHEMISTRY
Semester Hours: 3

Survey of nomenclature, structure, functional groups, properties and reactions of organic compounds. Prerequisites: CH 101 and 105 OR CH 121 and 125. Prerequisite with concurrency: CH 205.

CH 205 - ELEM ORGANIC CHEMISTRY LAB
Semester Hour: 1

Laboratory component of CH 201. Includes reactions of organic compounds and functional group modifications. Prerequisite with concurrency: CH 201. Prerequisites: CH 101/105 or CH 201/205.

CH 211 - ANALYTICAL CHEMISTRY/OAKWOOD
Semester Hours: 3

CH 223 - QUANTITATIVE ANALYSIS
Semester Hours: 3

Introduction to quantitative analytical chemistry including instrumentation. Data treatment, ionic equilibria, elementary electrochemical, spectrochemical, gravimetric, and volumetric techniques. Prerequisite: CH 126. Prerequisite with concurrency: CH 224.

CH 224 - QUANTITATIVE ANALYSIS LAB
Semester Hour: 1

Introduction to quantitative analytical chemistry laboratory. Experiments include pH measurements, spectrochemical, gravimetric, and volumetric titrations. Prerequisite: CH 126. Prerequisite with concurrency: CH 223.

CH 301 - ELEMENTARY BIOCHEMISTRY
Semester Hours: 3

Survey of structure and function of carbohydrates, lipids, proteins and nucleic acids. Enzyme properties and functions. Major metabolic pathways, interactions, and regulation. No credit given to chemistry majors of minors. Credit in CH 361 precludes credit in CH 301. Same as BYS 301. Prerequisites: BYS 120 and either CH 201 or 331.

CH 311 - ORGANIC CHEMISTRY I/OAKWOOD
Semester Hours: 3,4

CH 311L - ORGANIC CHEM I LAB/OAKWOOD
Semester Hour: 1

CH 312 - ORGANIC CHEMISTRY/OAKWOOD
Semester Hours: 3

CH 315 - CHEMISTRY TEACHING METHODS
Semester Hours: 3

Designed for students pursuing a Class B High School Teacher's Certificate. The course explores methods of presentation of chemical principles, including chemical demonstrations. Prerequisites: CH 201 or 223. Permission of instructor.

CH 331 - ORGANIC CHEMISTRY I
Semester Hours: 3

Lecture/Lab includes one two-hour recitation per week. Chemistry of organic compounds. Synthetic methods, theory, and reaction mechanisms. Prerequisites: CH 123.

CH 331R - ORGANIC CHEM I RECITATION
Semester Hours: 0

To be taken as a co-requisite with CH 331. Organic chemistry problem solving, including nomenclature, reactions, mechanisms, spectroscopy, and test-taking strategy.

CH 332 - ORGANIC CHEMISTRY II
Semester Hours: 3

Lecture/Lab Includes one two-hour recitation per week. Continuation of CH 331. Prerequisites: CH 331.

CH 332R - ORGANIC CHEM II RECITATION
Semester Hours: 0

To be taken as a co-requisite with CH 332. Organic chemistry problem solving, including nomenclature, reactions, mechanisms, spectroscopy, and test-taking strategy.
CH 335 - ORGANIC CHEMISTRY LAB I  
Semester Hour: 1  
Techniques of organic chemistry including synthesis, separation, and identification of organic compounds with use of chemical and spectroscopic methods. Prerequisite with concurrency: CH 331. Prerequisites: CH 126.

CH 336 - ORGANIC CHEMISTRY LAB II  
Semester Hour: 1  
Continuation of CH 335. Prerequisite: CH 335. Prerequisite with concurrency: CH 332.

CH 337 - ORGANIC CHEMISTRY LAB III  
Semester Hours: 2  
Advanced organic chemistry laboratory treating reactions and techniques not covered in CH 335 and 336. Pursuit of a special open-ended problem by each student. Prerequisites: CH 336 and approval of instructor.

CH 341 - PHYSICAL CHEMISTRY I  
Semester Hours: 3  
An introduction to physical chemistry encompassing: the kinetic theory of gases, the laws of thermodynamics, chemical equilibrium, phase equilibria, electrolyte solutions, electrochemistry and elementary theories of statistical thermodynamics. Credit in CH 341 precludes credit in CH 347. Prerequisites: CH 123, PH 112, MA 201, PH 115.

CH 342 - PHYSICAL CHEMISTRY II  
Semester Hours: 3  
A survey of additional fundamental concepts of physical chemistry including: chemical kinetics, quantum chemistry, atomic structure, group theory, spectroscopy (i.e. IR, Raman, NMR, EMR, etc.), and surface and colloid chemistry. Credit in 342 precludes credit in CH 348. Prerequisite: CH 341.

CH 343 - INTRO TO QUANTUM CHEM  
Semester Hours: 3  
Quantum mechanical treatment of atoms, molecules, and spectroscopy. Prerequisites: CH 341 and MA 238.

CH 345 - EXPERIMENTAL PHYSICAL CHEM I  
Semester Hour: 1  
Laboratory and computer investigation into topics covered in physical chemistry CH 341. Includes thermodynamics, chemical equilibria and electrochemistry. The lab involves report writing, data and error analysis, error propagation and linear and nonlinear regression using appropriate software. Prerequisites: CH 223 and 224. Prerequisite with concurrency: CH 341 or 347.

CH 346 - EXPERIMENTAL PHYSICAL CHEM II  
Semester Hour: 1  
Laboratory and computer investigations into topics covered in physical chemistry CH 342. Includes kinetics, quantum mechanics and spectroscopy. The lab involves report writing, data and error analysis, error propagation and linear and nonlinear regression using appropriate software. Prerequisites: CH 345. Prerequisite with concurrency: CH 342 or 348.

CH 347 - BIOPHYSICAL CHEMISTRY I  
Semester Hours: 3  

CH 348 - BIOPHYSICAL CHEMISTRY II  
Semester Hours: 3  

CH 361 - GENERAL BIOCHEMISTRY  
Semester Hours: 3  
Nomenclature, structure, function, properties, and metabolism of amino acids, carbohydrates, lipids, and nucleic acids. Enzyme function, major catabolic pathways, their interrelations and control mechanisms. Glycolysis, Citric Acid Cycle, and oxidative phosphorylation. Same as BYS 361. Prerequisites: BYS 120, CH 223, CH 224, CH 332, CH 335 OR BYS 311, CH 332, CH 335.
CH 362 - GENERAL BIOCHEMISTRY LAB
Semester Hour: 1

Lecture/Lab One 3-hour lab a week. Practical experience in isolation, qualitative identification, and quantitative estimation of biomolecules. Same as BYS 362. Prerequisites: CH 335 and 336. Prerequisite with concurrency: CH 361.

CH 363 - GEN BIOCHEMISTRY II
Semester Hours: 3

A continuation of CH 361 to include fatty acid and amino acid oxidation, enzymatic synthesis of biomolecules, integration of metabolic processes, DNA and RNA metabolism including replication and transcription, translation and protein synthesis, and regulation of gene expression. Same as BYS 363. Prerequisites: CH 361.

CH 364 - GEN BIOCHEMISTRY LAB II
Semester Hour: 1

Experimental course illustrating the topics in CH 363. Prerequisites: CH 361 and 362. Prerequisite with concurrency: CH 363.

CH 401 - INORGANIC CHEMISTRY
Semester Hours: 3

Fundamental topics in inorganic chemistry. Atomic structure, chemical bonding, symmetry, acid-base theories, non-aqueous solvents, coordination chemistry, crystal field and ligand field theory, main group and transition metal chemistry, organometallics, catalysis, and bioinorganic chemistry. Prerequisites: CH 332.

CH 402 - INORGANIC CHEMISTRY LAB
Semester Hour: 1

Laboratory techniques of inorganic chemistry including synthesis, purification, isolation, and identification of inorganic compounds. Prerequisite with concurrency: CH 401.

CH 407 - BIOCHEMISTRY I/A&M
Semester Hours: 3

CH 421 - INSTRUMENTAL ANALYSIS
Semester Hours: 4

Introduction to modern analytical instrumentation including IR, UV and atomic absorption spectrophotometers, nuclear magnetic resonance, electroanalytical equipment, and gas and liquid chromatographs. Lecture and laboratory. Prerequisite with concurrency: CH 347, or BYS 341, or CH 341.

CH 435 - CHEMICAL TOXICOLOGY
Semester Hours: 3

An introduction to the principles of chemical toxicology, including the effects of drugs, environmental pollutants, natural toxins and venoms, and other potentially hazardous chemicals, at the physiological, cellular, and molecular level. Prerequisites: CH 332 and CH 361.

CH 440 - POLYMER SYNTHESIS & CHARACTERIZATION
Semester Hours: 3

Synthesis of commercially relevant and novel polymers. Polymer characteristics and a discussion of the structural dependence of polymer properties. Course completion and/or grade requirements for undergraduate credit will differ from those for graduate credit. Prerequisites: CH 331 and CH 332.

CH 480 - SELECTED TOPICS IN CHEM
Semester Hours: 1-3

Special offerings to students in areas of interest not covered in present curriculum. Prerequisites: senior standing and approval of instructor.

CH 491 - INTRO TO CHEMICAL RESEARCH
Semester Hour: 1

Personalized programs to round out the undergraduate curriculum of students with various goals. Registration utilizes last digit of course number to designate semester hour credit. Student normally may elect only up to 6 hours. Prerequisites: Senior standing. Approval of supervising faculty member and chemistry chair required.

CH 492 - INTRO TO CHEMICAL RESEARCH
Semester Hours: 2

Personalized programs to round out the undergraduate curriculum of students with various goals. Registration utilizes last digit of course number to designate semester hour credit. Student normally may elect only up to 6 hours. Prerequisites: Senior standing. Approval of supervising faculty member and chemistry chair required.
CH 493 - INTRO TO CHEMICAL RESEARCH
Semester Hours: 3

Personalized programs to round out the undergraduate curriculum of students with various goals. Registration utilizes last digit of course number to designate semester hour credit. Student normally may elect only up to 6 hours. Prerequisites: Senior standing. Approval of supervising faculty member and chemistry chair required.

Chemistry, BS

The BS degree in Chemistry consists of the University Charger Foundation requirements, the major core courses, the major elective courses, and ancillary requirements. Beyond these the student may elect other course work to attain 128 semester hours with at least 39 semester hours at the level of 300 or above. The student may also elect a particular concentration. The concentration may require more than 128 semester hours of course work.

The B.S. in Chemistry consists of:

- Major core
- Major electives
- BS General Education Requirements (GER)
- Ancillary requirements
- General electives

Chemistry, BS - Basic Chemistry Concentration

This curriculum meets the minimum university requirements for a major in chemistry.

Chemistry: Basic Chemistry Concentration, BS Requirements:

- Chemistry, Basic Chemistry Concentration, BS degree requires 128 credit hours.
- 39 of 128 credit hours must be taken at 300 level or higher (39 credits includes courses taken at the 300+ level in major, minor (if chosen), Pre professional area and electives).
- 12 credit hours of 300 level and above must be taken in the major or 6 credit hours in the major and 6 credit hours in the minor (if chosen).
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- Unless otherwise noted a C- or better is required for all College of Science prerequisite courses.
- No more than 64 credit hours from a two-year college can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

Courses in organic chemistry completed at the junior college level may be used to satisfy semester hour and prerequisite requirements for upper level chemistry courses at UAH but do not count toward the 300-level requirements of the minor.

