

Master of Business Administration, MBA

For additional information about graduate programs within the College of Business, please contact the Director of Graduate Programs, Jennifer Pettitt, at GradBiz@uah.edu (gradbiz@uah.edu). Information about the application process may be found in the Admissions section of the Graduate catalog.

Purpose

The Master of Business Administration (MBA) program is designed as a general management graduate degree, offering a unique *management of technology* theme. The educational emphasis of the program builds upon knowledge and skills in all of the business disciplines to prepare students for careers in organizations that face opportunities and challenges afforded by technological change.

The MBA program was fashioned to be an interdisciplinary program in business for practicing administrators, primarily for early- and mid-career managers. The typical student aspires to managerial positions. The curriculum is designed to accommodate students from engineering, science, the liberal arts and other non-business backgrounds. Students in this program typically have five to fifteen years of full-time work experience. They aspire to upward career mobility or are seeking to change career paths.

The MBA program emphasizes the development of integrative systems thinking skills in order to build capable, creative managers able to face successfully both external challenges such as rapid technological change and increasing environmental complexities, and internal issues such as changing employee expectations and methods of increasing productivity.

The program orients students to the rigors of holistic thinking about technology-driven problems and opportunities, introduces students to concepts and tools from all the business disciplines to operate in a technological environment, and instills a commitment to teamwork. The curriculum provides instruction in financial reporting, analysis and markets; domestic and global economic environments of organizations; creation and distribution of goods and services; and human behavior in organizations. It provides advanced study in decision science and human aspects of organizational problem-solving. It provides education in managing technological innovations and processes, and integrating technology into the organization's strategic objectives. It addresses such issues as analyzing problems through economic and financial frameworks, developing and using information systems, providing information on accounting costs, marketing, managing the development of technology, reducing new product development time, managing technical professionals, and integrating technology into the overall strategic objectives of the organization.

Degree Requirements

Program Prerequisites

- (1) written and oral English communications
- (2) quantitative analysis/statistics
- (3) computer proficiency achieved either through prior experience and education or as part of the student's MBA program of study

Program Foundation Courses

The MBA curriculum includes a group of six courses (18 credit hours) that serves as the program foundation. A student's transcripts will be evaluated by the Director of Graduate Programs to determine if any of these courses can be waived.

Code	Title	Semester Hours
ACC 600	FOUNDATIONS ACC MANAGERS & ENG	3

Thesis: 6 Semester Hours		
Select 3 semester hours of graduate electives		
Plan II:		
Select 9 semester hours of graduate electives		
<hr/> Total Semester Hours		33

¹MGT 698, Strategic Management, is the capstone course and should be taken toward the end of the student's program. A student must earn a grade of B or better in MGT 698.

Electives Area

MBA students take nine semester hours of graduate electives consistent with their professional development aspirations. Sample areas of study available are accounting, cybersecurity, information systems, finance, human resource management, business analytics, federal contracting and procurement, engineering management, or supply chain and logistics management.

MBA Thesis Option

MBA students interested in research may choose to pursue a thesis. Students who choose to pursue a thesis, substitute six semester hours of electives with six thesis hours.