### Total Semester Hours

128

### Notes

1. Students must take one literature and one history course. Students must also take either a second literature or history course to complete a sequence. (EH 207 + EH 208, EH 209 + EH 210, EH 242 + EH 208, EH 242 + EH 210, HY 103 + HY 104, or HY 221 + HY 222)
2. Based on Math placement (http://www.uah.edu/science/departments/math/undergraduate-students/placement), prerequisite (MA 112 or MA 113) Mathematics courses may be required.
3. No more than 6 hours can be taken in a single discipline.
4. For choices see the World Languages and Cultures (p. 210) department.
5. Courses in organic chemistry completed at the 2-year college level may be used to satisfy semester hour and prerequisite requirements for upper level chemistry courses at UAH but do not count toward the 300-level requirements of the minor.

**Chemistry, BS - Biochemistry Concentration**

This concentration meets the requirements of the American Chemical Society for certification and serves as preparation for medical school, dental school, veterinary school, pharmacy school, graduate study in biochemistry or employment as a clinical chemist.
Chemistry: Biochemistry Concentration, BS Requirements:

- Chemistry, Biochemistry Concentration, BS degree requires 128 credit hours.
- 39 of 128 credit hours must be taken at 300 level or higher (39 credits includes courses taken at the 300+ level in major, minor (if chosen), Pre professional area and electives).
- 12 credit hours of 300 level and above must be taken in the major or 6 credit hours in the major and 6 credit hours in the minor (if chosen).
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- Unless otherwise noted a C- or better is required for all College of Science prerequisite courses.
- No more than 64 credit hours from a two-year college can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).
- Please see the Pre-Professional Advising Office (http://www.uah.edu/ppa) for information about requirements for admission to specific professional schools.

</tr>
</tbody>
</table>

(Immunology is required for admission to many Pharmacy schools)

For a double major with Biology, count Biochemistry I and lab as Biology and add BYS 490 and 8 hours of Biology credit (BYS 313+ BYS 314 for example).

Elective Courses

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
</table>

Electives can be taken from any department and do not have to be taken in your major or minor. No more than 4 credits of 100 level HPE courses can count toward degree requirements

Total Semester Hours 128

1. Students must take one literature and one history course. Students must also take either a second literature or history course to complete a sequence. (EH 207 + EH 208, EH 209 + EH 210, EH 242 + EH 208, EH 242 + EH 210, HY 103 + HY 104, or HY 221 + HY 222)
2. Based on Math placement (http://www.uah.edu/science/departments/math/undergraduate-students/placement), prerequisite (MA 112 and/or MA 113) Mathematics courses may be required.
3. No more than 6 hours can be taken in a single discipline.
4. For choices see the World Languages and Cultures (p. 210) department.
5. Courses in organic chemistry completed at the 2-year college level may be used to satisfy semester hour and prerequisite requirements for upper level chemistry courses at UAH but do not count toward the 300-level requirements of the major.

Sample four year plans for Chemistry, Biochemistry Concentration BS degree:

Note: These are only examples and variations are possible.
Example 1: Chemistry major with Biology minor

Chemistry, BS - Chemical Business Concentration

This curriculum is designed to prepare a student to perform business functions in the chemical or pharmaceutical industry.

Chemistry: Chemical Business Concentration, BS Requirements:
- Chemistry, Chemical Business Concentration, BS degree requires 128 credit hours.
- 39 of 128 credit hours must be taken at 300 level or higher (39 credits includes courses taken at the 300+ level in major, minor (if chosen), Pre professional area and electives).
- 12 credit hours of 300 level and above must be taken in the major or 6 credit hours in the major and 6 credit hours in the minor (if chosen).
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- Unless otherwise noted a C- or better is required for all College of Science prerequisite courses.
- No more than 64 credit hours from a two-year college can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

FIN 375  FINANCIAL INSTITUTIONS
MGT 301  MANAGING ORGANIZATIONS
MKT 301  PRINCIPLES OF MARKETING

Elective Courses  13
Electives can be taken from any department and do not have to be taken in your major or minor. No more than 4 credits of 100 level HPE courses can count toward degree requirements.

Total Semester Hours  128

1 Students must take one literature and one history course. Students must also take either a second literature or history course to complete a sequence. (EH 207 + EH 208, EH 209 + EH 210, EH 242 + EH 208, EH 242 + EH 210, HY 103 + HY 104, or HY 221 + HY 222)
2 Based on Math placement (http://www.uah.edu/science/departments/math/undergraduate-students/placement), prerequisite (MA 112 and/or MA 113) Mathematics courses may be required.
3 No more than 6 hours can be taken in a single discipline.
4 For choices see the World Languages and Cultures (p. 210) department.
5 Courses in organic chemistry completed at the 2-year college level may be used to satisfy semester hour and prerequisite requirements for upper level chemistry courses at UAH but do not count toward the 300-level requirements of the minor.

Chemistry, BS - Chemical Education Concentration

This concentration meets the requirements of the American Chemical Society for certification and meets the requirements for an Alabama Class B High School Teacher's Certificate.

Chemistry: Chemical Education Concentration, BS Requirements:

- Chemistry, Chemical Education Concentration, BS degree requires 128 credit hours.
- 39 of 128 credit hours must be taken at 300 level or higher (39 credits includes courses taken at the 300+ level in major, minor (if chosen), Pre professional area and electives).
- 12 credit hours of 300 level and above must be taken in the major or 6 credit hours in the major and 6 credit hours in the minor (if chosen).
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- Unless otherwise noted a C- or better is required for all College of Science prerequisite courses.
- No more than 64 credit hours from a two-year college can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

### Total Semester Hours

139-140

1 Students must take one literature and one history course. Students must also take either a second literature or history course to complete a sequence. (EH 207 + EH 208, EH 209 + EH 210, EH 242 + EH 208, EH 242 + EH 210, HY 103 + HY 104, or HY 221 + HY 222)

2 Based on Math placement (http://www.uah.edu/science/departments/math/undergraduate-students/placement), prerequisite (MA 112 and/or MA 113) Mathematics courses may be required.
No more than 6 hours can be taken in a single discipline.

For choices see the World Languages and Cultures (p. 210) department.

Courses in organic chemistry completed at the 2-year college level may be used to satisfy semester hour and prerequisite requirements for upper level chemistry courses at UAH but do not count toward the 300-level requirements of the minor.

Sample four year plan for Chemistry, Chemical Education Concentration BS degree:

Note: This is only an example and variations are possible.

Total Semester Hours: 139

Chemistry, BS - Chemical Physics Concentration
This concentration meets the requirements of the American Chemical Society for certification and is designed for students interested in physicochemical phenomena of atoms, molecules, and condensed matter.

**Chemistry: Chemical Physics Concentration, BS Requirements:**
- Chemistry, Chemical Physics Concentration, BS degree requires 128 credit hours.
- 39 of 128 credit hours must be taken at 300 level or higher (39 credits includes courses taken at the 300+ level in major, minor (if chosen), Pre professional area and electives).
- 12 credit hours of 300 level and above must be taken in the major or 6 credit hours in the major and 6 credit hours in the minor (if chosen).
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- Unless otherwise noted a C- or better is required for all College of Science prerequisite courses.
- No more than 64 credit hours from a two-year college can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

Chemistry, BS - Environmental Chemistry Concentration

Chemistry: Environmental Chemistry Concentration, BS Requirements:
- Chemistry, Environmental Chemistry Concentration, BS degree requires 128 credit hours.
- 39 of 128 credit hours must be taken at 300 level or higher (39 credits includes courses taken at the 300+ level in major, minor (if chosen), Pre professional area and electives).
- 12 credit hours of 300 level and above must be taken in the major or 6 credit hours in the major and 6 credit hours in the minor (if chosen).
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- Unless otherwise noted a C- or better is required for all College of Science prerequisite courses.
- No more than 64 credit hours from a two-year college can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

</tbody>
</table>

### Total Semester Hours

128

---

1. Students must take one literature and one history course. Students must also take either a second literature or history course to complete a sequence. (EH 207 + EH 208, EH 209 + EH 210, EH 242 + EH 208, EH 242 + EH 210, HY 103 + HY 104, or HY 221 + HY 222)

2. Based on Math placement (http://www.uah.edu/science/departments/math/undergraduate-students/placement), prerequisite (MA 112 and/or MA 113) Mathematics courses may be required.

3. No more than 6 hours can be taken in a single discipline.

4. For choices see the World Languages and Cultures (p. 210) department.

5. Courses in organic chemistry completed at the 2-year college level may be used to satisfy semester hour and prerequisite requirements for upper level chemistry courses at UAH but do not count toward the 300-level requirements of the minor.

Chemistry, BS - Forensics Chemistry Concentration

This concentration meets the requirements of the American Chemical Society for certification and is designed for a student who plans to do graduate work in forensics chemistry or a related science or desires a forensics science position.

Chemistry: Forensics Chemistry Concentration, BS Requirements:

- Chemistry, Forensics Chemistry Concentration, BS degree requires 128 credit hours.
- 39 of 128 credit hours must be taken at 300 level or higher (39 credits includes courses taken at the 300+ level in major, minor (if chosen), Pre professional area and electives).
- 12 credit hours of 300 level and above must be taken in the major--or 6 credit hours in the major and 6 credit hours in the minor (if chosen).
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- No more than 64 credit hours from a two-year college can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

**Elective Courses**

Additional Elective courses 100+ level to reach 128 credit hours. Electives can be taken from any department and do not have to be taken in your major or minor. No more than 4 HPE 100 level courses can count towards degree requirements.

**Total Semester Hours**

128

---

1. Students must take one literature and one history course. Students must also take either a second literature or history course to complete a sequence. (EH 207 + EH 208, EH 209 + EH 210, HY 103 + HY 104, or HY 221 + HY 222)

2. Based on Math placement (http://www.uah.edu/science/departments/math/undergraduate-students/placement), prerequisite (MA 112 and/or MA 113) Mathematics courses may be required.

3. No more than 6 hours can be taken in a single discipline.

4. For choices see the World Languages and Cultures (p. 210) department.

**Chemistry, BS - Materials Chemistry Concentration**

This concentration meets the requirements of the American Chemical Society for certification and is designed for students who want to pursue graduate studies or employment in materials chemistry.
Chemistry: Materials Chemistry Concentration, BS Requirements:

- Chemistry, Materials Chemistry Concentration, BS degree requires 128 credit hours.
- 39 of 128 credit hours must be taken at 300 level or higher (39 credits includes courses taken at the 300+ level in major, minor (if chosen), Pre Professional area and electives).
- 12 credit hours of 300 level and above must be taken in the major—or 6 credit hours in the major and 6 credit hours in the minor (if chosen).
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- No more than 64 credit hours from a two-year college can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

Elective Courses

Elective course 300+ level, 0-1 credit
Additional elective courses, 100+ level, 0-2 credits. Electives can be taken from any department and do not have to be taken in your major or minor. No more than 4 credits of 100 level HPE courses can count toward degree requirements.

Total Semester Hours 128

1 Students must take one literature and one history course. Students must also take either a second literature or history course to complete a sequence. (EH 207 + EH 208, EH 209 + EH 210, HY 103 + HY 104, or HY 221 + HY 222)
2 Based on Math placement (http://www.uah.edu/science/departments/math/undergraduate-students/placement), prerequisite (MA 112 and/or MA 113) Mathematics courses may be required.
3 No more than 6 hours can be taken in a single discipline.
4 For choices see the World Languages and Cultures (p. 210) department.

Chemistry, BS - Pre-Pharmacy Concentration

Chemistry-biological sciences program designed to prepare students for admission to pharmacy doctorate or pharmacology Ph.D. graduate programs. This major meets all of the requirements for admission to Auburn or Samford pharmacy schools.

Chemistry: Prepharmacy Concentration, BS Requirements:

- Chemistry, Prepharmacy Concentration, BS degree requires 128 credit hours.
- 39 of 128 credit hours must be taken at 300 level or higher (39 credits includes courses taken at the 300+ level in major, minor (if chosen), Pre professional area and electives).
- 12 credit hours of 300 level and above must be taken in the major—or 6 credit hours in the major and 6 credit hours in the minor (if chosen).
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- No more than 64 credit hours from a two-year college can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

**Electives**

Additional Elective courses 100+ level, 1 credit to reach 128 credit hours. Electives can be taken from any department and do not have to be taken in your major or minor. No more than 4 HPE 100 level courses can count towards degree requirements.

**Total Semester Hours**

128

1. Students must take one literature and one history course. Students must also take either a second literature or history course to complete a sequence. (EH 207 + EH 208, EH 209 + EH 210, HY 103 + HY 104, or HY 221 + HY 222)
2. Based on Math placement (http://www.uah.edu/science/departments/math/undergraduate-students/placement), prerequisite (MA 112 and/or MA 113) Mathematics courses may be required.
3. No more than 6 hours can be taken in a single discipline.
4. For choices see the World Languages and Cultures (p. 210) department.
5. Courses in organic chemistry completed at the junior college level may be used to satisfy semester hour and prerequisite requirements for upper level chemistry courses at UAH but do not count toward the 300-level requirements of the minor.

**Sample four year plan for Chemistry, Pre-Pharmacy Concentration BS degree:**

Chemistry, BS - Pre-Professional Concentration

The reduced course requirement for the major in chemistry in this curriculum permits the student to prepare for medical or dental school and to sample courses and subjects outside of the major.

Chemistry: Preprofessional Concentration, BS Requirements:

- Chemistry, Preprofessional Concentration, BS degree requires 128 credit hours.
- 39 of 128 credit hours must be taken at 300 level or higher (39 credits includes courses taken at the 300+ level in major, minor (if chosen), Pre professional area and electives).
- 12 credit hours of 300 level and above must be taken in the major--or 6 credit hours in the major and 6 credit hours in the minor (if chosen).
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- No more than 64 credit hours from a two-year college can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

## Chemistry, BS - Pure Chemistry Concentration

This concentration meets the requirements of the American Chemical Society for certification and is designed for a student who plans to do graduate work in chemistry or a related science or desires an industrial position that requires a strong chemical background.

### Chemistry: Pure Chemistry Concentration, BS Requirements:

- Chemistry, Pure Chemistry Concentration, BS degree requires 128 credit hours.
- 39 of 128 credit hours must be taken at 300 level or higher (39 credits includes courses taken at the 300+ level in major, minor (if chosen), Pre professional area and electives).
- 12 credit hours of 300 level and above must be taken in the major or 6 credit hours in the major and 6 credit hours in the minor (if chosen).
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
• Unless otherwise noted a C- or better is required for all College of Science prerequisite courses.
• No more than 64 credit hours from a two-year college can be applied toward a UAH degree.
• For graduation application instructions, see here (p. 806).

**Elective Courses**

Elective courses 300+ level: 3-5 credits.

Additional Elective courses: 16 credits. Electives can be taken from any department and do not have to be taken in your major or minor. No more than 4 credits of 100 level HPE courses can count toward degree requirements

| Total Semester Hours | 128 |

1. Students must take one literature and one history course. Students must also take either a second literature or history course to complete a sequence. (EH 207 + EH 208, EH 209 + EH 210, EH 242 + EH 208, EH 242 + EH 210, HY 103 + HY 104, or HY 221 + HY 222)

2. Based on Math placement (http://www.uah.edu/science/departments/math/undergraduate-students/placement), prerequisite (MA 112 and/or MA 113) Mathematics courses may be required.

3. No more than 6 hours can be taken in a single discipline.

4. For choices see the World Languages and Cultures (p. 210) department.

5. Courses in organic chemistry completed at the 2-year college level may be used to satisfy semester hour and prerequisite requirements for upper level chemistry courses at UAH but do not count toward the 300-level requirements of the major.

Total Credits: 21-22
The Computer Science department offers the following undergraduate degrees:

- Computer Science, BS (p. 567)
- Computer Science, BS - Entertainment Computing Concentration (p. 577)

Program Objectives
The Computer Science Department, with commitment to excellence in teaching, research, service, and overall development of students, has two primary objectives. First to be nationally and internationally recognized as an institution to which government, industry, and academic leaders turn for opinions on societal issues, especially those involving technology. Second, to ensure an environment where curiosity, discovery, innovation, and entrepreneurship are valued.

Learning Outcomes
Computer Science graduates will be

- Proficient in developing software using modern programming languages
- Proficient in applying mathematical and algorithmic foundations to computing problems
- Effective in team environments to accomplish common goals

Majors in Computer Science
- Computer Science, BS (p. 567)
- Computer Science, BS - Entertainment Computing Concentration (p. 577)

For more information about the Computer Science department, please visit cs.uah.edu.

Minors in Computer Science
- Computer Science (p. 582)
- Computer Languages and Systems (p. 581)
- Entertainment Computing (p. 582)

UAH's Joint Undergraduate Master's Program (JUMP) allows undergraduate students to study at the graduate level. By taking graduate courses in your senior year you could reduce the time taken to get a graduate (MS) degree. Please visit JUMP (p. 20) page for general information.

Requirements For Admission
1. Cumulative overall 3.25 GPA
2. Major GPA of 3.5
3. Must complete CS 317 and CS 321 before applying to program

Additional Information
1. Maximum of 12 credit hours count toward both degrees
2. CS 413, CS 490, CS 499, and as many CS elective courses as needed to complete the undergraduate major requirement
3. Student will take CS 524 instead of CS 424 and up to three additional graduate courses to be chosen in conjunction with the JUMP advisor

Designated Faculty Contact/Advisor
Dr. Weisskopf mary.weisskopf@uah.edu
256.824.6306
CS 100 - INTRO COMPUTERS & PROGRAM
Semester Hours: 3

Introduction to program design and implementation in the Visual Basic programming language, using hands-on programming assignments, class demonstrations and lectures. Problem analysis and some testing techniques. Basic program structure, data types, control structures, and file organization.

CS 102 - INTRO TO C PROGRAMMING
Semester Hours: 3

Introduction to program design and implementation in the C programming language, using hands-on programming assignments, class demonstrations and lectures. Problem analysis and some testing techniques. Basic program structure, and file organization.

CS 103 - INTRO PROGRAMMING USING JAVA
Semester Hours: 3

Introduction to program design and implementation in the Java programming language, using hands-on programming assignments, class demonstrations and lectures. Problem analysis and some testing techniques. Basic program structure, data types, control structures, methods and file organization.

CS 105 - COMP Sci SEM:ETH/PROFESS
Semester Hour: 1

Issues associated with the ethical use of computers in the information age. Ethics, professionalism, software piracy, copyrighting software, ethical standards and the impact of computers on society will be covered. Familiarization with the local computing environment will also be covered.

CS 109 - INTRO TO PROGRAMMING II/A&M UN
Semester Hours: 3

CS 121 - COMPUTER SCIENCE I
Semester Hours: 3

Review of problem solving techniques, algorithm development, and fundamental language features; e.g., loops, decisions. In depth coverage of functions, arrays, I/O. Principles of software design, implementation, and testing. Introduction to object oriented design and the C++ programming language. Prerequisites: CS 102 or 103, and either MA 113, 115, 120, 171, 172, 201, 238, or 244.

CS 143 - INTRO TECH MULTIMEDIA & GAMING
Semester Hours: 3

Introduction to terminology, technologies and tools for multimedia and gaming. Elements such as text, sound, images, animation, video, and how they are represented, captured, edited, stored, and published. Overview of multimedia and gaming technologies, multimedia authoring, publishing on the web.

CS 214 - INTRO DISCRETE STRUCTURE
Semester Hours: 3

Review of set algebra including mappings and relations. Algebraic structures including semigroups and groups. Elements of theory of directed and undirected graphs; Boolean algebra and propositional logic and applications of these structures to various areas of computer science. Prerequisites: MA 171 and either CS 121 or CPE 112 or CPE 211.

CS 217 - ANALYTIC TECH GAMING
Semester Hours: 3

Mathematics for understanding & implementing 3-dimensional graphics & interactive physical modeling in computer games. Topics: coordinate systems, vectors, matrices, transformations, kinematics, dynamics, automata, and probability. Focused on practical mathematics rather than theoretical derivations. Prerequisites: MA 120 or MA 171.

CS 221 - COMP SCI II: DATA STRUCTURES
Semester Hours: 3

Advanced features of the C++ programming language, including pointers, recursion, classes, and inheritance. Fundamental data structures including linked lists, stacks, queues, binary search trees. Basic sort and search algorithms. Design, development, and documentation of object-oriented programs. Prerequisites: CS 121. Either MA 113, or 115. Prerequisites with concurrency: MA 171 or CS 217.

CS 251 - C++ PROGRAMMING/CALHOUN
Semester Hours: 3

CS 261 - COBOL PROGRAMMING/CALHOUN
Semester Hours: 3.3
CS 307 - OBJECT ORIENT/PROG C++
Semester Hours: 3

Emphasis on principles of software engineering and object-oriented design. Practical experience using the standard C++ library, the standard template library, and design patterns. Introduction to and experience with graphical user interface applications. Prerequisites: CS 221.

CS 308 - ASSEMBLY LANGUAGE PROGRAMMING
Semester Hours: 3

Programming in a representative assembly language, including floating point programming. Overview of software systems: loaders, assemblers, compiler, interpreters, operating systems.

CS 309 - COMPUTER ORG & SWITCHNG THRY
Semester Hours: 3

Boolean algebra, Boolean function minimization techniques, design and analysis of combinational circuits, design and analysis of sequential circuits. Computer hardware organization, including CPU, instruction representation and executive. Programming in a representative assembly language, including floating point programming. Overview of software systems: loaders, assembler, compiler, interpreters, operating systems. A lab section must be scheduled for this course. Prerequisites: CS 214.

CS 309L - LABORATORY
Semester Hours: 0

Lecture/Lab 3. Students enrolling in CS 309L must enroll concurrently in CS 309.

CS 317 - INTRO DESIGN/ANALYSIS OF ALG
Semester Hours: 3

Introduction to complexity analysis of algorithms; emphasis on searching, sorting, finding spanning trees and shortest paths in graphs. Design techniques such as divide & conquer, dynamic programming, and backtracking. Introduction to problem classification: i.e. NP, Intractable, and unsolvable. Prerequisites: MA 244 and CS 214, and either CS 221 or CPE 212.

CS 321 - INTRO OBJECT-ORIENTED PROG JAV
Semester Hours: 3

Writing substantial object-oriented programs in Java, including design, documentation and testing. Advanced data structures (e.g., balanced trees, hash tables). Graphical interface programming using the Java abstract windowing toolkit. Comparison with other object-oriented languages, notably C++. Prerequisites: CS 211.

CS 325 - PROFESSIONAL & COMPUTG ETHICS
Semester Hours: 3

The course focuses on two major aspects of professionalism and computer ethics. The first concerns the rule of values and normative principles in the practice of computing or more specifically software development. The second concerns the impacts of computer technologies on society. Prerequisite with concurrency: CS 321.

CS 330 - ARTFCL INTEL & GAME DEV
Semester Hours: 3

Techniques and concepts of artificial intelligence applied game development and production. Topics: path planning, decision making, tactics, and non-rational behaviors. Prerequisite: CS 221.

CS 347 - INTRO VIDEO GAME DESGN & PROGM
Semester Hours: 3

Provides students with an overview of the video game production process. Covers both theory and practice of game design and programming. Students produce 2D and 3D games from beginning to end using existing game engines. Hands-on focus and project-oriented. CS 143 is highly recommended. Prerequisites: CS 221.

CS 365 - DATA BASE PROGRAMMING/ATHENS
Semester Hours: 3.3

CS 371 - MOBILE COMPUTING APP INCT & D
Semester Hours: 3

Considers application design for the mobile space with emphasis on mobile computer interfaces, including GUI for mobile environments, entertainment computing, and cross-platform development. This course is also a component of the Entertainment Computing Track. Prerequisites: CS 221 or CPE 212.
CS 384 - OPERATING SYSTEMS/A&M  
Semester Hours: 3

CS 390 - UNIX PROGRAMMING  
Semester Hours: 3

Design and development of systems and programs in the UNIX environment. File and terminal I/O, processes, inter-process communication, signals. Pattern searching, filters, pipes. Shell programming. Program and system development tools such as awk, C, make, sed, and yacc. Prerequisites: CS 221.

CS 391 - INT NETWORK ADMIN PRINC WINDOW  
Semester Hours: 3

Network administration principles for installing and administrating Windows networks. OS installation, general network topologies and protocols, and Windows client-server architecture. User management, network file and security systems, and disaster-recovery are also covered. Prerequisites: CS 221.

CS 392 - INT NETWORK ADMIN PRINC FOR UN  
Semester Hours: 3

Linux OS installation, network topologies and protocols, and UNIX client-server architecture. User management, network file and security systems, kernel configuration, print servers, domain name service, mail servers, Web and ftp servers are included. Design and implementation of a UNIX domain. Prerequisites: CS 390.

CS 396 - SPECIAL TOPICS  
Semester Hours: 3

Course offered by an instructor in a specialized area of computer science. Must have approval of instructor.

CS 397 - SPECIAL TOPICS  
Semester Hours: 3

Course offered by an instructor in a specialized area of computer science. Must have approval of instructor.

CS 398 - SPECIAL TOPICS  
Semester Hours: 3

Course offered by an instructor in a specialized area of computer science. Must have approval of instructor.

CS 403 - INT FORML LANG AUTO THRY  
Semester Hours: 3

Introduction to concepts and formalisms of formal languages and automata theory. Includes fundamental mathematical concepts, grammars and corresponding automata, and deterministic parsing of programming languages. Prerequisites: CS 317.

CS 409 - COMPUTER ORG & ARCHITEC/ATHENS  
Semester Hours: 3

CS 413 - INTRO DIGITAL COMP ARCHITECTUR  
Semester Hours: 3

Design of computer systems and subsystems, including register transfer, bus structure, timing and control. Pipelining, memory systems including cache and cache coherence, arithmetic, and I/O units. Interrupt handling. A lab section must be scheduled for this course. Prerequisites: CS 308 and CS 309.

CS 413L - LABORATORY  
Semester Hours: 0

Lecture/Lab 3. Students enrolling in CS 413L must enroll concurrently in CS 413.

CS 420 - ADV COBAL PROGRAMMING/ATHENS  
Semester Hours: 3

CS 424 - PROGRAMMING LANGUAGES  
Semester Hours: 3

CS 440 - DATA SYSTEMS/ATHENS  
Semester Hours: 3
CS 443 - INTRO TO MULTIMEDIA SYSTEMS  
Semester Hours: 3

Multimedia authoring, color models for image and video, introduction to image and video compression, digital audio, multimedia networks, multimedia synchronization, multimedia retrieval. Taught as CS 443/543. Prerequisites: CS 317.

CS 445 - INTRO COMPUTER GRAPHICS  
Semester Hours: 3

Introduces underlying theory and mechanics of interactive computer graphics. Basic modeling, rasterization, 2D/3D transformations, and viewing. 3D graphics rudiments. Some hardware and historical perspectives. Many programs. Same as CS 545; take only one! Prerequisites: CS 221 and MA 244 or CS 217.

CS 446 - ADVANCED COMPUTER GRAPHICS  
Semester Hours: 3

High resolution 3D graphics. Advanced topics in viewing, vertex & fragment processing, illumination & shading, 3D modeling (curve & surface representation, texture mapping. Some coverage of solid modeling and color theory. Game production pipeline. Many programming projects. Taught as CS 446/546. Prerequisites: CS 445 and at least junior standing.

CS 447 - GAME ENGINES & LEVEL DEVELOPMENT  
Semester Hours: 3

Students produce fully functional games from beginning to end with team members. Focused on engineering development and art asset generation and management. Examines the design, development, and distribution of computer games using game engines for cross-platform implementation. Taught as CS 447/547. Prerequisites: CS 330 and CS 445.

CS 451 - SOFTWARE ENGINEERING/ATHENS  
Semester Hours: 3

Aspects of client/server distributed computing, a paradigm that includes technologies addressing web services (such as AJAX using JavaScript/PHP, ASP.NET) as well as distributed objects (such as .NET remoting, CORBA). Students will apply the concepts in practical distributed programs. Prerequisites: CS 307 or CS 321. CS 420 is recommended.

CS 453 - CLIENT/SERVER ARCHITECTURES  
Semester Hours: 3

Introduction to Network Security: Fundamentals of network security and cryptography. Examines security at different network layers. Wireless security. Firewalls. Intrusion detection and penetration analysis. Prerequisites: CS 121 or CPE 112 AND CS 221 or CPE 221.

CS 454 - INTRO TO CLOUD COMPUTING  
Semester Hours: 3

CS 465 - NETWORK SECURITY  
Semester Hours: 3

Introduction to the organization and operation of computer networks. Physical, Data Link, Network, Transport, and Application-layer protocols and algorithms; LAN and WAN systems; TCP/IP; wired and wireless organizations; security approaches. Prerequisites: CS 413.

CS 470 - INTRO TO COMPUTER NETWORKS  
Semester Hours: 3

This course examines digital forensics of mobile devices such as smart phones and tablets in a law enforcement context. Mobile device characteristics that make forensics examinations difficult are discussed. Various forensic tools are critically examined with an eye toward improved tool development. Prerequisites: CS 413.

CS 480 - MOBILE DIGITAL FORENSICS  
Semester Hours: 3

This course examines the issues related to security policies, models and mechanisms applicable to providing security for computer-based systems including operating systems, database management systems, and networks. Corequisite: CS 490.
CS 487 - DATABASE SYSTEMS  
Semester Hours: 3

Basic concepts of database management systems with a focus on relational and object-oriented systems. Database design including semantic models and normalization. Design issues including query languages, internal storage, recovery, concurrency, security, integrity, and query optimization. Senior standing required.

CS 490 - INTRO TO OPERATING SYSTEMS  
Semester Hours: 3

Principles of operating systems. Process management, memory management, I/O management, and file systems. Specific topics include process states, threads, CPU scheduling, concurrent processing, virtual memory. Contemporary operating systems will be used as examples. Prerequisites: CS 413.

CS 495 - SEL TOPICS:UNDERGRAD CS  
Semester Hours: 3

Individual directed study under the supervision of an instructor. Instructor approval required.

CS 496 - SPECIAL TOPICS  
Semester Hours: 3

Course offered by an instructor in a specialized area of computer science. Instructor approval required.

CS 497 - SPECIAL TOPICS  
Semester Hours: 3

Course offered by an instructor in a specialized area of computer science. Instructor approval required.

CS 498 - SPECIAL TOPICS  
Semester Hours: 3

Course offered by an instructor in a specialized area of computer science. Instructor approval required.

CS 499 - SR PROJ:TEAM SOFTWARE DESIGN  
Semester Hours: 3

A combination of lectures on proven software engineering approaches, and team working sessions. Each student will participate in a sizable, complex, software development project based on a team approach. Each team will be required to provide oral and written documentation of their work. Prerequisites: CS 317.

Computer Science, BS

Computer Science, BS Requirements:

- Computer Science, BS degree requires 128 credit hours.
- 39 of 128 credit hours must be taken at 300 level or higher (39 credits includes courses taken at the 300+ level in major, minor (if chosen), Pre professional area and electives).
- A transfer student must complete a minimum of 18 hours of CS courses at UAH in order to obtain a degree in Computer Science.
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- Unless otherwise noted a C- or better is required for all College of Science prerequisite courses.
- No more than 64 credit hours from a two-year college can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

Degree Requirements

| Freshman Composition |  
|----------------------|---------------------------------------------------|
| EH 101               | COLLEGE WRITING I                                 |
| EH 102               | COLLEGE WRITING II                                |

### Elective Courses 13-14

Electives can be taken from any department and do not have to be taken in your major or minor. No more than 4 credits of 100 level HPE courses can count toward degree requirements.

### Total Semester Hours 128

1. Students must take one literature and one history course. Students must also take either a second literature or history course to complete a sequence. (EH 207 + EH 208, EH 209 + EH 210, EH 242 + EH 208, EH 242 + EH 210, HY 103 + HY 104, or HY 221 + HY 222)
2. Based on Math placement (http://www.uah.edu/science/departments/math/undergraduate-students/placement), prerequisite (MA 112 and/or MA 113) Mathematics courses may be required.
3. No more than 6 hours can be taken in a single discipline.
4. For choices see the World Languages and Cultures (p. 210) department.
5. To complete Math minor, choose MA 201 and take one additional MA 300+ course.

## Sample four year plan for Computer Science, starting in MA 171, BS degree:

Note: This is only an example and variations are possible.

**Computer Science, BS - Entertainment Computing**

**Computer Science, Entertainment Computing Concentration, BS Requirements:**

- Computer Science, Entertainment Computing concentration, BS degree requires 128 credit hours.
- 39 of 128 credit hours must be taken at 300 level or higher (39 credits includes courses taken at the 300+ level in major, minor (if chosen), Pre-professional area and electives).
- A transfer student must take 18 hours of CS courses at UAH in order to get a degree in Computer Science
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- Unless otherwise noted a C- or better is required for all College of Science prerequisite courses.
- No more than 64 credit hours from a two-year college can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

TH 225 ELEMENTS OF THEATRE PRODUCTION

Elective Courses 7-8
Electives can be taken from any department and do not have to be taken in your major or minor. No more than 4 credit hours of 100 level HPE courses can count toward degree requirements.

Total Semester Hours 128

1 Students must take one literature and one history course. Students must also take either a second literature or history course to complete a sequence. (EH 207 + EH 208, EH 209 + EH 210, EH 242 + EH 208, EH 242 + EH 210, HY 103 + HY 104, or HY 221 + HY 222)
Based on Math placement (http://www.uah.edu/science/departments/math/undergraduate-students/placement), prerequisite (MA 112 and/or MA 113) Mathematics courses may be required.

No more than 6 hours can be taken in a single discipline.

For choices see the World Languages and Cultures (p. 210) department.

Take one additional Math course at the 200 level or higher. To complete Math minor, choose MA 201 and take one additional MA 300+ course.

Sample four year plan for Computer Science, Entertainment Computing Concentration, BS degree:

Note: This is only an example and variations are possible.

Total Semester Hours 24

Earth System Science

NSSTC - Cramer Hall, Room 4044
Telephone: 256.961.7877
Email: ats@uah.edu

Note: The Earth System Science degree programs are administered by the Atmospheric Science department.

The Atmospheric Science department offers the following undergraduate degrees:

- Earth System Science, BS - Atmospheric Science/Meteorology Concentration (p. 587)
- Earth System Science, BS - Geographic Information Systems (GIS) & Remote Sensing Concentration (p. 592)
- Earth System Science, BS - Human Dimensions - Societal Impacts Concentration (p. 596)

Program Objectives

The two primary objectives of the ESS program are to meet important national, regional and statewide needs for highly technically-educated professionals who understand the Earth as a system, and to produce graduates who will be able to perform a variety of functions in research centers and industry centered in our impact on the Earth system.

Learning Outcomes

Earth System Science BS Graduates will:

- Demonstrate the ability to deal quantitatively with real-world problems
- Integrate knowledge from multiple disciplines to scientifically address Earth system issues quantitatively
- Work collaboratively in interdisciplinary teams
- Successfully carry out research projects to completion

Majors in Earth System Science

- Earth System Science, BS - Atmospheric Science/Meteorology Concentration (p. 587)
- Earth System Science, BS - Geographic Information Systems (GIS) & Remote Sensing Concentration (p. 592)
- Earth System Science, BS - Human Dimensions - Societal Impacts Concentration (p. 596)

Minors in Earth System Science:

- Atmospheric Science
- Earth Ecosystems (p. 601)
- Geographic Information Systems/Remote Sensing (p. 602)
- Natural Disaster Impacts and Policy (p. 602)

UAH’s Joint Undergraduate Master’s Program (JUMP) allows undergraduate students to study at the graduate level. By taking graduate courses in your senior year you could reduce the time taken to get a graduate (MS) degree. Please visit JUMP (p. 20) page for general information.

GIS Track ‘ JUMPs to MS in Earth System Science

Requirements For Admissions

1. Cumulative Overall 3.5 GPA
2. Major GPA of 3.5
3. ESS 301, PH 112/PH 115, MA 172, and CS 102 must be taken in Sophomore and Junior years

Additional Information

1. Maximum of 12 credit hours count toward both degrees
2. JUMP students may take ESS 507, ESS 508, ESS 509, ESS 514, ESS 515 in place of the undergraduate versions of these courses (ESS 407, ESS 408, ESS 409, ESS 414, ESS 415)
HDSI Track can JUMP into MS in Earth System Science if Physics with Calculus courses through PH 112 are taken as an option and an extra calculus course, MA 172 is added.

ATS Track JUMPs to MS in Atmospheric Science

Requirements For Admissions

1. Cumulative Overall 3.5 GPA
2. Major GPA of 3.5
3. ESS 301, PH 112/PH 115, MA 172, and CS 102 must be taken in Sophomore and Junior years

Additional Information

1. Maximum of 12 credit hours count toward both degrees
2. JUMP students may take ATS 509, ATS 510, ATS 520, ATS 541, ATS 551, ATS 561, ATS 571 in place of the undergraduate versions of these courses (ESS 409, ESS 410, ESS 420, ESS 441, ESS 451, ESS 454, ESS 461, ESS 471)

Designated Faculty Contact/Advisor
Dr. Lawrence Carey lawrence.carey@uah.edu 256.961.7909
ESS 100 - INTRODUCTION TO SPACE SCIENCE
Semester Hour: 1
Covers physiology in space, computer systems, materials, in space, robotics, thermodynamics, astrophysics, and solar physics. Laboratory experiments and simulated missions. Offered in cooperation with the Alabama Space and Rocket Center. Open only to students enrolled in Space Academy II.

ESS 101 - EXPLORING SPACE SC & ENGR
Semester Hour: 1
Exploring Space Science and Engineering courses 1-9. Each course examines an aspect of space exploration including but not limited to space science, human factors, medicine and engineering. Each course focuses on a single aspect. No more than three of the courses in the ESS 101 group may be taken for credit. The courses are offered through distance learning.

ESS 103 - ENVIRONMENTAL EARTH SCIENCE
Semester Hours: 4
Principles and foundations of Earth and environmental science with lectures and labs on concepts in Earth system science. Applied science labs use applications and real-world examples from ecosystems, geology, soil science, water, pollution, agriculture, population, natural disasters and energy.

ESS 103L - LABORATORY
Semester Hours: 0

ESS 110 - PHYSICAL SCIENCE/CALHOUN
Semester Hours: 4

ESS 111 - CLIMATE AND GLOBAL CHANGE
Semester Hours: 4
Intro to climate system including natural and human-induced changes in this system. Includes greenhouse effect, ozone depletion, pollution, urban heat island processes, continental drift effects, glacial melting and sea level changes, atmospheric and ocean circulations, solar activity variability.

ESS 111L - LABORATORY
Semester Hours: 0

ESS 210 - COLLAPSE OF CIVILIZATIONS
Semester Hours: 3
This course will investigate why some cultures succeed and others fail. From archeological and historical records of past civilizations we will examine the factors which lead to collapse in an attempt to determine the future of current societies.

ESS 212 - SEvere WEATHER ANALYSIS
Semester Hours: 4
Meteorological analysis and beginning forecasting of weather systems, severe weather, snowstorms, hurricanes, and tornadoes through the interpretation of surface, upper air, satellite, and radar weather observations. Strong emphasis placed on unique observations of severe weather from UAH radar and profiling systems. Prerequisites: ESS 111.
ESS 212L - LABORATORY
Semester Hours: 0
Laboratory. Prerequisite: ESS 111.

ESS 301 - INTRO TO EARTH & ATMOSPHERIC PHYS
Semester Hours: 3
This course will provide a survey of earth and atmospheric science for undergraduate students. Topics that will be covered will focus on how the earth-atmosphere system works in an integrated fashion. Prerequisites: ESS 103, ESS 111, (PH 101 or PH 111), and (MA 120 or MA 171).

ESS 302 - PEOPLE, PLANTS, & ENVIRONMENT
Semester Hours: 3
This course is designed to introduce students from multiple departments to the vital roles that plants have in our ecosystems through the study of basic plan and soil science. Special attention is placed on the impact plants have on our technology-based society. Sophomore standing or above.

ESS 303 - CLASSICAL & PHYSICAL CAUSES CLIMAX
Semester Hours: 3
Basic atmospheric structure and physical processes, surface processes, climate history and climate change, land use and land change, microclimates, topoclimates, Ecoclimatology. Prerequisites: ESS 103, ESS 111, MA 120 or MA 171, and PH 101 or PH 111.

ESS 305 - HYDROLOGY
Semester Hours: 3
Introduction to hydrologic cycles and concepts of how water interacts with the environment. Covers water properties, precipitation, groundwater and runoff, currents, waves, sediment processes, and conservation strategies. Prerequisites: ESS 103, ESS 111, MA 120 or MA 171, and PH 101 or PH 111.

ESS 307 - ENVIRONMENTAL ARCHEOLOGY
Semester Hours: 3
 Археологи сегодня нуждаются в широком диапазоне научных подходов, чтобы детализировать и интерпретировать экологию их сайтов. Этот подход революционизирует археологию, делая ее исключительно важной в современный мир. Инвестированный в этом курсе включает климатический моделирование, дистанционное зондирование, и GIS. Prerequisite: ESS 103.

ESS 312 - PRINCIPLES OF ECOLOGY
Semester Hours: 4
Lecture/Lab One 3 hour lab a week. Ecological principles controlling plant and animal populations. Development of ecosystems, communities and habitats. Field trips required. Strongly recommend CH 101 or 121. Prerequisite: BYS 120.

ESS 313 - GEOGRAPHIC INFORMATION SYSTEMS
Semester Hours: 3
Introduction to scientific spatial analysis concepts and spatial data processing with focus on ESRI ArcGIS software. Basic concepts in GIS data management and creation, with topics including raster and vector data, projections, data query, data acquisition, and cartography. Prerequisites: ESS 103 and either CS 102 or CS 103.

ESS 321 - POLLUTION PROBLEMS
Semester Hours: 3
Quantitative study of environmental conditions, processes, and problem-solving techniques related to specific pollution problems in air, water, and land. Prerequisites: ESS 111, ESS 103 and (MA 120 or MA 171) and (CH 101 or CH 121) and (PH 101 or PH 111).

ESS 351 - DYNAMIC METEOROLOGY
Semester Hours: 3
Dynamics and kinematics of atmospheric flow. Meteorological coordinate systems. Fundamental governing equations of atmospheric motion, circulation, and vorticity. Prerequisites: PH 111, ESS 301, CS 102 or CS 103, and MA 201 (with concurrency).

ESS 352 - SYNOPTIC METEOROLOGY
Semester Hours: 3
Analysis, interpretation and forecasting synoptic-scale and mesoscale phenomena, including air masses, frontal systems, cyclones, anti-cyclones, tropical cyclones, and associated mesoscale phenomena. Emphasis is placed on the use of remote sensing data from satellites, radars, and profilers using state-of-the-art workstations. Prerequisite: ESS 212 and ESS 351.
ESS 370 - INTRODUCTION TO REMOTE SENSING  
Semester Hours: 3

This course introduces the fundamental physics of remote sensing systems and incorporates hands-on exercises of image processing, information extraction and interpretation, and basic applications of airborne and satellite data in Earth System Science and Atmospheric Science. Prerequisites: ESS 103, ESS 111, (MA 120 or MA 171), (PH 101 or PH 111), and CS 102.

ESS 402 - SCI & SOC ASPTS NATRL DISASTER  
Semester Hours: 3

Students will understand causes of major natural events and evaluate effects of disasters on populations and possible mitigation measures. GIS software will be used to show progression of events and/or their impacts, with course case studies. Prerequisites: ESS 103 and ESS 111.

ESS 407 - ENV THRTS, PUB POLY, & DEC MKG  
Semester Hours: 3

Researchers, policymakers and environmental campaigners have identified 25 potential future threats to the global environment. This course examines the nature and consequences of these threats and their potential impacts for the survival of the human race. Prerequisite: ESS 103.

ESS 408 - PYTHON FOR GIS  
Semester Hours: 3

Introduction to GIS model building, Python programming, and automation of scripts for ArcGIS. Techniques in Model Builder, Python, and the methods for automation will be taught using data from numerous available data sources across the internet with heavy emphasis on the Earth Sciences. Prerequisites: ESS 313.

ESS 409 - SCI PROGRMNG FOR EARTH & ATMOS  
Semester Hours: 3

Survey of data types and languages commonly used in the meteorological community along with practical applications to meteorology. Course is designed to prepare students for graduate work and research in atmospheric science. Prerequisite: CS 102 or 103; ESS 301; MA 172; PH 112 and PH 115. Or consent of instructor.

ESS 410 - OPERATIONAL WEATHER FORECAST'G  
Semester Hours: 3

Subjective and objective methods of atmospheric prognosis. Techniques for forecasting critical weather elements. Interpretation, use and systematic errors of computer-generated products, human factors with forecasting, and application of meteorological theory in an operational setting. Prerequisites: ESS 111, ESS 212, ESS 352, MA 172, PH 112 and PH 115.

ESS 414 - GEOSPATIAL APPLICATIONS  
Semester Hours: 3

An introductory look at the ways in which GIS can be put to use in different fields of study, drawing examples from Demography, Sociology, Archaeology, History, and Ecology. Focus on cartography and map creation principles and public geospatial data acquisition. Prerequisite: ESS 313.

ESS 415 - ADVANCED TOPICS IN GIS  
Semester Hours: 3

Advanced continuation of concepts applied in Geospatial Applications. Students will learn through modules of real world scientific research how to use further tools in ArcGIS including: 3D Analyst, Spatial Analyst, Network Analyst. Topics include web data dissemination, spatiotemporal analysis and some basic spatial statistics measures. Prerequisite: ESS 414.

ESS 420 - INTRO ATMOSP CHEM & AIR POLLU  
Semester Hours: 3

This self-contained introductory course in atmospheric chemistry and air pollution is designed to provide students the basics of atmospheric chemistry and air pollution concepts. Topics include air pollutants, air-pollution meteorology, atmospheric gases and aerosols, and atmospheric processes. Prerequisites: PH 112, PH 115, CH 121, ESS 301 and ESS 321.

ESS 441 - ATMOSP THERMODY & CLOUD PHYSIC  
Semester Hours: 3

General aspects of thermodynamics and cloud physical processes occurring within the atmosphere; atmospheric statics and stability, saturation point analysis, aerosols, nucleation, and the behavior/growth of cloud particles and hydrometeors. Prerequisites: ESS 301, MA 238, PH 112 and PH 115.

ESS 451 - ATMOSPHERIC FLUID DYNAMICS I  
Semester Hours: 3

Fluid dynamics in the atmosphere. Coriolis acceleration, scale analysis and appropriate approximations of the complete governing equations. Numerical analysis and interpretation of weather phenomena. Same as ATS 451. Prerequisites: ESS 351, MA 238, PH 112 and PH 115.
ESS 454 - FORECASTING MESOSCALE PROC  
Semester Hours: 3  
Detection and forecasting of atmospheric mesoscale phenomena including the structure and evolution of clouds, precipitation (including floods) thunderstorms and severe weather. Includes basics of instruments used to detect mesoscale phenomena, most notably satellite and radar. Prerequisite: ESS 352.

ESS 461 - ATMOSPHERIC RADIATION I  
Semester Hours: 3  
Fundamentals of terrestrial atmospheric radiation. Topics include: basic concepts, radiative transfer equation, gaseous absorption, scattering by molecules and particles, band models, transmittance along an inhomogeneous path. Prerequisite: ESS 301, MA 238, PH 112 and PH 115.

ESS 471 - INTRO TO RADAR METEOROLOGY  
Semester Hours: 3  
Introduction to principles of radar meteorology, including radar operations, hardware, interpretation and analysis. Doppler, dual-polarization and dual-wavelength radar theory, methods and applications are covered. Prerequisite: ESS 301 and ESS 441.

ESS 490 - SELECTED TOPICS IN ENVIRON SCI  
Semester Hours: 1-3  
Special offerings to students in areas of interest not covered in the present curriculum. Prerequisite: permission of instructor.

ESS 495 - DIRECTED STUDY  
Semester Hours: 2-4  
Specialized research for undergraduates often is offered to undergraduates who have senior standing.

ESS 498 - RESEARCH & PROF DEV CAPSTONE  
Semester Hour: 1  
Applied concepts for professional and research development. Includes evaluation and discussion of published literature and department seminars, with focus on research synthesis and critique. Also includes development of professional and career skills focused on the Earth and Atmospheric Sciences. Senior Standing required.

ESS 499 - UNDERGRADUATE RESEARCH  
Semester Hours: 2-4  
For advanced Earth System Science students. Individual investigations into Earth systems science problems under direct supervision of a research mentor. Research is conducted and thesis-style paper is written and orally presented. Students identify and obtain consent from a faculty research mentor.

Earth System Sciences B.S. - Atmospheric Science/Meteorology Concentration

Earth System Science, Atmospheric Science/Meteorology Concentration, BS Requirements:  
- Earth System Science, concentration in Atmospheric Science/Meteorology, BS degree requires 128 credit hours.  
- 39 of 128 credit hours must be taken at 300 level or higher (39 credits includes courses taken at the 300+ level in major, minor (if chosen), Preprofessional area and electives).  
- 12 credit hours of 300 level and above must be taken in the major or 6 credit hours in the major and 6 credit hours in the minor (if chosen).  
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.  
- Unless otherwise noted a C- or better is required for all College of Science prerequisite courses.  
- No more than 64 credit hours from a two-year college can be applied toward a UAH degree.  
- For graduation application instructions, see here (p. 806).

### Elective Courses

Electives can be taken from any department and do not have to be taken in your major or minor. No more than 4 credit hours of 100 level HPE courses can count toward degree requirements.

**Total Semester Hours**

128
Students must take one literature and one history course. Students must also take either a second literature or history course to complete a sequence. (EH 207 + EH 208, EH 209 + EH 210, EH 242 + EH 208, EH 242 + EH 210, HY 103 + HY 104, or HY 221 + HY 222)

Based on Math placement, (http://www.uah.edu/science/departments/math/undergraduate-students/placement) prerequisite MA 112 (http://catalog.uah.edu/search/?P=MA%20112) and/or MA 113 (http://catalog.uah.edu/search/?P=MA%20113) Mathematics courses may be required.

No more than 6 credit hours can be taken in a single discipline.

For choices see the World Languages and Cultures (p. 210) department.

PH 111 + PH 114, PH 112 + PH 115, MA 238, MA 385, CH 121+ CH 125, ESS 301, ESS 303, ESS 305, ESS 351, ESS 370, ESS 409, ESS 441, ESS 471. These courses partially satisfy the National Weather Service GS-1340 Federal Civil Service Requirements.

ESS 410, ESS 352, ESS 454. Choose at least two of these elective courses to complete the National Weather Service GS-1340 Federal Civil Service Requirements.

ESS 313, ESS 408 and ESS 414. Student may choose 2 of these 3 GIS tools courses to count in the “choose 5 electives” section.

**Term Semester Hours:**
Earth System Sciences B.S. - Geographic Information Systems (GIS) & Remote Sensing Concentration

Earth System Science, Geographic Information Systems (GIS) and Remote Sensing Concentration, BS Requirements:

- Earth System Science, GIS and Remote Sensing Concentration, BS degree requires 128 credit hours.
- 39 of 128 credit hours must be taken at 300 level or higher (39 credits includes courses taken at the 300+ level in major, minor (if chosen), Pre professional area and electives).
- 12 credit hours of 300 level and above must be taken in the major or 6 credit hours in the major and 6 credit hours in the minor (if chosen).
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- Unless otherwise noted a C- or better is required for all College of Science prerequisite courses.
- No more than 64 credit hours from a two-year college can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

### Degree Requirements

#### Freshman Composition

**Earth System Sciences B.S. - Human Dimensions - Societal Impacts Concentration**

**Earth System Science, Human Dimensions and Societal Impacts Concentration, BS Requirements:**

- Earth System Science, Human Dimensions and Societal Impacts Concentration, BS degree requires 128 credit hours.
- 39 of 128 credit hours must be taken at 300 level or higher (39 credits includes courses taken at the 300+ level in major, minor (if chosen), Pre professional area and electives).
- 12 credit hours of 300 level and above must be taken in the major or 6 credit hours in the major and 6 credit hours in the minor (if chosen).
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- Unless otherwise noted a C- or better is required for all College of Science prerequisite courses.
- No more than 64 credit hours from a two-year college can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

### Elective Courses

Electives can be taken from any department and do not have to be taken in your major or minor. No more than 4 credit hours of 100 level HPE courses can count toward degree requirements.

### Total Semester Hours

128
Students must take one literature and one history course. Students must also take either a second literature or history course to complete a sequence. (EH 207 + EH 208, EH 209 + EH 210, EH 242 + EH 208, EH 242 + EH 210, HY 103 + HY 104, or HY 221 + HY 222)

Based on Math placement, (http://www.uah.edu/science/departments/math/undergraduate-students/placement) prerequisite MA 112 and/or MA 113 Mathematics courses may be required. If the student intends to pursue a course of study requiring more advanced mathematics background, MA 171 is recommended. Otherwise, MA 120 may be used to meet this requirement.

No more than 6 credit hours can be taken in a single discipline.

For choices see the World Languages and Cultures (http://catalog.uah.edu/undergrad/colleges-departments/arts-humanities-social-sciences/foreign-languages-literatures) department.

**Sample four year plan for Earth System Science, Human Dimensions and Societal Impacts Concentration, BS degree:**

**Atmospheric Science Minor**

A minor in Atmospheric science consists of:

**Required courses:**
ESS 103 & 103L ENVIRONMENTAL EARTH SCIENCE and LABORATORY
ESS 111 & 111L CLIMATE AND GLOBAL CHANGE and LABORATORY
ESS 212 & 212L SEVERE WEATHER ANALYSIS and LABORATORY
ESS 301 INTRO TO EARTH & ATMOSPHERIC PHYSICS

Elective courses: Choose at least 2 courses, minimum of 6 credit hours from these courses:

ESS 303 CLASSICAL & PHYSICAL CAUSE CLIMATE
ESS 321 POLLUTION PROBLEMS
ESS 322 DYNAMIC METEOROLOGY
ESS 352 SYNOPTIC METEOROLOGY
ESS 409 SCI PROGRAM FOR EARTH & ATMOS
ESS 410 OPERATIONAL WEATHER FORECASTING
ESS 420 INTRO ATMOSPHERIC CHEMISTRY & AIR POLLUTION
ESS 441 ATMOSPHERIC THERMODYNAMICS & CLOUD PHYSICS
ESS 451 ATMOSPHERIC FLUID DYNAMICS I
ESS 454 FORECASTING MESOSCALE PROCESSES
ESS 461 ATMOSPHERIC RADIATION I
ESS 471 INTRODUCTION TO RADAR METEOROLOGY

Total credit hours 21

**Earth Ecosystems Minor**

A minor in Earth Ecosystems consists of:

**Required courses:**
ESS 103 & 103L ENVIRONMENTAL EARTH SCIENCE and LABORATORY
ESS 111 & 111L CLIMATE AND GLOBAL CHANGE and LABORATORY
ESS 302 PEOPLE, PLANTS, & ENVIRONMENT
ESS 312 PRINCIPLES OF ECOLOGY

Elective courses: Choose at least 2 courses, minimum of 6 credit hours from these courses:

ESS 210 COLLAPSE OF CIVILIZATIONS
ESS 303 CLASSICAL & PHYSICAL CAUSE CLIMATE
ESS 307 ENVIRONMENTAL ARCHEOLOGY
ESS 313 GEOGRAPHIC INFORMATION SYSTEMS
ESS 321 POLLUTION PROBLEMS
ESS 370 INTRODUCTION TO REMOTE SENSING
ESS 407 ENVIRONMENTAL POLICY, PREDICTION, & DECISION MAKING
ESS 408 PYTHON FOR GIS

Total credit hours 21
### Geographic Information Systems/Remote Sensing Minor

A minor in Geographic Information Systems/Remote Sensing consists of:

**Required courses:**
- **ESS 103** & 103L: ENVIRONMENTAL EARTH SCIENCE and LABORATORY
- **ESS 111** & 111L: CLIMATE AND GLOBAL CHANGE and LABORATORY
- **ESS 370**: INTRODUCTION TO REMOTE SENSING
- **ESS 313**: GEOGRAPHIC INFORMATION SYSTEMS
- **ESS 414**: GEOSPATIAL APPLICATIONS

**Elective courses:** Choose at least 4 credit hours from these courses:
- **ESS 212** & 212L: SEVERE WEATHER ANALYSIS and LABORATORY
- **ESS 301**: INTRO TO EARTH & ATMOSPHERIC PHYSICS
- **ESS 303**: CLASSICAL & PHYSICAL CAUSES OF CLIMATE
- **ESS 305**: HYDROLOGY
- **ESS 321**: POLLUTION PROBLEMS
- **ESS 401**: INTRO TO EARTH & ATMOSPHERIC PHYSICS
- **ESS 402**: PHYSICS OF THE EARTH & ATMOSPHERE
- **ESS 407**: HYDROLOGY
- **ESS 415**: ADVANCED TOPICS IN GIS

Total credit hours: 21

### Natural Disaster Impacts and Policy Minor

A minor in Natural Disasters Impacts & Policy consists of:

**Required courses:**
- **ESS 103** & 103L: ENVIRONMENTAL EARTH SCIENCE and LABORATORY
- **ESS 111** & 111L: CLIMATE AND GLOBAL CHANGE and LABORATORY
- **ESS 402**: SCI & SOC ASPTS NATURAL DISASTER
- **ESS 407**: ENV THRTS, PUB POLICY, & DEC MKG

**Elective courses:** Choose at least 7 credit hours from these courses:
- **ESS 210**: COLLAPSE OF CIVILIZATIONS
- **ESS 212** & 212L: SEVERE WEATHER ANALYSIS and LABORATORY
- **ESS 305**: HYDROLOGY
- **ESS 307**: ENVIRONMENTAL ARCHEOLOGY
- **ESS 313**: GEOGRAPHIC INFORMATION SYSTEMS
- **ESS 321**: POLLUTION PROBLEMS
- **ESS 370**: INTRODUCTION TO REMOTE SENSING
- **ESS 414**: GEOSPATIAL APPLICATIONS

Total credit hours: 21-23
Individualized Bachelor of Science (IND) Degree

A UAH undergraduate who discovers that his or her interests don’t coincide with one of the departmental majors in the College of Science may propose an individualized science major which would allow the student to create a program of study appropriate for his or her individual educational and career goals. The student will need a clear concept of what his or her college degree is to accomplish.

Some examples of individualized science majors are biochemistry, biophysics, mathematical biology, astrophysical modeling, computational chemistry, environmentally sustainable systems, climate change, medical physics, and many others.

Program Objective
The primary objective of the program is to encourage students to think deeply about their career goals and make it possible for students to tailor their education in order to achieve those goals. A second objective is to ensure graduates of the program acquire a solid understanding, an undergraduate level, of an interdisciplinary area of science or mathematics. The third objective is to allow students to stay abreast of changes in the employment marketplace for science and mathematics graduates.

Learning Objectives
Graduates with Individualized Bachelor of Science degrees will demonstrate:

- Knowledge in an existing core major offered by the College of Science
- Ability to write in a scholarly manner
- Capability to work collaboratively to achieve academic and career goals

Requirements
The IBS degree consists of courses offered through the departments of the College of Science and other University departments. Every individualized degree will be built around a core of seven classes from an existing major in the College of Science.

The core plus courses from no more than three other departments (disciplines), not counting honors seminars, will account for a minimum of 54 semester hours. The course work in the additional disciplines will range from a low of 7 courses to a high of 11 courses depending on the number of semester hours for the selected courses.

A student must have earned at least 32 semester hours at UAH, with a grade point average of at least 3.0, before being admitted to the individualized major. However, the student must be admitted to the program no later than the first semester of the junior year. The student will work with a faculty mentor to develop a proposal consisting of an essay clearly explaining the area of intellectual focus, a statement of why the student requires an individualized science major in preference to a traditional major, a discussion of how the proposed coursework relates to the central focus of the program of study, and a description of the student’s goals beyond the bachelor’s degree. Consult with an Academic Advisor.

Mathematical Sciences

258A Shelby Center
Telephone: 256.824.6470
Email: mathUG@uah.edu

The Mathematical Sciences department offers the following undergraduate degrees:

- Mathematical Sciences, Concentration I, BS (p. 607)
- Mathematical Sciences, Concentration II, BS - Secondary Education (p. 612)
- Mathematical Sciences, Concentration III, BS - Double Major or Dual Degree. Double major-Math degree with another major in the College of Science. Dual Degree-Math degree with an additional degree in another college such as the College of Engineering. (p. 616)

Program Objectives
Our objective is to provide excellent instruction and resources for the mathematics education through our courses and degree programs. Through our bachelor’s, master’s and doctoral degree programs, our goal is to help produce the new generations of well-educated mathematicians that are critical for the progress of mankind. Our second objective is to promote and communicate the importance of mathematics in society and to help maintain standards of excellence in mathematics through collaboration with other departments. Our third objective is to have graduates prepared for careers in government, industry, teaching at a secondary school level, or for graduate study in mathematics.

Learning Outcomes
Graduates in Mathematics will:

- Demonstrate critical thinking skills to construct clear, valid and succinct proofs
• Effectively apply mathematics to solve problems in applied fields

• Exhibit quantitative reasoning and data analysis

### Majors in Mathematical Sciences

- Mathematical Sciences, Concentration I, BS (p. 607)
- Mathematical Sciences, Concentration II, BS - Secondary Education (p. 612)
- Mathematical Sciences, Concentration III, BS - Double Major or Dual Degree (p. 616)

### Minor in Mathematical Sciences

- Mathematics (p. 620)

UAH's Joint Undergraduate Master's Program (JUMP) allows undergraduate students to study at the graduate level. By taking graduate courses in your senior year you could reduce the time taken to get a graduate (MS) degree. Please visit JUMP (p. 20) page for general information.

### Requirements For Admission

1. Cumulative overall 3.5 GPA
2. Major GPA of 3.5
3. MA 238, MA 244, MA 330, MA 442, and MA 452 must be taken Sophomore and Junior years

### Additional Information

1. Maximum of 12 credit hours count toward both degrees
2. With permission of JUMP advisor, a student may use any 500-level course or 500-600 level sequence of courses normally acceptable on Mathematics Master's POS for the 12 hours of double counted courses (Of these 12 hours, 9 credit hours replace undergraduate mathematics electives, and 3 credit hours replace a general undergraduate elective)

### Designated Faculty Contact/Advisor

Dr. Guo-Hui Zhang zhangg@uah.edu 256.824.2228

MA 107 - ALGEBRA WITH APPLICATIONS
Semester Hours: 3
Algebra review, functions and graphs, linear models, exponential logarithmic functions, mathematics of finance, sets and probability. Prerequisites: Level 1 placement for MA 107 and Level 0 placement for MA 107L. No credit given to students who have received credit for another MA course.

MA 110 - FINITE MATHEMATICS
Semester Hours: 3
Algebra review, elementary functions, matrices, logic, sets, counting, and an introduction to probability and statistics. MA 110 is an AGSC core course. Prerequisites: Level 1 placement for MA 110 and Level 0 placement for MA 110L.

MA 112 - PRECALCULUS ALGEBRA
Semester Hours: 3
Real number systems, exponents, radicals, factoring, absolute value, inequalities, function notation, functions, inverse functions, graphing techniques, polynomial and rational functions, operations with complex numbers, conic sections, and theory of equations. Prerequisites: Level 1 placement for MA 112 and Level 0 placement for MA 112L.

MA 113 - PRECALCULUS TRIGONOMETRY
Semester Hours: 3
Exponential and logarithmic functions, trigonometric functions of angles and real numbers, graphing trigonometric functions, inverse trigonometric functions, solving trigonometric equations, verifying identities, laws of sines and cosines, vectors, trigonometric form of complex numbers, DeMoivre's theorem, summation notation, arithmetic and geometric sequences and series. Prerequisites: Level 2 placement or MA 112 with a grade of C or better. No credit given to students who have completed a MA course numbered above MA 113. MA 113 is an AGSC core course.

MA 115 - PRECALCULUS ALGEBRA & TRIG
Semester Hours: 4
The algebra of functions, including polynomial, rational, exponential, and logarithmic functions; systems of equations and inequalities; trigonometric and inverse trigonometric functions; trigonometric identities and equations; a brief introduction to DeMoivre's Theorem, vectors, polar coordinates, and the binomial theorem. This course is intended for students who plan to take at least MA 171 (Calculus A) but who do not need the full two-semester sequence in precalculus (MA 112, 113). MA 115 is an AGSC core course.
### MA 120 - MATH PROFESSIONAL APPLICATIONS
Semester Hours: 3

Limits, continuity, differentiation, applications of the derivative, integration, the fundamental theorem of calculus, applications of the integral. Prerequisites: MA 107, MA 110, or MA 112 with a grade of C or better, or Level 2 placement. No credit given to students who have already received credit for a calculus course. MA 120 is an AGSC core course.

### MA 171 - CALCULUS A
Semester Hours: 4

Limits, derivatives, applications of the derivative, definite and indefinite integrals, exponential and logarithmic functions, and inverse functions. Prerequisites: MA 113 or MA 115 with a grade of C or better, or Level 3 placement.

### MA 171R - CALCULUS A RECITATION
Semester Hours: 0

### MA 172 - CALCULUS B
Semester Hours: 4

Techniques of integration, applications of the integral, polar coordinates, sequences, series, and conic sections. Prerequisites: MA 171 with a grade of C or better.

### MA 201 - CALCULUS C
Semester Hours: 4

Vectors, vector-valued functions, partial derivatives, multiple integrals, vector fields, line and surface integrals. Prerequisites: MA 172 with a grade of C or better.

### MA 230 - MATH FOR ELEMENTARY TEACHERS
Semester Hours: 3

The course emphasizes the use of logical thinking in mathematics and the development of students' understandings of algorithm design. Directed at providing the elementary education student the mathematical background necessary for an understanding of the mathematical principles that are introduced to children in the elementary grades. Emphasis on sets, logic, an understanding of the number systems (integers, fractions, decimals, percents) and number theory. Prerequisites: Two MA courses at the 100 level or above, each with a grade of C or better. Open only to students majoring in elementary education.

### MA 231 - MATH FOR ELEM SCH TCHERS II
Semester Hours: 3

Rational numbers, real numbers, algebra, statistics, probability, geometric shapes, measurement, and geometry (using triangle congruence and similarity, coordinates, and transformations). Prerequisites: MA 230 with a grade of C or better.

### MA 238 - APPL DIFFERENTIAL EQUATIONS
Semester Hours: 3

This course provides an elementary introduction to the techniques and necessary theory for solving the basic differential equations usually encountered by beginning science and engineering students. General topics include analytical and graphical methods for solving and analyzing first-order differential equations; Euler's numerical method; the basic theory of higher-order, linear differential equations, with major emphasis on equations with constant coefficients; variation of parameters; the Laplace transform as a tool for solving differential equations. MA 238 is an AGSC core course. Prerequisites: MA 172 & MA 201 with concurrency.

### MA 244 - INTRO TO LINEAR ALGEBRA
Semester Hours: 3

Systems of linear equations, matrices, matrix operations, determinants, vector spaces, bases, dimension of a vector space, inner product, Gram-Schmidt process, linear transformations, change of basis, similar matrices, eigenvalues and eigenvectors, diagonalization, symmetric matrices, and applications. Prerequisites: MA 120 or MA 172.

### MA 281 - ELEMENTS OF STATISTICAL ANALYSIS
Semester Hours: 3

Descriptive statistics, fundamentals of probability theory, fundamentals of statistical inference, including estimation and hypothesis testing, and use of a typical statistical package such as MINITAB. Prerequisites: MA 113, or MA 115, or Level 2 Placement.
MA 299 - MATHEMATICS PROJECT
Semester Hour: 1

Individualized special projects in mathematics and its applications for inquisitive and well prepared sophomore-level undergraduate students. No credit allowed toward major or minor in mathematics. S/U grading. Approval of department chair and instructor required.

MA 301 - INTRO ELEMENTARY NUMBER THEORY
Semester Hours: 3

Fundamental properties of integers, divisibility, linear Diophantine equations, congruency, Euler function, Chinese Remainder Theorem, Fermat Theorems, Wilson Theorem, and applications to Cryptography. Prerequisite: MA 244.

MA 330 - FOUNDATIONS OF MATH
Semester Hours: 3

Symbolic logic and methods of proof, set theory, combinations and permutations, equivalence relations and functions, mathematical induction and recurrence relations, cardinality (finite, countably infinite, and uncountable sets), and decimal representation of the rational and real numbers. Prerequisites: MA 172 and (MA 201 or MA 244).

MA 385 - INTRO TO PROBABILITY & STATIST
Semester Hours: 3

This course is a calculus-based introduction to probability with special emphasis on the interplay between probability and statistics. Topics include descriptive statistics; probability spaces; discrete distributions (including the binomial, geometric, hypergeometric, and Poisson); continuous distributions (including the uniform, exponential, and normal); joint distributions; mean, variance, and general expected value; independence and correlation; the law of large numbers; and the central limit theorem. Prerequisites: MA 120 or MA 172 with a grade of C or better and 1 MA course at 200 level or above.

MA 399 - MATHEMATICS PROJECT
Semester Hour: 1

Individualized special projects in mathematics and its applications for inquisitive and well prepared junior-level undergraduate students. No credit allowed toward a major or minor in mathematics. S/U grading. Approval of department chair and instructor required.

MA 415 - INTRO NUMERICAL METHODS
Semester Hours: 3

Derivation and analysis of approximate methods for the solution of nonlinear equations, interpolation and integration of functions, and techniques for the solution of systems of linear equations and for approximating solutions of elementary differential equations. Emphasis is placed on obtaining an intuitive understanding of both the problem at hand and the numerical method used to solve it. Prerequisites: MA 201, MA 244, and CS 121.

MA 420 - INTERM DIFFERENTIAL EQUATIONS
Semester Hours: 3

This is a second course in differential equations. Course topics include series solutions for second order differential equations and the method of Frobenious; eigenvalue and eigenvector methods for solving systems of linear first order equations; the qualitative theory of nonlinear equations; boundary value problems and the Sturm-Liouville theory. Prerequisites: MA 201, MA 244 and MA 238.

MA 433 - INTRODUCTION TO GEOMETRY
Semester Hours: 3

Axiomatic development of geometry, introduction to non-Euclidean geometries with emphasis in elliptic and hyperbolic geometries, selected topics in Euclidean geometry. Prerequisites: MA 244 and MA 330.

MA 442 - ALGEBRAIC STRUCTURES W/APPLIC
Semester Hours: 3

Mappings, binary operations, equivalence relations, groups and subgroups, Lagrange's theorem, homomorphisms and isomorphisms, normal subgroups and quotient groups, rings, fields, ordered integral domains, fields of quotients, error correcting codes, linear codes, and decoding. Prerequisites: MA 244 and either MA 330 or 385.

MA 450 - COMBINATORIAL ENUMERATION
Semester Hours: 3

Counting, pigeonhole principle, permutations and combinations, generating functions, principle of inclusion and exclusion, Polya's theory of counting. Prerequisite: MA 385 or MA 442 (with concurrency).

MA 452 - INTRO TO REAL ANALYSIS
Semester Hours: 3

Sequences, limits, continuity, differentiation of functions of one real variable, Riemann integration, uniform convergence, sequences and series of functions, power series, and Taylor series. Prerequisites: MA 330.
MA 453 - INTRO TO COMPLEX ANALYSIS
Semester Hours: 3

Complex algebra, analytic functions, Cauchy-Riemann equations, exponential, trigonometric, and logarithmic functions, integration, Cauchy integral theorem, Morera's theorem, Liouville's theorem, maximum modulus theorem, residue theory, Taylor and Laurent series, and applications. Prerequisites: MA 201 and one MA course at 300 level or above.

MA 456 - METHODS OF PARTIAL DIFF EQUA
Semester Hours: 3

Survey of theory and methods for solving elementary partial differential equations. Topics include first-order equations and the method of characteristics, second-order equations, reduction to canonical form, the wave equation, the heat equation, Laplace's equation, separation of variables, and Fourier series. Prerequisites: MA 238 and MA 244.

MA 458 - APPLIED LINEAR ALGEBRA
Semester Hours: 3

Fundamental concepts of linear algebra are developed with emphasis on real and complex vector spaces, linear transformations, and matrices. Systems of equations, inverses of matrices, determinants, vector spaces, linear transformations, eigenvalues and eigenvectors, normal matrices, canonical forms of matrices, applications of systems of linear differential equations, and use of computer software such as MATLAB. Prerequisites: MA 238 and MA 244.

MA 460 - INTRO FOURIER ANALYSIS
Semester Hours: 3

Brief development of trigonometric and exponential Fourier series, derivation of the classical Fourier transform from series, classical properties of Fourier transforms, transforms of functions, convolution, elementary development of the delta function, transforms of periodic functions, use of transforms to solve systems, introduction to the discrete transform and/or multidimensional transforms, as time permits. Prerequisites: MA 238 and MA 244.

MA 465 - INTRO TO MATH MODELING
Semester Hours: 3

Applying mathematics by formulating, analyzing, and criticizing mathematical models of various phenomena. Examples will be chosen from the physical, biological, and social sciences. Emphasizes development and use of simple mathematical models by having student study general modeling principles and case studies (some open-ended) drawn from various sources. Prerequisites: MA 201, MA 238, and MA 244.

MA 487 - INTRO TO MATH STATISTICS
Semester Hours: 3

This is an introductory, calculus-based course in mathematical statistics. Topics include a review of basic probability, including probability spaces, independence, distributions and expected value; the fundamental theorems of probability, including the law of large numbers and the central limit theorem; estimation, including point estimation and interval estimates for means, variances, and proportions; hypothesis testing, including tests for means, variance, and goodness of fit; an introduction to correlation and regression; theory of inference, including sufficiency and power. Prerequisites: MA 201 and either MA 385 or ISE 390.

MA 490 - SEL TOP UNDERGRAD MATH
Semester Hours: 1-3

Requested undergraduate topics. Approval of instructor required.

MA 499 - MATHEMATICS PROJECT
Semester Hour: 1

Individualized special projects in mathematics and its applications for superior undergraduate students. No credit is allowed toward a major or minor in mathematics. S/U grading. Approval of department chair and instructor required.

Mathematical Sciences, BS - Concentration I

Mathematical Sciences, Concentration I, BS Requirements:

- Mathematical Sciences, Concentration I, BS degree requires 128 credit hours.
- 39 of 128 credit hours must be taken at 300 level or higher (39 credits includes courses taken at the 300+ level in major, minor (if chosen), Pre-professional area and electives).
- 12 credit hours of 300 level and above must be taken in the major or 6 credit hours in the major and 6 credit hours in the minor (if chosen).
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- Unless otherwise noted a C- or better is required for all College of Science prerequisite courses.
- No more than 64 credit hours from a two-year college can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

**Elective Courses**

Elective courses. 12 credits of the 35 elective credits must be taken at the 300+ level or higher.

**Total Semester Hours**

1 Students must take one literature and one history course. Students must also take either a second literature or history course to complete a sequence. (EH 207 + EH 208, EH 209 + EH 210, EH 242 + EH 208, EH 242 + EH 210, HY 103 + HY 104, or HY 221 + HY 222)

2 Based on Math placement, (http://www.uah.edu/science/departments/math/undergraduate-students/placement) prerequisite MA 112 and/or MA 113 Mathematics courses may be required.
No more than 6 credit hours can be taken in a single discipline.

For choices see the World Languages and Cultures (http://catalog.uah.edu/undergrad/colleges-departments/arts-humanities-social-sciences/foreign-languages-literatures) department.

Mathematical Sciences, BS or BA - Concentration I
This concentration leads to a B.S. or B.A. degree with a major in mathematics, and is appropriate for students planning careers in industry or graduate study in mathematics.

The minimum requirement for a B.S. degree is 128 credit hours. See: Academic Policies and Procedures (p. 806).

**Required Ancillary Courses for All Concentrations**

| CM 113 | Intro to Rhetorical Communication | 3 |
| EH 301 | TECHNICAL WRITING | 3 |
| CS 102 | INTRO TO C PROGRAMMING | 3 |
| CS 121 | COMPUTER SCIENCE I | 3 |
| PH 111 & PH 114 | GEN PHYSICS W/CALCULUS I and GENERAL PHYSICS LAB I | 4 |
| PH 112 & PH 115 | GEN PHYSICS W/CALC II and GENERAL PHYSICS LAB II | 4 |

**Required Courses**

| MA 238 | APPL DIFFERENTIAL EQUATIONS | 3 |
| MA 442 | ALGEBRAIC STRUCTURES W/APPLIC | 3 |
| MA 452 | INTRO TO REAL ANALYSIS | 3 |
| MA 465 | INTRO TO MATH MODELING | 3 |

Three mathematics courses at the 300 level or above

**Total Semester Hours**

103

1 Courses required for all concentrations in the major.
2 Only MA courses numbered 171 or above may be included in a mathematics major, and an overall average of C is required for all UAH MA or ST courses that are included in a mathematics major. Information on other MA course requirements is given in Concentrations I, II, and III below. Students who think that substitutions in those concentrations can produce a program better suited to their needs should consult their faculty advisor about the feasibility of such substitutions. All MA electives must be approved by the student's faculty advisor prior to registering for the courses. All majors in mathematics must satisfy the appropriate (B.S. or B.A.) Charger Foundation and degree requirements.
3 Students majoring in other academic areas who wish to obtain a more solid background in mathematics than is provided by a minor may pursue a second major in mathematics rather than a minor in mathematics. Concentration III is specifically designed for such students.
4 The MA electives must be pre-approved by the student's mathematics advisor. The Charger Foundations are outlined here (p. 36).

**Mathematical Sciences, Secondary Education, BS**

Mathematical Sciences, Secondary Education, Concentration II, BS Requirements:

- Mathematical Sciences, Secondary Education, Concentration II, BS degree requires 131 credit hours.
- 39 credit hours must be taken at 300 level or higher (39 credits includes courses taken at the 300+ level in major, minor (if chosen), Pre professional area and electives).
- 12 credit hours of 300 level and above must be taken in the major or 6 credit hours in the major and 6 credit hours in the minor (if chosen).
- 12 of the last 18 credit hours must be taken at UAH, with an overall 25% of coursework taken at UAH.
- Unless otherwise noted a C- or better is required for all College of Science prerequisite courses.
- No more than 64 credit hours from a two-year college can be applied toward a UAH degree.
- For graduation application instructions, see here (p. 806).

This concentration leads to a B.S. degree with a major in Mathematics, and meets the requirements for an Alabama Class B Middle/Junior High School Teacher's Certificate or an Alabama Class B High School Teacher's Certificate.
## Degree Requirements

### Freshman Composition
- EH 101 COLLEGE WRITING I
- EH 102 COLLEGE WRITING II
